JANUARY 21 TO FEBRUARY 14, 1918.

PAGES 1071 TO 2132.

Congressional Record.

PROCEEDINGS AND DEBATES OF THE SIXTY-FIFTH CONGRESS
SECOND SESSION.

SENATE.

MONDAY, *January 21, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we seek by prayer and supplication to fit ourselves for the solemn responsibilities and duties of this day. As we draw from Thee the inspiration and strength we shall measure up to the duties that are now upon us. Give us the Divine guidance that we may have gentleness and grace of spirit, understanding of the great issues of the day, and an appreciation of the responsibilities of this hour, that we may do all things according to Thy will for the peace and happiness of a great Nation. For Christ's sake. Amen.

The Journal of the proceedings of Friday last was read and approved.

Mr. GALLINGER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beckham	James	Norris	Smith, Mich.
Calder	Johnson, Cal.	Overman	Smoot
Chamberlain	Johnson, S. D.	Owen	Sterling
Colt	Kellogg	Penrose	Stone
Culberson	King	Phelan	Swanson
Curtis	Kirby	Poindexter	Thomas
Dillingham	Knox	Robinson	Tillman
Fernald	Lewis	Shafroth	Trammell
Fletcher	McCumber	Sheppard	Wadsworth
France	McKellar	Sherman	Warren
Frelinghuysen	McLean	Shields	Watson
Gallinger	McNary	Simmons	Williams
Gronna	Martin	Smith, Ariz.	Wolcott
Hale	Nelson	Smith, Ga.	
Hitchcock	New	Smith, Md.	

Mr. WOLCOTT. I wish to announce that my colleague [Mr. SAULSBURY] is detained at home by illness. I wish that this announcement may stand for the day.

Mr. LEWIS. I announce the absence of the Senator from Missouri [Mr. REED], the Senator from Mississippi [Mr. VARDAMAN], the Senator from New Mexico [Mr. JONES], and the Senator from Massachusetts [Mr. LODGE], detained on official business in the Committee on Manufactures. I also announce that the Senator from Kansas [Mr. THOMPSON] is detained on important public business.

The PRESIDING OFFICER (Mr. SWANSON in the chair). Fifty-eight Senators have answered to their names. There is a quorum present. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by G. F. Turner, one of its clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 195) providing for the sale of the coal and asphalt deposits in the segregated mineral land in the Choctaw and Chickasaw Nations, Okla.

The message also announced that the House disagrees to the amendments of the Senate to the joint resolution (H. J. Res. 174) for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CHARLES B. SMITH, Mr. CROSSER, and Mr. NOLAN managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 7697. An act to authorize the calling into the service of the United States the militia and other locally created armed forces in the Philippine Islands, and for other purposes; and

H. R. 6176. An act extending the time for the construction of a bridge across the Monongahela River at or near the city of Fairmont, W. Va.

PETITIONS AND MEMORIALS.

Mr. STERLING. I send to the desk a resolution adopted by the Farmers' Equity Union of South Dakota, relative to a survey of the power possibilities of the Missouri River, which I ask may be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD as follows:

Resolved, That we urgently request the South Dakota delegation in Congress to use its best efforts to secure provision from the present Congress for the comprehensive survey of the power possibilities of the Missouri River between the forty-third and forty-seventh degrees of north latitude.

Mr. KNOX presented a memorial of the Select and Common Councils of Philadelphia, Pa., remonstrating against the abolishment of the pneumatic mail tubes in that city, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Rotary Club, of Chester, Pa., praying for the enactment of legislation providing for universal military training, which was referred to the Committee on Military Affairs.

He also presented a petition of Erie Chapter, No. 253, American Insurance Union, of Erie, Pa., praying for the enactment of legislation for the repair, preservation, care, and future maintenance of the restored naval brig *Niagara*, Commodore Oliver Hazard Perry's flagship in the Battle of Lake Erie, which was referred to the Committee on Naval Affairs.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Oregon praying for the enactment of legislation authorizing the return to this country and burial here of the bodies of our soldier dead, which was referred to the Committee on Military Affairs.

Mr. CURTIS presented a petition of the Commercial Club of Hutchinson, Kans., praying for the enactment of legislation providing for universal military training, which was referred to the Committee on Military Affairs.

Mr. WARREN presented a memorial of the Upper Green River Valley Cattle Growers' Association, of Cora, Wyo., remonstrating against the proposed extension of the Yellowstone National Park, which was referred to the Committee on Public Lands.

He also presented a petition of the Garrison Army and Navy Union, of Cheyenne, Wyo., praying for the repair, preservation, and care of the naval brig *Niagara*, which was referred to the Committee on Naval Affairs.

He also presented a petition of the Wyoming State Council of National Defense, praying for the enactment of legislation granting the franking privilege to State councils of defense, which was referred to the Committee on Post Offices and Post Roads.

Mr. PHELAN presented resolutions adopted by the Board of Supervisors of Orange County, Cal., favoring the formulation of a plan for flood control and the conservation of water upon the Santa Ana River and its tributaries, which were referred to the Committee on Commerce.

He also presented a petition of the Santa Barbara County Chamber of Commerce, of California, praying for the construction of the proposed military highway from Blaine, Wash., to San Diego, Cal., which was referred to the Committee on Military Affairs.

Mr. JONES of Washington presented a petition of the Pacific County Council of Defense of the State of Washington, praying for the enactment of legislation relative to the drafting of alien foreigners, etc., which was referred to the Committee on Foreign Relations.

331618

LOCAL HOUSING SITUATION.

Mr. THOMAS. Mr. President, on Friday last I took occasion, when the bill in charge of the Senator from Florida [Mr. FLETCHER] was under consideration, to say something about the local conditions in the city of Washington and to suggest that appropriate legislation seemed to me to be very desirable regarding those subjects. Since then I have received some interesting and vigorous correspondence. I send to the desk and ask that the Secretary may read the following letter.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

CITY RENTAL BUREAU,
Washington, D. C., January 19, 1918.

Senator CHARLES SPALDING THOMAS,
United States Senate, Washington, D. C.

DEAR SIR: This afternoon's Star quotes you as saying that "great unscrupulousness, avarice, and extortion seem to be a common practice in this city, with here and there a few honorable exceptions," etc., etc.

As a citizen of the District of Columbia of 30 years' standing, I regret to say to you that you seem to belong to the plain, ordinary garden variety of damn fools. The charges that you have made in the Senate against the people of Washington are grossly false, grossly libelous, and I am unable to find in the English language sufficient adjectives to express my opinion of a United States Senator who would deliberately and willfully make such charges.

You evidently know no more about what you are talking than your party knows about the handling of the coal situation or shipping situation, or any situation which has become confusion worse confounded by the stupid muddling imbecility of the Democratic Party.

When you say that the people of the city of Washington are unscrupulous, you lie. When you say that avarice and extortion are a common practice in this city, you lie again.

I notice by the Congressional Directory that your term of office does not expire until March 3, 1921, and by that time, thank God, you and your party will be relegated to the obscurity of which you and they belong.

If you know of any cases of extortion and avarice, why don't you act like a man and mention the cases, and not indict the people of an entire city as you, in your ignorance, have done.

I have the honor to be, sir,

Very truly, yours, E. W. PIERCE, *Manager.*

Mr. THOMAS. Mr. President, the letter just read is dispassionate, impersonal, and nonpartisan, but it is not convincing.

Mr. GALLINGER. Will the Senator first let us know what this man manages?

Mr. THOMAS. He manages, I think, what is called the City Rental Bureau. I am disposed to conclude from the somewhat perverted character of this gentleman's English that he is one of the hit birds that flutters, and if so, my remarks were not entirely devoid of results. He very properly, however, inquires if I know of any specific instances of extortion why they are not furnished. There are so many of them which have come to my attention that it is impossible to do so at this time.

It may be that I have subjected myself to a part, at least, of this gentleman's rather vigorous criticism in that I confined what I had to say very largely to the people of the District of Columbia. My personal information is that wherever there is an undue congestion of people caused by this war in any part of the United States the resultant conditions are practically what they are here, and consequently the indictment, if I may so term it, which, in a general way, I made the other day was greatly circumscribed by applying it merely to the city of Washington.

I have, on the other hand, Mr. President, received a large number of letters commendatory of the information or the remarks in which I indulged the other day, and with the permission of the Senate I will read two of the shorter ones. One is from a young officer in the United States Army. He says:

DEAR SENATOR: I wish to take the liberty of expressing an appreciation of the stand you are taking in the local housing situation. Young Army officers on the lowest salaried commissions are being compelled to spend $20 to $40 per month for a room in which to live. The writer has come here at some personal sacrifice, of course, to help. Efforts to find a respectable room are without result at any price, except at the hotels, where usual rates prevail.

I am afraid he has not been to some of the hotels—

The Government is making a great mistake in taking over apartment houses for office purposes. They are needed for housing the very men working in these offices. Certainly some rough, temporary buildings, like the Ordnance Building, should be constructed at once, with rooms at not over $12 per month. This is perfectly practical. While it is now perhaps too late to change the system—like much that has been done—it would be better to build temporary offices and use, so far as possible, the apartments for what they were designed to be used for.

Very respectfully, yours,

V. A. MATTESON.

The other is dated January 19, and is from one of the Government employees living in the city:

MY DEAR SIR: I am pleased to note from this morning's paper that it is your intention to secure some legislation regarding the housing and living problem in the District. It seems to me there is more reason for a rise in the price of foods than in living quarters, and the real estate people and residents have become the worst of leeches.

I again say, Mr. President, that there are some honorable exceptions—

For instance, last evening one woman was telling of another woman, friend of hers, who had rented an apartment for $65. She was subletting it for $250 without furnishing any linens. A cousin of hers was renting all her rooms and then letting the first or basement floor for $45 to some Army officers, and they were furnishing their own cots. Another instance I know of personally: Four girls who had come here to work for the Government and were receiving salaries ranging from $900 to $1,200 had rented a furnished four-room apartment and were getting their own meals in order to cut expenses; they were paying $70 for the apartment. The person they were renting from came to them and said her friends had told her she was crazy to rent her apartment so cheap, and she would have to have $100 for it; they pleaded with her to allow them to keep it, and she finally agreed to let them remain for $80 per month, but three days after told them she would have to have the apartment, as she was going to rent it for $150.

The District people are not doing their patriotic duty in trying to help the war workers, but it seems they all feel they are entitled to live off the Government because they live in the District, and if all the family haven't Government jobs they feel entitled to take it away from the Government clerks. Only last week two girls told me they had had their rent raised $10 per month, and the owner told them that Congress was going to raise their salary. They begin taking "their share" before we even get ours. We were given a 5 per cent increase this year, and I am now paying $10 per month more for board than I paid last year, which is twice as much as the increase I received.

The real estate men—one company I know of—raised the price of all the two-room apartments a lady had who is making her living keeping boarders, while the families living in the same apartment they raised one with a four-room apartment $2.50 per month, while the woman I refer to he raised $7.50 on the same size apartment; on the two-room apartment he raised her $5, and a man and his wife who had one two-room apartment they did not raise at all. He told the woman who was keeping boarders to "take her slice while everyone else was," and expected her to raise her boarders accordingly, and, of course, he knew most of her people were working for the Government.

It seems to me that if a law was passed allowing people to charge no more than 15 per cent to 25 per cent on the amount they had invested in a house, in addition to the rent they pay would be fair compensation. No one expects to replace their furniture every four years, and at 25 per cent the cost of the furniture would be paid for in four years. As it is, some of them are making from 150 to 600 or 700 per cent. What other business could they do it in? One thing that has made it so hard for Government clerks is the fact that so many people of means have come here, some from necessity, others "just to be here," and are willing to pay any kind of price for things they want, and other people hearing of the exorbitant prices "their friends" are getting, immediately begin to boost their prices. I think when a number of the present Government clerks return home it will be with the idea that Washington has made enough out of them to pay their own taxes for some time to come.

Please pardon this long letter, but I only wanted to add a few facts to those you already have and wish for you success in a just cause.

(Miss) ELLA UNDERWOOD.

I shall not take up the time of the Senate any further this morning, Mr. President, in regard to this subject except to say that the insistent needs of the average wage earner here and those of the officers and soldiers of the United States Army—the officers particularly—make it impossible for them to meet existing conditions of living in the District. As a consequence, it behooves the Congress of the United States, in self-defense, as it were, to enact, if possible, some legislation which will cover this difficulty without at the same time inflicting undue injustice.

Mr. PHELAN. Mr. President, I am disposed to move to expunge that very offensive letter from the RECORD because it is an unwarranted reflection upon the Senator from Colorado [Mr. THOMAS] and on the Senate itself. At this time, if the Chair will permit me, while the country is at war and there has been such a magnificent spirit shown by the men of the country in volunteering their services, it is well to comment not only upon those who are engaged in profiteering, but also upon those who are volunteering their services gratuitously. I have in my hand a letter dated San Francisco and addressed to the Secretary of the Navy, which I shall read in order that it may be spread upon the RECORD. It is as follows:

SAN FRANCISCO BAR PILOTS,
San Francisco, Cal., November 28, 1917.

Hon. JOSEPHUS DANIELS,
Secretary of the Navy, Washington, D. C.

SIR: The undersigned San Francisco bar pilots have since the commencement of the war with the Imperial German Government furnished their services to vessels of the United States Navy free of charge. At the beginning of the war we verbally volunteered to render such services during its continuance. It is our impression that there is no formal record in your department of this volunteering of our services, and we take this occasion to renew in writing the tender previously made. Whatever skill and experience and service we can give you are freely subject to your direction.

We are attaching a copy of the letter from the State board of pilot commissioners ratifying our action in the above connection.

Very faithfully submitted,

SAN FRANCISCO BAR PILOTS.

STATE BOARD OF PILOT COMMISSIONERS,
San Francisco, Cal., December 3, 1917.

Capt. JOHN W. WALLACE,
Port Agent, Bar Pilots, San Francisco, Cal.

DEAR SIR: At a regular meeting of the State board of pilot commissioners, Monday, November 5, 1917, it was resolved that the action of the San Francisco bar pilots since the war between the United States and central powers in giving free pilotage to vessels of the United States Navy Department meets with our approval. It is noted with pleasure

that the bar pilots inform the board that it is their intention to give free pilotage to the vessels of the United States Navy so long as the war continues.

Very truly, yours,

HUGH M. BURKE, *Secretary.*

In contrast, therefore, to what has been done in the city of Washington, I think it is timely that a record of this kind be made.

The PRESIDING OFFICER. Does the Senator make a motion to expunge from the RECORD the letter which has been submitted by the Senator from Colorado?

Mr. PHELAN. I make that motion.

Mr. THOMAS. I offered the letter, and I have no desire to have it expunged from the RECORD.

Mr. PHELAN. If the Senator has no desire to have the letter expunged, but simply does not accept the sentiments uttered by the writer—for he has already answered them—I withdraw the motion.

Mr. THOMAS. I am not in the situation of offering this letter for the RECORD and then asking to have it expunged.

Mr. PHELAN. I thought I would save the Senator, on account of any delicacy which he might feel, from asking that the letter be expunged after he had informed the Senate of its contents. If there be no disposition to press it, I withdraw the motion.

Mr. PENROSE. Mr. President——

Mr. THOMAS. I appreciate the motive which actuates my friend the Senator from California [Mr. PHELAN], but I do not want the letter expunged.

Mr. PENROSE. Mr. President, I only want to observe that in the reading of the elegant epistle which was read at the request of the Senator from Colorado [Mr. THOMAS] I did not notice any reflection on the Senate, but the criticism seems to be devoted to the Democratic majority in the Senate.

Mr. THOMAS. Exactly so, Mr. President; and I am the only sinner.

ORDER OF FUEL ADMINISTRATOR.

Mr. McKELLAR. I present certain telegrams, which I ask to have printed in the RECORD without reading.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

CHICAGO, ILL., *January 17, 1918.*

Senator K. D. McKELLAR,
Washington, D. C.:

Fuel Administrator Garfield is certainly making a serious blunder in shutting down all industry on such short notice. It will bring intense demoralization and wide protest. By cutting off fuel supplies from all places of amusement and others not necessary to heat, shutting off half of the passenger-train service, and perhaps closing department stores at noon, great majority of industries can keep going. In all events, industries ought to be allowed to run as long as their present supply of coal lasts, and, if necessary, all fuel supplies consigned to factories can be diverted by Fuel Administrator for one week. I hope the Senate will insist upon deferring operation of the order for more mature consideration.

A. H. WOOD.

MEMPHIS, TENN., *January 17, 1918.*

Hon. K. D. McKELLAR,
United States Senate, Washington, D. C.:

If the order of Fuel Administrator for closing of industrial plants applies to laundries and becomes effective to-morrow will work a severe hardship not only to all concerns engaged in the laundry business but also to their thousands of employees. Laundries could not afford to pay their employees for practically a week's enforced idleness, and these thousands of men and women are necessarily dependent upon their week's wages for support. The hardship would also extend to the public in general whose bed and table linen and wearing apparel are now in the laundries in an unfinished state and which is impossible to assemble and return until completed. If the laundries are compelled to cease operation to-morrow, they will be unable to complete and return what they now have on hand and which, as you can well understand, is necessarily needed by their respective owners who could neither acquire new goods under the order nor could they afford to do so. This applies to individual families, soldiers encamped at aviation fields and cantonments, eleemosynary institutions such as the Y. M. C. A., asylums and hospitals, hotels and restaurants, and institutions in general dependent upon the public laundries. If the laundries are to be included in the order of Fuel Administrator, a modified order applying to them, beginning on next Monday and continuing in force on every Monday of each week thereafter for 10 weeks would help the situation. Is it possible for you to advise us definitely as to how this order applies to laundry industries?

LOEB'S LAUNDRY.

LOUISVILLE, KY., *January 18, 1918.*

Senator KENNETH McKELLAR,
Washington, D. C.:

Garfield's order, like taking over railroads, was sudden and drastic and will work some hardships, but production is now largely in excess of transportation and this order, in addition to conserving coal, will aid transportation both rail and ocean, and, in my opinion, should be loyally supported and observed by everyone; furthermore the President was given this authority by law and should be supported in his use of it while this law is in existence.

R. L. McKELLAR.

CHATTANOOGA, TENN., *January 19, 1918.*

Hon. K. D. McKELLAR,
United States Senate, Washington, D. C.:

Suggest change fuel order to allow six days business seven hours each for five days except Saturday.

W. F. FISHER & BROS. CO.

To the Hon. K. D. McKELLAR:

In order that the hands and the hearts of America's women may be freed from the fight against political inequality and devoted without reserve to war service, we respectfully and earnestly ask that you support the Federal suffrage amendment by your vote and your influence, and thus bring a speedy end to the more than 70 years of struggle.

H. C. TOLMAN AND OTHERS.

Mr. OVERMAN. I rarely ever ask for the publication of a telegram in the RECORD, but prompted by the nature of the telegrams that I hold in my hand, showing the spirit of my people with regard to the order issued by the Fuel Administrator, I send them to the desk and ask that they be read and printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Secretary read the telegrams, as follows:

DURHAM, N. C., *January 19, 1918.*

Hon. LEE S. OVERMAN,
Washington, D. C.:

The Durham Hosiery Mills Corporation, constituting a chain of 10 mills, 3 operated by steam and 7 by hydroelectric power, employing 3,500 hands, have shut down all of our plants, and paying our employees in full while the mills are standing patriotically complying with the request of the Fuel Administrator.

GEN. JULIAN S. CARR.

SCOTLAND NECK, N. C., *January 19, 1918.*

Hon. LEE S. OVERMAN,
Washington, D. C.:

We stand squarely behind administration and favor heartily Garfield's order; no sacrifice too great now.

CHARLES J. SHIELDS.

Mr. GALLINGER. I present two very important telegrams relating to the fuel order and its disastrous effects upon the workingmen of New Hampshire. I will not ask to have them read, but simply ask that they be printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

MANCHESTER, N. H., *January 18, 1918.*

Hon. JACOB H. GALLINGER,
United States Senate, Washington, D. C.

DEAR SIR: We all appreciate your efforts to have the drastic order of the Fuel Administration modified. This morning's papers announce that the General Electric Co. at Lynn are to be allowed to run because they have large war orders to fill and have an abundant supply of fuel. The Amoskeag Co. is in exactly the same position, with the additional fact that our fuel consists largely of fine culm and screenings, which can only be burned in specially fitted furnaces, and is, so far as I know, of no use to anyone else in New Hampshire. We have 16,000 horsepower of water running to waste while we are shut down. We can no more utilize this with the steam plant stopped than we could run an automobile on two wheels. Consequently we are practically running 80 tons of coal a day down the river during this enforced stopping. I suppose many other concerns are similarly situated. Can not something be done to check this enormous useless loss and waste caused by this order at a time when all our resources should be conserved if possible?

Respectfully, yours,

H. F. STRAW,
Agent Amoskeag Manufacturing Co.

NASHUA, N. H., *January 18, 1918.*

Hon. JACOB H. GALLINGER,
United States Senate, Washington, D. C.:

Resolved by the New Hampshire Manufacturers' Association, at a special meeting held this day at Nashua, at which all the leading industries were represented by executive officers, that the drastic order of the Federal Fuel Administrator is a most serious injury to the State and should be immediately rescinded or modified, unless national conditions forbid, so that all industries should be permitted to resume regular operations next Monday morning.

NEW HAMPSHIRE MANUFACTURERS' ASSOCIATION,
W. L. CARTER, *Chairman.*

Mr. SHERMAN. I have received a very large number of telegrams, four of which I have selected, and which I ask to have printed in the RECORD without reading.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

CHICAGO, ILL., *January 17, 1918.*

Hon. L. Y. SHERMAN,
Senate Chamber, Washington, D. C.:

In our opinion order of Fuel Administrator Garfield is a national calamity. It stops wages of hundreds of thousands of workmen, wastes millions of capital, and stops and disarranges production. Production only can win this war. Chicago dealers expressed opinion that majority of Chicago industries could have been kept running if left free hand.

R. R. DONELLEY & SONS CO.

SPRINGFIELD, ILL., *January 17, 1918.*

Senator LAWRENCE Y. SHERMAN,
Washington, D. C.:

Hundreds of miners in Illinois coal fields are either working short time or not at all on account of lack of coal cars. Authorities estimate capacity of Springfield mines has been curtailed average of 1,000 tons a day account of shortage of cars. In face of this deplorable situation Garfield's order inflicts further industrial chaos. Operation of every

industry in Illinois coal fields to limit of their capacity would not delay shipment of a single car of coal. If the theory is that everyone is to be made to suffer alike, why exempt everything west of Mississippi River and those using water power. Our suggestion is that railroad transportation be limited to coal and necessary commodities and that passenger traffic be limited to necessary purposes. Release of a few million box and flat cars and many locomotives for coal carrying purposes ought to furnish immediate fuel relief. We respectfully urge your support of any movement, first, to abrogate Garfield's order unless demonstrated clearly necessary; second, to permit use of fuel where supplied exclusively by wagon delivery from the mines; third, for postponement of Garfield order until business can adjust itself to the prospect.

THOMAS REES,
The Illinois State Register.
J. DAVID STERN,
Springfield News-Record.
LEWIS R. MINER,
Illinois State Journal.

—

SPRINGFIELD, ILL., *January 17, 1918.*

Hon. LAWRENCE Y. SHERMAN,
Washington, D. C.:

At a meeting held this morning of members of the Commercial Association, representing the leading coal mines, manufacturers, and other industrial interests of the city, it was unanimously agreed that all present would endeavor to carry out in the fullest possible measure the fuel order issued to-day by the National Fuel Administration, and a resolution was passed and will be published in the daily papers urging all citizens of the county to do likewise. The commercial association desires, however, to go on record as protesting most emphatically against the discrimination shown of limiting this fuel conservation order to that part of the United States east of the Mississippi River. It seems to us only fair that the order should be extended to the entire continental United States. Your support in this position is earnestly requested.

THE SPRINGFIELD COMMERCIAL ASSOCIATION.
A. H. McCREERY, President.

Attest:

W. H. CONKLING, *Secretary.*

—

CHICAGO, ILL., *January 17, 1918.*

Hon. LAWRENCE Y. SHERMAN,
Washington, D. C.:

The subjoined telegram was sent to President Wilson to-day:

To the PRESIDENT:

The directors of the Illinois Manufacturers' Association in meeting assembled respectfully urge that you so modify the order of the Fuel Administrator, effective January 18, 1918, as to permit the operation of all industries affected to 50 per cent of their normal capacity during the five days named in the order. Such a modification will enable the plant owner to maintain his organization and will reduce by one-half the pecuniary loss of the wage earners. We urge also immediate action to increase production at the mines and the clearing of the transportation lines by an embargo on all shipments except food and fuel for a week, if necessary. Suppression of energy, curtailment of all manufacturing industry, and prevention of opportunity arbitrarily will work incalculable injury.

Illinois Manufacturers' Association; D. E. Felt, first vice president; Wm. Nelson Pelouze, second vice president; Paul Schulz; Geo. R. Meyercord; S. M. Hastings, director; Herman H. Hettler, director; P. S. Theurer, treasurer; Colin C. H. Fyffe, general counsel; John M. Glenn, secretary.

Mr. SMITH of Georgia. I send to the desk certain telegrams that I desire to have read.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

JACKSONVILLE, FLA., *January 17, 1918.*

Hon. HOKE SMITH,
United States Senate, Washington, D. C.:

Referring to Fuel Administrator's order that industries will not be allowed to use fuel January 18 to 22, inclusive, and each Monday thereafter until March 25, Florida Fuel Administrator construes this order applies to sawmills and wood-working plants that use waste material for fuel, and unless modified they will not be allowed to continue to operate during that period. This ruling will undoubtedly be made by Fuel Administrator in Georgia as well and manufacturers in your State, who are members of this association, will be seriously inconvenienced. We submit that there will be not only no conservation of fuel by forcing sawmills and woodworking plants that use their own waste for fuel to shut down, but fuel supply will be reduced by closing these plants if order is to apply to sawmills and woodworking plants. Please have modified. Will appreciate immediate reply at our expense.

GEORGIA-FLORIDA SAWMILL ASSOCIATION,
By E. C. HARRELL, *Secretary.*

Mr. SMITH of Georgia. Mr. President, before the other telegrams are read, I desire to state that I was compelled to advise this association that Fuel Administrator Garfield only excepted from his order those sawmill plants, the list of which was given by the Shipping Board, as being mills furnishing lumber for ship manufacturing.

The PRESIDING OFFICER. The three other telegrams presented by the Senator from Georgia will be read.

The Secretary read the telegrams, as follows:

WAYCROSS, GA., *January 18, 1918.*

Hon. HOKE SMITH,
United States Senate, Washington, D. C.:

Does Fuel Administrator's ruling apply to our plant? We use sawdust and waste accumulated at our plant for fuel to make power. In fact, we give away and sell wood to the public. We use no coal at all. Answer.

ENTERPRISE LUMBER CO.

BAINBRIDGE, GA., *January 18, 1918.*

Hon. HOKE SMITH,
United States Senate, Washington, D. C.:

Get ruling and wire, our expense, if will have to close mill. Manufacturing fruit and vegetable packages, also Government quartermaster boxes. Using refuse waste, sawdust, shavings, and bark from manufactured product. We do not buy, use, or burn any coal. Foodstuff will be lost if we close mill.

ELBERTA CRATE CO.

—

MARIETTA, GA., *January 18, 1918.*

Hon. HOKE SMITH,
Washington, D. C.:

Is there no way by which we can get exempted from Fuel Administrator's instruction? Reason for exemption is we produce more fuel when running than we consume. Closing down increases coal consumption 6 or 8 tons per day. Can get no satisfaction from parties here. Please wire.

BRUMBY CHAIR CO.,
Per T. M. BRUMBY, Jr.

Mr. SMITH of Georgia. Mr. President, I wish to express the hope that even yet enterprises such as are described in the telegrams I have had read may not be interfered with by the fuel order where they produce more fuel than they consume or where they use no coal, and where their by-product in many instances furnishes the fuel for the community. We know we need lumber; we know we have been short of lumber; we know that in providing for our troops we have been forced to use duck and tents, instead of lumber and houses. While I sympathize thoroughly with the desire to furnish coal where it is needed, it is the universality of the order, its failure to discriminate, that causes me to hope that further exceptions will be made.

Mr. FLETCHER. Mr. President, I have a number of telegrams practically to the same effect as those submitted by the Senator from Georgia [Mr. SMITH]. I will not ask to have them read into the RECORD, as they present the same or similar questions.

I think perhaps one reason why the order has been made to apply to such plants is not because they consume coal or coke—and undoubtedly beyond that the order is rather advisory than mandatory—but the main question is the question of transportation.

The suggestion is further made by a number of people in that portion of the country that this order arises by reason of congestion principally in the Northeast and in north Atlantic ports, and that that difficulty might have been avoided and might still be relieved very extensively if the deep-water ports of the south Atlantic and Gulf were made use of. The terminals in that portion of the country are not congested; they are not overcrowded; they are not used to the extent to which they might be used, and if those facilities were made use of it would undoubtedly have a tendency to relieve the congestion in the Northeast and in the north Atlantic ports. There are ample terminals and facilities at deep-water ports on the south Atlantic and no congestion. If they were availed of and traffic routed in that direction, it would undoubtedly tend to a solution of the transportation problem.

I will say further in regard to the telegrams from the Georgia and Florida Saw Mill Association and other telegrams of like nature that there is scarcely a sawmill, practically, that is not cutting material for shipbuilding purposes. It has been estimated, for instance, that the entire output of the mills is more than contracted for by the Emergency Fleet Corporation up to this time or is about to be contracted for, so that very likely that situation will relieve itself to a considerable extent. These mills undoubtedly are engaged in supplying material for the building of ships, and for that reason they will not likely be interfered with.

Mr. SMITH of Georgia. Mr. President, will the Senator let me ask him a question?

Mr. FLETCHER. Certainly.

Mr. SMITH of Georgia. Has the Senator been able to get a list of those establishments that have been notified they are relieved from the order? I am getting telegrams from mills which have been sawing lumber for the Government, but have been able to obtain no notice that they were relieved. A list has been made up of those sawmills which were to be relieved, but I have found none who have had notice their mills were on the list, some have probably been omitted inadventently. I feel almost authorized to telegraph them, "Go ahead, if you are doing Government work; for, if they have not relieved you, they mean to do so"; and yet I have hesitated, because I feel that whether we like or do not like an order issued at this time from an administrative agency, whether we approve or do not approve, as loyal soldiers we should obey the command while the command stands.

Mr. FLETCHER. I think the Senator's reply indicated in his statement regarding the first telegram presented by him perhaps fully covered the situation; that is to say, where the

mills are cutting material for the building of ships they would be exempt. I have not the list. The plan was to have what is known as the Yellow Pine Emergency Bureau enter into agreement with the Emergency Fleet Corporation to supply this lumber. The members of that bureau include the Southern Pine Lumber Association and the Georgia-Florida Sawmill Association; and the members of these associations, I take it, are all included in the list of mills that are furnishing material for shipbuilding purposes. The detailed list, I take it, can be furnished by the Emergency Fleet Corporation; but I believe that those two associations and others known as independents are centered in what is called the Yellow Pine Emergency Bureau, and the contracts are made with the Emergency Fleet Corporation by that bureau. There are mills not members of any association which have contracts for shipbuilding material and they would be exempted on application to the Emergency Fleet Corporation.

I agree with the Senator that the disposition, I think, will be found there, as it ought to be, in my judgment, throughout the country, to obey the orders that are issued. We are all soldiers, everyone of us, individually and collectively, and the first duty of a soldier is to obey orders. That spirit must prevail if we are to win this war; and that is our chief business now.

Mr. TILLMAN. Mr. President——

The VICE PRESIDENT. The Senator from South Carolina.

Mr. TILLMAN. I merely want to suggest to the Senator from Florida and the Senator from Georgia that it would be wise for Mr. Garfield, or somebody in authority, instead of picking this, that, and the other sawmill or plant and allowing it to run by special permit to issue a general order covering individual cases, and we would not then have the trouble of trying to telegraph to our constituents that they might run their plants. Let him establish a general rule covering classes, and then each owner of a plant could determine for himself whether to shut down or run.

Mr. SMITH of Georgia. Mr. President, just a word. Really none of these sawmills ought to be interfered with; there is no justification for it. They create fuel; they consume no fuel. We know that our country needs their product to conduct the war properly; we need more lumber, much more than is within reach, and it is a hindrance rather than a help to our preparedness to stop sawmills from operating.

I wish to say further that surely the fact that so many exceptions have been made and so many more ought to be made to the Garfield order is sufficient proof of the wisdom of the Senate in requesting that this order should be postponed for five days, so that the exceptions might be carefully studied and many of the plants that have been interfered with eliminated from its operation before the order went into effect.

Mr. TILLMAN. By a general rule.

Mr. SMITH of Georgia. I do not think we have any reason to feel that our advice was not wise advice.

COST OF OFFICERS' UNIFORMS.

Mr. JONES of Washington. Mr. President, I have received several letters in the nature of petitions with reference to the bill that I introduced a few days ago relating to officers' uniforms. I see that the chairman of the Military Affairs Committee is present, and I want to call to his attention and have inserted in the RECORD a few statements with reference to this matter.

I read just a brief extract from one letter from an officer who says:

> When I went to Plattsburg I had a modest bank account, which I now have not. I have already spent about $500, and after about one month in camp and repeated embarrassment, account of short equipment, I find that an expenditure of about $300 more is necessary. The officer who succeeded in keeping the figure at $500 was a very shrewd buyer, or bought poor stuff. My salary as a second lieutenant for the next three months is spent in advance.

Then I have a letter from the father of two sons who are officers in the Army, and he says this:

> I have two sons who are officers in the Army, one a captain and the other a lieutenant, and their salaries will not meet their requirements on this account.

Then he gives some facts which I ask to put in the RECORD without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

> Clothing that officers have had to buy here and at Camp Bowie, near Fort Worth, must have been at two or three times its worth or cost price from the manufacturer. Overcoats, I am told, that are furnished by the Government to privates at a cost of $9 have been sold by merchants at $49; and a first-class officer's overcoat, I am told, costs $90, when it should not cost over $35 or $40, if that much, even if made by a local tailor.

Mr. JONES of Washington. I have here a letter from an officer in charge of one of the quartermaster depots of the Army, a man high in rank and of splendid character, and I want to read what he says. Of course I can not give his name, but this is what he says:

> Overcoats which the Government makes for enlisted men can be purchased for $12.50. They are in every way satisfactory for most officers, yet dealers would charge from $55 to $60 for an overcoat no more suitable. Other articles are proportionately higher.
>
> This has been a great hardship on many young officers. Under instructions from the War Department, quartermasters were forbidden to sell them these overcoats.
>
> I would not be at all surprised, if the matter was investigated, it would be found that dealers handling these goods have a lobby in Washington.
>
> At the present time overcoats are plentiful in the Army.

This morning I received another letter from this same official, in which he says:

> I am sending you herewith list of clothing, showing prices fixed by the Government and those for which the same articles can be purchased from retailers.

I will say, in justice to the retailers of Washington City, that this does not refer to them. It relates to another place where these headquarters are located.

> Several retailers were visited by a man I sent out for the purpose. The prices at each place were practically the same, showing collusion amongst them. There is undoubtedly an association of retailers of military goods. Some of these prices have come down in the last two or three weeks. Overcoats were as high as $60, but as nearly all of the new officers have been obliged to buy one from them instead of being allowed to purchase from the Government, the demand being less, the price also is less. An order was received in this office yesterday which authorizes the sale of the articles shown on the list herewith to officers under orders for over-seas duties, except woolen uniforms. This relieves the situation somewhat, but the harm has already been done to a great extent. However, there will be a large number of new officers coming in in about two months. They should be supplied if possible.

Mr. President, this officer attaches to his letter a list showing the prices at which the different articles will be furnished by the Quartermaster Department and the prices asked by these retailers, which I ask may be inserted in the RECORD.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

List prices of clothing.

	Government.	Retailers
Belts, waist	$0.17	$0.50
Gloves, horsehide, yellow	1.25	3.50
Gloves, riding	1.75	5.00
Gloves, woolen, olive drab	.41	1.50
Cotton olive-drab uniforms:		
Breeches	1.19	4.00-5.00
Coats	1.65	10.00
Cotton and woolen underwear:		
Drawers, jean, summer	.30	1.50
Drawers, canton flannel, winter	.37	2.00
Drawers, wool, knit	1.03	2.50
Undershirts, cotton, summer	.35	.50
Undershirts, woolen, winter	1.00	2.50
Undershirts, woolen, light-weight	.56	2.00
Stockings, cotton	.10	.25
Stockings, woolen, heavy	.35	.50
Stockings, woolen, light	.25	.50
Shoes, russet	4.50	7.00-12.50
Shoes, field	3.69	7.50-12.50
Shirts, flannel, olive drab	3.03	5.00
Slickers	3.85	7.50
Overcoats, long	12.50	45.00
Olive-drab woolen uniforms:		
Breeches, Coats	7.69	35.00

Mr. JONES of Washington. Then I have a letter from another man who says:

> Am glad some one is looking after the officers' end of the uniform business, as we are certainly robbed. Why do they give a naval officer an allowance and not any other?—

I do not know whether that is correct or not. I understand that in the Navy they are given an allowance for uniforms—

> Here is the way I stand after three months out:
> Three months' pay, $425.
> Three months' mess, $97.
> Uniforms and equipment, $325.
> Payments on liberty bonds, $60.
> One month's insurance, $6.50 per month.
> Incidental expenses, $25.

As I figure that up it totals $513.50, or he is out over $100 more than he is receiving.

Then I have another extract from a letter from a captain in the Army. I ask that I may insert the part that I have indicated here without reading.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

> I have just read of your proposed bill regarding the uniforms of Army officers, with the contemplated control of such in respect to quality, value, and supply. Let me please say that the passage of any

such bill would be a godsend to the officers of our Army of to-day, who it seems are made a mark for increased prices everywhere.

Immediately after the War Department ordered the Quartermaster Department to stop selling clothing and equipment to all officers this act of the War Department became a signal for all private concerns to increase, and in many cases double, their prices on articles needed by such officers.

With the cessation of all opportunity to purchase from the Quartermaster there was no accompanying lowering of the requirements regarding such necessities as an officer must continually have, thus making it a necessity for the officer to buy wherever and whatever price at which he can.

There never has been any such injustice done to the officers of our Army as resulted from depriving them of the privilege of purchasing from the Quartermaster and using the Quartermaster's prices as competition against private dealers' prices.

Is there any reason why the cost of uniforms has hardly increased at all in England and Canada after nearly four years of war, while in this country the cost has nearly doubled and the quality of the cloth is only half what it was formerly?

Again, is there any reason why the Government can not acquire clothing and equipment in such quantities as will allow officers to have the privilege once more of purchasing from the Quartermaster and thus prevent this highway robbery by private dealers? Private dealers seem to have neither trouble nor delay in acquiring such articles and stocks of military goods as they desire, and then sell them for whatever prices they wish to put on. Can not the Government either take over the supply and thus see that officers have a fair show, or so regulate the sale as to assure a fair price being asked?

Mr. JONES of Washington. Then I have here an article by Russell Fox, of Detroit, Mich. I ask to have the marked parts inserted in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

The list of stuff which these men have to buy is appalling. The War Department makes no provision for an economical purchase, has nothing to do with it whatsoever, furnishes nothing, even to a revolver or a binocular. They are forced in the open market to buy their entire outfits, a great variety and duplication, wherever they can find them. They have such a limited time to do it they are obviously a prey of all the stores within reaching distance.

I know of 10 cases where it has cost them from $600 to $1,200, an average of $800, for equipments inferior to those in the English Army, due to the fact that they can not even get the high quality of cloth into their uniforms that the service demands. One of my men has used up a uniform in 10 days on some artillery work at which he was set, as the cloth was a dress serge, and no other was obtainable.

Mr. JONES of Washington. I want to read one section of this article, to get your special attention to it.

It seems that some of these retail dealers, after having gotten the accounts of these officers, in order to enforce collection threaten these officers with calling their delinquency, if it may be called delinquency, to the attention of the department. Here is an extract that Mr. Fox gives from a letter that one of these merchants had written to a young officer to enforce one of these claims:

There are, as you know, several courses which we may pursue—

This relates to the unpaid account—

one of them, according to Army Regulations, that we may notify the War Department. We are not certain what effect this would have on a man's chances for a commission but have been assured by officers long in the service that it would operate against him.

We do not wish to notify your superiors of our account with you and shall not do so if you show any disposition to make arrangements for its payment. However, if you do not make such arrangements at once, we shall be forced to the conclusion that it would be better for the War Department to know that, so far as paying his bills is concerned, the reputation of one of their prospective officers is not of the best. We would ask you to spare us the necessity for taking such steps.

Mr. President, I hope that the Military Affairs Committee will give this matter consideration at as early a date as possible. I know that that committee is very busy; I know that it has had a great many important measures and that it has others of great importance before it; but I conceive this to be a very important matter not only to the officers who are to be commissioned but to the esprit de corps among these officers. As some men have expressed it, "Our experience in the Army has dampened our patriotism very much." Experiences like this are bound to do it, and I hope that the committee will find it possible to act upon this matter in the very near future.

LANDS IN MONTANA.

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (S. 935) for the relief of settlers on certain railroad lands in Montana, reported it with an amendment and submitted a report (No. 208) thereon.

UNITED STATES DISTRICT ATTORNEY FOR RHODE ISLAND.

Mr. OVERMAN. From the Committee on the Judiciary I report back favorably a bill (S. 2116) for which, in the absense of the junior Senator from Rhode Island [Mr. GERRY], who is very anxious to have it passed, I ask present consideration. The bill has once passed the Senate and has been unanimously reported by the committee.

Mr. GALLINGER. Let the bill be read for the information of the Senate.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Be it enacted, etc., That from and after the passage of this act the salary of the United States district attorney for the district of Rhode Island shall be at the rate of $5,000 a year.

The VICE PRESIDENT. Is there any objection to the present consideration of the bill? The Chair hears none. The amendment proposed by the committee will be reported.

Mr. SMOOT. What is the amendment, Mr. President?

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On line 5 it is proposed to strike out "$5,000" where it appears and to insert in lieu thereof "$3,500."

Mr. OVERMAN. Mr. President, I want to say that the district attorney for Rhode Island now gets only $2,500, which, I believe, is less than is paid any of the other district attorneys of the United States. The salaries range from $3,500 to $5,000. I think in this case it would be an act of justice.

Mr. GALLINGER. Mr. President, I will ask the Senator if he has compared this salary with the salaries paid to the district attorneys in any of the other New England States?

Mr. OVERMAN. Yes. I think there may be one other State where it is $2,500, but as a rule $3,500 is the smallest salary. They go up to $5,000 and $6,000. This man is getting only $2,500, and we concluded that we would put him on a par with similar positions in other States.

Mr. GALLINGER. Mr. President, until I can ascertain whether $3,500 is the minimum salary paid in New England, particularly, I will ask that the bill go over.

Mr. OVERMAN. I want to state that we have a bill before our committee fixing the salaries of all the district attorneys of the United States, which we will endeavor to report in the near future. I will ask the Senator from New Hampshire if he has any objection to this bill?

Mr. GALLINGER. If the Senator from North Carolina can assure me that $3,500 is the minimum salary paid in the other New England States, I will not object.

Mr. OVERMAN. The junior Senator from Rhode Island is not in his seat, and therefore I ask unanimous consent that the bill go over.

The VICE PRESIDENT. The bill will go to the calendar.

Mr. SMITH of Michigan. Mr. President, I should like to ask the Senator from North Carolina whether his measure proposing to equalize the salaries of district attorneys applies also to marshals?

Mr. OVERMAN. It applies to deputy marshals of the United States, and there is also a measure pending to fix the salaries of clerks. It has been recommended by the President and others; but as to the district attorneys and marshals there is a bill pending, too.

Mr. SMITH of Michigan. May I ask the Senator whether there is a prospect of the bill being reported to the Senate before very long?

Mr. OVERMAN. I think so; at this session, probably.

Mr. SMITH of Michigan. "Probably"—the Senator qualifies his statement.

Mr. OVERMAN. I want to say that we have tried time and time again to get up this question. It is contained in a judicial code that we have before us containing about 3,000 pages, but it has not been so that we could get it up. It will all come in together.

Mr. SMITH of Michigan. Is this a part of that measure?

Mr. OVERMAN. No; this is a separate bill.

Mr. SMITH of Michigan. I know, but is the equalization of salaries part of the code?

Mr. OVERMAN. Yes; it is part of a new code that we are preparing, and that will be reported to the Senate.

Mr. SMITH of Michigan. I hope the Senator will get it before the Senate.

Mr. OVERMAN. I hope we will be able to do so.

Mr. SMITH of Michigan. There are a great many inequalities in the present system.

Mr. OVERMAN. There is no question about that, and the salaries ought to be equalized all over the United States. Some are getting larger salaries than they ought to have, and some are below what they ought to get.

The VICE PRESIDENT. The bill will be placed on the calendar.

ADDRESS BY HON. JULIUS A. COLLER (S. DOC. NO. 164).

Mr. SMITH of Arizona. From the Committee on Printing I submit a resolution and ask unanimous consent for its present consideration. The Senator from Minnesota [Mr. NELSON]

requested the printing of a speech delivered by State Senator Julius A. Coller, of Minnesota, inasmuch as it is his desire to have it given some circulation in certain parts of the country. I therefore submit the resolution and ask for its present consideration.

The resolution (S. Res. 188) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the manuscripts submitted by the Senator from Minnesota [Mr. NELSON] on January 4, 1918, entitled "An address by Hon. Julius A. Coller," delivered at Jordan, Minn., November 10, 1917, be printed as a Senate document.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 3584) granting an increase of pension to Franz Nibler (with accompanying papers); and

A bill (S. 3585) granting a pension to James Phillips (with accompanying papers); to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 3587) to establish the Denver National Park in the State of Colorado, and for other purposes; to the Committee on Public Lands.

By Mr. TOWNSEND:

A bill (S. 3588) to amend an act entitled "An act for the relief of the Saginaw, Swan Creek, and Black River Band of Chippewa Indians, in the State of Michigan, and for other purposes," approved June 25, 1910; to the Committee on Indian Affairs.

By Mr. STERLING:

A bill (S. 3589) to reinstate Clarence W. Alger as a second lieutenant in the United States Marine Corps (with accompanying papers); to the Committee on Naval Affairs.

By Mr. McKELLAR:

A bill (S. 3590) granting an increase of pension to William H. Hart; to the Committee on Pensions.

By Mr. JAMES (for Mr. HUGHES):

A bill (S. 3591) granting an increase of pension to Laura C. Slack (with accompanying paper);

A bill (S. 3592) granting an increase of pension to George Crawford (with accompanying papers); and

A bill (S. 3593) granting an increase of pension to Lulu M. Joseph (with accompanying papers); to the Committee on Pensions.

By Mr. TILLMAN:

A bill (S. 3594) to provide for the purchase of land to increase facilities at naval ammunition depot, Fort Mifflin, Pa. (with accompanying papers);

A bill (S. 3595) to provide for the purchase of land to increase facilities at naval ammunition depot, Lake Denmark, N. J. (with accompanying papers); and

A bill (S. 3596) to authorize the Secretary of the Navy to increase the facilities for the proof and test of ordnance material, and for other purposes (with accompanying papers); to the Committee on Naval Affairs.

By Mr. MARTIN:

A bill (S. 3597) authorizing the sale of a tract of land lying below the original high-water line of the Potomac River in what is known as Battery Cove, at Alexandria, Va.; to the Committee on Military Affairs.

A bill (S. 3598) granting a pension to Lottie J. Miller (with accompanying papers); to the Committee on Pensions.

By Mr. PHELAN:

A bill (S. 3599) granting a pension to Bernard Reuben (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 3600) for the relief of William Thomas Winstanley;

A bill (S. 3601) for the relief of Christian M. Otto; and

A bill (S. 3602) for the relief of John L. O'Mara; to the Committee on Military Affairs.

A bill (S. 3603) granting a pension to Elizabeth Cole;

A bill (S. 3604) granting an increase of pension to Joseph Langenberger; and

A bill (S. 3605) granting an increase of pension to Joseph Keener; to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 3606) for the relief of the Parksley Lumber Co. (with accompanying papers); and

A bill (S. 3607) for the relief of J. W. Hogg (with accompanying papers); to the Committee on Claims.

A bill (S. 3608) granting a pension to James W. Weaver (with accompanying papers);

A bill (S. 3609) granting a pension to David Malley (with accompanying papers);

A bill (S. 3610) granting a pension to Mrs. Arthur M. Whitton;

A bill (S. 3611) for the relief of the estate of Antonia Sousa, deceased;

A bill (S. 3612) granting an increase of pension to Ella Brooke Perry;

A bill (S. 3613) granting an increase of pension to Murray Pierce;

A bill (S. 3614) granting an increase of pension to Thomas Cheek; and

A bill (S. 3615) granting a pension to A. M. Mead; to the Committee on Pensions.

By Mr. CURTIS:

A bill (S. 3616) granting an increase of pension to William C. Campbell;

A bill (S. 3617) granting a pension to Charlotte Ann Ury;

A bill (S. 3618) granting a pension to Melvina Roberson (with accompanying papers);

A bill (S. 3619) granting an increase of pension to Miner N. King (with accompanying papers);

A bill (S. 3620) granting an increase of pension to Lorenzo H. Green (with accompanying papers);

A bill (S. 3621) granting an increase of pension to Elmer Y. Morris (with accompanying papers);

A bill (S. 3622) granting an increase of pension to William L. Kessler (with accompanying papers);

A bill (S. 3623) granting an increase of pension to Alexander D. Tanyer (with accompanying papers);

A bill (S. 3624) granting an increase of pension to Alfred Helm (with accompanying papers);

A bill (S. 3625) granting an increase of pension to Arthur W. Brittingham (with accompanying papers);

A bill (S. 3626) granting a pension to Martha J. Thomas (with accompanying papers);

A bill (S. 3627) granting an increase of pension to Samuel M. Huey (with accompanying papers); and

A bill (S. 3628) granting an increase of pension to W. Lafayette League (with accompanying papers); to the Committee on Pensions.

By Mr. GORE:

A joint resolution (S. J. Res. 126) to amend an act entitled "An act to regulate commerce," approved February 4, 1887; to the Committee on Interstate Commerce.

WAR CABINET.

Mr. CHAMBERLAIN. I introduce a bill and ask that it may be read.

The VICE PRESIDENT. The Secretary will read the bill.

The bill (S. 3583) to establish a war cabinet and to define the jurisdiction and authority thereof was read, as follows:

Be it enacted, etc., That there is hereby created a war cabinet, to be composed of three distinguished citizens of demonstrated executive ability, to be appointed by the President, by and with the advice and consent of the Senate, through which war cabinet the President may exercise such of the powers conferred on him by the Constitution and the laws of the United States as are hereinafter mentioned and described.

SEC. 2. That said war cabinet shall have jurisdiction and authority as follows:

(a) To consider, devise, and formulate plans and policies, general and special, for the effectual conduct and vigorous prosecution of the existing war, and, in the manner hereinafter prescribed, to direct and procure the execution of the same.

(b) To supervise, coordinate, direct, and control the functions and activities of all executive departments, officials, and agencies of the Government in so far as, in the judgment of the war cabinet, it may be necessary or advisable so to do for the effectual conduct and vigorous prosecution of the existing war.

(c) To consider and determine, upon its own motion or upon submission to it, subject to review by the President, all differences and questions relating to the conduct and prosecution of the war that may arise between any such departments, officials, and agencies of the Government.

(d) To require information from, and utilize the services of, any or all executive departments and executive officers or agents of the United States and of the several States and Territories and the District of Columbia necessary or helpful in the proper performance of the duties of said war cabinet.

(e) In the exercise of the jurisdiction and authority hereby conferred to make, subject to review by the President, the necessary orders to any such department, bureau, official, or agency of the Government, and such decisions as the matters under consideration may require or warrant.

(f) To make rules and regulations governing its own procedure; and said war cabinet shall, upon completion of its membership, immediately organize and thereupon and thereafter proceed to an expeditious disposition of all matters coming before it.

SEC. 3. That the Secretary of War and the Secretary of the Navy, respectively, shall assign to duty with the war cabinet such commissioned officers as said war cabinet may request; and said war cabinet shall employ all clerical and other employees required for service with it; and in addition to the officers assigned thereto as herein provided the President may appoint for duty with said war cabinet such officers

as the war cabinet may determine to be necessary, who shall receive, until otherwise prescribed by law, such compensation as the war cabinet shall deem just and reasonable.

SEC. 4. That the salary of each member of the war cabinet shall be $12,000 per annum, payable monthly; and for all salaries, compensations, and other expenses, including necessary offices, incurred in the maintenance and administration of the war cabinet and authorized under the provisions of this act, there is hereby appropriated, out of any funds in the Treasury not otherwise appropriated, the sum of $500,000 for the fiscal year ending June 30, 1918.

SEC. 5. That at the end of six months after the termination of the present war, or at such earlier date after the termination of the war as the President may designate, the war cabinet hereby created shall cease to exist, and the funds, records, and other public property pertaining thereto or under its control shall be transferred to such executive departments as the President may designate.

SEC. 6. That all laws and parts of laws and all regulations, orders, rules, and decisions of any executive department, bureau, official, or agency of the Government are hereby repealed in so far as the same may be inconsistent with the provisions of this act; and on all questions of construction of the provisions of this act and of any act making appropriations to carry out any of the provisions thereof the decision of the war cabinet shall, subject to the revision of the President, be final.

Mr. LEWIS. Mr. President, a parliamentary inquiry.

Mr. SWANSON. Mr. President——

The VICE PRESIDENT. The Senator from Illinois will state his inquiry.

Mr. LEWIS. Is there a request that there be immediate consideration of this bill?

Mr. CHAMBERLAIN. Oh, no.

Mr. LEWIS. I desire to object to it if there is.

Mr. CHAMBERLAIN. Oh, no, Mr. President.

The VICE PRESIDENT. This is the first reading of the bill, as the Chair understands.

Mr. SWANSON. Mr. President, I should like to ask the Senator from Oregon a question. This bill and another bill, introduced by the Military Affairs Committee, propose to reorganize entirely the Navy Department. The measure is applicable alike to the War Department and to the Navy Department. We of the Naval Affairs Committee are very well satisfied with the efficiency of the Navy Department and with what it has accomplished. It is efficient in food, in clothing, in munitions, and in guns, and we do not think the Navy should be reorganized by a bill reported from the Military Affairs Committee. We think this bill should be considered by both committees before it comes to the Senate for final disposition.

I should like to ask if the Senator from Oregon does not think it would be well for both the Naval Affairs Committee and the Military Affairs Committee to examine this measure and make a joint report that is applicable to both?

Mr. CHAMBERLAIN. In reply to the Senator, permit me to say that I have not asked either to take up this bill or the one to increase and expedite the supply of munitions of war, which is on the calendar. I suppose it will be in order to take them up, if the Senate sees fit, after they have been placed on the calendar. The present bill is one which was prepared by the Military Affairs Committee in committee; it is really a committee bill and is not a bill of first impression introduced by me. I was instructed by the committee to present the bill and at the same time to report it back and ask that it go to the calendar, which I now do.

The VICE PRESIDENT. That can not be done if there is any objection. The bill has had its first reading.

Mr. SWANSON. I was asking about the reference because it is a bill to reorganize both the Army and the Navy. The Naval Committee is not willing nor should it be expected to give up its right regarding the reorganization of the Navy to the Military Committee.

Mr. CHAMBERLAIN. This bill does not reorganize anything. It creates a war cabinet.

Mr. SWANSON. It creates an entirely different system for the Navy and puts a whole lot of red tape around the Navy. It puts in the hands of a cabinet of three the munitions regarding the Navy, and disorganizes it, and uses a lot of red tape to obtrude itself into the Navy. We are satisfied with the efficiency of the Navy; it has measured up in this war. We see no occasion for the Navy or the Navy Department to be reorganized. The Naval Committee should have an opportunity to see to what extent it needs reorganization to be made more efficient.

The VICE PRESIDENT. This is just the first reading of the bill. If there is objection to the second reading, it can not go to the committee, but must lie on the table. That is all there is to it. Is there any objection to the second reading of the bill?

Mr. SWANSON. I would prefer to have it go over. I object.

The VICE PRESIDENT. Then it lies on the table until to-morrow for a second reading.

Mr. CHAMBERLAIN. All right.

WAR WITH GERMANY.

Mr. MCCUMBER. I introduce a bill, and I call the attention of the senior Senator from Colorado [Mr. THOMAS] to it, as it deals partially with the subject he has been discussing this morning. As to the first portion of the bill, it may be those gentlemen think it is not necessary to-day, but I am certain it will be necessary before we get through with the war. I ask that the bill may be read by title and referred to the Committee on Military Affairs.

The bill (S. 3586) to draft into the military service of the United States all male citizens over 18 and under 62 years of age as a reserve army, to call into service any unit or division of such reserve army for service in transportation, shipbuilding, production of munitions of war and other war supplies as may be necessary, and to commandeer and take possession of in any city or village in the United States any room or rooms used for rooming purposes and other rooms in private homes for quarters of soldiers and other employees, if necessary, and to pay for the use thereof just and reasonable compensation, and for other purposes, was read twice by its title and referred to the Committee on Military Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. PENROSE submitted an amendment authorizing the Postmaster General to expend $100,000 for the installation of experimental mail-distributing machines, intended to be proposed by him to the Post Office appropriation bill, which was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

Mr. CURTIS submitted an amendment proposing that hereafter it shall be the duty of the Commissioner of Indian Affairs to segregate the funds of any tribe of Indians susceptible of segregation, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

FEDERAL CONTROL OF RAILROADS.

Mr. GORE submitted an amendment intended to be proposed by him to the bill (S. 3385) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes, which was referred to the Committee on Interstate Commerce and ordered to be printed.

WITHDRAWAL OF PAPERS—ELIZA J. MOSHER.

On motion of Mr. CUMMINS, it was

Ordered, That leave be granted to withdraw from the files of the Senate the papers accompanying S. 1628, Sixty-fifth Congress, first session, a bill granting a pension to Eliza J. Mosher, no adverse report having been made thereon.

VALUE AND RELATIVE VALUE.

Mr. SHAFROTH submitted the following concurrent resolution (S. Con. Res. 16), which was referred to the Committee on Standards, Weights, and Measures:

Senate concurrent resolution 16.

Whereas the lack of uniformity in determining value or relative value results at once in general confusion and inequality in taxation burdens; and

Whereas a scientific study of the subject by some recognized bureau of the General Government would be helpful; and

Whereas the Bureau of Standards, already established, would seem to be best fitted for such research and service: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Bureau of Standards be, and it hereby is, empowered and directed to assign to the special study and investigation of the subject of value and relative value men of scientific and practical attainments, with the view of making early and comprehensive report on the subject to the Congress.

Resolved further, That in addition to suggesting and recommending a plan whereby value and relative value of all things shall be determined the bureau shall recommend the manner in which it is believed the standard determined upon may be made of uniform application in the several States and the lesser political subdivisions, all that inequalities in valuations made for revenue, as well as for all other purposes, may be reduced to the minimum or altogether eliminated.

Resolved further, That the Bureau of Standards and the men assigned to the investigation of the subject of this resolution shall give to Dr. Napoleon Wagner, of Denver, Colo., and other students of relative value as they shall offer to submit the result of their studies, reasonable opportunity in the premises, and, moreover, may ask men of the bureau's selection to appear and present orally or submit in writing that which they believe would be helpful in the solution of the world-wide important question of relative value.

Resolved further, That the expenditure of the sum of $25,000 in furtherance of the investigation contemplated herein is hereby authorized, to be paid from funds not otherwise appropriated.

AMENDMENT OF THE RULES.

Mr. JONES of Washington. I desire to give notice that in accordance with the rules I intend to propose an amendment to Rule XXV in regard to the committees of the Senate. I ask that it be printed in the RECORD.

The notice was ordered to be printed in the RECORD, as follows:

NOTICE OF AMENDMENT TO THE RULES.

I hereby give notice that on a following legislative day I shall propose the following resolution providing for an amendment of Rule XXV of the standing rules of the Senate, to wit:

Resolved, That beginning with the Sixty-sixth Congress, Rule XXV of the standing rules of the Senate be amended to read as follows:

"Rule XXV. The following standing committees shall be appointed at the commencement of each Congress, with leave to report by bill or otherwise:

"A Committee on Appropriations.
"A Committee on Commerce.
"A Committee on Finance.
"A Committee on Foreign Relations.
"A Committee on Interstate Commerce.
"A Committee on the Judiciary.
"A Committee on Banking and Currency.
"A Committee on Public Lands
"A Committee on Agriculture and Forestry.
"A Committee on the District of Columbia.
"A Committee on Rules.
"A Committee on the Census.
"A Committee on Civil Service and Retrenchment.
"A Committee on Claims.
"A Committee on Education and Labor.
"A Committee on Insular Affairs.
"A Committee on Indian Affairs.
"A Committee on Immigration.
"A Committee on Military Affairs.
"A Committee on Naval Affairs.
"A Committee on Pensions.
"A Committee on Post Offices and Post Roads.
"A Committee on Printing, which shall have power to act jointly with the same committee of the House of Representatives.
"A Committee on Enrolled Bills, which shall have power to act jointly with a similar committee of the House of Representatives, and which, or some member of which, shall examine all bills or joint resolutions which shall have passed the Senate or both Houses to see that the same are correctly engrossed or enrolled, and, when signed by the Speaker of the House and the President of the Senate, shall present the same forthwith, when they shall have originated in the Senate, to the President of the United States in person and report the fact and date of such presentation to the Senate.
"A Committee on Public Buildings and Grounds, which shall have power to act jointly with a similar committee of the House of Representatives.
"A Committee to Audit and Control the Contingent Expenses of the Senate, to which shall be referred all resolutions directly the payment of money out of the contingent fund of the Senate or creating a charge upon the same."

The foregoing committees shall consist of not to exceed 15 members.

"SEC. 2. That the aforesaid committees shall continue and have the power to act until their successors are appointed."

ADDRESS BY SENATOR THOMPSON.

Mr. SHEPPARD. Mr. President, I ask that an address by the senior Senator from Kansas [Mr. THOMPSON] at the dedication exercises of the Kansas recreation building at Camp Funston, Kans., January 15, 1918, may be published in the RECORD in brevier type.

The VICE PRESIDENT. Without objection, it is so ordered.

The address referred to is as follows:

ADDRESS OF SENATOR WILLIAM H. THOMPSON AT DEDICATION EXERCISES OF KANSAS RECREATION BUILDING AT CAMP FUNSTON, KANS., JANUARY 15, 1918.

AMERICA IN THE WAR.

"It is a high honor to be invited to speak on this occasion, and I thank your distinguished commanding officers for the opportunity they have given me to come from Washington to participate in these dedication ceremonies. I have contributed to many worthy things incident to carrying on the war, but there is no contribution I am prouder of than the one for the construction of the building you are dedicating to-day. It is a fitting tribute to the brave, courageous, and patriotic Kansas soldier boys, and I know that with their characteristic hospitality the benefits they will receive from it will be shared with their worthy comrades.

"I am glad that this building is located at Camp Funston. It will serve not only as a place of comfort and pleasure for yourselves but also as a monument to that greatest of all Kansas soldiers, Gen. Funston, whose untimely death resulted in such great loss to Kansas, our Nation, and the world. May each of you young men emulate his illustrious example and bring as much fame and honor to your names as the military history of our State records for him.

"We are passing through the greatest epoch in the history of the world. Never before was there such military opportunity offered the young men of our country. It is indeed a high honor to actively participate in this greatest of all wars, and I congratulate you upon being chosen for this great work. Each of you will receive your just reward. It may not come in military honors, but it will surely come in a better and more lasting way when the war is over through the appreciation of a grateful people and in the enjoyment of peace, liberty, and happiness for ourselves and all posterity.

"In times past some question has arisen as to the causes of the war, and without discussing them in detail you can put it down as a settled fact that if there ever were just causes for war they existed in more aggravated form for this war than in any other recorded in history. Let us not permit ourselves to be deceived or misled concerning the original and present purpose of the Imperial German Government. The time for mincing words has passed. It is President Wilson against the Kaiser. It is patriot against traitor. We have got to be either for America or for Germany. There is no middle ground, and we can not straddle. There is no excuse for the conduct of the German Government. They have no defense before God or man for their willful, wicked, contemptible, and most damnable crimes committed against this country not only but against all of the law-abiding and liberty-loving people of the world. They have violated every law—divine, moral, national, and international—and every sacred obligation they owe to God or man, and have broken every solemn pledge and promise made to this country and every other country on the globe. The primary object of the Kaiser and his leaders is simply destruction and death for all those who refuse to submit to his will. The Kaiser professes faith in God, but is so blasphemous as to claim His guiding hand in all his oppressions, murders, and atrocious crimes, and for that sacrilegious profession and criminal conduct God will strike him dead some day, and perhaps by the aid of the American Army. With all his pretended faith in Divine Providence, yet it is not sufficient for him to permit himself to be exposed to gun fire. Instead of being a Christian he has proven himself to be the most sacrilegious fiend and scoundrel who ever lived. He has Nero out-Neroed. It is clearly proven beyond all question of doubt that the Kaiser and his followers are responsible for the present world disaster. He has not been a figurehead, as is sometimes contended, but a prime mover in the events of this horrible upheaval of murder and destruction, as is clearly indicated by his acts, as well as in his own words in speeches delivered to his army, when he said:

"When you meet your foe give him no quarter and take no prisoners. Let none be at your mercy. Make yourselves more frightful than the Huns under Attila. See that for a thousand years no enemy mentions the name of Germany without a shudder.

"The German Army has attempted literally to carry out his barbaric and criminal instructions, as is clearly shown by the awful inhuman atrocities of which it has been guilty. There was never before committed by any people, savage or civilized, such pillage and wanton destruction of towns, cities, and sacred places and such low-down, fiendish massacres of people and crimes against the aged and helpless women and children.

"After the German retreat there were in some cities so many amputated hands of little children in the streets as to make it impossible to walk along without stepping on them. Many little boys and girls were nailed by the hands and feet to the doors and sides of buildings, some being left alive when the crimes were committed. No girl or woman, no matter how old or how young, is safe in the hands of an unrestrained German soldier. The military forces of the Kaiser have destroyed religious edifices, crucified priests and nuns, ravished women, blinded innocent infant babies, butchered children, bombarded hospitals, sunk hospital ships and ships bearing wounded soldiers and carrying supplies for starving noncombatants and inmates of hospitals, murdered prisoners of war, deported populations, and subjected millions of helpless men, women, and children to low, degrading, and most cruel servitude at the point of the bayonet.

"I have talked personally with members of Congress and others who have been to the front, as well as the representatives of various missions coming to this country, and I can positively say that all these accusations and many more too horrible to mention and too foul to print are true beyond a question of a doubt.

"With such a record of crimes and atrocities against the Kaiser and his army, the time has passed for parleying over the causes of the terrible cataclysm. The Kaiser's situation is reflected in the picture and little poem by Paul Hayden appearing in the Christmas number of Leslie's Weekly. There is a double-page picture of the ocean washing ashore the dead bodies of men, women, and children, and the Kaiser stands with a drawn sword striking at a beautiful young woman with waving hair and arms outstretched pleading for mercy, and whose left hand has caught the blow from the Kaiser's sword, which is sending the blood trickling down her arm and body. With this awful picture in mind the author wrote:

"I saw the Kaiser standing
In the tides of human dead.
I asked:
'Do these not daunt you?
In the nighttime do they haunt you?'
And I thought the Kaiser said:
'It's not the rise of the tide
Nor the surge of the sea
But the undertow I dread.'

"I saw the Kaiser battling
In the world-wide sea of red.
I asked:
'Does this not fright you?
Nor the endless carnage blight you?'
And I thought the Kaiser said:
'It's not the surge of the sea
Nor the rise of the tide
But the undertow I dread.'"

"All these crimes shall be avenged by Uncle Sam in our fight for humanity and liberty, and you boys will have the honor and glory of helping to administer the deserved punishment.

"The Bible says, 'If your enemy smites you on the right cheek, turn your left cheek also,' but it nowhere says what you shall do after you have been struck on your left cheek. The Kaiser struck Uncle Sam on his right cheek and he turned his left cheek, which the Kaiser struck with his mailed fist, and for that crime we will lick the life out of him and his followers. In the language of Billy Sunday, 'We will bury the Kaiser and his hot-dog gang so deep that they will not hear the toot of Gabriel's horn on resurrection morn.'

"The Kaiser's whole aim is and has been for more than a quarter of a century to conquer, oppress, and rule the world. He had it all systematically planned and carefully figured out, but his foot slipped in the very outset when he jumped onto little Belgium. He has never recovered, and never will recover, from the blows administered by that brave and unconquerable little nation of heroes. It was his purpose to conquer Europe first, and then, with the combined navies of Germany, England, France, and Russia, to bombard the coast cities of the United States and to land armies on our shores and bring his unholy and inhuman warfare to our beloved land. But he will find that he has jumped onto the wrong fellow this time. He has taken in too much territory. It is like the story of the drunken fellow who first said that he could lick anybody in the town, and nobody took him up; and then he said he could lick anybody in the State, and nobody took him up; and finally he said he could lick anybody in the United States; and then a little bantum-weight, sawed-off fellow jumped onto him and knocked him down and kicked him into the street. The drunken man got up and, brushing himself off, said, 'Stranger, I don't know who you are or where you come from, but I do know the trouble with me is I took in too much territory.' That is exactly what the Kaiser has done.

"This is a war that we do not have to offer any apologies for our part in it, and living up to our high standards and ideals we never will have to, for our cause is just and right, and victory alone will be the inevitable result. Then the world will be safe for democracy, and a safe place for peaceable people to live. It is argued that we have no right to tell Germany what kind of a government she shall have; but we do have the right to tell her what kind of a government she shall not have, not only for the good of her own people but for the good of the rest of the world. When her Government has become a menace to the people of the world, the United States has the right to say, and shall insist to the end upon that right, that that form of government shall not exist anywhere on earth. Kaiserism and militarism must and will be destroyed.

"About 300 years ago the oppressed people of Europe threw off the yoke of autocracy, left their homes, their relatives, and friends, braved the dangers of the sea and the savages of the land, and crossed the pathless ocean to the shores of a new world. Here they set up a government of their own, founded upon a new principle—that all men are created equal and endowed by their Creator with certain inalienable rights, which are life, liberty, and the pursuit of happiness. They recognized the principle that all governments derive their just powers from the consent of the governed, and that no power exists anywhere for any man to set himself up as the ruler of men and guide their destinies according to his own sweet will. They breathed the breath of liberty and it was good—liberty, the richest blessing that can come to a people. The atmosphere of freedom was so pure, so sweet, and so exhilarating that they were willing to fight and die for it; and they did fight for it. Their feeling culminated in the sentiment expressed by that great patriot, the immortal Patrick Henry, in his famous liberty address, when he us life gave us liberty at the same time.'

"They were forced then to fight for liberty for themselves. We are forced now to fight not only to perpetuate that liberty for ourselves but for all the liberty-loving people of the world. Oh, is it not a just cause? Jefferson said, 'The God who gave us life gave us liberty at the same time.'

"In the language of the poet:

"'Tis liberty alone that gives the flower
Of fleeting life its luster and perfume;
And we are weeds without it.
* * * * * * *
A day, an hour of virtuous liberty
Is worth a whole eternity in bondage.

"The entrance of the United States into the war was the most important factor in favor of the allies since its beginning. It insures ultimate success, and beyond everything else an earnest participation by the United States in the terms of peace, which will mean so much for the entire world. When peace does come America will do more than any other country in framing that treaty, and it will not be signed until victory is complete and the dethronement of the Hohenzollerns and the destruction of autocracy and militarism is an accomplished fact; and what is more important, exact justice will be done every nation, no matter how small or how great, and no pains will be spared to make it an everlasting peace. The President on January 8 last, in one of his greatest papers, one which will perhaps live the longest and the effects of which reach the farthest, told the Congress and the world in unmistakable language what the terms of peace should be. The participation of the United States in this war has raised our country to the highest pinnacle ever attained by any nation since the foundation of the world, and it is your good fortune to help carry the Stars and Stripes and extend the high American ideals for which they stand to the remotest corners of the earth. Bear in mind at all times that the people and the Congress of the United States are behind you. Congress at the last session created the foundation for an Army of millions of men and appropriated $21,000,000,000 toward carrying on this conflict, and it will unhesitatingly give you everything necessary in the way of money, comrades, supplies, munitions, and anything else within its power to accomplish the desired end.

"The United States in this great crisis appears to the people of the world as that bright and shining star of the west which appeared in the heavens at the most critical time in all history, shining forth in radiant light the words of the Savior of the world in such brilliancy that they may be seen the world over by all future generations, 'Peace on earth, good will toward men.'

"May God speed you on your way. Remember always you take with you the best wishes of 100,000,000 American people, whose constant prayer will be for your safety, comfort, and success, and who hope for your early safe return to receive the crown of victory from the hands of millions of grateful people of the world."

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had on the 18th instant approved and signed the act (S. 3235) amending section 32, Federal farm-loan act, approved July 17, 1916.

REPORT OF FUEL ADMINISTRATOR (H. DOC. NO. 837).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, ordered to lie on the table and be printed:

To the Senate and House of Representatives:

In compliance with the provisions of section 21 of the act of August 10, 1917, entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, I transmit herewith the annual report of the Fuel Administrator for the year 1917.

WOODROW WILSON.

THE WHITE HOUSE, *18 January, 1918.*

REPORT OF UNITED STATES FOOD ADMINISTRATION (H. DOC. NO. 837).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, ordered to lie on the table and be printed:

To the Senate and House of Representatives:

In compliance with the provisions of section 21 of the act of August 10, 1917, entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," I transmit herewith the report of the United States Food Administration for the year 1917.

WOODROW WILSON.

THE WHITE HOUSE, *18 January, 1918.*

AGRICULTURAL LANDS IN PORTO RICO (S. DOC. NO. 165).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Pacific Islands and Porto Rico, and ordered to be printed:

To the Senate and House of Representatives:

Section 39 of the act of Congress approved March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," contains the following provision:

That the Governor of Porto Rico shall cause to have made and submitted to Congress at the session beginning the first Monday in December 1917, a report of all the real estate used for the purposes of agriculture and held either directly or indirectly by corporations, partnerships, or individuals in holdings in excess of 500 acres.

In accordance with this provision, there is submitted herewith a report prepared under the direction of the Governor of Porto Rico.

As will be noted, this report covers all real estate used for the purposes of agriculture and held either directly or indirectly by corporations, partnerships, or individuals in holdings in excess of 500 acres.

Very respectfully,

WOODROW WILSON.

THE WHITE HOUSE, *18 January, 1918.*

LAWS OF ALASKA (H. DOC. 838).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, referred to the Committee on Territories, and ordered to be printed:

To the Senate and House of Representatives:

In compliance with the provisions of section 20 of the act of August 24, 1912, entitled "An act to create a legislative assembly in the Territory of Alaska, to confer legislative power thereon, and for other purposes," I transmit herewith the Session Laws of Alaska for 1917, containing the acts, resolutions, and memorials passed at the third regular session of the Territorial Legislature of the Territory of Alaska, which convened at Juneau, the capital, on the 5th day of March, 1917, and adjourned the 3d day of May, 1917.

WOODROW WILSON.

THE WHITE HOUSE, *18 January, 1918.*

REPORT OF ALIEN PROPERTY CUSTODIAN (H. DOC. 840).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, ordered to lie on the table, and be printed:

To the Senate and House of Representatives:

In compliance with the provisions of section 6 of the act of October 6, 1917, entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," I transmit herewith the report of the alien-property custodian of all proceedings had under said act during the year 1917 on the part of the alien-property custodian.

WOODROW WILSON.

THE WHITE HOUSE, *18 January, 1918.*

STANDARDIZATION OF WAGES.

The VICE PRESIDENT. Is there further morning business?

Mr. KING. I move that the Senate proceed to the consideration of Senate resolution 174, which is lying on the table. When the resolution is taken up I desire to yield to the Senator from Missouri [Mr. STONE].

The VICE PRESIDENT. The question is on the motion of the Senator from Utah that the Senate proceed to the consideration of Senate resolution 174, heretofore submitted by him.

The motion was agreed to.

The VICE PRESIDENT. The Chair lays the resolution before the Senate.

Mr. KING. I do not ask that it be read. I shall not ask for action upon it to-day.

Mr. STONE. Mr. President, it is not my purpose to discuss with particularity the exact question or questions presented in the pending resolution of the Senator from Utah. Later on I may refer more directly to this resolution, but for the present my purpose is to discuss especially some regrettable things more or less intimately associated with the various congressional investigations into our war activities which have been authorized and are now in progress. I wish to speak in general terms especially of the current congressional investigations as a whole, and of other things related thereto.

Mr. President, the course of at least many of our colleagues on the other side of this Chamber, although quite adroitly directed, has developed a situation about which, as a member of the party in power, I feel constrained to speak in protest. The recent tendency of many, not all, but of many Republican Senators, acting here in this body in manifest concert with dominant Republican leaders throughout the country, to make politics out of the war has become too evident to be longer passed in silence. I am genuinely sorry that constantly recurring events make the necessity for speaking of these things mandatory. But I think the time has come, right now, to strike a final blow, if that be possible, against partisan activity in the conduct of the war. It is evident that the spirit of partisanship is thrusting itself upon the conduct of our national part in this great and bloody international drama overshadowing the world, and I think this spirit of partisanship *should be struck dead at once.*

I have observed, as all of you must have observed, the significant fact that following the adjournment in October of the extraordinary session of this Congress and immediately following the reassembling in December a lot of resolutions were offered in the Senate directing investigations into practically all of our war activities. All these resolutions, suddenly showered upon us, were offered by Republican Senators, save only the resolution now under consideration offered by the Senator from Utah, and which is really of a character that does not open it to my criticism. The significant fact that these resolutions originated with Republican Senators, standing alone, stamps these proceedings with a suspicion of partisan purpose.

Mr. President, there is no need for us to be overfastidious about this or to try to fool each other or to fool the country. Republican leaders in and out of Congress are undoubtedly seeking to make politics out of the war. This may not be true of all, I am disposed to exempt some from this charge, but it is true of at least many of the most powerful men of that party.

Mr. President, there is to be an election next fall. A new House of Representatives and one-third of the Senate are to be chosen. Two years later a new President, a new House, and again one-third of the Senate are to be elected. Here is presented a chance to the dominating Republican politicians of the country—some of them, perhaps not more than one of them, seeking to promote his immediate personal glorification, and others, acting on a larger scale, let it be said, to promote a party advantage—to strike hard to turn down this administration and take the Government over into their own hands. That fight is on. Let no man deceive himself about that. That movement is on right now, and it is being played out before our very eyes. I see this partisan movement as an ever-thickening cloud on the horizon, spreading more and more every day over the sky. If there be one who does not see this, he is blind. Rising out of this cloud is the abhorrent figure of a political hag, stirring the cauldron of domestic partisanship to disturb even in this hour of national peril the sympathetic unity of the American people. That presents a grave question of national moment at this time. The fact that political partisanship is thus thrusting itself upon the country is too plain to be ignored or denied, and it is a menace to national unity. We are even now in something more than the initial stage of a partisan attack on the administration. I can not suppress the conviction that these various resolutions of investigation, coming in substantial effect wholly from the Republican side, are partisan in purpose and intended to promote a partisan advantage. It is a shrewd movement—to plant the mine and get some simple-hearted—I will not say simple-minded—Democrat to fire it off.

In what way might they promote a partisan advantage. Let us see. We all know there are various elements of discontent in the country, each more or less potential. Some of these elemental influences you may denounce and some of you do denounce them, but you know they exist and their potentiality as political equations is recognized by all. It may be well surmised that the natural disposition of these discontented elements will be to strike blindly, although unwisely, at the party in power. Therefore, in a way, working for the accomplishment of a common end, to wit, the defeat of the Democratic Party, Republicans ally themselves with these discordant elements of unrest and discontent. But beyond and on top of all that, the thing I especially protest against and denounce is the effort put forward in the name and under the guise of patriotism to disparage this Congress and the present administration, and to excite a wider feeling of discontent and lack of confidence, and to spread the poison of this impression broadcast among the really patriotic masses of the people. Plainly this sort of movement is afoot. The plan, the purpose, the propaganda are all evident. The veil thrown over the movement is too thin to obscure or deceive; the mask does not hide the face under it. If you can persuade or convince the people that this Congress and the Wilson administration have been incompetent, weak, inefficient in supplying the Army and Navy with things necessary for their support and for the proper and vigorous prosecution of the war, as well also to convince them that even with respect to the broader financial and constructive policies we have undertaken, we have been lacking in sagacity and sound judgment, you will have laid the basis for a popular attack to undermine the administration. Upon this questionable pro-

gram the shrewdest politicians on the other side of this Chamber and shrewd Republican politicians throughout the country have set their hearts. So I believe and declare.

THE PROOF.

Mr. President, I have not said these things without deliberation. Rather am I speaking, after deliberation, regretfully. It is plain that powerful men of the Republican Party are for political reasons bent on exploiting what they denounce as administrative blunders committed in the prosecution of the war. That is what they chiefly harp upon. Seemingly they are staking their political fortunes upon that. And here I feel constrained to express the fear that we have on this side been misled into doing unwise things, or permitting them to be done, which are being exploited now not only to our party detriment but, what is a thousandfold worse, are being exploited out of partisan zeal by Republicans, even to the serious detriment of the national cause itself. The mighty ambitious men of the Republican Party—at least, the reputed mighty men of that party—are up in arms to fight this Congress and the Wilson administration and to discredit both. Do you ask what proof I have for this charge, which it would be almost criminal to make without definite proof? In proof I present two or three witnesses—the foremost men of the Republican Party—and out of the mouths of these witnesses I accuse. The number of witnesses I might offer to prove what I say could be multiplied, but when I submit the testimony of these two or three it is enough.

PENROSE.

First, I present the Hon. BOIES PENROSE, long the head of the Republican Party of the great State of Pennsylvania, which State is confessedly the keystone in the arch of Republican Party strength, and who as the great party leader of this foremost Republican State in all the Union very properly occupies a front seat in the Republican national Sanhedrin. Where would I go to find one bearing a higher commission to authoritatively voice the sentiment, thought, and policy of the Republican Party? There is but one other over him, and a little later I will make him my chief witness. But first I deal with the Senator from Pennsylvania.

I quote from the New York Times of December 21, 1917, as follows:

Reorganization of the Republican national and congressional committees in preparation for the congressional election next November is now being seriously discussed by Republican leaders, *who see in the present developments before the congressional committees issues that can be effectively used against the Democrats.*

In the last 10 days groups of Republican national committeemen have come here (to Washington) to discuss the advisability of beginning without delay the plan of campaign which will be used to capture the next House. These leaders did not receive much encouragement for an early campaign until last week, when the exposes followed one after another. As the result of the delays in the War Department and other alleged deficiencies in the conduct of the war, these Republicans decided that prompt preparation and an educational campaign should be started. Accordingly a meeting of the Republican National Committee has been called to assemble in St. Louis the middle of February.

WHAT PENROSE SAYS.

"The issues are here in great numbers," said Senator PENROSE, Republican national committeeman from Pennsylvania, after a talk with other national committeemen. "The conditions of the War Department, the neglect of the camps and cantonments, and the failure to supply sufficient arms are matters which the American public will charge to the majority party.

"Politics of the worst sort has appeared in the conduct of the war. Politicians were named by Democratic Senators and committeemen for one of the most important places, that of explosive inspectors. I know of three instances where political debts were paid and men appointed who will never be able to enforce the explosive law. The Democratic State chairman from Indiana appointed the superintendent of his farm. In my State a groceryman was selected.

"I wrote to the Chief of the Bureau of Mines and informed him that the State of Pennsylvania wanted a first-class man for this job, one experienced in such matters, and suggested that he confer with the State bureau of mines. He wrote me, saying that the Secretary of the Interior was taking his recommendations from Democratic Senators and committeemen.

"And while these political appointees draw their salaries, explosions and destruction continue."

Mr. PENROSE. Mr. President——

The PRESIDING OFFICER (Mr. JAMES in the chair). Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE (continuing):

"The Republicans have not been partisan in this war, but the time has come when they must be consulted and men of experience and ability placed in places of responsibility. Another evidence of politics which I complain of is the sending of Col. House to represent this Government. It was an insult to other Governments, who sent their premiers. If President Wilson did not wish to send his Secretary of State I think some other man versed in big problems and international usages should have been sent.

"As a party the Republicans have loyally supported the Government, but we are now going to ask for an accounting and propose to carry our fight to the people in the next congressional elections."

Now I yield to the Senator from Pennsylvania.

Mr. PENROSE. Mr. President, I do not want to interrupt the Senator by an inquiry at this juncture. All of his references to me are literally true, and I am astounded at my own moderation. [Laughter.] What I want to ask the Senator particularly, however, is, Does he state that any person other than a partisan dyed-in-the-wool Democrat was appointed inspector of explosives in any one of the 48 States in the Union? Does the Senator claim that any but notorious Democrats were appointed to those 48 places?

Mr. STONE. Mr. President, I do not know the exact fact, but I will take the Senator's word for it. I hope the Senator is not wholly mistaken. [Laughter.]

Mr. PENROSE. And yet the Senator claims the administration is not partisan.

Mr. STONE. Oh, well, I am not going to go into that at this moment, but later.

Mr. President, this convincing testimony of the Pennsylvania Senator might well be left without comment. It proves what I have said about partisanship. But there are one or two things in this bold partisan proclamation to which I feel obliged to refer especially. As a justification of this partisan outburst—the Senator complains that a Democratic groceryman in Pennsylvania and a Democratic farmer in Indiana have been appointed by the Government as explosive inspectors. I am puzzled to know how to adjust the scales so as to determine where the heavier weight of the Senator's objection lies as between the politics and the businesses of these two men. Of course, I have long known the Senator's political distaste of Democrats, but I was not previously aware of his prejudice against farmers and grocerymen. I did not previously know that my distinguished friend and his party had thrown these two classes into the discard.

The Senator says "politics of the worst sort has appeared in the conduct of the war," and in proof he cites the appointment of these explosive inspectors. Mr. President, I affirm that never in our history has a national administration shown a less spirit of partisanship—never has one reached out and drawn to its support officially a greater number of men opposed to it—than this administration since our entrance into the war. Personally I am not bragging about that, but I state it as a fact.

By way of contrast let me impress upon the memory of the Senator what he seems to have forgotten, some facts about the action of his own well-beloved governor with respect to appointments made under authority of law of the war agencies of Pennsylvania to work in conjunction with the war agencies of the National Government. Here I present a table revealing the impartial, nonpartisan spirit in which war appointments have been made by or directly on the recommendation of the governor of Pennsylvania, an official of the Senator's own creation:

	Republicans.	Democrats.
Committee on public safety	265	5
Exemption appeal boards	36	9
Federal food administrator	1	.....
Federal fuel administrator	1	.....
Federal director of employment	1	.....
State war board	5	.....
Total	309	14

Mr. PENROSE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE. I do.

Mr. PENROSE. I ought to state to the Senator, by way of explanation to the Senate, that nearly all the Democrats in Pennsylvania are holding Federal office. [Laughter.]

Mr. STONE. That may be; but these are in a large sense Federal offices.

Mr. PENROSE. Not remunerative, however.

Mr. STONE. They all are remunerative; and if it be true that there are some Democrats in Pennsylvania holding Federal appointments, after the long period of absolute deprivation to which they have been subjected, I can not see why the Senator from Pennsylvania should seriously object. But I am not talking politics; I am talking against politics. [Laughter.]

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from New Hampshire?

Mr. STONE. I do.

Mr. GALLINGER. It must be the first time in the Senator's life that he has done an act of that kind. [Laughter.]

Mr. STONE. No; not by any manner of means. The Senator is too prone to judge others by his own standards.

To this table there is nothing to be added. It is beyond comment. But, Mr. President, I have other data of like kind from other States which show in striking contrast the difference in action between Republican and Democratic governors, and I shall ask leave to print at least some of these at the close of my remarks for the information of the Senate and for the especial delectation of the Senator from Pennsylvania.

I ask that leave.

The PRESIDING OFFICER. Without objection, it is so ordered. The Chair hears none.

CHAIRMAN WILCOX.

Mr. STONE. Mr. President, before I introduce my star witness I conclude, on reflection, that it would not be amiss to support the testimony of the Senator from Pennsylvania, himself a member of the Republican national committee—not that it needs support, but only to emphasize it—by quoting a statement made to the press by the chairman of that committee on January 9 of the present year, and published broadcast. From that statement I quote the following:

The importance of the economic questions that will come up for solution at the close of the war or even before can not be overstated. The history of the Nation in the last 60 years shows that the Democratic party has never shown competence, particularly in a crisis, in dealing with the great economic questions of the country. The importance, therefore, of the coming congressional election can not be overestimated.

Accordingly, Chairman Wilcox has issued a call for his committee to meet at St. Louis on February 12, to inaugurate a winter campaign to be continued with increasing ferocity up to November, for the election of Republican Senators and Representatives; and St. Louis newspapers report that Col. Roosevelt has engaged a hall in St. Louis to make a war speech the day before the committee meeting. The kind of campaign this is to be thus opened is sufficiently forecast in the statements I have quoted from the two leading members of the national committee.

WASHINGTON POST.

At this juncture I will also further break away from my direct line of thought to call attention to a clipping taken from Sunday's Washington Post of this week, which I refer to merely as further showing the direction in which the wind blows. I quote:

Republicans in Congress are beginning the perfection of their organization for the coming congressional elections. House Republicans will hold a caucus this week, at which time it is understood that they will make an issue out of the refusal of President Wilson and Secretary Baker to agree to the creation of a new department of munitions.

They also expect to make political capital out of the opposition by President Wilson to the creation of a joint committee of Congress on war expenditures.

WILL REORGANIZE COMMITTEE.

Extravagance, waste, and inefficiency in the administration of the war program will be important features of the political warfare they are to make.

THEODORE ROOSEVELT.

Mr. President, I now introduce my star witness, Theodore Roosevelt himself, whom I characterize as the most seditious man of consequence in America. The heart of this man is aflame with ambition, and he runs amuck. On my responsibility as a Senator I charge that since our entrance into the war Roosevelt has been a menace and obstruction to the successful prosecution of the war. His chief thought has not been to help the Government solve the mighty problems they have had to solve but always his chief thought has been of Roosevelt. Almost every day this man speaks in bitter and contemptuous disparagement of the President and of the majority Members of this Congress. Every week for a long time he has been and still is publishing under contract for a money consideration—think of it, for money—villainous screeds in the Kansas City Star, which paper has a wide circulation in several States, attacking the President and the Government. By some syndicated arrangement these Roosevelt contributions to the editorial columns of the Star are reproduced in numerous important newspapers published throughout the country.

Whatever may be said of the papers reproducing these disloyal utterances, the Kansas City Star, in whose editorial offices these emanations originate, is chiefly responsible.

What shall I say of the Kansas City Star? I will let the Kansas City Post, a local contemporary of the Star, speaking through one of the most fluent editorial writers of the Middle West, answer that question. I quote two editorials from the Post of December 27, 1917, and December 30, 1917, in the order of their publication.

1. The editorial of December 27:

At last Col. Theodore Roosevelt is out in the open, all his camouflage torn away, all his fervid protests of patriotism swept away by his desire to implant in the hearts of the people of the United States a distrust of President Wilson.

In to-day's issue of the Kansas City Star, which he chose months ago as the instrument through which he would begin his campaign for the Presidency, he, for the first time, accuses President Wilson of being responsible for a condition in Army and training camps which, if true, were well calculated to plant fear in the heart of every mother and father who has a son in khaki and to arouse in every cantonment a spirit of unrest and rebellion.

By suggestion he would have the people believe that every camp is a pestilential spot, every youth stricken with the seeds of disease, every soldier unclothed, every soldier unarmed.

That Col. Roosevelt chooses for the organ of distribution of his propaganda of distrust of the President, of disruption of national spirit, of disorganization of the Nation's loyalty, *a paper whose general manager was so lately a subject of the Kaiser that the ink is scarcely dry upon his naturalization papers may or may not be significant.*

The cold fact remains. Col. Roosevelt can not forgive President Wilson for being President. He can not forgive the people for electing Wilson. He can not refrain in this hour of crisis from attempting to divide the people in their loyalty and their war purpose in order that he may again become the President. That this daily diatribe is circulated from this city is a matter of shame to a city that has stood foremost in every patriotic movement, first in its undivided support to the war, to liberty loans, to the Red Cross, to the volunteer forces.

For certain it is that were the Kaiser himself given free editorial rein in this country, were Bernstorff back with his plottings and his subsidy of newspapers, they would pen to-day the very articles which Col. Theodore Roosevelt sends broadcast through the Kansas City Star.

2. The editorial of December 30:

"A pro-German is a man who, by private or public utterance, stands in the way of a whole-hearted prosecution of this war and the defeat of the German will to conquer. He may do it by finding fault with the conduct of the war."

This is the definition of Herbert Quick, a publicist whose patriotism is preeminent, at present farm-loan commissioner, chosen because of the fact that he is trusted and known by more farmers in this Nation than any other citizen.

He might well have pointed the finger of accusation at Col. Theodore Roosevelt and the Kansas City Star, for whatever may be the excuse for Roosevelt's friends for his attitude, the most kindly of which is that he is possessed of an overwhelming egotism and desire to again be President, the facts point to a different conclusion as to the motive of those who exploit his daily carping at the President.

Read the record and reflect:

Shortly before April 6, the date on which war was declared, August Seested, the general manager of the Star, made affidavit that he was then a subject of Kaiser Wilhelm.

Shortly after April 6, in a semiprivate hearing, when the law regarding the internment of alien enemies threatened to enmesh all those who favored or helped the Kaiser, Seested was made a citizen of the United States.

Almost the first act of the former subject of the Kaiser, who is legally responsible for every line printed in the Star, and who is held forth as the director of its policies and acts, was to engage Theodore Roosevelt as a writer.

Every article which has appeared under his name has been a covert or open attack upon the President.

Every article has been cunningly devised to disrupt the morale of the people, to divide them into quarreling camps, to frighten the mothers and fathers of the Nation for the safety of their sons, to inspire discontent and rebellion in the ranks of the boys in the cantonments.

Seested, who as early as the date of war swore that he was a subject of the Kaiser, prints them.

That Roosevelt, as President, did nothing to cure the "red-tape" evil of which he writes; that he threw his influence against the shipping bill at a time when that measure, asked by the President, would have enabled this country to buy and build a great fleet of merchant ships in preparation for any crisis, military or commercial; that he was so urgent in this that in March he telegraphed his protest to the Senate and held in line his old friend LODGE. These things are history and may be remembered or not, as you choose.

The big fact stands out boldly and should be known and understood: Roosevelt, whatever his purpose, is doing more to help the Kaiser by his propaganda of disruption and distrust than have all the pacifists and I. W. W. and Bernstorff's spies.

And the man who prints them says that he was from birth a subject of the Kaiser, who would crush a world that he may rule.

The people must know. Then they will perhaps not be misled by the poison that is poured out for them to read, may still have faith in our Government, may retain that splendid enthusiasm for liberty and democracy which has led this city to give generously of its youth, its money, and its labor for the great cause.

Mr. President, supplementing this excoriation by the Post, I quote confirmatory editorial expressions from the Toledo (Ohio) News-Bee, written under the name of its editor, as follows:

Mr. Roosevelt's general attitude seems patriotic, but he can not conceal his bitterness toward President Wilson. There is always the discordant note. It seems that he can not forgive Wilson for being elected President, or the people for having elected him. The moment a congressional investigation showed that this Nation had not fully equipped itself for war within much less than a year Col. Roosevelt cuts loose with the attack on the administration he had been holding back until opportunity offered.

And the attack was just what he had been preparing for in his public speeches and published editorials. It was tuned to that one discordant note. He attempts to stir up a bitter feeling toward President Wilson and his administration, and puts more pep into that than he does in any effort to stir up feeling against Prussian autocracy.

I charge that Theodore Roosevelt is playing politics with the war, and that he is starting now the congressional campaign of 1918 and his own presidential campaign of 1920.

STRANGE CONTRASTS.

Mr. President, strange things happen nowadays. For example, Roosevelt denounces the President and the Government in terms that should, as I believe they do, excite wide indignation—denounces in terms that would subject almost any other citizen to arrest—yet his utterances, which I say would be denounced

as treasonable if made by others—are widely published without even official protest.

Mr. PENROSE. Will the Senator permit me?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE. Yes; I yield.

Mr. PENROSE. Does the Senator deliberately advance the extraordinary doctrine here that every American citizen has not the right to say what he thinks of Mr. Wilson without going to jail?

Mr. STONE. Is that the question?

Mr. PENROSE. Yes; that is the question.

Mr. STONE. I answer no.

Mr. PENROSE. Does the Senator mean to say that an American citizen has not the right freely to express his views regarding Mr. Wilson if he be difficult to see, hidden away, and in his opinion surrounded by an incompetent personnel which has delayed preparedness for this war almost to a point of scandal? Does the Senator mean to say there is any statute or any principle of law that forbids such a citizen to express his views?

Mr. STONE. No.

Mr. PENROSE. That is the most extraordinary doctrine I have ever heard advanced.

Mr. STONE. I have not advanced it.

Mr. PENROSE. No; but the Senator came pretty near advancing it.

Mr. STONE. No; I did not, and I disclaim it.

Mr. PENROSE. The Senator practically stated that anyone who criticized Mr. Wilson ought to go to jail.

Mr. STONE. No; I did not say anything of that kind.

Mr. PENROSE. I should be glad if the Senator would explain it, because it is a rather important point.

Mr. STONE. I shall not explain something I did not say. I am now, for the edification of the Senator from Pennsylvania, drawing a contrast between Roosevelt and the plain citizen. I will give a specific instance or two to emphasize the contrast.

Let me quote some things Roosevelt has said under his own name:

Moreover, and this is the vital point, we now have the time to prepare only because the English and French fleets and armies protect us.

Again—

Our troops in France have received thousands of coffins, but an insufficient number of shoes. * * * Not more than one-tenth of our soldiers, taken altogether, are fit to go to battle, nine-tenths of our gallant and fine-spirited men are still without training, arms, and equipment that would permit them to meet any trained foe.

Again—

The administration now officially and complacently announces that the policy which at this very moment has proved disastrous is to be persevered in for the future. It therefore assumes complete responsibility for every blunder and delay and for all the misconduct, and announces that these blunders and delays and all this misconduct have taught us nothing and that we are to amble onward in the same futile path until disaster overtakes. Mr. Wilson's administration officially declares that we shall persist in our own folly until we are brayed in the mortar of dreadful calamity.

Again, published under the headline of "A Betrayal of Democracy," Mr. Roosevelt says:

When President Wilson says "We do not wish in any way to rearrange the Austria-Hungarian Empire; it is no affair of ours what they do," he is engaged in the betrayal of democracy, and if his present words are to be taken seriously, then his declaration about making the world safe for democracy was false and empty rhetoric. Either one statement or the other must be unsparingly condemned by all honest men. * * *

The President's proposal represents three separate betrayals. It is the betrayal of the Slavs of Austria, to whose cause our allies have pledged themselves and who form a democratic population oppressed by a militaristic autocracy.

It is the betrayal of democracy, because we abandon the majority, who are our friends, into the hands of a minority, who despise and hate us. It is the betrayal of free people everywhere to Germany, for Germany is now a world menace, chiefly because Austria and Turkey are her subject allies, and President Wilson's proposal is to leave them undisturbed.

Again—

It will be quite impossible to get at all the facts of our unpreparedness. Most officers will be very reluctant to testify to the whole truth. They know they will suffer if they do so, because they have seen the punishment inflicted by the administration on Maj. Gen. Wood for the sole reason that he dared to tell the truth about our shortcomings and dared to advocate preparedness in advance. * * *

For this reason I am not at liberty to quote the generals, colonels, captains, and lieutenants of the Artillery, Infantry, Medical Corps, and Quartermaster Corps who have told me of their troubles with unheated hospitals, insufficient drugs, summer underclothes in winter weather, lack of overcoats, of shoes, of rifles, of ammunition, of cannon. But in the camps I visited I saw some things so evident that no harm can come to any officer from my speaking of them.

I might go on quoting this sort of stuff ad nauseum, and all these things were written deliberately—not spoken on impulse, but written deliberately—by Mr. Roosevelt. These words, and others of like import—which I charge to be in substance and effect false words—have been spread broadcast throughout this Nation and throughout the world. The only possible effect of these widely published utterances of this man has been, as they were designed to be, to discredit and bring the present Government into public disfavor and weaken its hold on popular confidence. That seems to be the Rooseveltian standard of patriotism.

Mr. President, can we forget, should we forget, that the present Government is charged with the mighty responsibility of managing the tremendous affairs connected with the conduct of this war? This Government has been charged by the people with this responsibility. Does not patriotism require—aye, absolutely demand—that in this time of war every man should stand behind this Government and support it?

Mr. President, I have quoted these utterances of Roosevelt for a double purpose. First, to show that his vaunted claim, self-advertised, of a superior brand of patriotism is empty; and, secondly, to inquire—now I come to the contrast I promised the Senator from Pennsylvania—why Roosevelt may say things with impunity which a citizen of lesser consequence dare not even repeat without danger of indictment for disloyalty.

I bring to you the case of a plain citizen without special note or influence. I give you this particular case as one selected out of many for the sake of comparison. On December 21 last John D. Shanks, a traveling salesman, was coming into St. Louis on the Frisco Railroad. In a conversation on the train he was reported as making a certain statement to several gentlemen with whom he was conversing. I quote the exact words of that statement as reported in all—not in one, but in all—the St. Louis papers, and which I have had officially verified. The statement is as follows:

Wilson kept us out of war; like hell he did. It's a shame the way our soldiers are being treated in the concentration camps. They are not properly clothed, and the sanitary conditions are poor. Hoover's sugar plan is a big joke, too.

For saying this Mr. Shanks was taken from the train while in transit by policemen summoned by wire before he reached his destination, and, I am informed by the United States district attorney at St. Louis answering my personal inquiry, that Mr. Shanks is now under bond awaiting the action of a Federal grand jury for the crime charged against him for saying what I have quoted.

Mr. PENROSE. Will the Senator permit me to interrupt him for a moment?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE. I do.

Mr. PENROSE. The Senator said the man was taken from the train by policemen. Do I understand that he was taken from the train by the municipal police of St. Louis or by Federal agents of the Department of Justice?

Mr. STONE. That is a mere detail.

Mr. PENROSE. It is important.

Mr. STONE. If the Senator thinks so——

Mr. PENROSE. I assume the man was arrested by Federal agents of the Department of Justice appointed by Mr. Wilson or his Attorney General, and in my opinion his arrest was illegal, unjustifiable, and he can not be convicted.

Mr. STONE. As to that I express no opinion.

Mr. PENROSE. The Senator is giving a most impressive illustration of the high-handed methods of the present administration.

Mr. STONE. Mr. President, this commercial traveler—I do not even know him—merely repeated in conversation and in a minor degree what Theodore Roosevelt had said editorially in the Kansas City Star, and which editorial utterances had been reproduced in many of the important papers of America. This commercial traveler, coming into St. Louis on the Frisco Railroad, traveled through a section which is within the shining radius of the Kansas City Star. Therefore it follows that he must have read and pondered the antiadministration propaganda emitted by Roosevelt—the Star's special guide, philosopher, and friend.

What I wish to know is why Shanks should have been arrested for repeating what Roosevelt said, while Roosevelt goes free? Why should we make fish of one and fowl of the other?

Mr. PENROSE. Mr. President, I do not want to interrupt the Senator if it is disagreeable to him.

Mr. STONE. It is not.

Mr. PENROSE. I only thought that I could help to elucidate the Senator's argument. I consider that the instance the Senator has recited is outrageous, and I should like him to permit me——

Mr. STONE. The average man would think so.

Mr. PENROSE. I should like, if the Senator will permit me—it will give him an opportunity to rest for a minute—to

call the attention of the Senator to another equally outrageous case, if the Senator has no objection.

Mr. STONE. I have no objection.

Mr. PENROSE. It is a case that occurred in Louisville, Ky. One Ernest L. Schneider, a private at Camp Zachary Taylor, the new National Army cantonment near there, has been sentenced to 10 years at hard labor in the Federal prison at Atlanta, forfeiture of all Army pay, and to be dishonorably discharged. Stripped of its technicalities, Schneider was charged with villifying the President of the United States and voicing objections to the draft law.

Announcement that the War Department had approved the findings of the general court-martial which tried Schneider was made to-day, says the dispatch from Louisville, published in the press.

I want to say, Mr. President, that there is nothing occurring in Russia or any other country in Europe that presents a case of greater outrage than the conviction of this young man and a sentence for a period of 10 years.

Mr. STONE. But what I wish to know, Mr. President, is why Shanks and Schneider should have been arrested for repeating what Roosevelt said, and why Roosevelt goes free? I am speaking of the leader of your party.

Here is presented a contrast that might make men doubt the impartial and discriminating justice of our Government. Nevertheless, I have confidence in the high purpose of the Government to do justice to all men, although now and then cases do arise like this that would seem to challenge confidence in this behalf. But what is to be said of Roosevelt, who thus leads or misleads his fellow citizens?

Of all men, Roosevelt is himself most responsible for many of the things he denounces. He does his work artfully. In the front of his propaganda he throws a deceptive glamour—a sort of political-patriotic camouflage. I charge that Theodore Roosevelt, whether willingly or out of sheer madness is unimportant, is in effect the most potent agent the Kaiser has in America. I can not escape the belief that this exceptional colonel, who has played so many games of questionable politics, is now playing another game of his peculiar brand for a very great stake.

Mr. President, on this proof alone showing Republican partisanship, and without further extending it as I might, I am willing to rest the case and submit it to the country.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Idaho?

Mr. STONE. I do.

Mr. BORAH. Is the Senator going to present any proof that Col. Roosevelt is a Republican? [Laughter on the floor and in the galleries.]

The PRESIDING OFFICER. The occupants of the galleries must be in order.

Mr. STONE. He says he is. He worked with you. I do not know that he works with the Senator from Idaho just now. He used to, but now I think he works with the Senator from Pennsylvania. [Laughter.]

Mr. PENROSE. If it would not be treason for me to say it, Mr. President, if the Senator will permit me, perhaps Mr. Wilson at his first election was under great obligation to Mr. Roosevelt.

Mr. STONE. If that be treason, we shall all of us have to make the most of it.

A PRENATAL DEFENSE.

In the Washington Post of Friday last a gentleman who writes for that publication under the name of George Rothwell Brown—one of the daily dope dispensers of the Post—in criticizing in advance the speech I am making to-day, undertook, in anticipation, to make a passionate defense of the Republican political attitude. He criticized the speech before it was born. I quote from his article:

> The facts are that Republicans believe that if anything is to be said touching on and appertaining to politics in the war they have a prior right in the premises.
>
> The Republican attitude is that the ablest members of the Republican Party are being deprived of an opportunity to serve the country as a result of political prejudice and for political reasons. * * *
>
> If Senator STONE forces the issue of politics in the war in the Senate he will be answered by the charge that for political reasons Roosevelt and Wood, as well as Taft, Hughes, and Root, are not being used by the Government.

I assume Mr. Brown speaks with some degree of authority after discussing the subject with his friends about the Senate.

Mr. Brown, presumably speaking for the Post, complains that the President has not brought into intimate relationship with his administrative work certain noted Republicans—namely, Roosevelt, Wood, Taft, Hughes, and Root.

Just a word or two about this to make the facts clear. Gen. Wood, for whom I have a high personal regard, has from the beginning of the war been in positions of high responsibility. His services and usefulness have not been ignored. It only so happened that the President and the War Department did not see proper to put Gen. Wood in supreme command of our forces in the field. That is the substance of the criticism. I believe Gen. Wood to be a strong man, but also I believe there are others just as strong as he in the Army. I believe Gen. Pershing is his equal—and here I may add that Gen. Pershing ought by education and experience to be a better-trained soldier than Gen. Wood. I do not disparage Gen. Wood, I could only praise him, but I have full faith in Pershing, and Pershing is a Republican as well as Wood. My faith in Pershing is not due to his politics, although I do not in such a case consider that of the slightest importance and refer to it only to show that Gen. Wood was not discriminated against on political grounds by the appointment of Gen. Pershing, if by the furthest stretch it could be said he was discriminated against at all, which I deny.

Mr. Brown complains that the services of Mr. Elihu Root have not been utilized. Mr. Brown, like others I know of, evidently regards Mr. Root as a sort of Jove sitting on Mount Olympus. I do not estimate him so highly as that, although I do esteem him as a man of most excellent and superior ability. He is a lawyer of renown and has behind him a most creditable official record. Mr. Brown is mistaken in his supposition that the President has ignored Mr. Root. My understanding is that Mr. Root has been frequently consulted by both the President and Secretary of State. Moreover, the President sent Mr. Root at the head, at least practically so, of a great mission to Russia. While he was at Petrograd and Moscow we read cabled columns of glowing description of the mighty work he was doing there. We were led to believe that he had settled for the good of this country and the allies the whole Russian situation, so as to leave little doubt as to the sympathetic attitude of the great Republic new born in northern Europe. I would not say anything to discount this patriotic service undertaken in the face of great difficulties, but evidently these descriptions were overdrawn. However, the fact remains that in this instance of incalculable public concern Mr. Root was called by the President into a service of the highest moment and which put his capacity for great achievement to the test. The result speaks for itself. Plainly, Mr. Root has not been neglected.

As to Mr. Roosevelt I have already spoken. Mr. Taft and Mr. Hughes I pass by with respectful silence, without comment on Mr. Brown's suggestion as to them. Mr. Brown, speaking through the Post, supposedly with its approval, seems to favor a bipartisan management of the war and a bipartisan organization of the executive department. Mr. President, the executive department is at least nonpartisan now, and so far I do not see that any particular good has come of that. Here it is apropos to refer to the fact that on Friday last Mr. William R. Willcox, up to that date chairman of the Republican National Committee, was appointed on an important commission by Mr. McAdoo, the Director General of Railroads. This appointment was made notwithstanding the very recent political utterances and activities of Mr. Willcox to which I have referred. Mr. Willcox was made chairman of the Republican National Committee by Mr. Hughes. He is the bosom friend and a political adviser of Mr. Hughes. It might well be said that in a political sense he represents Mr. Hughes. This appointment does not look as if the administration was discriminating against Republicans in general or Mr. Hughes in particular on account of politics.

CONGRESSIONAL INVESTIGATIONS.

Mr. President, passing now to the consideration of a somewhat different line of thought, I wish to say a few words on the subject of congressional investigations. Investigation has apparently become a passion with the Congress. I desire to say a word or two on general lines about this business.

Mr. President, I hope no sane man is so squeamish as to deny to the Congress their constitutional right of inquiry into any question of grave public importance, or who would clothe the head of a bureau with a power above the Congress of the United States. Nowhere else has any effort been made to thus suppress parliamentary power. It has not been attempted in England, France, Italy, or even in Germany. Let it not be said that parliamentary power in the United States is to be regarded as of less moment than in Europe.

But, Mr. President, there are investigations and investigations ad libitum, if not ad nauseum. I disclaim any desire to be hypercritical, but I beg to express the opinion modestly that investigations which concern especially our Military and Naval Establishments, and which concern the development of our shipping facilities, and other actual war activities—activities which directly concern the conduct of those war affairs in which the whole world is interested—should be guarded against undue pub-

licity. I do not mean to say that even matters of world-wide consequence should not be made the subject of inquiry by the authorized agencies of the Senate and House of Representatives. I have no such thought. But as to matters of the kind I especially refer to—essentially war matters—I can not but feel that it is unwise to make them the subject of public or even semipublic exploitation. I can not believe that a world-wide advertisement of alleged deficiencies in our war activities, even if ultimately found to be true in whole or part, whatever the facts may be, is necessary to bring about such administrative reforms, as the circumstances demand. Therefore I can not but doubt the wisdom of the program we have adopted of wide-open investigations into almost everything that might be made the subject of criticism of the administration since our entrance into the war nine months ago. Do not understand me as meaning—for I do not mean that—that administrative errors, whether of omission or commission, should be concealed from our people; far from that. I have in mind only the proper occasion and the proper method of doing things of this sort. Of course mistakes have been made by the Government—doubtless many and grave mistakes. In the circumstances that was inevitable. But is it necessary for us to stand on the housetops or hilltops and proclaim these mistakes with a loud voice to the whole world? Considering the stupendous and almost unsolvable problems suddenly confronting the administration when the Congress declared for war in April last, and in view of all the difficult circumstances of the environment into which we thrust ourselves when we plunged into this world war, I take the liberty of declaring it as my matured belief that the achievements of this Congress and of the administration, accomplished amid unprecedented conditions, signalize a degree of marked success without parallel in the world's history. Of course mistakes have been made. The Congress have made mistakes; may I not venture to say that even the Senate has not been infallible; and almost inevitably the various military, naval, and civil executive departments, including even the President himself, upon whom, altogether, the chief burden of preparation has fallen, have made mistakes in the gigantic preparatory work so suddenly thrust upon them.

THE SPANISH WAR.

Why, Mr. President, even during the Spanish War, when the Republican Party was supreme, mistakes were made by our high Government officials, no doubt for the most part inevitable mistakes. We plunged as suddenly into that war as into this one, and with the same general lack of preparation. A Volunteer Army was raised and gathered together in various concentration camps, ready to be sent to Cuba or the front as the need therefor should arise. In a way we had then the same difficulty in supplying our soldiers with adequate equipment as we are now experiencing on a larger scale; even in a more pronounced degree we then encountered the same difficulty we are now encountering about sanitation and sickness in the concentration camps, some of the camps at that time becoming so bad that they were abandoned; then, also, the Government was showered with complaints of public corruption, inefficiency, and waste far beyond anything of that kind we have so far had to deal with in this war of incalculably vaster proportions; and we then had complaints, which, fortunately, we have so far escaped in this war, not only of insufficient food but of unsound food furnished our soldiers. It is too early yet to forget the scandals about embalmed beef. I am not indicting or censuring the officials of that day; they did their best, and did well, and I believe that the scandalous stories circulated at that time were grossly exaggerated. What I seek to impress by this reference to the Spanish War is that mistakes were made, inevitably made, even during the short period of that skirmish we had with Spain. I say "the skirmish we had with Spain," but I do not say that in disparagement of the brave and splendid men engaged in that memorable war, but that is all it amounted to as compared with the tremendous task upon which we are now engaged. Of course, mistakes have been made during the last nine months, but I reaffirm what I stated a moment since, that, all things considered, the achievements of the administration have been characterized by an extraordinary degree of success, and the marvel is that so few mistakes of particular importance have occurred.

But why should we flaunt our mistakes, whatever they are, great or small, before the world? Should we not rather deal with them as our exclusive business, without undue present publicity? There are times for doing things and ways of doing things, but, as I see it, the right way of doing these things of which I speak was to do them so as at least not to unduly advertise our weaknesses to the enemy. The value of a bold front is a mighty factor in the equation of war. And hence I have thought that if there be faults and weaknesses in the administration, let them be flaunted to the world hereafter—hereafter, when the time for harm in flaunting them has passed—but not now. We are now in the depths of a desperate war, and this is the time, above all times, for universal national sympathy, cohesion, and solidarity.

Mr. President, I merely give voice to the vision of things as they appear to me. My appeal now is first and especially to my colleagues on this side of the Chamber to stand firmly against influences calculated to mislead us, and then, secondly, I appeal to my colleagues on the other side of the Chamber to thrust back the evident rising tide of partisanship which threatens to sweep them off their feet. I have so spoken of the rising tide of partisanship on the other side with reluctance and without bad feeling, and have spoken of it only because I feel I should speak of it in the public interest. I wonder if Senators seriously reflect upon what it is they are starting in to do. What indeed is it they are trying to do? If we are to judge by what we see going on and by what Republican leaders are saying in disparagement of the President and the majority in Congress there should be little trouble in the public mind to determine what they are up to. Their purpose is to elect a Congress which would be out of harmony and unsympathetic with the President. What would happen to the Wilson administration if the Republican Party should have control of the next Congress? If I were adept in the use of Billy Sunday classics I should say the President would have "a hell of a time." [Laughter.]

Mr. President, partisanship and politics must be kept out of the war. There are most vital questions now demanding grave consideration and discussion, and other questions of far-reaching moment to our national life will arise in the immediate future, and I hold, Mr. President, that the highest considerations of patriotism demand that all these questions should be met, considered, and determined with an eye single to the national honor and welfare, divorced from all thought of partisan advantage. Any other course would be intolerable. Let us wait until the war is over and the world sane again before we renew too fiercely our old-time conflict for party supremacy. During this period of national stress and world horror through which we are passing we must place country above party.

Mr. President, I asked and think I obtained leave to print in the RECORD certain data showing the appointments made by different governors of their war agencies. If I have not obtained leave to print these in the RECORD, I now ask permission to print them.

The PRESIDING OFFICER (Mr. KING in the chair). Without objection, the request of the Senator from Missouri is granted.

The matter referred to is as follows:

1. BY REPUBLICAN GOVERNORS.

CALIFORNIA.

Republican governor. State council of defense: Republicans, 29; Democrats, 4. Executive committee of State council of defense: Republicans, 11; Democrats, none. Women's committee, State council of defense: Republicans, 19; politics unknown, 4. Federal food administrator: Republican. Federal fuel administrator: Democrat. Special agent, War-Trade Board: Republican. Chairman of the committee of four-minute men: Republican. Total Republicans, 63; Democrats, 4; politics unknown, 4.

CONNECTICUT.

Republican governor. State council of defense: Republicans, 8; Democrats, 2; Progressive, 1. Chairman county organizations: Republicans, 8. Chairmen of subcommittees of State council: Republicans, 9; Progressive, 1. The personnel of subcommittees of State council and county committees overwhelmingly Republican. Federal food administrator: Republican. Federal fuel administrator: Republican.

DELAWARE.

Republican governor. State council of defense: Republicans, 6; Democrats, 4. Federal food administrator: Vacant. Federal fuel administrator: Republican. Federal fuel administration, vice chairman: Republican. Federal fuel administration, member for Sussex County: Republican. District draft board: Republicans, 3; Democrats, 2. War savings stamp committee: Republicans, 3; Democrats, none. State food council: Republicans, 6; Democrats, none.

ILLINOIS.

Republican governor. State council of defense: Republicans, 12; Democrats, 3. Federal food administrator: Republican. Federal fuel administrator: Republican. All other war-service positions, except a few members of exemption boards, held by Republicans.

INDIANA.

Republican governor. State council of defense: Republicans, 11; Democrats, 8 (chairman of State council is Will H. Hayes, chairman of Republican State committee, who continues political activity through his committee). Supervisory officials, under State council: All Republicans. State conscription agent: Republican. State food administrator: Republican. State fuel administrator: Democrat (not appointed upon recommendation of State council, which recommended a Republican; see Cincinnati Enquirer report).

IOWA.

Republican governor. State council of defense: Republicans, 17; Democrats, 4. Federal food administrator: Republican. Federal fuel administrator: Republican. State fuel administration: Republicans, 6; Democrats, 2. War-savings-stamp committee representatives, Republican.

KANSAS.

Republican governor. State council of defense: Republicans, 39; Democrats, none. Independents, 2. State food administrator: Republican. State fuel administrator: Republican. Red Cross work: Republican. State conscription agent: Republican.

MAINE.

Republican governor. Committee on public safety: Republicans, 10; Democrats, none. Associate members: Republicans, 70; Democrats, none. Federal food administrator: Republican. State committee on food production and conservation: Republicans, 8; Democrats, none. Seed-saving committee: Republicans, 5; Democrats, none. Head of food-conservation campaign: Republican. Live-stock committee: Republicans, 4; Democrats, 1. Marketing committee: Republicans, 8; Democrats, 2. Exemption boards, first district: Republicans, 3; Democrats, 2; second district, Republicans, 4; Democrats, 1. Maine representative, Red Cross: Republican. Liberty-loan commissioners: Republicans, 3; Democrats, none.

MINNESOTA.

Republican governor. Public-safety commission: Republicans, 6; Democrats, 1. Federal food administrator: Republican. Director of milling division: Republican. Northwestern representative United States Wheat Corporation: Republican. National head, United States Wheat Corporation: Republican. Federal fuel administrator: Republican. War-savings-certificate committee headed by a Republican.

NEW HAMPSHIRE.

Republican governor. State council of defense (committee on public safety, executive committee): Republicans, 9; Democrats, 4. Seventy-five per cent of the chairmen of subcommittees appointed by State committee are Republicans. Officers, State Defense League: President, Republican; honorary president, Republican; secretary, Republican; treasurer, Republican. Chairman, Red Cross work: Republican. Federal food administrator: Republican. Federal fuel administrator: Republican.

NEW JERSEY.

Republican governor. State council of defense, executive committee: Republicans, 6; Democrats, 1.

NEW YORK.

Republican governor. State council of defense: Republicans, 5; vacancies, 2. (These vacancies represent places authorized by the act but which have never been filled by the governor.) State food supply commission: Republicans, 4. State food control commissioners: Republicans, 2; Independent, 1. State council of farms and markets: Republicans, 11. Exemption boards (up-State): Northern district, division 1, Republicans 5; division 2, Republicans 5; division 3, Republicans 5; western district, division 1, Republicans 4, Democrats 1; division 2, Republicans 5; division 3, Republicans 5; southern district, Republicans 5; eastern district, Republicans 5. New York City boards: Republicans, 28 (headed by Charles E. Hughes); Democrats, 2. Total, Republicans 82, Democrats 3, Independent 1.

OREGON.

Republican governor. State council of defense: Republicans, 8. Federal food administrator: Republican. Northwest manager, grain division: Republican. Pacific coast manager, milling division: Republican. Four-minute men committee: Republicans. Pacific coast agent, War Department training-camp activities: Republican. Oregon manager, Fleet Corporation: Republican. Director of work, spruce-production manager, etc.: Republican. Liberty-loan-sale board: Republicans, 6. Federal fuel administrator: Democrat.

One Democrat out of the bunch.

RHODE ISLAND.

Republican governor. State council of defense: Republicans, 11; Independent, 1. Federal food administrator: Republican. Federal fuel administrator: Republican.

SOUTH DAKOTA.

Republican governor. State council of defense: Republicans, 13; Democrats, 0. Federal food administrator: Republican. Federal fuel administrator: Republican. Director, war-savings-stamp sales: Republican.

Another clean sweep.

VERMONT.

Republican governor. Public-safety committee: Republicans, 43; Democrats, 11. Federal food administrator: Republican. Federal fuel administrator: Republican. Head of war-savings-stamps committee: Republican. District exemption board: Republicans, 5; Democrat, 1. Appointed judge advocate: Republicans, 2.

WISCONSIN.

Republican governor. State council of defense: Republicans, 13; Democrats, none; Socialist, 1. Federal food administrator: Republican. Federal fuel administrator: Republican. No Democrat has been appointed to the office of county food or fuel administrator in any of the counties of Wisconsin. Examination boards and district appeal boards will average 90 per cent Republicans and Socialists.

2. BY DEMOCRATIC GOVERNORS.

COLORADO.

Democratic governor. State council of defense: Republicans, 14; Democrats, 7. Food administrator: Republican. Fuel administrator: Democrat. Chairman Red Cross work, mountain division: Republican. Chairman liberty-loan campaign: Republican. Liberty loan, women's committee, chairman: Republican. Liberty loan, women's advisory committee, chaiman: Republican; members, 35 Republicans. Liberty loan, committee on finance, chairman: Republican; members, 6 Republicans. War-savings committee headed by a Republican.

IDAHO.

Democratic governor. State council of defense: Republicans, 15; Democrats, 10. Federal food administrator: Republican. Federal fuel administrator: Republican. Chairman Red Cross work: Republican. Chairman State liberty loan committee: Republican.

MISSOURI.

Democratic governor. State council of defense: Democrats, 12; Republicans, 9; Independent, 1. Federal food administrator: Democrat. Federal fuel administrator: Democrat.

MONTANA.

Democratic governor. State council of defense: At large—Republicans 3, Democrats 4, Independent 1, Farmers' Equity Society 1; county representatives—Republicans 75, Democrats 54; chairmen county councils of defense—Republicans 27, Democrats 16. Federal food administrator: Republican. Food campaign manager: Progressive Republican. Federal fuel administrator: Democrat. Executive secretary, fuel administration: Republican. County fuel committees: Republicans, 64; Democrats, 65. Chairmen county fuel committees: Republicans, 26; Democrats, 17.

NEVADA.

Democratic governor. State council of defense: Republicans, 4; Democrats, 7. State food administrator: Republican. Assistants to food administrator: Republicans, 11. State fuel administrator: Democrat.

OHIO.

Democratic governor. State council of defense: Republicans, 18; Democrats, 10. District exemption boards of appeal: Sixty per cent Republicans. Every major appointment of war positions in Ohio made by the Federal Government, Republican. Ninety per cent of commissions issued to civilians in noncombatant arms and three-quarters of commissions in fighting arms of military service were issued to Republicans. Federal food administrator: Democrat. Federal fuel administrator: Republican.

UTAH.

Democratic governor. State council of defense: Republicans, 20; Democrats, 17. Federal food administrator: Democrat. Executive secretary, food administration: Republican. Federal fuel administrator: Democrat. Executive secretary, fuel administration: Republican. Director war-savings-stamps sales: Republican. Chairman executive committee, liberty-loan campaign: Republican.

WASHINGTON.

Democratic governor. State council of defense: Republicans, 11; Democrats, 3. Federal food administrator: Republican. Federal fuel administrator: Republican. District manager Shipping Board: Republican. Representatives War Trade Board: Republican.

It is hard to believe that this governor is a Democrat.

WEST VIRGINIA.

Democratic governor. State council of defense: Republicans, 6; Democrats, 8; secretary of council and assistant, Republicans. Federal food administrator: Republican. Federal fuel administrator: Democrat. Director war-savings-stamps sales: Republican. Exemption-appeal boards, northern district: Republicans, 4; Democrats, 1; southern district, Republicans, 2; Democrats, 3.

WYOMING.

Democratic governor. State council of defense: Republicans, 4; Democrats, 5. Federal food administrator: Democrat. Federal fuel administrator: Republican. Director war-savings committee: Republican.

Mr. LODGE. Mr. President, nothing during this war has been so profoundly gratifying to me as the fact that since last April there have been no political lines drawn in the Congress of the United States. There have been until to-day no political speeches which I have heard; there has been no political voting; both branches have labored together with the common desire to prosecute the war to the quickest possible conclusion. To-day the Senator from Missouri, greatly to my regret, has made a distinctly political speech. I do not propose to imitate his example by assailing Senators or Representatives of an opposite political faith from mine, but I must say a few words to repel his misrepresentations as to the Republican Party.

I can quite understand, Mr. President, that the Senator from Missouri finds it personally desirable to make such a speech as that to which the Senate has listened, but it is also a time when our personal desires should be made subordinate to the public interest and when we should not deliberately strive to revive party feeling. I can only hope that the speech will be as grateful in the quarters where he desires it to be grateful, as he expects.

Mr. President, the Republicans of the House and of the Senate have voted for all the great measures necessary for the war. They have voted for all the money asked, for all the loans authorized, for all the great powers to be given. There have been measures, Mr. President, desired by the administration which might have failed, which would have failed in one House, at least, without the Republican vote. The Republicans have, to my knowledge, cast no party vote since the 2d of last April, and they will continue to avoid casting party votes while the war is in progress.

Mr. President, if there has been partisanship anywhere since the war began it has not been in the Congress of the United States. Party politics have been pretty obvious, however, to everybody, to the most casual looker-on, elsewhere. While we were organizing all the industries and all the resources of the United States, as we needed to do in order to win this war, it has seemed to me at times as if it might be well to organize and use all the ability of the country. The parties of this country are pretty evenly divided, and to confine one party to the right to give their lives, their sons, their brothers, their husbands, to the armies and navies seemed to me not altogether best. I think it would have been better if they had been more largely called upon for work, and that we needed all our ability, not half of it, in the general service of the United States. I have found no fault, however, with this attitude. The only fault I

have ever found is that the administration has failed to take the best from its own party.

There has been a marked admiration shown for what have been called the dwellers in the twilight zone; a keen desire to appoint men, few in number, who have wandered from one party to another until some irreverent people have referred to them as "the mavericks of politics." These "mavericks," some pro-German before last April, usually pacifists, have been taken wherever possible, without regard, so far as one can see, to anything except their somewhat varied political record, and have been put in places of great importance. I have observed also that these wanderers generally permit themselves to be branded easily by some one who is able to admit them to green pastures and to comfortable stalls. The fault I find is in the administration's failure to call out the best ability in the Democratic Party, if Government service outside the Army must be confined to one-half of the people of the country. There are too many men exercising large powers at this moment, vested with great authority, who seem to the observer to have nothing to commend them except an insignificance which makes them solely dependent on the Executive pleasure. My criticism has never run on party lines and does not now.

Mr. President, the Senator has referred to investigations. I introduced one of the resolutions of investigation. The portion of the country from which I come was suffering very grievously from a shortage of sugar, amounting almost to a famine, and from a shortage of coal, and it seemed to me that it was an obvious duty for Congress to try to discover whether there was anything wrong in the policy which had been adopted and whether there was not some remedy that could be furnished. The resolution I offered was adopted by the Senate. The investigation has been carried out without one thought of partisanship or party lines, so far as I could see, in the subcommittee charged with the investigation, and headed by the colleague of the Senator from Missouri [Mr. REED]. In that subcommittee, as it has been throughout the Senate, there have been divisions of opinion, but they have not run along the party boundary.

As to the investigation being carried on by the Committee on Military Affairs, in my humble opinion no greater service has ever been rendered to the country by any committee of Congress than that committee has rendered in the last six weeks. Investigations censured! Is this Congress to stand by in silence while blunders and delays and needless losses go pouring past, and to be accused of treason if it tries to tell the truth and to make conditions better?

The Senator has referred to the Spanish War, which lasted three months. We were unprepared then, as we were unprepared last April, and mistakes were made then, even in that short time; but it will be remembered that at that time without congressional investigation the President changed his Secretary of War.

Mr. President, the Senator has spoken about these investigations being of assistance to the enemy in what they reveal. Certainly in the Committee on Military Affairs they reveal to the people of the United States many things which cry for remedy. They reveal very little, in my opinion, that the enemy does not know. But when you speak of the effect of these investigations, what do you think was the effect on our allies and our enemies alike when this Government, not yet fully immersed in war, deliberately closed down for five days all the industries of the country? What impression do you think will be given by that act? What will be the impression upon the German mind when they read of that order of the Fuel Administration?

I am not going into this point in detail. I have been passing a great many hours in considering it, and I shall have something to say about it later. But it is not well to speak of these investigations as having a bad effect and being hostile to the country when such an exhibition of impotence and failure has been made as is shown in that fuel order.

The Senator devoted a good deal of attention to Col. Roosevelt. I do not think it is necessary for me to enter upon any defense of Col. Roosevelt. He has been President of the United States. His life is an open book. Whatever mistakes may be charged against him, there is one thing that is certainly true. He never has had any secrets from the American people. They are capable of judging him, and they will judge him. He offered himself for service in the war. He was anxious to go into the Army in any capacity, and he was refused.

The Senator has attacked Col. Roosevelt for criticizing the President. He supported the President, at least, in trying to have the merchantmen armed and in the declaration of war. He is supporting the war in every way he can. His four sons are all in the war. Three are on the Flanders front at this moment. A disloyal man does not make such sacrifices as that. I think Col. Roosevelt was against the Shipping Board. I was. I did all I could to beat it in the protracted filibuster that ended in its defeat; and the main reason why it was defeated, in fact the dominant reason, was that at that time one great purpose of the act was to buy the German ships and give to Germany thirty or forty million dollars, perhaps more. Amendments to exclude them were voted down. That is why the bill failed, and it is well that it did fail.

The Senator says that Col. Roosevelt has been guilty of treason, because he has written certain articles which the Senator has read here. Is it treason to say that our lack of preparation has cost thousands and thousands of lives of our allies, hundreds of lives already of our own men, and uncounted millions of money? That is the hard, naked truth. Is it treason to say that? Is it treason to point to those camps? Then, Gen. Gorgas, the Surgeon General of the Army, ought to be court-martialed, for he was the first to call attention to the insanitary condition of those hapless camps.

Mr. President, it may be difficult for the Senator from Missouri to understand, but it is quite true, that there are men all over this country—and Col. Roosevelt is one of them—whose one dominant idea is to win this war, who are ready to make every sacrifice to do it, who are making every sacrifice in their power to do it, who forget their party in their effort to reach victory, who forget everything but their great, mastering purpose. But there is one thing those men will not do: They will not sit silent and accept mistakes and delays which they think may cause us to lose the war.

If it is their duty to support the administration as they have done, they will do it. If they think it is their duty to endeavor to improve conditions so as to help win the war, even at the expense of criticizing those in power in the administration, that criticism they will make. The Senator need not worry about the rising tide of partisanship. It will never rise as high here, on this side as it has risen in his own breast. We shall stand by the war and the administration, as we have always stood; but because somebody chooses to call us partisans we shall not withhold the truth, as we see it, from the American people.

The Senator says the utterances of Col. Roosevelt are treasonable; and he brings up——

Mr. STONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Missouri?

Mr. LODGE. Certainly.

Mr. STONE. I beg the Senator's pardon. I did not say they were treasonable.

Mr. LODGE. I understood the Senator to say that in substance. He said men had been arrested and prosecuted for less; and he read the case of a man who made a remark in the cars, I believe, for which certainly he ought not to have been prosecuted, and yet he is being prosecuted by the officials of this administration. If they think Col. Roosevelt deserves prosecution as much as that man, why do they not prosecute him? He is visible; he can be found. He is also audible, and—this is what makes his crime—he is also readable. [Laughter.]

Ah, Mr. President, the Senator undertakes to put criticism and disloyalty on the same basis. We all owe to the President of the United States, who is charged with these terrible responsibilities, all the support we can give him, and we have given it ever since the 2d of April. But our highest allegiance is not to the President. Our highest allegiance is to greater things than presidents or governments. Our highest allegiance is to the country and the cause; and if we see things going wrong we shall call the attention of the country to them if we can. We shall vote the President all powers, all money, as we have in the past; but if the money is wasted and the war delayed, if the powers are ineffective in the hands to which they are entrusted, we should be traitors, indeed, if we sat silent and allowed the country to drift to disaster because we were afraid that somebody filled with the exuberant patriotism of recently acquired appointed office would call us treasonable.

Mr. PENROSE. Mr. President, I do not intend to detain the Senate by any lengthy address.

I listened carefully to the remarks of the Senator from Missouri, and was greatly surprised to find that they were not more formidable than they were. When I read in the newspapers during my absence from Washington last week that in some way I was to be challenged by the Senator from Missouri, I wondered what offense I had committed that the statute of limitations did not fully cover. [Laughter.] My relations with him were so pleasant and agreeable during the framing of the revenue law, when we sat together for six or seven months looking at each other across the table, that I was greatly concerned.

The article in the paper which I read said that "Senator Stone, a prominent politician from Missouri"—I have the

article here in my desk—" has assailed the Senator from Pennsylvania in connection with a speech that he is about to make, entitled 'Politics in the War'"; and I was somewhat concerned. But after hearing what the Senator has said, and realizing what a disinterested political character he always has been during his long career, I am surprised at my own moderation, and I plead guilty to everything he has said.

I say candidly that I do not think political parties ought to be abolished or submerged simply because the country is at war. So far as I can ascertain it is the general consensus of opinion that a bipartisan administration of the war, such as we witness in England, has not been a success. I am entirely willing to see the Democratic Party go on with the conduct of the war, and I am still more earnestly willing that the Republican Party shall maintain its organization and its integrity, to support the administration in every patriotic and laudable way, and at the same time to act as a party of just criticism.

Mr. President, I consider criticism by the minority party a patriotic duty; for how else are we to remedy inefficiency and abuses such as we all know to have prevailed unless we call attention to them? It is not likely that the Cabinet officers and the heads of the bureaus and departments who are guilty of these inefficiencies will themselves call attention to them; and if there have been notorious instances of delay in our preparedness due to inefficiency, I, for one, consider that I am performing a patriotic duty in calling the attention of Congress and the country to them and urging the removal of those officials who do not seem to be able to administer the trying duties of their positions. That, Mr. President, I say I consider my individual patriotic duty, under my oath of office as a Senator, and primarily the patriotic duty of the minority Senators in this body.

Of course I favor the restoration of the Republican Party to power in the Nation. I have been sufficiently impressed with the inefficiency in administration which has existed during the past year to be fully persuaded. So far as I am concerned, that a better administration, possessing to a greater degree the confidence of the business people of the country and of the great mass of the citizens of the country, would be given under a Republican régime; and I certainly have the right, without being open to a charge of disloyalty, to do all I can not only to carry Pennsylvania—as it will be carried next November by an overwhelming majority—for the Republican candidates, but any other State where a Republican Senator can be gained; and I consider that in so doing I am promoting the cause of efficient government and of legitimate party government, which is the only kind of government that can prevail in a free democracy.

I do not see, Mr. President, that there is any divine anointment upon the head of Mr. Wilson. The Senator from Missouri talks as if he were the Government; as if, in some way or other, notwithstanding all the blunders that are committed in his name and under his auspices, it were treason and disloyalty to criticize him. I am greatly in doubt as to how long the Senator thinks this policy of silence should prevail. Is Mr. Wilson to remain in power forever? Is there never to be another person in the presidential chair to succeed him, in the interminable years that are ahead of us during the war and during the complicated processes of peace settlement after the war? Why, Mr. President, the life of the Republic is to criticize Mr. Wilson or any other official along legitimate lines; and if this administration is inefficient or has not the confidence of the people—and I do not think it has the confidence of the American people—let us have legitimate party discussion between the two parties.

There are many things that could be mentioned by way of criticism of the present administration that, in my opinion, would bring vastly beneficial results to the country during the present war crisis; but I have kept scrupulously silent in this body, not wanting to embarrass the administration in any way, and, with one or two exceptions, voting for every measure that was submitted by the various departments, in most cases against my judgment and my private opinion, simply to give them every opportunity to succeed, and fully realizing that sooner or later the hour of reaction would come and the door of criticism would be wide open and the country would know what it has for some time been entitled to know.

Were I disposed to take a malicious advantage of the opportunity afforded by the speech of the Senator from Missouri, I might proceed now—for he has invited it—to make indictment of the present administration in many aspects of its inefficiency, and present startling facts which I have known for a long time; but at this late hour in the day, not having had any advance notice of the contents of the Senator's speech, I shall not go into this phase of the matter at any length. It is sufficient to say, however, Mr. President, that the Senator's action here to-day has deliberately invited the minority to proceed with this criticism; and the ill-advised and radical action of Mr. Garfield, the Fuel Administrator, operating under an act of Congress, which I am glad to say I voted against, has afforded the occasion and the opportunity for criticism and investigation which from this time on I hope will proceed with unabated vigor.

I have often admired the statesmen in England during this war, Mr. President. They have never hesitated to speak bluntly and plainly on the floor of Parliament. If there has been mismanagement in a military maneuver or an expeditionary force in any theater of the war, they have not hesitated to take the public into their confidence, to remove the general or the executive who was at fault, to reorganize, and go ahead.

The Senator has referred to my criticism of Col. House. I am glad of this opportunity, Mr. President, to state that I was shocked at the time to hear of the make-up of the American delegation to the allied war council in Paris. I will not go into the details of who Col. House is. I will confine myself simply to stating how he is described in a newspaper. This article is entitled:

First Full Roster of Delegates to Allied Paris War Council—Col. E. M. House, Personal Representative of President Wilson.

Then the rest of the names are given, including such notable international statesmen as Oscar T. Crosby and Thomas Nelson Perkins. Then a list is given of the delegates from other nations.

Great Britain: David Lloyd-George, premier; Arthur James Balfour, secretary of foreign affairs; Sir Francis Bertie, ambassador to France; Sir Eric Campbell Geddes, first lord of the admiralty; Gen. Sir William Robertson, chief of the imperial staff at army headquarters; Admiral Sir John Jellicoe, chief of the naval staff; Sir Maurice Hankey, secretary to the committee on imperial defense.

France: Her foremost statesman, George Clemenceau, premier and minister of war; Stephen Pinchon, minister of foreign affairs; Louis Klotz, minister of finance; George Leygues, minister of marine; Etienne Clementel, minister of commerce; Louis Loucher, minister of munitions; Victor Boret, minister of provisions; M. Lebrun, minister of blockade and invaded region; Andre Tardieu, high commissioner to the United States; Jules Cambon, general secretary to the foreign office; M. de Margarie, director of the ministry of foreign affairs.

Italy sent her foremost statesman, Prof. Vittorio Orlando, premier and minister of interior; Baron Sonnino, foreign minister; Francesco S. Nitti, minister of the treasury; Count Bonin-Longare, ambassador; Signor Bianchi, minister of transports; Gen. Alfredo Dallolio, minister of munitions.

Japan: Viscount Chinda, ambassador to Great Britain.

Belgium: Baron Charles de Broqueville, foreign minister; Baron de Gaiffier d'Hestroy, minister to France; Gen. Rucquoy, chief of the general staff.

Serbia: Nikola P. Pachitch, premier and minister of foreign affairs; Dr. M. R. Vesnitch.

Roumania: V. Antoresco, minister; Gen. Iliesou, chief of the general staff.

Greece; Eliptherios Constantine Venizelos, premier and minister of war; Athos Romanos, minister to France; Alexandre Diomede, former minister of finance; M. Agyropoulos, governor of Macedonia; Col. Frantzis; M. Rottassis, naval attaché.

Portugal: Dr. Affonso Costa, premier and minister of finance; Augusto Soares, minister of foreign affairs.

Montenegro: Eugene Popovitch, premier and minister of foreign affairs.

Brazil: Antonio Cÿnthe de Magalhaes, minister at Paris.

Cuba: Gen. Carlos Garcia y Velez, minister at London.

Russia: Mathieu Sevastopoulo, councilor of the embassy at Paris; M. Maklakoff, ambassador to France (by special invitation and not officially, as he has not yet presented his letters).

Siam: M. Charoon, minister at Paris.

China does not appear in the list as given out officially.

All were represented by their prime ministers and America by Col. House, the personal representative of President Wilson.

Mr. President, it is strange doctrine that we have personal government in the United States, that Mr. Wilson is represented personally and not the American Nation or the American people. That certainly does put a most novel phase upon the diplomatic amenities and methods of the present war, which, I think, are most profitable for discussion. Under ordinary conditions, had it not been for the earnest desire of the foreign nations in their great agony to secure the help of this enormously rich and resourceful Nation, it is likely that they would have refused to admit Col. House and the distinguished statesmen I referred to, Oscar T. Crosby and his associates. They would hardly have sat down to confer with men who were not officially their peers. What must these foreign nations think with their trained statesmen when we conduct negotiations in

such a cheap manner through personal representatives of President Wilson? Wilson is not the American Government. This Senate is a part of the American Government. The House of Representatives is a part of the American Government. Mr. Wilson simply represents the executive branch of the American Government, and very frequently by no means the most important branch of it.

Mr. STONE. May I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from Missouri?

Mr. PENROSE. Certainly.

Mr. STONE. The Senator is seemingly very much disturbed by the fact that the President selected Col. House as the head of the mission appointed.

Mr. PENROSE. I complain about the violation of all the amenities of diplomacy in sending a Texas politician as the personal representative of President Wilson to a conference of high officials. He should have sent the Secretary of State. I would not expect him to send a Republican.

Mr. STONE. I understood the Senator's attitude; but if the President was called upon, as he was, to select a man who would go to this great meeting in Paris to lay before that meeting the view of this Government as the President understood it, who should select that man—the President or some one else? Of course, if the Senator from Pennsylvania had selected him it would have been some one else; but the President selected Col. House, and according to the reports in the papers that have been cabled over here, and from what we have heard since Col. House returned, his service was a valuable one and a capable one and an exceptional one.

Mr. PENROSE. The humblest consular officer has to be confirmed by the Senate. He goes forth to foreign lands representing the great American Republic. I have never heard in the history of America of a President of the United States sending a personal representative. I have heard of czars and kaisers and kings doing it, but we are supposed to be in a world-wide contest for democracy, and these are not good democratic methods.

Mr. STONE. But the Senator——

Mr. PENROSE. Will the Senator let me finish, and then I will let the Senator take all the time he wants?

The PRESIDING OFFICER. The Senator from Pennsylvania declines to yield.

Mr. PENROSE. I maintain that the Secretary of State should have been sent to that important conference. I maintain that Col. House, so far as I know, is under no obligation of office. He holds no office. He is some kind of a mysterious traveler, with his expenses paid from a contingent fund, and has no official relation to the American people, and it was a violation of every propriety to have him thus unofficially sent to this conference and was calculated to make us lose standing and character before the peoples of civilized Europe.

Mr. STONE. May I interrupt the Senator now?

Mr. PENROSE. I will yield for an inquiry, but not for any long statement.

Mr. STONE. Well, as far as the Senator will indulge me. He complains that Col. House was a personal representative of the President. I ask the Senator if he is not catching on some newspaper story——

Mr. PENROSE. Every paper in the United States discussed his status.

Mr. STONE. The Senator is giving newspaper representations or characterizations of Col. House as the personal representative of the President. I venture to say his commission did not read in that way. I venture to say it read just like that of Mr. Crosby and Gen. Bliss and Admiral Benson.

Mr. PENROSE. They were not at the head of the commission; they were side lights.

Mr. STONE. No; he was named as the head of the commission, I assume, but not as the personal representative of the President. However, it is common talk around that Col. House is the personal representative of the President.

Mr. PENROSE. Can the Senator inform me who he is and what he does represent?

Mr. STONE. Yes; I can tell you.

Mr. PENROSE. If the Senator knows him very well, I would like to have a little sidelight on the colonel. [Laughter on the floor and in the galleries.]

The PRESIDING OFFICER. The occupants of the galleries must preserve order.

Mr. STONE. Col. House is a prosperous and successful——

The PRESIDING OFFICER. The Senator from Missouri will suspend for a moment. The occupants of the galleries must preserve order or the Sergeant at Arms will be instructed to remove visitors from the galleries.

Mr. LEWIS. Mr. President, I rise to request that the Presiding Officer shall inform the occupants of the galleries that the rule of the Senate is contrary to that of the House, that where the House allows displays we have no such rule in this body.

The PRESIDING OFFICER. I think the occupants of the galleries have been so advised.

The PENROSE. They have been advised for the last 130 years, Mr. President.

Mr. STONE. And without result.

Mr. PENROSE. Without effect, and they will be advised for another 130 years to the same effect.

The PRESIDING OFFICER. The Senator from Missouri is recognized for an interruption.

Mr. STONE. The Senator from Pennsylvania asked me to give him a little side light on Col. House. If I thought it necessary, I should indulge him with that performance, but I do not think it is necessary to say more than a word or two.

Col. House was a very successful business man in Texas, and it is to his credit to say that he wrought out a great career in the great State of Texas. He was a success as a business man. He accumulated sufficient of the world's goods to live in leisure if he desired to do so. He is a friend of the President. The President knows him. The President esteems him as a man of exceptional ability. He has sent him on various missions. They are intimate friends. The President thinks that here and there on important occasions he is the best man he can designate to perform an important public service.

Mr. PENROSE. Where did he get his military title?

Mr. STONE. I do not know.

Mr. PENROSE. I am curious to know. I want to get his full pedigree.

Mr. STONE. I do not know. In Missouri and elsewhere I meet so many men who are called colonel——

Mr. PENROSE. They are numerous in some of the Southern States.

Mr. STONE. They are very numerous.

Mr. LEWIS. If the Senator will allow me, if the Senator is serious in his inquiry and the information is at all important, the Senator may be advised that the title of "colonel" is that which was granted him by the governor of Texas, serving on the staff of the governor of Texas in the office of colonel. And, Mr. President, if the Senator will still allow, I beg to suggest at this time that that title as applied to many eminent gentlemen in every State of the Union is never used with disdain nor contempt when it has been obtained in that honorable manner.

Mr. PENROSE. I thank the Senator from Illinois for his interesting contribution to the discussion.

Mr. LEWIS. Let it be added, and also an informing contribution.

Mr. PENROSE. Yes, informing. I have no doubt if Col. House had an opportunity to display his military genius he would equal Napoleon or Cæsar, but doing a peculiar line of inquiry in Europe as the personal representative of the President and keeping under cover seems to be more in his line instead of going over the top. But I do not criticize the colonel's private life, his ancestral pedigree, or his business career. I object to the method of the transaction. I would not care who it is. I think the person sent by this great Republic in the hour of the agony of those nations to join in that conference should, at least, have been a man who had taken the oath of office to support the Constitution of the United States, and who had had some public career that inspired confidence on the part of the American public——

Mr. STONE. May I again——

Mr. PENROSE. And not a lobbyist from Texas, as I am informed the colonel was.

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield?

Mr. LEWIS. That statement of the Senator, Mr. President——

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from Missouri?

Mr. PENROSE. I am always glad to yield to the Senator from Missouri.

Mr. STONE. The Senator thinks that there ought to have been appointed to the head of this mission some one who had at least taken an oath of allegiance to the United States?

Mr. PENROSE. Yes, sir.

Mr. STONE. Mr. Root was appointed at the head of another mission of equal importance, and he did not take any oath, and I did not hear any complaint of that, nor did any member of the commission accompanying him take any oath.

Mr. PENROSE. Mr. President, Mr. Root was appointed on a mission to Russia and went over there to investigate. Here is an official sent to meet 10 or 15 delegations from nations, all of whom were represented by their prime ministers and our great Republic by a Texas colonel who made a liberal contribution to the Wilson campaign committee. He may be a

very fine man, but we are under the observation of the civilized world to-day and are subject to a considerable amount of criticism, and I have no doubt of the secret contempt on the part of some foreign diplomats. When a cheap thing like this is done, I think it is a patriotic duty to call attention to it, so that our diplomacy shall not still retain the brand of the chautauqua lecturer or a Texas colonel.

Mr. President, I was the author of one of the resolutions last summer to which the Senator from Missouri has referred. The so-called public information bureau gave out ridiculous and bombastical accounts of some terrible battle in mid-ocean with a submarine which turned out to be largely a figment of the imagination of the head of the bureau, and at the request of nearly all the members of the press gallery of this Chamber I took my life in my hands and offered a resolution to ascertain the names of the employees of the Creel Public Information Bureau. That resolution still is on the calendar, and I can not get it up. It seems that the enemy might get valuable information if some of the high salaries paid in the Creel Publication Bureau should be disclosed, and whenever the resolution is reached on the calendar some Senator on the Democratic side gets up and objects. I fail to persuade myself that the list of the names and salaries of the high-class literary artists and dope distributors, as the Senator from Missouri would describe them, sent to the Senate would give any valuable information to the enemy, and I hope I will be discharged from the suspicion of treason by reason of having offered that humble little resolution.

The Senator has invited this discussion, and I could make myself very disagreeable if I wanted to. It is currently reported in the public prints that he made his speech contrary to the urgent request of many of his colleagues, and so far does that opinion prevail on his side that one of his Democratic associates actually charged me this afternoon with having instigated the Senator from Missouri to make the speech, as being in some kind of collusion with him, all of which I want emphatically to deny.

But the Senator took me to task for criticizing the character of men appointed as inspectors of explosives. That might seem like a minor matter, Mr. President, when we have just been discussing Paris conferences and international matters, yet often we can learn a lesson from a little thing.

The law requires the appointment of an inspector of explosives, one in each State of the Union, at a salary of $2,400 and expenses, to be confirmed by the Senate. It is a place of some importance else why was it created? It was not necessary to have Col. House confirmed, yet it seemed important to have the explosive inspectors confirmed, and their duties, as I ascertained from reading the law, seem very important in States where there are any explosives. Of course there are some States, like North Dakota, where there are no explosives in the State, but in Pennsylvania, which is a mass of explosives from the head of the Ohio to the Delaware, it looked like a proposition where the office was of some importance, particularly as it is not unusual to have an alien enemy engaged in the attempt to blow up some plant. One of the duties after an explosion is for the inspector to visit the works and ascertain the cause and travel around the State generally at the expense of the Government.

I have refrained from making any recommendations to the present administration, realizing that as a member of the Republican minority I have no status, but I did undertake a civil inquiry for information, not with any desire to get an inspector of explosives appointed, but merely to ascertain the situation so that I might be able to advise a very large number of manufacturers who kept writing to me as to what was going to be done. I called up the Bureau of Mines and asked them how these appointments were to be made, whether by a civil-service examination or from graduates of a technical college or from men experienced in the manufacture of these articles. I was told in cold-blood by some gentleman at the other end of the telephone, and I have two witnesses to the conversation who were there, my secretary was one of them, that these men were to be appointed in States where there were two Democratic Senators, upon the recommendation of those two Senators; in States where there was one Democrat and one Republican Senator, on the recommendation of the Democratic Senator; and in States where both Senators were Republicans, upon the recommendation of the chairman of the Democratic State committee. That does not seem exactly to chime in with the views of the Senator from Missouri about a nonpartisan war.

Still I did not make any objection to the information; I let it go at that; but my curiosity led me still further, and I hope I was not guilty of treason nor disloyal to the Wilson Government in being curious. I believe that ought to be the proper name to term it now, the Wilson Government, not the American. I had curiosity to find out who had been appointed, and I discovered in Pennsylvania that a gentleman who had been engaged in the honorable occupation of selling Hire's root beer at retail was the inspector of explosives, and admitted that he did not know a thing about it, but if there was any hard work connected with it he would not take it. The Senator from Arizona was extremely solicitous to have his inspector acted upon immediately, and I discovered from several hundred letters from the State of Arizona that he was a cigar maker. My colleague from Connecticut will bear me out, I expect, in the statement that the inspector of explosives in Connecticut, which is full of ammunition plants, is an ex-saloon keeper, showing that while temperance rules in Pennsylvania rum is not an objection in Connecticut. In Indiana the chairman of the Democratic Party appointed the superintendent of his farm as an explosives inspector.

Can the Senator from Missouri blame me for introducing politics into the war when I express my opinion about the scandalous character of appointments made to these important offices, 48 altogether, all Democrats, all cheap and small Democratic workers in their various villages and towns without one vestige of qualification, and not on the recommendation of the duly elected and accredited people in the legislative branch of the Government, all of us supporting the war patriotically and disinterestedly, but upon the recommendation of Democratic politicians in Republican States. The Senator has queer ideas about politics in the war if he can overlook things like that.

I intend later on, Mr. President, for I have had it in my mind for a long while to address the Senate on the mistakes and inefficiency in the conduct of war, but I have not wanted to do it before it was necessary. I shall do it at a comparatively early date. I can not do it this afternoon; the subject is too vast, but there is no question about it. Why disguise anything from the country? It is known to the enemy that the inefficiency has been deplorable. While 25,000 or more men were killed every day and $50,000,000 or $100,000,000 have been spent in shrapnel and the expenditure of other munitions of war, the Secretary of the Navy, it is well known, would take papers home every night for three months at a time, delaying the decision of questions with his pettifogging economies. While this enormous expenditure of life and money was going on, I venture the assertion, without fear of contradiction, that his ignorance of business conditions and infirmity of purpose led him thus to procrastinate about what could have been settled in three days by any half dozen business men in the United States, whether Democratic or Republican business men.

That is one of the causes of this unpreparedness, and why disguise it? I hope to show this situation in detail later on in the winter, with a view to correction.

The Secretary of the Navy has been educated at the expense of the Government for six years, at a cost of many hundred million dollars. It may be that the Navy is getting along a little better now than the War Department, but the inefficiencies in the Navy Department are equally notable. When conditions in the cantonments are shown to the Senate and House it will not be a commendation of efficiency of the War Department. I am told on good information, upon which I entirely rely, that the outbreak of pneumonia is wholly due to the inability of the volunteer surgeons here in Washington to persuade the Government officials to use the ordinary modern methods of preventing pneumonia.

Now, we have this final disastrous outbreak—this fuel order. Who is the fuel controller, Mr. President? A college president who never saw a coal mine, probably, in his life and knows no more about coal than when he sees it burn in the stove. His appointment was not calculated to inspire confidence among the business men of America, particularly the coal operators. Certainly technical knowledge is of some importance to the Government. Mr. Garfield may be an admirable scholar, conversant with the classics in Latin and Greek and ancient history, but he is decidedly short on his knowledge of coal. He makes an order overnight. Without taking the public into his confidence, without giving them any notice, without discussing the matter, contrary to the advice of the Senate, he addresses an order which is more radical and unsparing than any edict of the most despotic government in the world.

In the great State which I represent the greatest confusion and resentment prevail on every side, and men wonder to what deplorable depths of inefficiency the American Government has got and what effect this radical action will have when it is known in Germany and in other nations. Certainly criticism of this order is not going to give the enemy any more information than he has.

I am not going into the coal situation at this time, but, in my opinion, there has been no necessity at any period for a shortage of coal in the United States. Last summer the coal operators met here in Washington from some 33 States producing bitumi-

nous coal, and they met the Secretary of the Interior, Mr. Lane. After three days' conference Mr. Lane suggested a rate of $3 a ton. The operators agreed to it, and never in the history of the Government were a body of men addressed in terms of greater eulogy in commendation of their patriotism and of their liberal spirit than were these men by Mr. Lane.

But hardly was the ink dry on the agreement when Mr. Daniels and Mr. Baker came in and upset the whole arrangement. The situation was reduced to hopeless confusion. The operators went home disgusted and demoralized and hopeless; profiteering and high prices again prevailed on every side, and the situation seemed to be incapable of correction. Congress passed the control bill, and the Government fixed prices for coal which, in many of the States, reduced the maximum of production. Coal became scarcer and scarcer, because the price was such that it could not be produced. Later on, of course, the railroad system of the country became broken down completely, and the transportation complications followed.

Mr. President, I want to say here that I do not think, in the few months we have been in this war, we have ever reached the point where it was necessary to interrupt the ordinary normal currents of commerce, trade, and industry; but somehow or other we have become obsessed with fads, and everything we read of having occurred in some much smaller country abroad is copied and brought to the Capitol by some bureau clerk, and we pass it without question. I think the time has come when that should stop; and there will be no politics injected in the war when I, as I have no doubt others will, challenge any further such legislation.

We fought the Civil War, which certainly tore the Nation to the very vitals, without all these things, and we are in no such situation to-day We are not invaded; our people are not plunged into the agony and the peril of France and Belgium up to the present time. Perhaps in many respects the war has been of benefit in a strictly selfish financial way from the point of view of enormous orders from foreign Governments to our industrial establishments, and from the fact that we perhaps will get a merchant marine, a Navy, and a National Army, such as we never would have got if we had not had the prompting and the necessity of the war. When the Civil War began the North had no navy; but within one year we had flotillas covering the Atlantic seaboard, the Mississippi River, and the Great Lakes.

If we had resorted to all the complicated shipping boards and diverse authorities and complicated crossing of wires that exist to-day, making "confusion worse confounded," we would not have had that Navy at the end of a year. I believe we could have got along very well up to the present time by letting things proceed in the normal way; to have invited bids for steel products and coal and other commodities; to have awarded them at prices which would have kept up the maximum of production and which would have insured promptness of delivery; and then, if the profits had been too great, to have reached out with the strong arm of the taxgatherer and taken them back. When your house is on fire promptness of action and maximum of production in the way of water or anything necessary to put out the fire is what you want. A saving of a few hundred million dollars, if, forsooth, for the sake of argument, that amount were saved, would be no economy when it meant delay and reduction in maximum production while these enormous expenditures in treasure and in life were going on every day.

I certainly think that it is to the benefit of the American Government and a patriotic duty to call attention to these things. So far as I am concerned, I am making a careful study of them and getting ready to call attention to them very fully. If, later on, the exposure of some of these things will lead to their correction, I shall feel that the task has not been in vain, and if at a later period it means a change of administration I shall not, perhaps, shed a tear.

I am at a loss to know what the Senator from Missouri has had in his mind in inviting this discussion. It would seem to indicate that the Senate really has no important legislative business before it just now, owing to the condition of business in the other House, and that perhaps we might as well adjourn over until the end of the week.

Mr. LEWIS. Mr. President, I beg to impose upon the Senate but for a moment, that I may correct impressions that have been left by the Senator from Pennsylvania [Mr. PENROSE] in the speech he has just concluded.

Mr. President, I have no purpose to enter into anything that may be called a partisan discussion. There is no one on this floor more than myself who has sought to avoid anything that could be colored with the charge of partisan prejudice. As I shall not enter upon it, I shall not invite it; but if it is put upon us, I will not shrink meeting it with such humble capacity as I might offer to oppose it; or if, sir, it shall be injected into the form of unjust indictment, and what I must term partisan and malicious impeachment, unjustified by facts, I shall denounce it and to the extent of my capacity vanquish it. If I am unable to serve with success in that respect, I can at least expose to the public such facts as from which the public itself can at least learn the truth and be just—that to others it may do justice.

At first, Mr. President, I desire to invite the attention of the Senator from Pennsylvania to his professions of cooperation in the Government service and to ask him, while he boasts, with a literary satire envied by the less gifted of nonpartisanship in the discussion he presents upon the officials of the Government, and while he acclaims a desire to aid the Government in upholding its officials, to consider of the reflections he has cast upon the Government envoy, Col. E. M. House. Will the able Senator not recognize that nothing can so much frustrate the real object for which Col. House went abroad or make unprofitable the service he rendered as the criticism from a United States Senator—from an honorable Senator from so eminent a State as Pennsylvania—holding him up as a man unworthy of the respect of this body, unentitled to the confidence of his country, and unfitted in mental stature to the dignity which the President has given him? What is more calculated to destroy the very object which he went to serve, to take from it the dignity which the Senator claims it should possess, and wrest from it completely all results, than the attitude of the eminent Senator from Pennsylvania in his voluntary assault upon a man who is so situated that he can not speak for himself in this Chamber, and who, I dare say, has in no wise ever inflicted the slightest affront or even discourtesy upon the eminent Senator from Pennsylvania.

Mr. PENROSE rose.

Mr. LEWIS. The Senator rises assumably to interrupt me. I now yield to him.

Mr. PENROSE. The Senator from Illinois was not stating my position correctly as I have stated it. If he prefers, however, I shall wait until he has concluded. Otherwise I shall try to correct him in a few words.

Mr. LEWIS. I shall be pleased to have the Senator interject anything at this time which he thinks essential or that might correct me if I am in error. I will say to him it may be now that I have betrayed to him the way that his attitude really appears, and that if he did not intend to present it in that way, and will gather from my presentation the way his arraignment will address itself to the country; if he has a new construction of his conduct, let him impart it to the country. I do not need correction to understand him.

Mr. PENROSE. The Senator does not quite yet understand me. I want to say, Mr. President, that I can hardly think Col. House is such a delicate piece of bric-a-brac that he must be kept under a glass case, protected from the contamination of criticism. All strong characters thrive on criticism, and it is not going to jeopardize his standing in the circles in Europe because I have called attention to what I consider a diplomatic irregularity in sending over as the head of a mission to meet the prime ministers of every other country, not the representative of the American Government but Mr. Wilson's emissary, his personal representative, without his even being under an oath of office or holding any office that I know of except to have his traveling expenses paid out of some contingent fund. I said nothing against Col. House personally.

Mr. LEWIS. Mr. President, I can readily appreciate how the distinguished Senator must, upon second thought, realize that his attitude calls for defense, and out of a charity of friendship long existing between us, if it were in my power, I would erase from his record that which he has performed to-day, knowing that he will at some time confront it with an honest character quailing as before a guilty thing.

Mr. President, I invite the Senator to recall what he did say. If this man House had been before the Senate on confirmation for some position before he had entered upon his task, the Senator would have been justified in expressing rumor or gossip, but when Col. House had served the Nation abroad—had finished his mission—then, to have the eminent Senator refer to him as a "Texas lobbyist" and say that he has been given information that such was his character, stamps him before the world in that category ever reprehensible, indeed contemptible, before the mind of modern statesmanship. It addresses statesmen of an exalted altitude, and informs them, as from the Senator, that it was such an obnoxious character that the President of the United States chose as his personal representative in matters of gravest world concern.

Mr. President, I now demand of the Senator, sir, what proof has he to justify himself on his honor in this place to have

justified that impeachment against an honorable citizen and upon which he asserts that accusation against a public representative of this Government?

Mr. PENROSE. Mr. President, the Senator from Illinois takes the matter entirely too seriously. It seems to me I touched lightly on a few phases of Col. House, more with a view of endeavoring to discover his training in diplomacy through his life than for any other reason. I thought perhaps his service on the staff of the governor of Texas might have given him a diplomatic training, and hence those inquiries. It may be that contact with the Texas Legislature developed his powers of discernment and ability to influence other men for purposes of his own. It was more in a light vein that I touched on that. The main thought I had in mind must be obvious to every Senator, that when we send a man over to meet the prime ministers of other countries they should meet their peer officially, and he should be a man not representing Mr. Wilson or any other individual member of the American Government but the whole American Government.

Mr. LEWIS. Mr. President, I have listened to the Senator from Pennsylvania in his deliberate delivery with patience—partly with admiration for adroitness, some amusement at the ridiculous, and a great deal of regret upon his conclusion, but I have not heard him say that he could offer any evidence to justify the charge that Col. House, who had been commissioned by this Government, was a "Texas lobbyist." If the Senator meant that casually, and if it is the habit of the Senator to insinuate insults upon any gentleman merely because he might serve a Democratic administration, he should confess that slandering a man was to him but playfulness, he owes it to the man or he owes it to this body to withdraw the charge and apologize for uttering it. If the Senator does not withdraw it, then he stands still asserting it without proof, without information, without justification, and in contempt of the honor that he owes a gentleman.

Mr. PENROSE. Mr. President, the term "lobbyist" is not necessarily one of opprobium. In many of the States now they license lobbyists. Doubtless in Texas they recognize lobbying as a regular profession, like lawyers who come here to appear before committees; they are not exactly lobbyists, they are lawyers. I am not very familiar with the technical definition of the word "lobbyist," but I have been told frequently by a number of gentlemen in whom I have great confidence that Col. House had a mysterious, hypnotic influence over the Texas Legislature.

Mr. LEWIS. Mr. President, when the distinguished Senator from Pennsylvania, the Hon. BOIES PENROSE, makes the confession that he is not advised as to the meaning of the word "lobbyist," he indulges in more humor than has heretofore characterized what has generally been regarded a most humorous performance, to wit, a PENROSE speech on the floor of the Senate. [Laughter.] The eminent Senator can not hope to have me accept that modest confession. It is because I know that there is no man in public life who is so well informed as to the meaning of the word "lobbyist" and who understands better the opprobrium it conveys than the Senator that I draw him to account and ask him if he will not withdraw the impeachment, knowing, as he must know, from all forms of experience, personal and political, the criminal character that that word invariably gives to any man to whom it is appended? I now, therefore, say that the eminent Senator should not have made such accusation. When he now admits, by his silence, that he has no proof of it, and then tells the Senate that from common, current rumor somewhere, some place, or from some man, whose name he does not give, he was willing to make such a characterization, he but impresses us of how true is the sentiment expressed by the great bard:

> No might nor greatness in mortality
> Can censure 'scape; back-wounding calumny
> The whitest virtue strikes. What king so strong
> Can tie the gall up in the slanderous tongue?

Mr. President, the Senator asserts upon a statement which he said he read in the newspapers that this gentleman, Mr. House, was sent as a "personal representative" of the President. I do not know in what particular capacity Col. House was commissioned. I, sir, have not been advised as to the wording of the commission of the delegation which he headed. I take it, as the Senator from Missouri has said, that possibly they were all commissioned to the same extent of authority. But, Mr. President, it does appear that from time to time Col. House was designated to certain, I might say confidential, undertakings, and that before the matter to which the Senator from Pennsylvania now refers had arisen, this gentleman had gone abroad upon errands in behalf of the Government of important nature. This was at the behest of President Wilson.

Now, I say to the Senator from Pennsylvania—and I ask of him most considerate attention—when he announces to the world from this great place and from his splendid elevation that this act on the part of the President was without precedent and in violation of the rules of Government, so much so that he would impeach it as unworthy the credit of his country, I invite him to the history of his land, and I recite for his information a few appropriate details: First, when Abraham Lincoln, the President of the United States, a Republican, had occasion to confer and consult with a set of gentlemen coming from abroad, who emboldened themselves to enter into the affairs of this Government to suggest matters of peace, did he name a member of his Cabinet, did he name an official of the Government? On the contrary, he chose as his personal representative his personal friend, a distinguished lawyer of the American bar, who had up to that time never held official position or station in America. President Lincoln not only did this in that instance, but afterwards, when that distinguished President was called upon to deal with a foreign affair of great and vital concern to America, he chose another private individual, by the name of Judd, of the city of Chicago, whose only entrance into politics previous to that was as Lincoln's personal friend and sponsor. Subsequently that gentleman was made minister to Prussia, as the Senator may recall in history.

I now invite the Senator's attention to the fact that when Grover Cleveland called a man named Blount, from the State of Georgia, and gave him what was called "paramount" authority and sent him to Hawaii to adjust the concerns of that island, an assault was made upon the appointment upon the floor of the Senate upon the ground that no such power to so do was in the President. Then partisan prejudice charged that Cleveland had committed an offense to Government in not sending the name to the Senate for confirmation. A committee of the Senate investigated the subject. At the head of that committee was no less a person than the eminent dead statesman and eminent lawyer, Senator Hoar, of Massachusetts. To the Senate a report was made. That report is extant and accessible to the distinguished Senator. That report sets out the justification for the act of Mr. Cleveland, citing the act of Mr. Lincoln, and referring, I may say to the distinguished Senator, to 11 consecutive instances in the history of this Government where just such an agency had been availed of as that employed by President Wilson in the matter of Mr. House. The reason for this course is to allow the President of the United States to choose a person in whom he has such confidence and of whom he has such knowledge that he can convey to him in a confidential way difficulties and matters of public concern which it might not be wise, or at least profitable, to betray at the time to the public mind. When the eminent Senator from Pennsylvania seeks to leave the impression upon the European world, hearkening to his utterance, at this critical hour that we had done something which to the American public was without precedent—an insult to diplomacy, an affront to the history of our Government—I appeal to him that he study the history of the diplomacy of America, that he again recur to the pages of the records of legislation, and inform himself on these things before he feels emboldened to make indictments without evidence and without information.

Mr. President, so far as I am concerned, I am not defending Col. House, the man. He needs no defense as citizen and man. I have but a kindly acquaintance with the gentleman, in no wise a confidential relation. I am speaking of Col. House, the appointee of the President, that it may not be held up again by any one nor by the Senator from Pennsylvania—charged again that the President of the United States did that which historically was not justified or that he honored a gentleman who in himself was not wholly worthy.

Mr. PENROSE. Mr. President, will the Senator permit a further correction?

Mr. LEWIS. I yield to the Senator from Pennsylvania. I wish to do him no injustice, and, if it appears that I have misquoted him, I prefer a correction.

Mr. PENROSE. There is a great difference, Mr. President, between sending a commissioner to some island to perform a certain mission—although I share the opinion with others that in the case referred to the proceeding was irregular and should not be repeated often—and sending a man or a delegation headed by that man to meet 10 or 15 distinguished representatives of foreign governments. If, for instance, the French Parliament should send some of the employees of that body to meet the Committee on Foreign Relations of the Senate, they would doubtless exclaim that they were entitled to meet the members of the French Parliament who were on a similar committee. I do not say this in any way to the detriment of the employees of the legislative body; they are often more useful

than some of the actual legislators, but they are not legislators. I claim that the dignity of the American Government and the decency of diplomacy required that a duly constituted commission, not these other gentlemen, should have represented America.

Mr. LEWIS. Mr. President, of course each time the Senator makes explanation it is in the form of an apology for his previous utterances, which, apparently, he will not admit as an apology, but is willing to have the country understand that he wishes to withdraw his previous assertion by correcting it with a second. His apology in this respect I do not interfere with nor would I prevent, but this much I will have him understand, that the able Senator seems to misapprehend the mission of which Col. House was the head. It was a mission to aid in concentrating the different agencies having to do with the expenditures of the allied countries in Europe and those of the United States. I advise the learned Senator that Mr. House, having previously been abroad serving the Government, was the one man in all America who had the personal acquaintance of these eminent foreigners to whom the Senator has referred and whose names he has read. By these men Col. House had been received upon two separate occasions. He had been a guest at their homes; by these he had been received in official station. He knows them intimately; they knew the trend of his mind; they knew the course of his thought; they knew the habit of his silence; they knew the security of conversation with him; they knew more—that he carried with him the mark of approval of the President of the United States. What man more appropriate than one who had been so trained, as he had in previous undertakings, and so tried, and so personally known to them, could the President have named? It was because of these claims of superior fitness on the part of Col. House that he was named. What Senator now will impeach the selection?

Now as to Mr. Crosby. I do not know Mr. Crosby personally. I think he is a Virginian of very high standing. I understand he is a gentleman of learning; that he has been long an officer of the Army, has been stationed abroad. He is a linguist. He has held several offices abroad and at home, and at present in the Government is Assistant Secretary of the Treasury. Surely the eminent Senator will recognize that in that particular position he was most fit to make an expression as to expenditures of the Treasury, which was the object of that gathering.

But I shall not enter at this time, sir, upon any defense of the gentlemen who made up the commission. My only purpose was to give the able Senator to understand that he had fallen into a very grievous error in his wrongful misrepresentation of the President, as well as of his envoy, Mr. House.

Mr. President, I will not trespass upon the time of the Senate longer, except to say that the Senator from Pennsylvania promises the Senate that at a future early day he will enter generally upon an indictment as to all the matters which he feels are the shortcomings of the administration, particularly as to the conduct of the war. When that time arrives I take it there will be Senators on both sides of this Chamber who will see that justice is done to those to whom an injustice may be done, if such shall be, by the Senator from Pennsylvania. But, Mr. President——

Mr. PENROSE. Mr. President, will the Senator, as a part of that program, help me to get through a little resolution I have offered requesting the names of the gentlemen and lady employees of the Creel Literary Bureau?

Mr. LEWIS. Mr. President, I can understand from the Senator's——

Mr. PENROSE. Will the Senator help me get that resolution through?

Mr. LEWIS. I can understand from the Senator's general social habit that his desire to get the names of the lady members might be personal. [Laughter.]

Mr. PENROSE. If I were capable of exciting the admiration of the fair sex like the Senator from Illinois, I would be rejoiced; but the day would not be long enough nor would I be skillful enough or have the artistic temperament to adorn myself like the Senator from Illinois so as to attract the fair sex. [Laughter.]

The VICE PRESIDENT. The galleries must remember that there is a rule of the Senate to the effect that neither approval nor disapproval can be manifested in the galleries, and that it is the duty of the Chair to clear the galleries if it does not cease. That order will be enforced on repetition of any manifestation in the galleries.

Mr. LEWIS. Mr. President, amidst the uproarious acclaim of the Senator from Pennsylvania in the galleries—a source to which he usually appeals by his speech, and seldom to the reason or wisdom of the lower floor—I lost much of his animadversion; but I take it that the last part of his remark was that he could not compete with me touching progress toward the lady members of the Creel cabinet for lack of ability of self-adornment, or adornment of himself by himself, or something of the kind. Let the Senator understand that if it is a matter of adornment that is attractive, I, poor me, would have to apply that to myself. He can lay the unction to his soul that nature has been so generous to him as to give him those courtly proportions that need only present themselves to the sight of a lady to have her succumb to immediate surrender. [Laughter.]

The VICE PRESIDENT. The Sergeant at Arms will clear the galleries if the outbreak of laughter and applause is repeated. The Senator from Illinois will proceed.

Mr. LEWIS. Now, Mr. President, I come to the Senator's observation of some moments ago. I will say to him, touching his resolution, that I really am not on the committee that has charge of it. I do not know what committee has jurisdiction of his resolution. I would aid him in any way to get out any resolution or any undertaking that he felt was important.

Mr. PENROSE. It is on the calendar.

Mr. LEWIS. And I trust that any resolution he may have hereafter will be one to be exactly fair, made personally to himself, and just to mankind.

Mr. President, I heard the Senator from Massachusetts [Mr. LODGE], who preceded the Senator from Pennsylvania, advert to the claim—and the charge will go out to the country through the enterprise of the American press—that the President of the United States had made appointments of persons whom the Senator from Massachusetts designated as incompetents, and referred to them as lacking the character of any form of capacity, and as being distinctively partisan. I fear, Mr. President, the eminent Senator from Massachusetts did not recall the roll of appointees. It is most unfair to leave upon the country the impression that President Wilson has made partisan appointments connected with the control of the Army or the execution of the law. Surely, sir, the Senator from Massachusetts might recall with satisfaction to himself that the very first officer named that the President had the right to designate was Gen. Pershing, in supreme charge of the Army in France, an eminent Republican, who made very free his opposition to the policy of this administration on the Mexican question, where he had a right to do so. That immediately afterwards the President named Gen. Bliss, of whom it must be said, from his frank statement, aside from voting for Grover Cleveland, that there has been no exhibition that he was a Democrat in any way whatever. And in this connection, sir, it will not be overlooked that Gen. Goethals has received two different appointments—an eminent Republican, a distinguished soldier, who in no wise is a Democrat. When we sent the commission to Russia we put at the head of it ex-Senator Root, former Republican Secretary of State, former Republican Senator, a gentleman eminent in letters and in the law. We sent Col. John F. Stevens, the appointee of President Taft in connection with the Panama Canal Commission, and who also held his honors under President Roosevelt. These were not Democrats.

Mr. President, it will not be forgotten also that in naming Mr. Hoover at the head of the Food Commission the President appointed a man who was not a Democrat, who was not a member of the Democratic Party, and who can not be said to be such.

Dr. Garfield was a Republican. He is the head of the Fuel Administration. He ran for Congress, was his party's candidate, and was from time to time presented by that honorable party.

The eminent Senator surely, as to these gentlemen, can not turn upon us and say: "These eminent gentlemen represent the Democratic Party." They can not be said to be Democrats nor partisans, nor can it be said that the President named them as incompetents or "nomads of politics," as the eminent Senator from Massachusetts would have us understand.

Then, sir, on the financial board there is Mr. Julius Rosenwald, of Chicago, who was the head of the finance committee of Mr. Taft's campaign. With him, sir, is Mr. Shaw, of the Economy Commission, the chairman of the Taft business men's finance campaign. Then, sir, comes Mr. Davison, of Morgan & Co., of New York, a Republican; and Mr. Vanderlip, who was the treasurer and practically the head of the financial resources of the Republican campaign in three different campaigns, apart from being an officer of what I may term the Republican machinery of the State of New York. Surely these gentlemen can not be said to be Democratic appointees.

Mr. PENROSE. Mr. President, will the Senator permit an observation on that point for the purpose of elucidating his statement?

Mr. LEWIS. Certainly. I yield to the Senator.

Mr. PENROSE. Those gentlemen are the salvation of the situation. They are here as volunteers—what are known as dollar-a-year men. They are devoting their time, at the sacrifice

of their business, to the welfare of the country. If they were not here, and the officeholders alone were here, a very different story would be told.

Mr. LEWIS. Mr. President, as far as I am concerned, I would not detract from any glory of these gentlemen if I could. I am delighted that they enjoy it justly. I am pleased that my Government can obtain the benefit of their services, of whatever nature they may be. But I can not permit in one breath the Senator from Massachusetts to make the charge that we have named no man of consequence or fitness from among Republicans and that nothing has been shown but incompetency, while on the other hand the Senator from Pennsylvania takes credit to his party because of the creditable character of the men we have named to the public service who are Republicans. The inconsistency is too glaring.

Mr. PENROSE. Mr. President, if the Senator will permit a further observation——

Mr. LEWIS. I yield to the Senator.

Mr. PENROSE. What the Senator from Massachusetts meant, I take it, was that during this war the administration has appointed to office—using the word "office" in the technical sense—no one who was not a Democrat or a so-called Republican who voted for Wilson, and that the situation has been saved from utter breakdown and demoralization by these so-called volunteer boards, through which some of the greatest men in America have come here to try to help the administration out of the holes in which it found itself.

Mr. LEWIS. Mr. President, as an indication that he is in error, the Senator probably has overlooked the fact that the chairman of the campaign committee seeking to elect Judge Hughes, his candidate, for President, was lately named to a very responsible place on the railroad board with the direction of the President of the United States. I refer to Chairman Willcox.

Mr. President, the Senator would draw a distinction between men who draw salaries and men who are named to office for great responsibilities and receive no pay. Before the Senator departs, as I see him moving as to the door, may I——

Mr. PENROSE. I am going to stay here.

Mr. LEWIS. The Senator's back is attractive, but his face is sometimes alluring. [Laughter.] He was retreating face forward.

Mr. PENROSE. I did not hear the Senator.

Mr. LEWIS. I see the Senator went over to confer with his colleague. I do not wish to disturb the counsel the senior Senator from Pennsylvania expects to obtain from his colleague, the junior Senator from Pennsylvania [Mr. KNOX], knowing how capable the junior Senator from Pennsylvania is to impart to any man refuge from a severe situation.

Mr. PENROSE. I was conferring with the Senator from California [Mr. JOHNSON].

Mr. LEWIS. But I will ask the Senator from Pennsylvania, when he says that the positions to which he refers were not offices in the technical sense; that the statement of the eminent Senator from Massachusetts did not comprehend these voluntary appointments; but referred to an absence of offices that paid. Do I understand that the Senator's test of an office is that it shall pay?

Mr. PENROSE. My definition of an office, Mr. President, is that it is sanctioned by law, created by law, is accompanied by the taking of an oath of office, and that its great attraction is the emoluments to most people who aspire to it, particularly under a Democratic administration. I do not know whether Mr. Willcox gets any salary or not; but surely membership in a commission of arbitration composed of civilians, taking no oath of loyalty to the Government, having no office created by law, is not an office in the strict nature of the term, but it is part of the grand scheme of cooperation of every American patriot to help the Government.

Mr. LEWIS. Mr. President, the Senator says that his standard of an office is one that is recognized by law and pays emoluments. I should greatly regret to feel that a Republican measured his devotion at this time only by the emoluments he might get from the office. I deplore to confess that there have been some of that name, called Republicans, who have developed in these investigations to which the Senator refers as having been the only ones who obtained the emoluments at this time of war, confessing their willingness to fatten upon the misery of their country. But for myself I exempt that great body of Republicans, patriotic citizens who are here in service, in high office, from the charge that the emoluments of the office are the only inducement and the only inviting thing to them to occupy a place of honor—service in the Government. I must differ from the Senator, and point out that among these very eminent Republicans who are holding high office in this city and in the administration of this Government there is a denial of the partisanship charged by the eminent Senator from Massachusetts and the able Senator from Pennsylvania.

Now, sir, lest I take up too much time in a catalogue, one other word.

What do the Senator from Pennsylvania and the Senator from Massachusetts imply when they refer to what they say is the "inefficiency" and "incompetency" of the War Department? What does the Senator mean when he speaks of these Democratic appointees of the War Department? Surely the Senators will be just. Both Senators, I am sure, will be truthful. Every war official of the War Department, who appeared before the committee holding an office under the Army regulations was appointed by a Republican President. They were named by Republican administrations. They are officeholders by virtue of Republican commissions. They are serving in the very same form of action that was transmitted to us, the Democratic administration. Not one of them was ever named by President Wilson. There is not one but that was named by a Republican President, and not one, sir, but that is executing his duties according to the laws and customs we found here in process and in administration when we took control of this Government. Will the Senator deny that?

Mr. PENROSE. Mr. President, I will not only admit it, but I will state without fear of contradiction, and every gentleman knows it, that many of these military and naval officers are most bitter in their denunciation in private conversation of the inefficiency of the heads that Mr. Wilson has put over them.

Mr. LEWIS. Mr. President, the Senator gives us the information that in private conversation these officials of the War Department are bitter in their denunciation of the officials put over them.

Mr. PENROSE. The inefficiency of the officials put over them.

Mr. LEWIS. The inefficiency of the officials put over them. Mr. President, I would gather from that, then, that this is the kind of men who are holding these offices, who seek out the Republican Senator from Pennsylvania, a distinctive partisan, the leader of a partisan conflict, and pour out to him their ingratitude for being kept in office by President Wilson by condemning their superior officers instead of taking the course that their manly nature should adopt, and their military discipline should have suggested, of going to their superior officers, making known the deficiencies in order that they may be remedied. Then, all the more proof, sir, of what we endure in our desire to keep men in their position lest we be charged with removing them on the ground of partisanship, as has ever been the charge every time we had to make a change.

But, sir, I can not believe that all of them have done this thing. Those who have gone before the Military Affairs Committee and upon whose heads criticism has been so leveled, surely, sir, are men seeking to perform their duty; and if, sir, they are so circumscribed that they can not perform their duty it is because of the laws that have been passed. Those laws were passed by a Senate which was Republican and by a House which was Republican; and, while it may be that they should be remedied now—as I admit, sir, they should be—and, if found to be deficient, should be repealed, and, if inefficient, should be overthrown, what I wish to speak to the country upon is that it is an unfair thing, little less than slander, to have go out from the Senate the assertion that these men were partisan appointees of President Wilson. This statement on the part of the distinguished Senator is error, and such an error ought not to be inflicted at this time upon the country or upon the administration.

Mr. President, we want only what is just. We ask no favor. We not only ask no favor, but we ask no unusual consideration.

I have but one other observation to make. I regret that I am impelled to make it out of the necessities of the situation.

The eminent Senator from Massachusetts and the able Senator from Pennsylvania, following the charge that from time to time has echoed throughout this country, charge us with having no preparation. Mr. President, we were precipitated into this war unexpectedly and, God knows, against the prayers of all of those in control of this administration. When necessity forced it we were compelled to adopt it, and if, Mr. President, this Government found itself unprepared to defend, if anyone should be held responsible, whom should it be? For 16 long years, under the leadership of the eminent Senators who have just addressed this body, the great Republican Party was in power. It voted $3,000,000,000 of the American money to put the country in a state of preparation; and yet when this administration came into power, by the confessions of Republican Senators, the Government was not in a condition even to defend itself against an invasion of the American border by Mexican peons.

We Democrats have never before the American public, in any rostrum or any place of power, charged this upon the Republicans. We have withheld the fact. We have sought no partisan favor from it. But if now we are to be held up before the world as those who should suffer the penalty of this lack of preparation, let the Nation know the truth—that it was brought upon us by the administrations preceding us, which had expended this vast sum of money without results to the Nation—and without account for the expenditure—and leaving us weak and naked to the enemy, forcing us in the little while we had to gather ourselves together the best we might, hoping to veil from the world the indefensible position in which we had been left by these our honorable predecessors.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from New Hampshire?

Mr. LEWIS. I gladly yield to the courteous Senator from New Hampshire; yes.

Mr. GALLINGER. If I understood the Senator correctly, he said that the Republican Party had expended $3,000,000,000 for the War and Navy Establishments. Can the Senator tell how long a period that covered?

Mr. LEWIS. I said, Mr. President, that during the 16 years previous to the coming in of the present administration these billions of dollars were expended, and that when we came into power, notwithstanding the expenditure, we found ourselves confessedly, by the admission of the Republican leaders, without Army and without Navy.

Mr. GALLINGER. Yes; and did not the President on several occasions tell us that there was no danger of war?

Mr. LEWIS. Yes; the President of the United States from time to time—if the Senator means the Democratic President—sought to avoid war. He did all he could to avoid war, and told the Congress from time to time that in his judgment this Nation would be able to avoid war; and with that in his mind and in his heart, of course he would take no steps to burden this country with heavy military expenditures that were not apparently necessary. But the fact remains that when we are impeached on the floor by these eminent Senators for unpreparedness, the country must know that it should not be borne only by the present administration, which believed in peace, prayed against war, and did everything to avoid it, but it should likewise understand the condition of preceding administrations, which for 16 years, with all the facts in the world before them, had left us in the same state of unpreparedness. Shall the Senators forget that which now the country must know, that President Roosevelt submitted his message to this body in which he asked as to the Navy only ship for ship, and in his latest message, in 1906, with the heavy shadows of the difficulties of the Orient upon us, he was content with this program, knowing that the feeling of the country was against heavy armaments and expenditures? He, too, but yielded to the conviction of his Nation—opposed to war and opposed to preparation for any war. And then, sir, will it be forgotten that Secretary of War Root, under the administration of President Roosevelt, withdrew the Army from out of the Philippines, reduced and dismembered and disbanded it, lessening our fighting force, because of his honest belief that a military armament and military establishment ought not to be kept up in America beyond the real needs of the situation, and because the country was crying against it.

This was the honest conviction on the part of all America. It was an error. I had in many places opposed it. Yet, if it was an honest error under Republican administrations, what right have any gentlemen to say that under ours it is dishonest to have indulged the same hope of peace and friendship with nations which left us unprepared for war's conflict of arms?

Mr. GALLINGER. Mr. President——

Mr. LEWIS. I yield to the Senator from New Hampshire.

Mr. GALLINGER. I will venture to ask the distinguished Senator from Illinois if it is not historically a fact that while the Republican Party was contending for a large increase of the Navy from year to year the Democratic Party in the other House particularly, and to some extent in the Senate of the United States, was combatting that idea and voting for a smaller number of ships than the Republican Party wanted? Roosevelt asked for four, and how many did he get?

Mr. LEWIS. Mr. President, I answer the Senator that at the time President Roosevelt asked for four and got two the House was Republican; it was a Republican House; the Committee on Naval Affairs was Republican; it had a Republican chairman. These gentlemen who failed to comply with that request were Republicans, and they failed to comply, not because they were Republicans but because, inheriting the sentiment of the communities which they represented, they sincerely believed that it was not necessary to put upon the country that expenditure at that time, when the very skies were clear of a cloud of threat or alarm.

Mr. GALLINGER. Mr. President, will my friend kindly inform me how many Democrats in the House of Representatives were in favor of more than two ships at that time? In other words, were they not a solid, compact body, opposed to the program, and needing only a few Republican votes to defeat it?

Mr. LEWIS. Mr. President, I am unable to reply to the able Senator from New Hampshire as to the exact number of Democrats on the committee of the House at that time who supported the Republican measure; but I do know, sir, that when the time comes when we shall be before the people in the coming elections, when the Republican minority, or a certain set of them, will be out indicting this administration, they will not be found saying that because Republicans voted for a measure therefore it is exempt from their criticism. They will say that the Government was in our hands; it was our Government; and we were responsible for its accomplishments, its achievements, its faults, and its failures. So, too, the eminent Senator from New Hampshire can not escape the clear conclusion that these failures of a Republican Congress, with a Republican Naval Committee, under a Republican President, can not be charged to a mere minority of Democrats who might have agreed with the Republican majority.

Mr. CALDER. Mr. President, will the Senator yield?

Mr. LEWIS. I yield to the Senator from New York.

Mr. CALDER. Does not the Senator know that under the leadership of the Democratic Committee on Military Affairs of the House of Representatives in 1912 the military appropriation bill was put through the Congress with an actual reduction of five cavalry regiments, and that the Army would have been reduced to that extent but for the veto of President Taft?

Mr. LEWIS. Mr. President, it may be that in the House the Military Affairs Committee may have recommended and that the House may have passed a bill providing for the number to which the Senator alludes. I have no knowledge on the subject. I did not come into this body until 1913. But this much may be said, sir: If it did, it merely followed the direction given by the Republican Secretary of War, Secretary Root, and was merely carrying out the program of retrenchment, that for the purpose of saving expenditures on the part of the Government there was no necessity of a big Military Establishment, and because the very heart and spirit of our people seemed averse to it—they were merely obedient to public opinion.

Mr. JAMES. Mr. President——

Mr. LEWIS. I yield to the Senator from Kentucky.

Mr. JAMES. I should like to suggest to the Senator that it would be interesting to inquire how that bill got through a Republican Senate, so that it had to be vetoed by President Taft. The Senator says that a Democratic House passed it. The Republicans were in control of the Senate; so that it must have passed here before it got to the President, who was a Republican. The Senator might study that out.

Mr. CALDER. If the Senator makes the inquiry from me, I will say that while I was not a Member of this body then, either, as I recall the matter, the Republican conferees on that military bill were compelled to yield in order to pass the military bill.

Mr. JAMES. Yes; I have often noticed how the poor Republican conferees in the Senate are intimidated by the Democratic conferees in the House and forced to yield. That frequently occurs.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from New Hampshire?

Mr. LEWIS. Certainly.

Mr. GALLINGER. If the Senator will pardon me, they frequently yield upon the threat that unless they do yield no bill will be passed.

Mr. JAMES. They ought to send some people here that are not afraid, then, and put them on the Republican side.

Mr. LEWIS. Mr. President, of course to past history, before I was honored with a seat here, I can not refer; but I may be permitted to pause to express my sympathy for a nature so supine, so gentle, so weak, and so withering that it has been compelled to surrender to the mere suggestion that it was wrong and that a Democratic minority, or any other minority, could have so dragooned a majority, to surrender national defense—taking the statement of the Senator from New York, with their country in danger, if they so saw that the land needed defense; if they so saw it that they were yet willing to surrender it rather than to contest against a minority—I join with the Senator from Kentucky, and suggest that some little more strength of

character, some little more firmness of nature contributed to Republican legislators, would probably long since have remedied that unhappy end.

Mr. GALLINGER. Mr. President, I apprehend that the Senator from Illinois has not served on many conference committees of Congress, or he would know that during the closing days of the session no minority party or majority party will take the responsibility of defeating a measure that is absolutely demanded by the welfare of the country in the matter of a conference report, and that very frequently both the Democratic and Republican members of a conference committee have yielded their convictions for the sake of permitting a bill to pass that was essential to the welfare of the country. That is exactly what happened on that occasion.

Mr. LEWIS. Mr. President, I must say, having no knowledge of those matters, I could not offer my word against the Senator.

Mr. President, I rose to reply merely that I might set the record fairly and justly before the American people.

Mr. President, I ask for no judgment against the Republican Party. I ask, sir, that our failure of unpreparedness, wherever it did exist, should not be charged to them. I demand, sir, that it equally should not be charged to the Democratic Party. I ask that our distinguished colleagues here, as I appeal to the country, recognize that these conditions were the result of the sentiment of our Nation, filtering through their representatives, and expressed by them in their official course. Sir, subsequent events have made necessary a change in this course. We must admit that both parties, all people, failed to appreciate or prepare for the necessity. But it will not justify any one party to attempt to put upon the other the whole responsibility under a misrepresentation of truth.

Mr. President, I have concluded, in bringing to the attention of the Senate, as I assume to do, wherein it had done an injustice first, sir, to the President's representative, then to the President, and then to the Senate, then to the Democratic Party, and to the country. It is true, sir, and I delight to admit it, that as to legislation on the principal war measures there has been no dissension; there has been no political issue; there has been on both sides complete harmony to the patriotic object. I know it will continue. All will now reunite in the support of the President of the United States and in his noble undertaking to win this great war of liberty and justice. I assert to the country that we will have the cooperation of our noble opponents because of the patriotism they truly possess and readily extend. But at this particular time, when they were willing to give evidence to the country of holding up the officers who execute these powers as being wholly unworthy, how in heaven's name do they expect to invite the common citizen to cooperation and enthusiasm when they themselves from their high station impugn the officials as unworthy of the approval of the Senate or the confidence of the country? I beg them, sir, to reconsider the influence on the land of such a course, as it is true that they even joined with us and in every provision of national defense at the outset, when our Nation was first put in peril by murderous Prussia. So may they continue, all as one, and we all as a Nation's noble sons responding to the call of our mother, "To the breach, dear sons; not for self, but country; not for the political profit of the hour, but for the liberty of the Republic for all time." I thank the Senate.

Mr. NEW. Mr. President, the Senator from Missouri sought and obtained, as I understand it, permission to print in the RECORD certain tables which he did not read to the Senate. I have on my desk one of those tables as it has been given to the press, and which I therefore assume will appear in the newspapers of to-morrow as a part of the Senator's remarks.

In the course of this printed article I find reference to Indiana and to the State council of defense in that State. It is not my purpose, Mr. President, to detain the Senate by prolonging this discussion, but I can not forego the impulse to say a word or two concerning Indiana and the part that has been played there by a Republican State administration in carrying on this war in view of the reference made by the Senator from Missouri, which is clearly intended to show to its disadvantage.

Mr. President, it is true that a wisely discriminating and highly intelligent electorate returned a Republican State administration in Indiana in the election of 1916. It sent to this body two Republican Senators and it sent to the House of Representatives 9 of 13 Members of Congress, all of whom have at every stage voted for every single war measure that has been presented by this administration or in the name of the administration.

Upon the Republican governor of Indiana reflection is rather cast, as I take it, for the appointment of Will H. Hayes, chairman of the Republican State committee of Indiana, and the statement is made in this printed article that Mr. Hayes is carrying on his political activities through this committee.

Mr. President, I utterly deny that charge. It is entirely without foundation. Mr. Hayes was appointed chairman of the State council of national defense because of all the many good men the State contained who were competent and willing to assume the duties of that position he was clearly and confessedly the most capable, a fact which is attested first by a letter written and published publicly acknowledging it by Hon. Thomas Taggart.

Mr. STONE. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Missouri?

Mr. NEW. I do.

Mr. STONE. The Senator from Indiana made a statement with reference to Mr. Hayes, from which it will appear in the RECORD that he utterly denied the charge. I will not undertake to repeat the statement in detail. The Senator does not deny the charge that Mr. Hayes at the time of his appointment was the chairman of the Republican State central committee.

Mr. NEW. No, sir; I do not. It is true, I am happy to say. No more do I deny the fact that Mr. Charles A. Greathouse, the chairman of the Democratic State central committee of Indiana, is at this moment a member of the national committee for vocational education by appointment of President Wilson. Of that the Senator has nothing to say, but he speaks of Mr. Hayes as having been nominated by the governor for the position he occupies.

Just a word, Mr. President, as to the character of that committee and its competency. Besides Mr. Hayes, we find the name of Hon. Thomas Taggart, late chairman of the Democratic national committee, for many years the chairman of the Democratic State committee, a very capable man, my personal friend, but certainly a very ardent Democrat. We find the names of Mr. Evans Woollen and Mr. Meredith Nicholson, who were the two electors from the State at large on the Democratic ticket in Indiana in 1916.

Mr. STONE. Will the Senator allow me?

Mr. NEW. Certainly.

Mr. STONE. What position did the Senator says that Mr. Thomas Taggart occupied?

Mr. NEW. On the State council of defense.

Mr. STONE. The State council?

Mr. NEW. Yes, sir; of which Mr. Will H. Hayes, referred to in this article, is chairman.

Mr. STONE. The Senator is right. I was looking at the wrong list.

Mr. NEW. These gentlemen were not referred to in the Senator's remarks.

Mr. STONE. The Senator is correct. As furnished to me, Mr. Thomas Taggart is named, but he was unable to serve because of ill health.

Mr. NEW. He is a member of the committee. So are Mr. Evans Woollen, as I have said, and Mr. Meredith Nicholson, who are the two Democratic electors on the ticket from that State. So is Mr. Frank C. Daily, who was appointed by President Wilson as district attorney for Indiana. So is Mr. George Harney, a member of the Democratic Editorial Association, who is also the publicity man, giving out all the news that emanates from that committee.

The statement is made here that there are 13 Republicans and 9 Democrats. That is the statement made by the Senator from Missouri. That is somewhat incorrect, because, as a matter of fact, the committee is made up of 10 Republicans and 9 Democrats appointed by the Republican governor.

Now, Mr. President, a word as to what that State council of national defense has aided in doing. Under the work of that council, and under the work of the Republican administration, Indiana has furnished by voluntary enlistment 16,581 soldiers for this war, independent of the Navy or the Marine Corps, its quota being 5,400. It looks as though there had been some effective work done by the State administration and by the council, and that the State may be looked upon as a fairly patriotic one.

It is true, Mr. President, that when the governor of Iowa was here a short time ago and went to the National Council for advice as to where to go for observation of the most competent and capable State council of defense, Mr. Winterbottom, one of its members and secretaries, directed him to go to Indiana, because he said that the council there is preeminently the best and in a class all by itself, and they went to Indiana to pattern by that State council of defense.

Mr. President, if politics has played any part in Indiana with reference to the war activities it has not been brought in by the

Republican Party. When it became the duty of the Republican governor to appoint a State fuel administrator, the man to whom he went was a Democrat, Mr. Evans Woollen, one of the gentlemen on this Council of National Defense. Mr. Woollen declined the offer. He then went to another, a very eminent Republican business man of the State and tendered it to him. This gentleman said that he would accept, but for five weeks the nomination of a fuel commissioner in Indiana was held up, notwithstanding the active demand for hasty and active operation of the coal mines. The confirmation was held up while the Democratic member of the national committee and the State Democratic chairman combed the State of Indiana to find a Democrat who would serve in that place rather than confirm that Republican. The Democrat was not found until finally the governor was again appealed to and the gentleman to whom he had originally offered it, Mr. Woollen, a Democrat and a most capable man and gentleman, was prevailed upon to take the place. But five weeks of time were lost there while an effort was made to find a Democrat who would fill the place. So it is not becoming of anyone to reflect upon Indiana or its council of defense for anything that it has or has not done during the progress of this war.

Mr. President, the Republicans of Indiana demand and will not be denied their right to participate actively in all the preparations for and the vigorous prosecution of this war.

Mr. KIRBY. Mr. President, I rise with some diffidence at this point in the discussion. I think some matters that have been charged here this afternoon should be answered. I think they ought to have been answered by the chairman of the Military Affairs Committee, or by some ranking member of that committee.

I do not believe the American people are interested at this time in the success of the Democratic Party or in a Republican success but in military success upon the field of battle. That is the question that ought to move the Senate here, it seems to me, and I believe that the discussion we have had to-day is not conducive to military success anywhere. On that account I do not approve of most of the things that have been said. I do not think it makes any difference about existing conditions whether the Republicans have been derelict heretofore or not. I do not believe that is an answer if one is needed. I do not believe it exists, the conditions charged by the Senator from Pennsylvania, and the testimony before our Military Affairs Committee has tended to show that it does not.

Senators speak of incompetence and inefficiency, charging it has characterized our war preparations. I am no apologist for incompetence and inefficiency anywhere in government under any conditions, but I say to you I have sat with the Committee on Military Affairs, I have listened to the investigation for four or five weeks, and in the examination and in carrying on and conducting that investigation I have not seen manifested this partisan spirit that has been said to exist. I have seen there pictures of the development of the war activities. It has been brought out before the committee, and I tell you to-day that I believe the condition of the Army is as good as it could have been made under the circumstances but for one or two things that have not been done that ought to have been done, and there is no use to alarm the country unduly about the existing conditions unless the facts justify it, and I do not believe they do, and the investigation has not shown that they do.

I mention one committee or board that has been active, acting as a voluntary board, if you please, and there was no other way that this service might be done under the law. This board, with the assistance of the Army officers, just to illustrate, they have contracted for and expended in the purchase of goods, supplies, ordnance, and munitions $800,000,000 in eight months. They have had 4,500 transactions. They have given out on an average 200 orders daily, requiring an expenditure of $4,000,000. They have sent 80,000 letters and communications and 10,000 telegrams. The result has been that every soldier is now in uniform, every soldier is properly clothed be he upon the field of battle in France or in cantonments in the United States. That is the condition that exists relative to the clothing of the soldiers, and all who have need of and who are expected to use rifles have rifles in their hands to-day. That part of the Army that has gone abroad is fully equipped, as I understand it, and as the testimony has shown before the investigation committee down here. Certain training equipment for the camps in this country has not yet been fully supplied, but it is being done rapidly, and as fast as the soldiers can be sent on to Europe they are fully equipped.

Under those conditions why should we have this other discussion? It seems to me that what we want to do is to win the war, and we can not do it by discussions that divide us and by a crimination and recrimination policy here and there. It may be that I am giving some gratuitious advice, but this is the way the thing appeals to me.

Mr. PENROSE. Will the Senator permit a suggestion at that point?

Mr. KIRBY. Yes, sir.

Mr. PENROSE. One of the leading lights in his own party in this Chamber invited this discussion.

Mr. KIRBY. I am not justifying any man's position here. I am merely stating what it appears to me ought to be done in the United States Senate and in Congress.

Mr. PENROSE. So far as this splendid equipment is concerned, it is a notorious fact that the allies in Europe have had to furnish a large amount of it.

Mr. KIRBY. That is true; we could not manufacture the equipment in time, and could purchase it from our allies, who could supply it. We purchased it with good American money that was put at the disposal of the Government, and we acquired the needed equipment that it was possible to acquire most speedily.

I have heard the testimony of those great men who have been successful in business affairs. I have heard their criticism, especially invited by different members of the Military Committee, as to the condition existing; how it might be improved; and I have heard some of these men state that the organization as it has now been developed could carry on the war successfully with the machinery and agencies we already have. What are the conditions that had to be met? We have expanded our Military Establishment from 50,000 to a million and a half men in eight months, and we have supplied and equipped them. Not only that, but great men who have been successful in business affairs have said this about the organization that has been built up, and they have said it under oath in the Military Affairs Committee: They stated also that twice as much had been accomplished with the agencies we used as could have been accomplished without them, and at one-half the cost to the Government that would otherwise have been required.

Mr. PENROSE. I should like to address an inquiry to the Senator, who is a member of that committee. How does he explain it that the chairman of the committee, the Senator from Oregon [Mr. CHAMBERLAIN], has felt compelled to introduce a bill providing for a board of three distinguished citizens, whatever that term may mean, and expressly excluding the Secretary of War and the Secretary of the Navy?

Mr. KIRBY. Mr. President, I do not propose to be responsible for any views that may be held by the chairman of the Military Affairs Committee. We have in that committee recommended the passage of a bill to create a director of munitions. All the men who are supposed to have made a survey of conditions, who have been in contact with the actual development of conditions in the War and Navy Departments as they are now constituted, have said the greatest objection that they have found to present conditions and to obtaining speedy action was in a case of this kind: The Navy, say, wants a certain sort of supplies, the Army must have a certain amount of the same kind of supplies, and there must be given to some of the other activities the same kind of supplies. Suppose our manufacturing capacity is short, for instance, suppose the country has a manufacturing capacity of duck of 3,000,000 yards a year; that that was the manufacturing capacity of the country, and we needed 89,000,000 yards under existing conditions, which has been supplied. The sources of supply in the manufacturing have to be developed. It was said, if the Navy goes out and competes in the market with these other agencies of the Army, shipping, and aircraft boards, you will have five buying agencies, and nobody to see which department is in the most urgent need and where the material should be first supplied. There is a lack of authority in the last resort in one center to determine which of the branches of our war machine shall have certain supplies and equipment when there is not enough for all. It was thought by the Secretary of War and by some others of the war council, since each member of the council had authority in his particular department, that by adjustment, by agreement, and by conference the council might supply the needed authority. Others said, "No; create a director of munitions, who can say which is the more urgent demand and where the supplies shall go."

I agree that that might be well, and I recommended, so far as I was concerned, that that sort of a position be created. I do not believe that any other cabinet is needed, nor that conditions as developed indicate that there should be another one. I do not know what has been done about recommending a new war cabinet. I understand the bill has been introduced, but it has not been brought before any meeting of the committee when I have been present for any approval by the members of the committee.

I have referred briefly to the conditions. I think we ought to devote our attention to the things that are before us right now, with a view to improving them, and I do not believe that some of the discussion here will ever tend to improve anything. I do not care to say anything else about it, but I did think that somebody ought to say this much, and I believe it ought to have come from some member of the Military Affairs Committee who was conversant with conditions as developed by the sworn testimony.

EXECUTIVE SESSION.

Mr. BANKHEAD. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session, the doors were reopened.

ADJOURNMENT TO THURSDAY.

Mr. MARTIN. I move that when the Senate adjourns to-day it be to meet on Thursday next at 12 o'clock noon.

The motion was agreed to.

ADJOURNMENT.

Mr. KING. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 30 minutes p. m.) the Senate adjourned until Thursday, January 24, 1918, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 21, 1918.

ASSISTANT TREASURER OF THE UNITED STATES.

Martin Vogel, of New York, N. Y., to be Assistant Treasurer of the United States at New York, N. Y. (Reappointment.)

COLLECTORS OF CUSTOMS.

Edmund Billings, of Boston, Mass., to be collector of customs for customs collection district No. 4, with headquarters at Boston, Mass. (Reappointment.)

William H. Berry, of Philadelphia, Pa., to be collector of customs for customs collection district No. 11, with headquarters at Philadelphia, Pa. (Reappointment.)

NAVAL OFFICERS OF CUSTOMS.

H. Otto Wittpenn, of Jersey City, N. J., to be naval officer of customs in customs collection district No. 10, with headquarters at New York, N. Y. (Reappointment.)

William M. Croll, of Philadelphia, Pa., to be naval officer of customs in customs collection district No. 11, with headquarters at Philadelphia, Pa. (Reappointment.)

SURVEYOR OF CUSTOMS.

Joseph A. Maynard, of Boston, Mass., to be surveyor of customs in customs collection district No. 4, with headquarters at Boston, Mass. (Reappointment.)

Charles R. Kurtz, of Philadelphia, Pa., to be surveyor of customs in customs collection district No. 11, with headquarters at Philadelphia, Pa. (Reappointment.)

CONSULS.

CLASS 8.

Austin C. Brady, of Santa Fe, N. Mex., to be a consul of class 8 of the United States of America.

Parker W. Buhrman, of Gala, Va., to be a consul of class 8 of the United States of America.

Lloyd Burlingham, of Olean, N. Y., to be a consul of class 8 of the United States of America.

Leonard G. Dawson, of Staunton, Va., to be a consul of class 8 of the United States of America.

Shelby F. Strother, of Louisville, Ky., to be a consul of class 8 of the United States of America.

Harry L. Walsh, of Baltimore, Md., to be a consul of class 8 of the United States of America.

Romeyn Wormuth, of Syracuse, N. Y., to be a consul of class 8 of the United States of America.

PROMOTION IN THE COAST GUARD.

Third Lieut. of Engineers Paul Revere Smith to be second lieutenant of Engineers in the Coast Guard of the United States, to rank as such from March 27, 1917, in place of Second Lieut. of Engineers Albert F. Patterson, promoted.

RECEIVERS OF PUBLIC MONEYS.

Joseph Allen, of California, to be receiver of public moneys at Visalia, Cal., his present term expiring January 26, 1918. (Reappointment.)

Ashley G. Dawley, of Nevada, to be receiver of public moneys at Elko, Nev., his term having expired. (Reappointment.)

REGISTERS OF THE LAND OFFICE.

Frank T. Woods, of Billings, Mont., to be register of the land office at Billings, Mont., vice Fred H. Foster, deceased.

John E. Robbins, of Nevada, to be register of the land office at Elko, Nev., his term having expired. (Reappointment.)

MEDICAL CORPS.

To be first lieutenants.

First Lieut. Charles August Stammel, jr., Medical Reserve Corps, from January 2, 1918.

First Lieut. Albert Gordon Bower, Medical Reserve Corps, from January 3, 1918.

First Lieut. Arthur Russell Porter, jr., Medical Reserve Corps, from January 4, 1918.

First Lieut. Virgil Heath Cornell, Medical Reserve Corps, from January 5, 1918.

First Lieut. Everett Le Compte Cook, Medical Reserve Corps, from January 6, 1918.

First Lieut. Ralph Leslie Cudlipp, Medical Reserve Corps, from January 7, 1918.

First Lieut. James Brent Anderson, Medical Reserve Corps, from January 8, 1918.

First Lieut. George Perry Ross, Medical Reserve Corps, from January 9, 1918.

First Lieut. Ebner Holmes Inmon, Medical Reserve Corps, from January 10, 1918.

First Lieut. William Alger Shaw, Medical Reserve Corps, from January 11, 1918.

First Lieut. Theo. Wallace O'Brien, Medical Reserve Corps, from January 12, 1918.

DENTAL CORPS.

To be first lieutenants.

First Lieut. John Godfrey Urban, Dental Reserve Corps, from December 15, 1917.

Carl Stevenson Emmert, of Indiana, from December 16, 1917.

First Lieut. William Henry Siefert, Dental Reserve Corps, from December 17, 1917.

Samuel J. Lewis, of Michigan, from December 18, 1917.

First Lieut. James Henry O'Reilly, Dental Reserve Corps, from December 19, 1917.

Frederick Werner Miller, of Missouri, from December 20, 1917.

James Alfred Curtis, jr., of Georgia, from December 21, 1917.

First Lieut. James Jay Weeks, Dental Reserve Corps, from December 22, 1917.

John Nelson White, of Kentucky, from December 23, 1917.

First Lieut. Homer Lash Sams, Dental Reserve Corps, from December 24, 1917.

George Magnor Krough, of Minnesota, from December 25, 1917.

First Lieut. Wayne W. Woolley, Dental Reserve Corps, from December 26, 1917.

First Lieut. Edward Wallace Barr, Dental Reserve Corps, from December 27, 1917.

First Lieut. Fernando Emilio Rodriguez, Dental Reserve Corps, from December 28, 1917.

First Lieut. John Leigh Davis, Dental Reserve Corps, from December 29, 1917.

First Lieut. Joseph Henry Jaffer, Dental Reserve Corps, from December 30, 1917.

Adolph August Meyer, of California, from December 31, 1917.

First Lieut. Howard Clayton Feyler, Dental Reserve Corps, from January 1, 1918.

William Ferdinand Scheumann, of Indiana, from January 2, 1918.

First Lieut. Alonzo Gooch McCue, jr., Dental Reserve Corps, from January 3, 1918.

Campbell Hopson Glascock, of Missouri, from January 4, 1918.

First Lieut. Austin Freeman Roberts, Dental Reserve Corps, from January 5, 1918.

William Frederic Wieck, of Texas, from January 6, 1918.

Thomas Herbert Veale, of Massachusetts, from January 7, 1918.

First Lieut. Lawrence Joseph Dunn, Dental Reserve Corps, from January 8, 1918.

Carl Reuben Oman, of Washington, from January 9, 1918.

First Lieut. Leslie Albert Gould, Dental Reserve Corps, from January 10, 1918.

Harold Avery Curtis, of New York, from January 11, 1918.

PROVISIONAL APPOINTMENTS IN THE ARMY.

FIELD ARTILLERY ARM.

Second Lieut. Leon C. Swager, Field Artillery, Officers' Reserve Corps, to be second lieutenant of Field Artillery, with rank from October 26, 1917.

CAVALRY ARM.

Second Lieut. Ralston Dean Livingston, Infantry, National Guard, to be a second lieutenant from October 24, 1917, to fill an existing vacancy.

COAST ARTILLERY CORPS.

Band Sergt. Leon J. Walrath, Headquarters Company, One hundred and sixth Field Artillery, National Guard, to be second lieutenant in the Coast Artillery Corps, with rank from date of appointment.

PROVISIONAL APPOINTMENT, BY TRANSFER, IN THE ARMY.

CAVALRY ARM.

To be second lieutenants with rank from October 26, 1917.

Second Lieut. Leonard Over, Coast Artillery Corps.
Second Lieut. Carlton B. Rettig, Field Artillery.
Second Lieut. Samuel O. Taylor, Field Artillery.
Second Lieut. John S. McCloy, Infantry.
Second Lieut. Robert Driscoll, Field Artillery.
Second Lieut. George S. Warren, Infantry.

FIELD ARTILLERY ARM.

To be second lieutenants with rank from October 26, 1917.

Second Lieut. Edward Reese Roberts, Infantry.
Second Lieut. George Wesley Norrick, Coast Artillery Corps.
Second Lieut. Lynn Helm, jr., Infantry.
Second Lieut. Fred P. Clark, Cavalry.
Second Lieut. Frank Starr Pope, Cavalry.
Second Lieut. Alfred G. Ford, Cavalry.

COAST ARTILLERY CORPS.

To be second lieutenants with rank from October 26, 1917.

Second Lieut. Harry Lee Campbell, Field Artillery.
Second Lieut. Lawrence W. Fox, jr., Cavalry.

INFANTRY ARM.

To be second lieutenants with rank from October 26, 1917.

Second Lieut. Walter A. Stover, Cavalry.
Second Lieut. James R. Lowry, jr., Cavalry.

PROMOTION IN THE ARMY.

MEDICAL CORPS.

Maj. William H. Tefft, Medical Corps, to be lieutenant colonel from December 21, 1917, subject to examination required by law, vice Lieut. Col. Samuel M. De Loffre, retired from active service December 20, 1917.

TEMPORARY PROMOTIONS IN THE ARMY.

CORPS OF ENGINEERS.

To be colonels with rank from August 5, 1917.

Lieut. Col. Charles Keller, Corps of Engineers, vice Col. Edward Burr, appointed brigadier general in the National Army.

Lieut. Col. Spencer Cosby, Corps of Engineers, vice Col. Henry Jervey, appointed brigadier general in the National Army.

Lieut. Col. James F. McIndoe, Corps of Engineers, vice Col. William C. Langfitt, appointed brigadier general in the National Army.

Lieut. Col. Jay J. Morrow, Corps of Engineers, vice Col. Harry Taylor, appointed brigadier general in the National Army.

Lieut. Col. George P. Howell, Corps of Engineers, vice Col. Mason M. Patrick, appointed brigadier general in the National Army.

Lieut. Col. Frederick W. Altstaetter, Corps of Engineers, vice Col. Charles H. McKinstry, appointed brigadier general in the National Army.

Lieut. Col. Lewis H. Rand, Corps of Engineers, vice Col. William V. Judson, appointed brigadier general in the National Army.

Lieut. Col. Thomas H. Jackson, Corps of Engineers, vice Col. E. Eveleth Winslow, appointed brigadier general in the National Army.

Lieut. Col. Gustave R. Lukesh, Corps of Engineers, vice Col. Frederic V. Abbott, appointed brigadier general in the National Army.

To be lieutenant colonel with rank from July 9, 1917.

Maj. Lewis H. Rand, Corps of Engineers, vice Lieut Col. Edgar Jadwin, appointed colonel in the National Army.

To be lieutenant colonels with rank from July 13, 1917.

Maj. Edward M. Markham, Corps of Engineers, vice Lieut. Col. Herbert Deakyne, appointed colonel in the National Army.

Maj. Thomas H. Jackson, Corps of Engineers, vice Lieut. Col. William P. Wooten, appointed colonel in the National Army.

To be lieutenant colonel with rank from July 14, 1917.

Maj. George B. Pillsbury, Corps of Engineers, vice Lieut. Col. Harry Burgess, appointed colonel in the National Army.

To be lieutenant colonel with rank from July 18, 1917.

Maj. Gustave R. Lukesh, Corps of Engineers, vice Lieut. Col. James B. Cavanaugh, appointed colonel in the National Army.

To be lieutenant colonels with rank from August 5, 1917.

Maj. John R. Slattery, Corps of Engineers, vice Lieut. Col. William Kelly, appointed colonel in the National Army.

Maj. Albert E. Waldron, Corps of Engineers, vice Lieut. Col. Edward H. Schulz, appointed colonel in the National Army.

Maj. Francis A. Pope, Corps of Engineers, vice Lieut. Col. John C. Oakes, appointed colonel in the National Army.

Maj. Gilbert A. Youngberg, Corps of Engineers, vice Lieut. Col. Sherwood A. Cheney, appointed colonel in the National Army.

Maj. Edward N. Johnston, Corps of Engineers, vice Lieut Col. Frank C. Boggs, appointed colonel in the National Army.

Maj. Clarence O. Sherrill, Corps of Engineers, vice Lieut. Col. George B. Pillsbury, appointed colonel in the National Army.

Maj. Ernest D. Peek, Corps of Engineers, vice Lieut. Col. Lytle Brown, appointed colonel in the National Army.

Maj. George R. Spalding, Corps of Engineers, vice Lieut. Col. Harley B. Ferguson, appointed colonel in the National Army.

Maj. Elliott J. Dent, Corps of Engineers, vice Lieut. Col. James A. Woodruff, appointed colonel in the National Army.

Maj. William P. Stokey, Corps of Engineers, vice Lieut. Col. John R. Slattery, appointed colonel in the National Army.

Maj. Wildurr Willing, Corps of Engineers, vice Lieut. Col. Clarence O. Sherrill, appointed colonel in the National Army.

Maj. William A. Mitchell, Corps of Engineers, vice Lieut. Col. George R. Spalding, appointed colonel in the National Army.

Maj. Mark Brooke, Corps of Engineers, vice Lieut. Col. William J. Barden, appointed colonel in the National Army.

Maj. Laurence V. Frazier, Corps of Engineers, vice Lieut. Col. Edward M. Markham, appointed colonel in the National Army.

Maj. James F. Bell, Corps of Engineers, vice Lieut. Col. Francis A. Pope, appointed colonel in the National Army.

Maj. Harold C. Fiske, Corps of Engineers, vice Lieut. Col. Robert R. Raymond, appointed colonel in the National Army.

Maj. Max C. Tyler, Corps of Engineers, vice Lieut. Col. Earl I. Brown, appointed colonel in the National Army.

Maj. Ulysses S. Grant, 3d, Corps of Engineers (General Staff Corps), vice Lieut. Col. James P. Jervey, appointed colonel in the National Army.

Maj. Julian L. Schley, Corps of Engineers, vice Lieut. Col. Ulysses S. Grant, 3d, retained in the General Staff Corps.

Maj. William H. Rose, Corps of Engineers, vice Lieut. Col. Charles Keller, promoted.

Maj. Rufus B. Clark, Infantry (Quartermaster Corps), vice Lieut. Col. Charles L. Willard, retained in the Quartermaster Corps.

Maj. William A. Carleton, Infantry (Quartermaster Corps), vice Lieut. Col. Rufus B. Clark, retained in the Quartermaster Corps.

Maj. Lochlin W. Caffey, Infantry, vice Lieut. Col. William A. Carleton, retained in the Quartermaster Corps.

Maj. William S. Faulkner, Infantry, vice Lieut. Col. William P. Jackson, promoted colonel.

Maj. Ernest H. Agnew, Infantry, vice Lieut. Col. Matthias Crowley, promoted colonel.

Maj. Robert O. Ragsdale, Infantry, vice Lieut. Col. John J. Bradley, promoted colonel.

Maj. Austin A. Parker, Infantry, vice Lieut. Col. Douglas Settle, promoted colonel

Maj. Charles M. Gordon, jr., Infantry, vice Lieut. Col. Isaac C. Jenks, promoted colonel.

Maj. Fred Van S. Chamberlain, Infantry, vice Lieut. Col. Hanson E. Ely, promoted colonel.

Maj. William N. Hughes, jr., Infantry (General Staff), vice Lieut. Col. Lewis S. Sorley, promoted colonel.

Maj. Sylvester Bonnaffon, 3d, Infantry, vice Lieut. Col. William N. Hughes, jr., retained in the General Staff.

Maj. Robert C. Humber, Infantry (Quartermaster Corps), vice Lieut. Col. William M. Morrow, promoted colonel.

Maj. Joseph C. Brady, Infantry, vice Lieut. Col. Robert C. Humber, retained in the Quartermaster Corps.

Maj. John H. Page, jr., Infantry, vice Lieut. Col. Benjamin F. Hardaway, promoted colonel.

Maj. Parker Hitt, Infantry, vice Lieut. Col. Joseph C. Castner, promoted colonel.

Maj. Paul W. Beck, Infantry, vice Lieut. Col. Edward Sigerfoos, promoted colonel.

Maj. Robert I. Rees, Infantry (General Staff), vice Lieut. Col. Henry L. Kinnison, appointed colonel in the National Army.

Maj. John J. Miller, Infantry, vice Lieut. Col. Robert I. Rees, retained in the General Staff.

Maj. Jesse M. Cullison, Infantry, vice Lieut. Col. Paul B. Malone, promoted to colonel.

Maj. William H. Noble, Infantry (Quartermaster Corps), vice Lieut. Col. William F. Creary, promoted to colonel.

Maj. Wilbur A. McDaniel, Infantry, vice Lieut. Col. William H. Noble, retained in the Quartermaster Corps.

Maj. Evert R. Wilson, Infantry, vice Lieut. Col. Herschel Tupes, promoted to colonel.

Maj. Philip Powers, Infantry, vice Lieut. Col. Isaac Newell, promoted to colonel.

Maj. Clenard McLaughlin, Infantry, vice Lieut. Col. Robert O. Van Horn, detailed in the Signal Corps.

Maj. Edward B. Mitchell, Infantry, vice Lieut. Col. James B. Allison, detailed in Signal Corps.

Maj. James H. Como, Infantry (Quartermaster Corps), vice Lieut. Col. John L. Jordan, retired.

Maj. Harol D. Coburn, Infantry, vice Lieut. Col. James H. Como, retained in the Quartermaster Corps.

Maj. Allen J. Greer, Infantry (General Staff), vice Lieut. Col. Lawrence B. Simonds, promoted to colonel.

Maj. Robert Whitfield, Infantry, vice Lieut. Col. Allen J. Greer, retained in the General Staff.

Maj. Abraham U. Loeb, Infantry, vice Lieut. Col. Frederick W. Lewis, promoted to colonel.

Maj. Constant Cordier, Infantry (General Staff), vice Lieut. Col. Frederick G. Lawton, appointed colonel in the National Army.

Maj. James M. Loud, Infantry, vice Lieut. Col. Constant Cordier, retained in the General Staff.

Maj. J. DeCamp Hall, Infantry, vice Lieut. Col. Parker Hitt, detailed in the Signal Corps.

Maj. Davis C. Anderson, Infantry, vice Lieut. Col. Wilson B. Burtt, detailed in the Signal Corps.

Maj. Robert D. Carter, Infantry, vice Lieut. Col. Claude H. Miller, detailed in the Inspector General's Department.

Maj. Douglas Potts, Infantry, vice Lieut. Col. John H. Hughes, detailed in the Inspector General's Department.

Maj. Vincent M. Elmore, Infantry, vice Lieut. Col. Alexander T. Ovenshine, detailed in the Inspector General's Department.

Maj. Benjamin R. Wade, Infantry, vice Lieut. Col. George N. Bomford, detailed in the Signal Corps.

Maj. George E. Goodrich, Infantry, vice Lieut. Col. Oliver S. Eskridge, detailed in the Signal Corps.

Maj. Edwin S. Hartshorn, Infantry, vice Lieut. Col. Paul Giddings, detailed in The Adjutant General's Department.

Maj. Clark R. Elliott, Infantry, vice Lieut. Col. James N. Pickering, promoted to colonel.

Maj. Ralph B. Lister, Infantry, vice Lieut. Col. Eleutheros H. Cooke, retired.

Maj. Harry E. Comstock, Infantry, vice Lieut. Col. Harvey W. Miller, detailed in the General Staff.

Maj. William R. Standiford, Infantry (General Staff), vice Lieut. Col. Harry H. Tebbetts, detailed in The Adjutant General's Department.

Maj. Frederick S. Young, Infantry (General Staff), vice Lieut. Col. William R. Standiford, retained in the General Staff.

Maj. Thomas S. Moorman, Infantry (Quartermaster Corps), vice Lieut. Col. Frederick S. Young, retained in the General Staff.

Maj. Charles H. Morrow, Infantry, vice Lieut. Col. Thomas S. Moorman, retained in the Quartermaster Corps.

Maj. Brady G. Ruttencutter, Infantry, vice Lieut. Col. Edwin S. Hartshorn, detailed in the General Staff.

Maj. Jennings B. Wilson, Infantry, vice Lieut. Col. William A. Burnside, promoted colonel.

Maj. William O. Smith, Infantry (Quartermaster Corps), vice Lieut. Col. Russell C. Langdon, promoted colonel.

Maj. Clarence K. La Motte, Infantry, vice Lieut. Col. William O. Smith, retained in the Quartermaster Corps.

Maj. George M. Holley, Infantry, vice Lieut. Col. Frank C. Bolles, promoted colonel.

Maj. Edgar S. Stayer, Infantry (Quartermaster Corps), vice Lieut. Col. James W. Clinton, promoted colonel.

Maj. Charles H. Errington, Infantry (Quartermaster Corps), vice Lieut. Col. Edgar S. Stayer, retained in the Quartermaster Corps.

Maj. George C. Shaw, Infantry (Inspector General's Department), vice Lieut. Col. Charles H. Errington, retained in the Quartermaster Corps.

Maj. Charles E. Reese, Infantry, vice Lieut. Col. George C. Shaw, retained in the Inspector General's Department.

Maj. Robert S. Knox, Infantry, vice Lieut. Col. Vincent M. Elmore, detailed in the Inspector General's Department.

To be lieutenant colonels with rank from November 5, 1917,

Maj. William A. Castle, Infantry (General Staff), vice Lieut. Col. Henry E. Eames, promoted colonel.

Maj. Harry D. Blasland, Infantry, vice Lieut. Col. William A. Castle, retained in the General Staff.

To be lieutenant colonels with rank from November 16, 1917.

Maj. Edward H. Andres, Infantry (Quartermaster Corps), vice Lieut. Col. Carroll F. Armistead, promoted colonel.

Maj. Thomas J. Rogers, Infantry, vice Lieut. Col. Edward H. Andres, retained in the Quartermaster Corps.

APPOINTMENTS AND PROMOTIONS IN THE NAVY.

The following-named medical inspectors to be medical directors in the Navy, for temporary service, from the 15th day of October, 1917:

Charles E. Riggs,
Ammen Farenholt, and
Charles P. Kindleberger.

Surg. Joseph C. Thompson to be a medical inspector in the Navy, for temporary service, from the 23d day of May, 1917.

The following-named surgeons to be medical inspectors in the Navy, for temporary service, from the 15th day of October, 1917:

Karl Ohnesorg,
William Seaman.

Archibald M. Fauntleroy,
Robert E. Hoyt,
Joseph P. Traynor,
John F. Murphy,
Jesse W. Backus, and
John L. Neilson.

Pay Inspector Joseph J. Cheatham to be a pay director in the Navy, for temporary service, from the 1st day of July, 1917.

Paymaster George P. Dyer to be a pay inspector in the Navy, for temporary service, from the 23d day of May, 1917.

The following-named paymasters to be pay inspectors in the Navy, for temporary service, from the 1st day of July, 1917:

William A. Merritt,
Frederick K. Perkins,
Grey Skipwith,
McGill R. Goldsborough, and
Eugene C. Tobey.

The following-named officers to be ensigns in the Navy, for temporary service, from the 1st day of January, 1918:

Jesse E. Walter,
Harry Waterhouse,
Oscar E. Harris,
Percy S. Hogarth,
Doile Greenwell,
Earl H. Knee,
Thomas F. Cullen,
Thomas S. Beard,
Henry A. Beaman,
Arthur L. Karns,
George J. Wolf,
Frank W. Crilley,
Jesse M. Acuff, and
Lincoln B. Walker.

The following-named enlisted men to be ensigns in the Navy, for temporary service, from the 1st day of January, 1918:

George Hurst,
William Smith,
Caleb A. Holbrook,
John M. Morrison,
George M. Donovan,
James F. Mullin,
Edward Van Pelt,
George T. Rolfes,
Ernest A. Broms,
Edward G. Evans,
John H. Rider,
Carlisle J. Christman,
William T. Murray,
Christian Bauer,
Charles A. Pilant,
John W. Cunningham,
Michael T. Minihan,
Charles Keenan,
James T. Brien,
Robert J. Denny,
Thomas A. Patterson,
Walter E. Holden, and
Howard Keane.

The following-named officers of the United States Naval Reserve Force to be ensigns in the Navy, for temporary service, from the 1st day of January, 1918:

John Black, jr.,
Thomas H. Laine, and
Ludwig G. Hoefling.

The following-named pay inspectors to be pay directors in the Navy, for temporary service, from the 31st day of August, 1917:

George G. Seibels, and
Edmund W. Bonnaffon.

Pay Inspector Joseph Fyffe to be a pay director in the Navy, for temporary service, from the 15th day of October, 1917.

The following-named paymasters to be pay inspectors in the Navy, for temporary service, from the 31st day of August, 1917:

Franklin P. Sackett,
David M. Addison,
Victor S. Jackson,
John R. Sanford,
Herbert E. Stevens,
Charles R. O'Leary, and
Charles W. Elliason.

The following-named paymasters to be pay inspectors in the Navy, for temporary service, from the 15th day of October, 1917:

Cuthbert J. Cleborne, and
John D. Robnett.

Paymaster George W. Pigman, jr., to be a pay inspector in the Navy, for temporary service, from the 11th day of December, 1917.

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 21, 1918.

COMMISSIONER FOR THE DISTRICT OF COLUMBIA.

Louis Brownlow to be a Commissioner for the District of Columbia.

RECEIVER OF PUBLIC MONEYS.

Fred A. King to be receiver of public moneys at Cass Lake, Minn.

REGISTERS OF THE LAND OFFICE.

Alvah G. Swindlehurst to be register of the land office at Cass Lake, Minn.

John T. Cogan to be register of the land office at Pierre, S. Dak.

HOUSE OF REPRESENTATIVES.

MONDAY, *January 21, 1918.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in Heaven, we thank Thee for the simple yet sublime truths expressed in the familiar hymn, the basis upon which all true religions have their foundation:

How gentle God's commands!
How kind His precepts are!
Come, cast your burdens on the Lord,
And trust his constant care.

His goodness stands approved,
Unchanged from day to day;
I'll drop my burden at His feet
And bear a song away.

Hasten the day, we beseech Thee, when all mankind shall accept and live these truths in the common daily activities of life; that the demons which so easily beset us—greed, avarice, hate, revenge, unholy ambitions, and selfishness—may be cast out, and the world become a better and saner place to dwell in, after the manner of the Lord Jesus Christ. Amen.

The Journal of the proceedings of Saturday was read and approved.

LEAVE OF ABSENCE.

Mr. LAZARO. Mr. Speaker, I ask unanimous consent for the leave of absence of my colleague, Mr. WILSON, indefinitely, on account of sickness.

The SPEAKER. The gentleman from Louisiana asks unanimous consent for indefinite leave of absence for his colleague, Mr. WILSON, on account of sickness. Is there objection?

There was no objection.

The SPEAKER. The Chair wishes to announce once more that the easiest and best way to obtain leave of absence is to make out a slip and present it to the Clerk.

Mr. LONDON. Mr. Speaker, I make the point of order that no quorum is present.

The SPEAKER. The gentleman from New York makes the point of order that no quorum is present, and evidently there is not.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The doors were closed, and the Sergeant at Arms was ordered to notify the absentees.

The Clerk called the roll, and the following Members failed to answer to their names:

Bacharach	Dewalt	Greene, Mass.	Miller, Wash.
Bowers	Dooling	Griest	Montague
Brodbeck	Doremus	Hamill	Mudd
Buchanan	Drukker	Hamilton, N. Y.	Neely
Byrns, Tenn.	Eagan	Hrrrison, Miss.	Nichols, Mich.
Caldwell	Eagle	Harrison, Va.	Nolan
Campbell, Pa.	Edmonds	Haskell	O'Shaunessy
Cannon	Esch	Helm	Paige
Capstick	Estopinal	Helvering	Parker, N. J.
Carew	Evans	Hood	Parker, N. Y.
Carlin	Fairchild, G. W.	Husted	Porter
Church	Flynn	Johnson, S. Dak.	Price
Clark, Fla.	Focht	Kahn	Ragsdale
Costello	Francis	Kennedy, R. I.	Ramsey
Crago	Fuller, Mass.	LaGuardia	Reed
Currie, Mich.	Garland	Lesher	Riordan
Curry, Cal.	Godwin, N. C.	Lobeck	Rowe
Dale, N. Y.	Good	McClintic	Rowland
Dale, Vt.	Goodall	McCulloch	Sanders, La.
Darrow	Gould	McLaughlin, Pa.	Scott, Pa.
Davidson	Graham, Ill.	Maher	Scully
Decker	Graham, Pa.	Mann	Sherley
Dempsey	Gray, N. J.	Mansfield	Siegel

Sims	Stephens, Nebr.	Templeton	Wilson, La.
Slemp	Sullivan	Van Dyke	Winslow
Small	Swift	Vare	Wood, Ind.
Snook	Tague	Venable	Woodyard

The SPEAKER. On this roll call 319 Members, a quorum, have answered to their names.

Mr. CARTER of Oklahoma. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

S. J. Res. 107. Joint resolution authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial to Francis Asbury.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3387. An act to authorize and empower the President to create military zones around shipyards where vessels are under construction for the United States; and

S. 3389. An act to authorize and empower the United States Shipping Board Emergency Fleet Corporation, to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes.

The message also announced that the Vice President, in accordance with the act of August 29, 1916, had appointed as members of the Board of Visitors to the Naval Academy, at Annapolis, on the part of the Senate, Mr. SWANSON (ex officio chairman), Mr. SMITH of Maryland, Mr. PENROSE, and Mr. LODGE.

SENATE BILLS AND JOINT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate bills and joint resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 3389. An act to authorize and empower the United States Shipping Board Emergency Fleet Corporation, to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes; to the Committee on the Merchant Marine and Fisheries.

S. 3387. An act to authorize and empower the President to create military zones around shipyards where vessels are under construction for the United States; to the Committe on the Merchant Marine and Fisheries.

S. J. Res. 107. Joint resolution authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial to Francis Asbury; to the Committee on the Library.

COMMITTEE ON EXPENDITURES IN THE NAVY DEPARTMENT.

Mr. HARDY. Mr. Speaker, I ask unanimous consent to present a resolution authorizing the Committee on Expenditures in the Navy to send for persons and papers.

The SPEAKER. The gentleman from Texas asks unanimous consent for the present consideration of the resolution authorizing the Committee on Expenditures in the Navy Department to send for persons and papers.

Mr. HARDY. We want to get to work is the reason, and if it will take any time I will withdraw it.

The SPEAKER. Is there objection?

Mr. GILLETT. Let us have it reported.

The Clerk read as follows:

House resolution 202.

Resolved, That the Committee on Expenditures in the Navy Department, in making the investigation required by the rules of the House, be authorized to send for persons and papers.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, this seems to be a novel resolution for any expenditure committee, even for a standing committee of the House, to be authorized to send for persons and papers. Usually in the administration of committee affairs a mere request to officials of the department—if they are the persons the gentleman has in mind—brings them voluntarily, and it is not necessary to have any special authorization.

Mr. HARDY. What the gentleman says is exactly true, but it has been held that these committees have no authority to compel the attendance of witnesses without special resolutions.

I do not apprehend that any member of the administration or that any member of any department will need any subpœna, but we might have a necessity to summon others.

Mr. STAFFORD. Has the gentleman attempted to obtain the department officials, and have they declined to respond to the invitation?

Mr. HARDY. Not at all. We do not intend to use it for any department.

Mr. STAFFORD. It is anticipating a condition that may never happen?

Mr. HARDY. It is anticipating sending for other witnesses, not departmental.

Mr. CARTER of Oklahoma. Mr. Speaker, I ask the gentleman from Texas to withdraw this resolution for the present. The gentleman does not seem to have met any conditions which warrant action on this resolution up to this time. If he had I would not object to it.

Mr. STAFFORD. Is the purpose of the resolution to send for persons outside of the departments?

Mr. HARDY. That is the purpose of it.

Mr. STAFFORD. Of course, that is a different condition. If that is so, I shall not object.

The SPEAKER. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, is it the intention to bring witnesses in from all over the country?

Mr. HARDY. We may.

Mr. FOSTER. That would require an expenditure.

Mr. HARDY. We may want to send for some witnesses. We promised the Committee on Accounts that we would make investigations, and if we need to have the witnesses we ought to have the authority to get them.

Mr. FOSTER. This would give the gentleman no authority to pay their expenses. I wish the gentleman would withdraw it for this morning, until we can see further about it.

Mr. HARDY. Mr. Speaker, rather than take up further time I withdraw the resolution.

COAL AND ASPHALT DEPOSITS, CHOCTAW AND CHICKASAW NATIONS.

The SPEAKER laid before the House the bill (H. R. 195) providing for the sale of the coal and asphalt deposits in the segregated mineral lands in the Choctaw and Chickasaw Nations, Okla., with Senate amendments thereto.

The Senate amendments were read.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. CARTER of Oklahoma. Yes.

Mr. STAFFORD. I wish to inquire whether the amendment in the Senate striking out the description of the property that could be used by the State of Oklahoma and substituting therefor the phraseology limiting it only to that which has been purchased by the State penitentiary purposes is identic in purpose?

Mr. CARTER of Oklahoma. The item which carried the preferential right for the State to purchase these lands carried a description in full, which was furnished me by the governor of the State of Oklahoma. I afterwards found from the warden of the State penitentiary that that description was an error and contains land outside the penitentiary grounds which the State did not desire to purchase, and the warden of the penitentiary said it was not the purpose of himself nor the governor nor any other State official to purchase land other than that under the State penitentiary lands, and when this was explained at the Senate end of the Capitol the amendment was made to conform to what was actually sought to be done.

Mr. STAFFORD. So the Senate amendment restricts the quantity of land?

Mr. CARTER of Oklahoma. Yes.

Mr. STAFFORD. And carries out the original purpose of the House bill?

Mr. CARTER of Oklahoma. Yes. I had no way of knowing whether or not the description carried in the original bill was correct, for the reason that I did not have by me any detailed description of the lands embraced in the surface grant to the penitentiary.

Mr. STAFFORD. I have directed the gentleman's attention to an error in the amendment that was offered by myself, a mere formal amendment, when the bill was under consideration, striking out the word "apply" and substituting therefor the words "as applied," and I find in the bill as it is before us the amendment carries the past tense "applied." I believe the gentleman agrees that should be "apply," and he intended later to offer a concurrent resolution directing the engrossing clerk in the engrossed copy to change the word "applied" to the word "apply."

Mr. CARTER of Oklahoma. That is a typographical error. In the original bill the word was "applied," and when our attention was called to that by the gentleman from Wisconsin the change was made on the floor of the House.

Mr. STAFFORD. The other amendments of the Senate are minor.

Mr. CARTER of Oklahoma. Except in one particular.

Mr. STAFFORD. What is the amendment that the gentleman says is of more than minor importance?

Mr. CARTER of Oklahoma. It is the one at the end of line 2 on page 5, after the word "twelve" to insert:

Provided further, That no person or corporation shall be permitted to acquire more than four tracts of 960 acres each, except where such person, firm, or corporation has such tracts under existing valid lease.

Mr. STAFFORD. And that is for the best interest of the people of Oklahoma, the gentleman thinks?

Mr. CARTER of Oklahoma. Yes.

Mr. WINGO. Mr. Speaker, will the gentleman yield?

Mr. CARTER of Oklahoma. Yes.

Mr. WINGO. I gathered from the reading of the Senate amendments that there is an amendment in there covering the question of convict labor.

Mr. CARTER of Oklahoma. Yes.

Mr. WINGO. That amendment was arrived at by consulting with the interested parties and the Senators from Oklahoma and the governor of that State?

Mr. CARTER of Oklahoma. I will read the amendment for the gentleman's benefit:

Page 5, line 16, strike out all after "Oklahoma," down to and including "east," line 5, page 6, and insert "for the grounds of the State penitentiary: *Provided*, That said coal deposit under said land shall not be mined by convict labor for the purpose of sale to any private agencies, individual person, or corporation, or to be sold for private or commercial purposes."

I will state, further, that this amendment was suggested by the governor of Oklahoma himself. This complied with the governor's statement to me in transmitting the item to be introduced, which was to the effect that he had no purpose of attempting to mine coal from the deposits purchased in competition with free labor.

Mr. WINGO. The object of that amendment is to restrict the use of the mines and the convict-mined coal to the penitentiary where the convicts are?

Mr. CARTER of Oklahoma. Yes.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 8696) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1919.

The motion was agred to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696, the Indian appropriation bill, with Mr. GARNER in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the purpose of the consideration of the bill, the title of which the clerk will report.

The Clerk read as follows:

A bill (H. R. 8696) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1919.

The CHAIRMAN. The Chair's information is that when the committee arose on Saturday the question pending before the committee was a point of order made by the gentleman from Wisconsin [Mr. STAFFORD]. Does the gentleman insist upon his point of order?

Mr. STAFFORD. May we have an understanding that this item be passed over temporarily? The gentleman from Arizona this morning met me on my way to the committee room of the Committee on Appropriations where I had an important hearing and could not present the matter that he wished. Yesterday I took occasion to look over everything that referred to this project in the hearing but he had some further data to present.

Mr. CARTER of Oklahoma. Does the gentleman just want to pass this item over without prejudice?

Mr. STAFFORD. Yes.

Mr. CARTER of Oklahoma. I will be glad to do so.

The CHAIRMAN. Without objection, the paragraph on page 17, down to line 10, page 18, will be passed for the present. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

To enable the Secretary of the Interior to carry into effect the provisions of the sixth article of the treaty of June 1, 1868, between the United States and the Navajo Nation or tribe of Indians, proclaimed August 12, 1868, whereby the United States agrees to provide school facilities for the children of the Navajo tribe of Indians, $100,000: *Provided*, That the said Secretary may expend said funds, in his discretion, in establishing or enlarging day or industrial schools.

Mr. CAMPBELL of Kansas. Mr. Chairman, I would like to know what is being done with this $100,000. I think the committee should know just what is being done with it.

Mr. HAYDEN. Mr. Chairman, I can say to the gentleman from Kansas that excellent use is made of this money in the operation of day and boarding schools on the Navajo Indian Reservation.

Mr. CAMPBELL of Kansas. Do we establish day schools by annual appropriations every year? How many schools have been established and how many are maintained, and how many pupils attend them?

Mr. HAYDEN. The hearings show that last year a dormitory was completed at the Leupp Indian School on this reservation; also a dairy barn at Navajo. The equipment made necessary by the enlargement of Pueblo Bonito and Western Navajo schools was supplied and a new schoolhouse with a capacity of 300 pupils has been constructed at Tohatchi. The hearings show that at present there are school buildings on the Navajo Reservation with a capacity for 2,072 children and there are 6,642 Navajo Indian children without school facilities at this time.

Mr. CAMPBELL of Kansas. How much money was used last year in the construction of these schools for the benefit of these children?

Mr. HAYDEN. The hearings show an expenditure of $47,777.

Mr. CAMPBELL of Kansas. Does that include the construction of buildings?

Mr. HAYDEN. Yes.

Mr. CAMPBELL of Kansas. Why is it necessary to have $100,000 this year, the buildings having been constructed?

Mr. HAYDEN. I know that the Indian Service expects to complete the construction of several additional buildings at Keams Canyon and other places. Until we provide school facilities, schoolhouses on the reservation where the Indian children can attend, we should not stop appropriating money. There are over 6,000 children on the Navajo Reservation for whom there are no school facilities at the present time. There are over 24,000 Navajo Indians in Arizona, comprising one of the largest Indian tribes in the United States.

Mr. CAMPBELL of Kansas. I am aware of that, and they are good Indians. They have been getting along splendidly without any sort of aid or supervision from the Government. They are among the best self-sustaining Indians we have, and I am fearful that they, having been among the good Indians who have been taking care of themselves, will begin to rely largely on the Government and finally the Government will be called upon to send a lot of white men out there, spend a lot of money on them with more benefit to the white men who are employed than to the Indians in whose behalf it is alleged the money is spent.

Mr. HAYDEN. Notwithstanding, the gentleman will admit that it is the policy of this Government to furnish educational opportunities for Indian children?

Mr. CAMPBELL of Kansas. What has been the method of providing for the Navajos in the past in respect to education?

Mr. HAYDEN. They have not been educated.

Mr. CAMPBELL of Kansas. Have they grown up without any schools at all?

Mr. HAYDEN. Yes, sir; the great majority of the Navajos are illiterate and very few of them can even speak the English language.

Mr. CAMPBELL of Kansas. Notwithstanding, they are mighty good Indians.

Mr. HAYDEN. There is no question about the Navajo being a good Indian.

Mr. CARTER of Oklahoma. May I call the attention of the gentleman from Kansas to the fact that this is a treaty item, anyway.

Mr. CAMPBELL of Kansas. Even so, the money should not be wasted——

Mr. CARTER of Oklahoma. That is right.

Mr. CAMPBELL of Kansas. Even where a treaty of years and years ago provided for it. We will come later on to some treaty items that provide for an annual waste of money. Conditions that existed in Indian tribes 30 years ago which made a treaty item necessary do not necessarily exist to-day, and I think we should bring the Indian Service down to date.

Mr. CARTER of Oklahoma. Well, the gentleman from Kansas well knows that there is only one way by which the treaty item can be disposed of fairly and in good morals to the Indians, and that is the capitalization of the amount.

And that has always been the policy of the Government. In order to comply with treaties, all treaty items must be pro-

vided for the Indians, and the only legitimate way to dispense with them is by capitalization of such treaty item at the ratio of 10 to 1.

Mr. CAMPBELL of Kansas. This is alleged to be under the sixth article of the treaty of June 1, 1868. Well, when did we begin to take notice that that treaty existed?

Mr. CARTER of Oklahoma. I am not prepared to give the gentleman information about that. I have not kept up with this item. I agree with the gentleman fully that these matters ought to be looked into very carefully to see that the money is expended properly.

Mr. CAMPBELL of Kansas. Does not the gentleman from Oklahoma think they ought to be looked into carefully before the money is spent rather than afterwards?

Mr. CARTER of Oklahoma. Decidedly so. That has always been my position.

Mr. CAMPBELL of Kansas. There is $100,000 under the old treaty item that was dug up from 1868, when for all these years we have been running along without doing anything for these Indians.

Mr. HAYDEN. This appropriation originated in the Senate about five years ago as the result of an investigation which disclosed that the Government had not kept the agreement made with these Indians in 1868 and provided educational facilities for their children. I think the appropriation should be continued until we have school facilities for every Indian in the Navajo country. As it stands to-day there are 7,844 children of school age on the reservation. There are 6,642 Indian children that could not go to school if they wanted to do so.

Mr. CAMPBELL of Kansas. Is it not true that everybody who knows anything about Indians knows the Navajo Indians are the best Indians per individual that are to be found anywhere out in the mountain countries and that they have been taking care of themselves? They are self-supporting Indians.

Mr. HAYDEN. But would it be any detriment to the Indian, in the gentleman's judgment, if he learned to speak the English language and to read and write it?

Mr. CAMPBELL of Kansas. It will be a detriment to the Navajo Indian to come under the control of the Indian Office or an Indian control that has devitalized other Indian tribes while this tribe, without control, is a vital, manly, and womanly set of people.

Mr. HAYDEN. I agree with the gentleman in all that he says in praise of the Navajo Indians.

Mr. CAMPBELL of Kansas. They are self-supporting and self-respecting and composed of a high-grade type of men and women, as everybody knows who knows anything about Indians.

Mr. HAYDEN. I am in thorough accord with the gentleman that, so far as the property of these Indians is concerned, the Government should keep its hands off and let them attend to their flocks and herds and sell their blankets, as they do now; but I can not see for the life of me how it would injure an Indian child any more than a white child to send it to school.

Mr. CAMPBELL of Kansas. Is it not true that the Navajo Indians attend our Indian schools? Can not a Navajo come to Haskell or to Chilocco or any other of the Indian schools and be educated at the expense of the Government?

Mr. HAYDEN. We all agree that sending the children away to boarding schools is not the best system of educating the Indians.

Mr. CAMPBELL of Kansas. It has not proved so for the Navajos.

Mr. HAYDEN. The kind of education that we shall provide is by establishing day schools and boarding schools in proximity to the reservations. Day schools shall be encouraged in preference to boarding schools, so that the Indian children may go home to their parents at night, as white children do. It was by that system that the American people became educated. The hot-housing system that is pursued in some of the boarding schools results in but little permanent benefit to the Indians.

Mr. CAMPBELL of Kansas. I think it is an unwise policy to take up Indians that are self-respecting and self-supporting, that have produced high-grade men and women, such as the Navajos have produced, without any sort of aid or assistance from the Government, or supervision from the Indian Office, and then pick up an old treaty somewhere, at this late day, a treaty agreed to in 1868, in order to foist a supervision or control over those Indians. I think it is very unwise to do it, and I do not think that this appropriation of $100,000 ought to be made in this lump sum. If anything is to be done, a school ought to be provided at a certain place for so many dollars and at a certain other place for so many dollars, rather than to give a lump sum here to be used as is provided in this bill.

Mr. HAYDEN. I am in accord with the gentleman's last suggestion, and so far as I am concerned this appropriation will not again be made without specifying the schools where the funds are to be expended.

Mr. CAMPBELL of Kansas. It ought not to occur now. Let us pass this item and get it in shape. It ought not to go in in this way. It is simply against the policy of the Committee on Indian Affairs, a policy that has been adopted with respect to other matters. I do not see why we should put it in this item in this way.

Mr. HAYDEN. Will the gentleman consent to pass the item, so that we may ask the Indian Office to submit an itemized estimate?

Mr. CAMPBELL of Kansas. I will ask that the item be passed and ask the gentleman from Arizona [Mr. HAYDEN], in whose section of the country this money is to be spent, to take the matter up with the Indian Office.

Mr. HAYDEN. I will be glad to do that. I ask unanimous consent that the paragraph be passed over.

The CHAIRMAN. The gentleman from Arizona [Mr. HAYDEN] asks unanimous consent to pass the paragraph on page 18, beginning with line 10 and ending with line 19, inclusive. Is there objection? [After a pause.] The Chair hears none; and the Clerk will read.

The Clerk read as follows:

For continuing the development of a water supply for the Navajo and Hopi Indians on the Navajo, Moqui, Pueblo, San Juan, and Western Navajo Reservation, $25,000, to be immediately available, reimbursable out of any funds of said Indians now or hereafter available.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. HAYDEN. Mr. Chairman, I move to amend the paragraph, on line 22, by making the word "Reservation" plural, so that it will read "Reservations."

The CHAIRMAN. Does the gentleman from Wisconsin withdraw his point of order?

Mr. STAFFORD. I wish to make an inquiry about this change of phraseology before withdrawing the point of order. Is it the purpose to extend this project in any way except to extend the privileges to different Indians on the same reservation?

Mr. HAYDEN. When this appropriation was made last year and in prior years it said, "the Navajo Indians on the Navajo Indian Reservation." As a matter of fact, the Navajo jurisdiction has been divided into these various reservations, and the Indian Office advised the committee that a strict interpretation of the law would compel this appropriation to be expended on one small part of the Navajo country rather than on the various reservations, as it ought to be. As I happened to know that the Hopi Indians also lived in that Territory, I had the word "Hopi" inserted so that the Hopi Indians would also have the benefit of the development of an additional water supply.

Mr. STAFFORD. Do they live on the Navajo Reservation?

Mr. HAYDEN. They live on the Moqui Reservation, together with the Navajos. The Moqui Reservation is surrounded by the Navajo Reservation.

Mr. STAFFORD. Together with the Pueblos, Moquis, and others?

Mr. HAYDEN. Yes; they occupy a part of the Navajo country. These reservations were created by Executive order at different dates.

Mr. STAFFORD. The amendment does not propose to create a new project to carry out more specifically what was intended by the general language in last year's bill?

Mr. HAYDEN. That is it exactly.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order.

The CHAIRMAN. The gentleman withdraws the point of order. The Clerk will report the amendment offered by the gentleman from Arizona.

The Clerk read as follows:

Amend, page 18, line 22, by striking out the word "Reservation" and inserting in lieu thereof the word "Reservations."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For completing the construction by the Indian Service of a dam with a bridge superstructure and the necessary controlling works for diverting water from the Gila River for the irrigation of Indian land and Indian allotment on the Gila River Indian Reservation, Ariz., as recommended by the Board of Engineers of the United States Army in paragraph 217 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $50,000, to be immediately available and to remain available until expended, reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., 522): *Provided*, That the limit of cost of the said dam and bridge fixed by the act of May 18, 1916 (39 Stat. L., 130), is hereby changed from $200,000 to $250,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph just read.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order on the paragraph.

Mr. STAFFORD. What is the occasion of increasing the limit of cost on this project from $200,000 to $250,000?

Mr. HAYDEN. The occasion for this increase is the great flood that came down Gila River, which widened the channel at the place where this dam is to be constructed so that it can not be built for the money appropriated. That and the increased cost of labor and material necessary for its construction occasioned this increase.

Mr. STAFFORD. This dam also is to be utilized for bridge purposes, is it?

Mr. HAYDEN. Yes, sir.

Mr. STAFFORD. And the river has been widened considerably at this point by reason of the flood that the gentleman refers to?

Mr. HAYDEN. Yes, sir.

Mr. STAFFORD. I withdraw the reservation of the point of order.

The CHAIRMAN. The gentleman from Wisconsin withdraws the reservation of a point of order; and the Clerk will read.

The Clerk read as follows:

For the construction of a fence along the international boundary line between Mexico and the Papago Indian Reservation, in Arizona, created by Executive order of January 14, 1916, under such rules and regulations as the Secretary of the Interior may prescribe, $10,000, to be immediately available and to remain available until expended.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph just read. I wish to inquire whether this item was included by the department in their estimates?

Mr. HAYDEN. Yes, sir. You will find the item and the justification on page 133 of the hearings. The department very strongly urges this appropriation by reason of the fact that owing to the unsettled conditions in Mexico a considerable number of cattle belonging to the Papago Indians have drifted across the international boundary, where they have been killed and consumed by the Mexicans. It is therefore necessary to keep the stock of the Indians on this side of the line. If the conditions in Mexico were more settled, there would be less urgency for the construction of this fence.

Mr. STAFFORD. Is this an ordinary range fence to surround the cattle ranch to keep them in the corral?

Mr. HAYDEN. No. It is what is called a "drift fence," which will cross a valley along the international boundary line between this reservation and old Mexico.

Mr. STAFFORD. The gentleman uses a term in connection with the fence that I am not familiar with. What does he mean by a "drift fence"?

Mr. HAYDEN. A "drift fence" is a fence to prevent cattle from drifting or wandering across the country. Drift fences are constructed all along the international boundary line to prevent the cattle from drifting over into Mexico. The Mexicans are hungry these days and do not hesitate to eat any meat animal that they can catch.

Mr. STAFFORD. Do these fences have any effect in preventing the Mexicans from coming over into this country in their raids?

Mr. HAYDEN. The boundary fence near Columbus, N. Mex., did not stop Villa when he made his raid. The raiders cut the fence about 2 miles from a gate where the picket of American soldiers was stationed that night.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order.

The CHAIRMAN. The gentleman from Wisconsin withdraws the reservation. The Clerk will read.

The Clerk read as follows:

That the unexpended balance of $6,715 appropriated by the Indian appropriation act approved May 18, 1916, for the proportionate share of the amount required to construct a wagon road or highway through the Kaibab Reservation in Utah is hereby made available upon the same terms, except that any labor may be used upon the construction of such road or highway, giving preference to Indian labor.

Mr. HAYDEN. Mr. Chairman, I move to amend, on line 5, by striking out the words "in Utah" and inserting the word "Indian" after the word "Kaibab."

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page 22, line 5, after the word "Kaibab," insert the word "Indian," and after the word "Reservation," strike out the words "in Utah."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CALIFORNIA.

SEC. 3. For support and civilization of Indians in California, including pay of employees, $42,000.

Mr. CAMPBELL of Kansas. Mr. Chairman, I move to strike out the last word for the purpose of finding out what this $42,000 is used for. The hearings show that for last year about $30,000 was expended in order to get about $9,000 worth of goods to the Indians. The money was expended last year as follows: Seventeen thousand dollars for regular employees. Now, can you imagine how it would be necessary to employ $17,000 worth of employees to spend $40,000 in any service on earth except the Indian Service? Those are the regular employees. Now, here are irregular employees, $746. Then, traveling expenses, $2,459; transportation of supplies, $673; stationery and printing, school supplies, $29.50. An enormous amount of this $42,000 for school supplies! Twenty-nine dollars and fifty cents. Telegraphing and telephoning, $426; light, heat, and power, including fuel, $3,375. I assume that that was to keep the employees warm. So far we have not done a thing for the Indian except to get him $29 worth of school supplies. Now, here are $9,713 worth of dry goods, subsistence, forage, medical supplies, and so forth. I do not know just how these supplies were distributed, but I want to know if it takes $3,000 to get $1,000 worth of goods distributed to a few Indians.

Mr. CARTER of Oklahoma. Mr. Chairman, this is the regular——

Mr. CAMPBELL of Kansas. That does not make it right, even if it is regular. It is just that much worse.

Mr. CARTER of Oklahoma. I should be glad to finish my sentence, or I will wait until the gentleman finishes. I did not say anything was right. I undertook to say that this is the regular agency appropriation. Agency appropriations as a rule are used for employees, as the gentleman well knows, to administer the affairs of the Indians. Certainly if we are going to continue to administer the affairs of the Indians we will have to make appropriations, and the money will have to be spent for employees. If we are going to stop administering the affairs of the Indians, then all these expenses can be stopped. I do not know how they can be stopped otherwise. It might be that if we had an investigation of the matter, and had time to go out through the reservations, we could dispense with a great number of employees; but until that is done the Committee on Indian Affairs, of which the gentleman is a member, has no way of getting that information except through the Indian Bureau. As the gentleman well knows, the only source of information we have is through the Commissioner of Indian Affairs himself. Just what good for the Indians has been done by this appropriation it is impossible for me to say. Whether a man working for a salary of $1,000 and expenses $500 renders a $1,500 service to the Indians I am unable to say, and I do not think any man could undertake to say, unless an investigation were made and he went on the reservation to look in a thorough manner into the work that these employees were doing. The gentleman may be right in his statement that there are a great many useless employees in the Indian Service. I do not know any way to intelligently dispense with them, unless we can have some kind of an investigation to show which ones are unnecessary and which are necessary.

Mr. CAMPBELL of Kansas. Does not the gentleman from Oklahoma also agree that we have a number of useless agencies?

Mr. CARTER of Oklahoma. The gentleman may be right about that.

Mr. CAMPBELL of Kansas. And that this is probably one of them, as the analysis of the expenditures shows.

Mr. CARTER of Oklahoma. As the gentleman knows, these appropriations are not used to give money or supplies to the Indians as a rule, but usually are used for the purpose of paying farmers, matrons, and different employees of the service to go among the Indians.

Mr. CAMPBELL of Kansas. I went to one of those agencies at Mayetta, Kans., last spring and found just such an organization as that, and the only thing that agency did was to acknowledge leases for farm purposes made by Indian farmers who had the ability and the energy to run farms and occasionally leased their lands to a neighboring farmer. This agency cost the Government $21,000, and the only service it rendered could have been performed by a notary public in a near-by village for about $18.

Mr. CARTER of Oklahoma. Was that the Kickapoo Agency in Kansas?

Mr. CAMPBELL of Kansas. Yes; on the reservation.

Mr. CARTER of Oklahoma. There was also a school in connection with that, was there not?

Mr. CAMPBELL of Kansas. They say so. I did not locate it near the agency.

Mr. CARTER of Oklahoma. A camouflage school!

Mr. CAMPBELL of Kansas. That item that the gentleman refers to will go back into the bill. I am now talking about these items as they come up here to impress this House with the fact that the time has come to get a pruning knife and go after these agencies and cut them out. It can not be done in one instance alone. It does not start the matter to take out one agency.

Mr. CARTER of Oklahoma. I shall be very glad to join the gentleman in cutting down the expenses to the lowest possible amount, and in taking away from the Indian any supervision that he does not need; but the gentleman will agree that we must undertake that in an intelligent manner. We can not just arbitrarily wipe out an agency here and there without knowing what we are doing.

Mr. CAMPBELL of Kansas. How do these Indians in California live—in teepees, wearing blankets, in an Indian village?

Mr. CARTER of Oklahoma. Some of them live in villages and some scattered over the reservation. I have been over one reservation in California. These Indians are taken care of by this agency.

Mr. CAMPBELL of Kansas. How do they make a living?

Mr. CARTER of Oklahoma. Some of them farm and do different things. I think some of them have a few sheep. Some of them do very little, if anything.

Mr. CAMPBELL of Kansas. What on earth does the agent do for them?

Mr. CARTER of Oklahoma. Just about what he does at any other place.

Mr. CAMPBELL of Kansas. What does the farmer do?

Mr. CARTER of Oklahoma. I did not get into communication with the farmer, but the gentleman knows what the duties of an agency farmer are. I do not know how well he performs his duties.

Mr. CAMPBELL of Kansas. I know the kind of farmer he is, and I know about the value of the service he renders for them. It is as valueless as the service that the agent renders.

Mr. CARTER of Oklahoma. Perhaps the gentleman is right about that. I know there are 9,329 Indians on the reservation to be taken care of by this agency.

Mr. CAMPBELL of Kansas. About $1 apiece——

Mr. CARTER of Oklahoma. More than that.

Mr. CAMPBELL of Kansas. Out of this appropriation of $40,000 about a dollar apiece would reach the Indians, and the rest of it goes to maintain the households of the employees.

Mr. CARTER of Oklahoma. Mr. Chairman, the purpose of this appropriation, as the gentleman knows, is not to deliver money to the Indians, but it is to supervise and teach the Indian, to bring him up until he can get up to self-sustaining citizenship. Whether that is being done the gentleman is better informed with reference to this particular agency than I am. I do not think it is being done to such an extent as it should be in some of these agencies of which I am advised.

Mr. CAMPBELL of Kansas. May I ask the gentleman if it is his observation and experience that these Indian agents really advance the civilization of the Indians, if they really render a beneficial service to the Indians?

Mr. CARTER of Oklahoma. Yes; I will say to the gentleman that the superintendent at Muskogee renders very valuable service, and there is a class of local agents in Oklahoma who are now rendering beneficial service to the Indians. There the probate attorneys render valuable service to the Indians.

Mr. CAMPBELL of Kansas. I do not mean that class, I am referring to the agents such as are provided for in this bill for agencies in California, Kansas, Minnesota, and other States where the Indian agent surrounds himself with a doctor and a few employees, while the Government furnishes fuel and somebody to start the fires, where the agent sits around, and when a few Indians come in once in a while the agent is very much bored if he has to go out and see the Indians.

Mr. CARTER of Oklahoma. I think some agencies in Oklahoma have really done some good. It may be, I think, in some instances they have not. I am willing to go with the gentleman and cut out the unnecessary ones. I am willing to make any cut that I know will not injure the service.

Mr. CAMPBELL of Kansas. I want to compare the Navajo Indians in Arizona with other Indians in that section of the country. These Navajos have been largely free from agencies and the influence of agents, and they are high-grade Indians; I venture to say much higher grade than these in California that have been under the supervision of this agency. I withdraw the pro forma motion.

The CHAIRMAN. The pro forma motion is withdrawn, and the Clerk will read.

The Clerk read as follows:

For beginning the enlargement and improvement of the irrigation project upon the Torres Indian Reservation, California, for the irrigation of approximately 3,000 acres of Indian land in accordance with the plans and estimates submitted by the Chief Engineer in the Indian Service and approved by the Secretary of the Interior, $25,000, to remain available until expended and to be reimbursed to the United States in accordance with such rules and regulations as the Secretary of the Interior may prescribe: *Provided*, That the total cost of said irrigation project shall not exceed $150,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph just read. An examination of the hearings on this item discloses that this appropriation is for the purpose of sinking some large wells on a sparsely settled Indian reservation in the southern part of California for the ostensible purpose of helping the Indians. The estimated cost, if this is successfully undertaken, is $55 per acre, a rather large price for irrigation work on arid lands.

There have been some wells sunk on this reservation in the past, wells not of the same diameter as those contemplated in this new project. It is something new in a way to us from the East to cultivate lands by sinking various pipe wells and then establishing pumping stations in connection with those wells to get the water from below to the surface.

For the benefit of whom? In this case primarily for the benefit of the Indians. The Indians are not pressingly seeking this relief. There are only a few of them, and those few to-day have sufficient accommodations for tilling the land. This irrigation project is located where alternate sections have been heretofore granted to the railroads under the land-grant concessions, and these alternate sections are owned in private ownership. The major argument on the part of the department in favor of this project is that the private owners are sinking wells and tapping the water supply, and it is necessary to come to the rescue and relief of the Indians by establishing a large system.

Mr. MONDELL. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. MONDELL. On the point of cost—I know nothing about this project—but the gentleman referred to the cost of this project, $55 an acre, as rather high. I will say to the gentleman that irrigated lands in that section would easily stand a much larger construction charge than that. Some of the irrigation projects under the national irrigation law are costing considerably more than that per acre in regions where the acre production is much smaller than it would be in this section of California. I know nothing about the merits of this project, but I do know that the cost of $55 is not at all excessive. I should say it was quite reasonable.

Mr. STAFFORD. There are cases where under irrigation projects the cost of large tracts is as low as $20 or $25 an acre. Since the gentleman arose I have refreshed my memory and find that the value of the acreage will be $200 per acre. But even if there was just reason, as a business proposition, to go ahead with this well-sinking project, nevertheless when there are only 266 Indians on this reservation with a total area of 25,870 acres, you can not, particularly if we are going to protect the Treasury, have even a scintilla of regard for the Treasury or the taxpayers when we launch this project at an expense, according to the estimates, of about $23,000,000.

Mr. HAYDEN. Oh, no.

Mr. STAFFORD. I can not read it on account of the fine print. Is it $23,000,000?

Mr. HAYDEN. Twenty three thousand two hundred and three dollars and nine cents.

Mr. STAFFORD. Oh, yes; that is the cost of the present plant. Then that argument falls, because my eyes were seeing double what is printed in the hearings. As suggested by the gentleman, it is not unusual in these times to read billions or millions for thousands. As a matter of fact, in the Committee on Appropriations I have heard nothing but billions and millions, so I must be excused if I read millions for thousands. [Laughter.]

I certainly believe that if this project is adopted the cost will be more than the estimated amount, $150,000. I regret that my eyes will not permit me to read this fine print which I scanned last evening, but the idea that I obtained from reading the report of the department was that at this time, so far as the welfare of the Indian is concerned, you could not justify this new project of digging large wells for the accommodation of 266 Indians. I suppose that estimate of 266 Indians includes minors, women, and all other kinds of Indians, full blood and half blood, and all other relationships of blood.

Mr. HAYDEN. It is the practice of the Indian Service to provide 10 acres of irrigated land for each man, woman, and child; and if this project is carried out to the usual extent, they would have to provide 2,660 acres of land to take care of the entire tribe. As a matter of fact, they really propose to irri-

gage under this project, when it is completed, a much less area than that, due to the limited water supply available there. If the gentleman remembers the last time he traveled to California, if he went on the southern route, he passed through the Imperial Valley and then up the Coachella Valley and over the mountains into California.

Mr. STAFFORD. I am afraid I passed over that particular portion in the nighttime, and I was sound asleep in my berth, I remember traveling over the Mohave Desert.

Mr. HAYDEN. It is a fertile country, in which irrigated crops can be grown 365 days in a year. In this valley they produce the earliest cantaloupes raised anywhere in the United States. Irrigation is being extended all over the Coachella Valley. Unless a water supply is developed for the Indian lands all the underground water will be appropriated and the Indians never can irrigate their lands. Furthermore, if this work is undertaken it will bring immediate returns in the way of crops.

Mr. STAFFORD. The argument the gentleman advances was suggested in the hearing, and it is printed in large type in the copy of the hearings, which I was able to read last evening. As I recall, the gentleman raised the question then as to whether prior rights did not give the Indian the right to a certain supply of water, just as in the case of oil, when abstracted from the ground; whether prior usage would not permit the Indians or the representative of the Indians to go into court and restrain any other person from draining the water supply underneath the ground, so that their supply would not be impaired. As they have wells at present, if that is the case, what is the need of launching upon this new project?

Mr. ROBBINS. Mr. Chairman, the doctrine of the common law is that they can use water for commercial and domestic purposes that flows on the surface, even to exhaustion. The proposition the gentleman puts forth is that if an Indian has 26 acres of land and puts down a well and establishes a water right that an adjoining owner could not acquire title and put down a well and establish a use of water underground from this substrata and bring it to the surface and use it because the Indian on the adjoining portiton has a prior right to it. That is not the common-law doctrine at all.

Mr. STAFFORD. That was the proposal advanced by the gentleman from Arizona in the committee, and I am relying upon his assertion of that rule of law.

Mr. HAYDEN. There have been cases in the courts of California involving an appropriation of underground water made prior to the establishment of another well in the vicinity which lowered the water supply in the first well, and the courts have enjoined the pumping of water from the second well.

Mr. ROBBINS. That is contrary to the common-law doctrine.

Mr. HAYDEN. The common-law doctrine in regard to appropriations of water does not apply in the West.

Mr. ROBBINS. You must have statutory enactment to establish any such law as that.

Mr. HAYDEN. Therefore, it is necessary, particularly where a reservation is divided up into alternate sections as this one is, that the Indians proceed with due diligence to establish their pumping plant and get the water on their ground. If they do not do it, all of the underground flow in the Coachella Valley will be appropriated and the Indians never can irrigate their lands.

Mr. ROBBINS. Is this substrata in which they find water so limited that a few wells will exhaust it?

Mr. HAYDEN. Yes. Water-bearing area is at the bottom of the valley and is limited in quantity.

Mr. ROBBINS. How about the railroads and the public utilities established in that vicinity? Would they not have the right to exhaust the water entirely, and hence your project would fail?

Mr. HAYDEN. The railroads obtain their supply from over the mountains in other parts of California where water is more plentiful.

Mr. STAFFORD. Is this near Death Valley?

Mr. KETTNER. No; Death Valley adjoins the State of Nevada.

Mr. STAFFORD. Is this a dry country or a wet country?

Mr. KETTNER. It is very dry. Mr. Chairman, I will state that southern California is what may be called a man-made land. All water there must be developed. All of southern California is practically a desert, and water must be developed; and this land in the Coachella Valley is similar to the land in the Imperial Valley. A year ago I had the pleasure of passing over this land with the gentleman from Missouri, Mr. RUBEY, and several other Members of the House. We stopped at a ranch where they were very much surprised to learn that 47 carloads of lettuce had been shipped from that ranch to the eastern market. This was in March. At another place they had shipped something like 43 carloads of asparagus. That was on the 17th day of March, and, as the gentleman from Arizona has well stated, this land can be cultivated every day in the year, and it brings food to the market when they need it. The gentleman from Pennsylvania, Mr. BUTLER, was also in the party, and I think he will tell the Members what he saw in the Imperial Valley, and this is similar land to that——

Mr. BUTLER. If the gentleman will permit me——

Mr. KETTNER. I will.

Mr. BUTLER. How much produce was shipped from the Imperial Valley last year?

Mr. KETTNER. Thirty million dollars' worth.

Mr. BUTLER. How much was shipped 17 years ago?

Mr. KETTNER. Seventeen years ago? Not a dollar's worth.

Mr. BUTLER. Not a dollar's worth; it all comes from irrigation?

Mr. KETTNER. All from irrigation.

Mr. BUTLER. There is nothing more beautiful in the wide world, and I suppose there is no place in the United States that produces as much material as is produced in the Imperial Valley with irrigation. Is that still developing?

Mr. KETTNER. It is still developing.

Mr. STAFFORD. Are these lands in the Imperial Valley developed by means of wells with the aid of pumps?

Mr. KETTNER. Mostly from the Colorado River.

Mr. STAFFORD. That is a different project entirely. We all recognize that lands that are irrigated by means of water supply furnish large returns, but here is a pumping——

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to speak for 5 minutes, so as to allow the gentleman from Oklahoma [Mr. FERRIS] to ask me a question.

The CHAIRMAN. Is there objection? [After a pause]. The Chair hears none.

Mr. STAFFORD. I first yield to the gentleman from California.

Mr. KETTNER. Mr. Chairman, I will state, for the benefit of the gentleman from Wisconsin, that these lands can be very readily irrigated by pumping. The water there is very close to the surface, something like 6 or 8 feet, and, as has been stated, every other section of the land is railroad land, and by developing this water at the present time, in my opinion, it will make these Indians self-supporting.

Mr. STAFFORD. Will the gentleman yield?

Mr. KETTNER. I will.

Mr. STAFFORD. Why will not the present wells bring forth sufficient water so as to irrigate the land? What is the need of these enlarged wells and new pumping facilities?

Mr. KETTNER. All that part of the desert is practically new; it has only come under cultivation in the last 17 years.

Mr. STAFFORD. The report says that the present wells are inadequate by reason of the white settlers on alternate sections having tapped the water supply beneath. Now, it seems, from the argument here, there is a race on between the white settlers and the Indian Office as to which shall bore the largest well, so as to appropriate the water which is only 6 feet, the gentleman says, beneath the surface.

Mr. KETTNER. At some places. I will state that it was the white settler that has reclaimed some of this territory, and the Indian Department, I think, after seeing what the white settler can do, are now trying to make the Indians take care of themselves.

Mr. STAFFORD. That is very difficult, it seems to me, as has been illustrated in many instances throughout the country.

Mr. KETTNER. They have the land, and they surely can raise everything if we give them the water.

Mr. FERRIS. Mr. Chairman, I want to appeal to the gentleman from Wisconsin that whatever should be said should be said according to its adaptability to these Indians, and it is necessary that everybody should do that. There are 266 Indians. They are now cultivating 200 acres of land, which is less than an acre apiece.

Mr. STAFFORD. Will the gentleman permit me there? These 266 Indians are not 266 of majority?

Mr. FERRIS. I understand that.

Mr. STAFFORD. I assume only 40 or less.

Mr. FERRIS. Probably that is true; but that would only be 5 acres per capita, which is wholly inadequate. This is on a desert, and if it is not watered it is as bald and useless for crop purposes as the top of that table. Now, by giving them this project it will make about 10 acres apiece for these Indians, and it is reimbursable. You get the money back from the land, and you have relieved them and the Government from their support. They become self-supporting. The Treas-

ury will get its money back, and a barren waste will be converted into a habitable settlement there.

Mr. STAFFORD. I do not understand these Indians have any money to their credit.

Mr. FERRIS. It is reimbursable, because the Interior Department holds their land, and when this land is sold it can not be sold until the irrigation item has been reimbursed to the Government; so whatever is expended will come back to the Treasury. The gentleman knows that with water on the land they can raise anything on earth, and without water it is bald and without a blade of grass, and I think it is common sense to do this.

Mr. STAFFORD. I understand there is a competition between the white and the red man here.

The white men are there. There is a limited quantity of water supply that is being exhausted by the sinking of those wells. They are going to utilize that water supply. The hearings show that there is only a limited amount.

Now, there is a race on. I do not have that faith in the Indians, perhaps, that the gentleman has, although perhaps the Oklahoma Indian is different from the northern Wisconsin and Michigan Indian with whom I am acquainted. You can not make those Indians up north work except in rare instances.

Mr. FERRIS. That is a bad Indian.

Mr. STAFFORD. They are not bad Indians. They are shiftless Indians. Out on the Menominee Indian Reservation we used $3,000,000 of trust funds of the Indians and sunk it in a lumber mill up there, and it has been of no direct value to the Indians because they will not work. They have to get white men in there. Take it out on these arid lands and the Indians are nowise different. They have 1 acre for every person, including babies, minors, sisters, and their aunts, and their other relatives, and they themselves say that 4 acres of land is sufficient to support an Indian family.

Mr. FERRIS. I am not a member of the Indian Committee, but I remember this project when I was on that committee and was giving more attention to it than I do now. They were struggling for this 8 or 10 years ago before the Indian Committee.

Mr. STAFFORD. Why did they not have it?

Mr. FERRIS. I assume some one probably handled it as the gentleman contemplates now, and knocked it out. They have been bandied around from pillar to post, and it ought not to be so any longer, because they have a right in that fertile land. It has been demonstrated precisely what the water will do on land that is located right next to this. And it is not a case of some logging scheme that will not pan out, but it is a case of putting water on land that they know will be productive.

I hope the gentleman will not raise the point of order on it.

Mr. BUTLER. Mr. Chairman——

Mr. STAFFORD. I yield to the gentleman from Pennsylvania.

Mr. BUTLER. Mr. Chairman, I hope the gentleman from Wisconsin [Mr. STAFFORD] will not insist upon his point of order. I understand the purpose of this proposed appropriation is to enable these Indians and those interested in them to develop this country, to find some place in which to grow something.

The gentleman from California [Mr. KETTNER], who knows what he is talking about, says that this land is similar to the land that we find in the Imperial Valley, and that water run upon this land will have the same result that they have had by irrigation in the Imperial Valley. I understand the gentleman from Wisconsin [Mr. STAFFORD] makes his point of order against this item on the ground that it is not in order on this bill. I assume he is right—he usually is—and if he insists upon the point of order the item will go out of the bill and these Indians will not have advantage of this small amount of money for the purpose of improving their property.

I have never seen anywhere, I have not been able to see anything, that would size up to the productiveness found in the Imperial Valley, the pride of our good friend WILLIAM KETTNER. I went over into this land of promise as his guest about a year ago, and it is almost impossible to speak of its possibilities without exaggeration. The temptation is to be untruthful when one speaks of what will grow in the Imperial Valley if given the proper attention. There is no water there. I would not give the end of nothing for the whole of Imperial Valley if water had not been brought to it—by the enterprise of the people there—from the Colorado River. I will restrain myself and endeavor to be accurate when I tell you that I saw cattle pasturing upon alfalfa fields from which 5 to 7 tons of alfalfa per year are taken. If the production from this valley, properly watered, could be brought into this section of the country, it would feed us all.

Mr. FERRIS. And that land is similar in character to the land we are asking this appropriation for.

Mr. BUTLER. Because it is similar to the land that I saw, I venture to ask the gentleman from Wisconsin not to press his point of order, but let the trial be made here. They are the most fertile fields, the greenest that I ever saw, and everything that man or beast can eat will grow upon these barren plains when watered.

I had heard of the improvements and developments made in the Imperial Valley, and I thought that they were not truthfully spoken of but idle talk not worthy of storage in man's memory, but when I made the visit with Mr. KETTNER I found that the statement had been underdrawn, that more will grow there than I had ever seen or heard of. Hay, alfalfa, beans, cotton—yes, everything, that soil will send forth to sustain life—can be grown without one bit of expense or attention except that given to the irrigation ditches.

I have had but one concern since I left those people, and that is that we are leaving them way behind and seemingly alone. This Government should help them in some way to bring water to their land other than as they are now getting it, which is, as I understand, through Mexico. If those great channels should be interrupted and the water was taken from them the people might starve to death. If water will improve this great valley, why will it not improve the country we are talking about? I do hope that my friend will not press his point of order against this item. [Applause.]

Mr. FRENCH. Mr. Chairman, just a word further on this.

As it has been suggested here that there seemed to be something of a race between the white settlers and the Indians, let us suppose it to be the case. The Government stands in the relation of trustee to the Indians and it surely would be the duty of the Government to protect their rights. However, that particular point is not now before us, because it was brought out before the committee that it is believed these lands for the Indians can be irrigated at this time through wells without in any way interfering with the rights of white settlers who now are taking water and putting it upon their land. At a later date there may not be. I submit, then, that it is the part of wisdom, before the time shall come when there may be a possibility of sharp competition, with possible injustice, we ought to settle this question as trustees of the Indians so that their rights will be protected.

Mr. STAFFORD. Mr. Chairman, I appreciate all the arguments that have been advanced in favor of this project, and yet here we are launching on a new one, amounting to $150,000. If I thought that the Indians were in that condition, that they were without means of support, necessarily I would have to surrender my position. But here they have at present on these lands wells where, by means of pumping, they are able to supply themselves, as I take it, with water to irrigate the lands now being cultivated. At least, the hearings so disclose. I feel compelled, Mr. Chairman, to make the point of order.

The CHAIRMAN (Mr. FOSTER). The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

For beginning the construction of a road from Hoopa to Weitchpec, on the Hoopa Valley Reservation, in Humboldt County, Cal., in conformity with plans approved by the Secretary of the Interior, $10,000, to be immediately available and to remain available until expended, and to be reimbursed out of any funds of the Indians of said reservation now or hereafter placed to their credit in the Treasury of the United States: *Provided*, That the proper authorities of the county of Humboldt, Cal., agree to furnish, at their own expense, a competent engineer satisfactory to the Secretary of the Interior to supervise the construction of said road; to provide the use of such tools and implements as the said Secretary may deem to be justly required of them; and to maintain said road in good condition: *Provided further*, That the total cost of said road shall not exceed $30,500.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

I wish to inquire of some member of the committee or of the gentleman from California whether this item was recommended by the department, and if so, on what page of the hearings it is to be found? I have not been able to locate the item in the hearings.

Mr. LEA of California. It was recommended by the department, but it is not in the hearings, as I understand. This matter was presented to the committee toward the conclusion of their hearings, and I believe it is not embodied in their regular report.

Mr. STAFFORD. Is it included in the hearings at all?

Mr. LEA of California. I think it is not published in the hearings. The hearings with reference to this particular item were not published, as I understand.

Mr. CARTER of Oklahoma. I think the hearings on this particular item were had after we had sent the main hearings

to the Public Printer, and the hearings on these items were not inserted in the manuscript.

Mr. STAFFORD. That is the occasion of my rising—the fact that there were no hearings published which would give information on this item. I yield to the gentleman from California to give the necessary information which he probably gave to the committee, and which probably induced them to make this recommendation.

Mr. LEA of California. The reservation here in question is about 30 miles long, extending up the Klamath River to the Trinity River, and then up the Trinity River to Hoopa. The Indians number 1,299, and 464 of those Indians are in that part of the reservation where Hoopa is located, Hoopa being the administrative center of the Hoopa Valley Reservation, where there is an Indian school. Twenty-five thousand dollars of the funds of the Indians down the Klamath River are being used to construct a road and trail up the Klamath River to Weitchpec, and the road proposed here is to connect Weitchpec with the center of the reservation at Hoopa. In other words, this road is necessary to connect the two ends of the reservation. The pupils are required to go over this road; otherwise they would have to travel a distance of 75 or 100 miles to go by a road. It also gives an outlet for the products of the Hoopa Valley, where there are about 1,750 acres of arable land.

Mr. STAFFORD. Is there any road there at present?

Mr. LEA of California. No; there is not.

Mr. STAFFORD. It is a new project, then?

Mr. LEA of California. The only road now is a trail over the mountains such as the cattle could follow.

Mr. STAFFORD. One of the conditions of the paragraph is that the county of Humboldt should maintain the road after it is established?

Mr. LEA of California. Yes.

Mr. STAFFORD. What assurance can the gentleman give that the county will do that if the appropriation is made?

Mr. LEA of California. According to the language of the section, as I understand it, the road will not be built unless the county gives that assurance. That assurance would be required to be given by the supervisors of Humboldt County.

Mr. STAFFORD. Has the matter been taken up with the authorities of Humboldt County?

Mr. LEA of California. Yes; it has.

Mr. MONDELL. The road is on the reservation, is it?

Mr. LEA of California. Yes; the reservation is in Humboldt County. Humboldt County has already expended about $50,000 to connect that road with the other road. Through some mistake Humboldt County was given to understand that the Government would construct this road, and for that reason Humboldt County has expended $50,000 to construct a road to connect with this road and a bridge across the Klamath River. Several thousand dollars was spent to construct that bridge, which has been standing unused for two years past, and it will remain unused unless this road is connected with it.

Mr. STAFFORD. Has a declaration been made by the supervisors of Humboldt County that they would maintain the road if it is established?

Mr. LEA of California. There has not been an authoritative declaration to that effect, but there is no doubt, in my judgment, but that the county will do so.

Mr. STAFFORD. Mr. Chairman, the gentleman has made out a good case, and I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn. The Clerk will read.

The Clerk read as follows:

For the repair and extension of a bridge across the San Jacinto River, near the Soboba Indian Reservation, Cal., $4,000, to be expended under the direction of the Secretary of the Interior, and to be reimbursable from any funds now or hereafter placed in the Treasury to the credit of said Indians: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the State of California, or the county of Riverside, satisfactory guaranties of the payment by the said State of California, or by the county of Riverside, of at least one-half of the cost of repair and extension of said bridge, and that the proper authorities of the said State of California, or the said county of Riverside, shall assume full responsibility for, and will at all times maintain and repair, said bridge and the approaches thereto: *And provided further*, That any and all expenses above the amount herein named in connection with the repair and extension of said bridge shall be borne either by the said State of California or the said county of Riverside.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph just read.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order on the paragraph.

Mr. STAFFORD. I believe that this item and that for the construction of a bridge in North Carolina, later on provided, make provision for bridges off the reservations. It has not been the policy of the Government heretofore to carry appropriations for the construction of bridges when they are off the reservations, even though the bridges might be of some service to the reservations near by.

Mr. HAYDEN. I do not believe that any such rule has been adopted. I happen to know of a number of bridges constructed partly out of Indian funds, as in this case, that were not on reservations.

Mr. STAFFORD. It is not to be constructed out of Indian funds, but out of Government funds belonging to the United States.

Mr. HAYDEN. It would be reimbursable from any funds that the Indians may have.

Mr. STAFFORD. The gentleman should take the facts as they are. The Indians have no funds in this case and the money is to be appropriated out of the Treasury of the United States for the benefit of the locality. Am I in error as to that?

Mr. HAYDEN. The gentleman is mistaken about that. Whenever the trust period expires and the lands are sold, the money derived therefrom must be used to reimburse the United States.

Mr. STAFFORD. We will be a long time dead when that condition occurs, so that the burden is falling upon the United States for a local improvement.

Mr. CARTER of Oklahoma. Mr. Chairman, may I ask the gentleman, Has he read the evidence that has been presented to the committee in this case?

Mr. STAFFORD. Yes. I read the evidence as presented, including the very strong presentation of the case from the local standpoint made by the distinguished Representative from California, who is now on the floor; but it seems that this bridge for which this appropriation is sought should be erected by the local county authorities. It is true that the Indians on this reservation may get some benefit, but there are also some white people living nearby who would be benefited. As far as I recall the testimony, this river is as dry as the Imperial Valley for a good portion of the year. Now, I am not so much in sympathy with this idea of establishing bridges across dry streams in order to make it easier for Indians to get into a wet country. [Laughter.] Really, in all seriousness, I think this burden should be borne by the local authorities, and you are attempting by this means to place that charge upon the National Government. I call upon the members of the committee to cite any instance where we have done this heretofore. If we adopt this precedent we will have innumerable instances, perhaps stronger than this, perhaps not as strong, where the National Government will be called upon to erect bridges off reservations for some incidental benefit to the Indians on the reservation nearby, but principally for the benefit of the white people.

Mr. KETTNER. Mr. Chairman, I think the gentleman is in error in regard to this case. While there are a few white people living at the foot of the mountain, more than 90 per cent of the Indians live on that side of the river. In wintertime it is impossible for them to get to San Jacinto or to attend school. It is almost impossible in summer, when it is dry, for them to cross the river with any load or with a wagon. An automobile can not cross it. This is in the interest of the Sobaba Indian Reservation, and I feel certain that the gentleman has not read the evidence, because the Commissioner of Indian Affairs strongly recommends it. The Indian superintendent stationed there strongly recommends it, and has appealed to the Indian Department for the last two years to build this bridge. It is impossible for the Indians to bring to market at San Jacinto what they raise on their farms. It is a dry community. The county of Riverside is dry, so I hope the gentleman will not insinuate that the Indians are going into wet territory. I do know that this bridge is needed by the Indians, and I hope the gentleman will read the hearings again, because I know his idea of fairness——

Mr. NORTON. Does the gentleman think that his dry argument will appeal to the gentleman from Wisconsin?

Mr. STAFFORD. If there was any wet territory near by, I do not imagine you could keep the Indians on this arid place very long.

Mr. KETTNER. There is no wet territory near by, and I hope the gentleman will read the evidence again before he makes the point of order, because this appropriation is surely in the interest of the Indians.

Mr. STAFFORD. The hearings disclose the fact that there was a bridge constructed there in 1890.

Mr. KETTNER. Yes.

Mr. STAFFORD. That bridge was washed away by a flood.

Mr. KETTNER. Yes.

Mr. STAFFORD. That bridge was originally constructed by the county authorities.

Mr. KETTNER. Yes.

Mr. STAFFORD. The Indian reservation was there at that time. No more Indians have come onto that reservation since that time. More white people have come into that territory since that time.

Mr. KETTNER. Not on that side of the river.

Mr. STAFFORD. There are no less white people on that side of the river than there were when that bridge was first established, and we find the chairman of the committee addressing himself to the distinguished gentleman at the hearing as follows:

The CHAIRMAN. Mr. KETTNER, of course I have explained to you in the past the policy of the committee and of the House about building bridges on Indian reservations. It has always been the policy of the committee, since I have been here, not to build any bridges except out of Indian funds. Have any of these Indians any funds?

Mr. KETTNER. I can not say, Mr. Chairman.

The CHAIRMAN. Have they any lands?

Mr. KETTNER. I do not believe so. The Indians of California are very poor.

Mr. CARTER of Oklahoma. Will the gentleman permit me right there? Evidently there is a misprint there. It has been the policy of the committee to build bridges out of tribal funds only or to make them reimbursable where we could see tribal funds available in the future.

Mr. STAFFORD. But the gentleman could not see any tribal funds whatever out of which this expenditure could be paid, even with his fine inspection and far sight.

Mr. KETTNER. I hope the gentleman from Wisconsin will not make a point of order on this item.

Mr. STAFFORD. Mr. Chairman, it is not the amount, but a question of principle is involved. The sum of $4,000 is a mere bagatelle in these days when we are voting billions, but if we are going to launch on to this policy there will be no limit to it. I think there is good ground for maintaining the policy as in the past, not to provide funds out of the National Treasury for the building of bridges outside of reservations.

Mr. KETTNER. Will the gentleman yield?

Mr. STAFFORD. I am always glad to yield to the gentleman.

Mr. KETTNER. The evidence shows that they have tried for the last two years to get the supervisors to build this bridge, and they will not build it, as they claim the bridge would be used almost exclusively by the Sobaba Indians, and the Government should build the bridge.

Mr. STAFFORD. Of course there is no question that the supervisors are trying to have this money furnished by the National Government. That is natural. The supervisors in every county in the country would throw the burden on the National Government if they thought the National Government would sustain it.

Mr. KETTNER. I hope the gentleman will not make that assertion, because the supervisors would build this bridge if there were white people over there or if they thought it was their duty to build it. It is needed by the Indians.

Mr. STAFFORD. They thought it was their duty in 1890. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The clerk read as follows:

FLORIDA.

SEC. 4. For relief of distress among the Seminole Indians in Florida, and for purposes of their civilization and education, $10,000.

IDAHO.

SEC. 5. For support and civilization of Indians on the Fort Hall Reservation in Idaho, including pay of employees, $30,000.

Mr. MILLER of Minnesota. Mr. Chairman, I want to make an inquiry respecting Florida, if I may be allowed to revert to that. I ask unanimous consent that we may return to the item for Florida.

Mr. HARRISON of Mississippi. I want to reserve a point of order on the paragraph just read touching Idaho.

Mr. MILLER of Minnesota. We have not finished reading that.

Mr. HARRISON of Mississippi. I do not want to lose the right.

Mr. MONDELL. The gentleman's reservation of the point of order comes too late if it relates to the Florida item.

Mr. HARRISON of Mississippi. The Idaho item.

The CHAIRMAN. The Chair begs to state that the Clerk read the item relating to Florida and started to read Idaho, and read the first three lines, but the gentleman from Minnesota addressed the Chair, and asked to return to section 4, Florida.

Mr. MILLER of Minnesota. That is correct.

The CHAIRMAN. And the gentleman from Mississippi, as the Chair understands, desires to reserve a point of order on the Idaho item, section 5.

Mr. HARRISON of Mississippi. I do not want to lose my right to reserve a point of order on the Idaho item.

The CHAIRMAN. The gentleman has that right. Is there objection to returning to section 4?

There was no objection.

Mr. MILLER of Minnesota. This item of $10,000 for the relief of the Seminole Indians in Florida is an old friend of the House. It has been a matter of extreme interest to me to know the progress made by the Indian Office in relieving distress among the Seminole Indians, and consequently in expending this $10,000 which they yearly get. I think this makes nine successive years that this $10,000 has been appropriated. The total amount contributed would be $90,000. I imagine that is about a thousand dollars apiece to all the Seminole Indians yet rounded up. There are a lot in the Everglades that have not come in and will not come in. There was a time, three or four years ago, when it was thought advisable to have a committee go and make an investigation and see what progress was made in relieving the distress of the Seminole Indians. I understand that some agents of the department, fearing that Congress might discontinue the appropriation, have at various times gone down there and held dangling from the trees, under the mosses and the mistletoe, some of those beautiful American bank notes elegantly engraved, and said, "Brother Seminoles, please come to your white brothers and take the fruit that you see before you"; and the Seminole says, "We have tasted the white man's fruit too often, and so have our ancestors"; and they will not come in. I do not know but that some better work has taken place lately, and therefore I make this extended inquiry that I may get the latest information. Tell us how the brother Seminoles are getting on and how much they have been allowed to enjoy the wonderful blessings of civilization that comes from the annual expenditure of $10,000. [Laughter.]

Mr. SEARS. Is the gentleman through.

Mr. MILLER of Minnesota. Temporarily.

Mr. SEARS. Mr. Chairman, the distinguished and learned gentleman, my colleague from Minnesota, having been raised in that cold, frozen, bleak, and barren north, evidently does not understand Florida, that sun-kissed garden spot and heaven on earth. [Laughter.] We do not have to dangle anything down there from the limbs of the trees to have people come to our land and enjoy our climate. I am surprised that he should undertake to misquote what has been done by Congress for the Seminoles. I am sure it is because he is uninformed.

The first appropriation was only $5,000, if I recollect correctly, and there has only been two of $8,000, and now for the first time it is raised to $10,000.

Mr. Chairman, I do not care at this time to go into the defense of the Seminoles. I will only say that if there is a band of Indians that needs assistance, and to whom assistance is owed by the Government, it is the Seminole Indians. This great country of ours took from them that beautiful State, where I now live, without giving to them one dollar in compensation. This is the only tribe of Indians that I know of who for all their lives have lived in Florida or any State, and still are full-blooded Seminoles. They have not mixed or mingled with the whites. They feel that they have simply been robbed of what really belongs to them, and that the white men have taken it from them. This is a small pittance given to them for the purpose of educating them and repairing in a small degree the injury we did to them in violation of the treaty that we made with them years ago.

Mr. LOBECK. How many Seminoles are there?

Mr. SEARS. There are 635 Seminoles. Let me say that Florida, while she feels that the National Government should do more for the Seminoles, and while we feel it will do more if you study the question, I am assured by the Commissioner of Indian Affairs that he is thoroughly investigating conditions, and for the first time will make a personal visit to Florida for further investigation, and he assures me something will be done for them. I have been getting appropriations for the Seminole Indians and, as I stated to the Commissioner of Indian Affairs over the phone, there was no need of my securing appropriations unless the appropriations were spent to help the Seminoles.

At the last session of the Legislature of Florida a bill was passed giving to the Seminoles 100,000 acres of land. I ask unanimous consent to insert that bill in the RECORD in order to show the good things that Florida has done for them. For my part, as I said to the Indian Committee, if they would assist in educating the Seminoles, Florida could be depended upon to do her part.

Mr. MILLER of Minnesota. About how many feet of water is the 100,000 acres of land under?

Mr. SEARS. If it was under 10 feet of water, it would be more pleasant to live on than under 10 feet of snow. [Laughter.] But be that as it may, these Indians, rather than move to Oklahoma from Florida, which was their first home in the

United States and of which they are all proud, resisted our troops and we were never able to take the Seminoles to that State.

Mr. MILLER of Minnesota. Any Indian in the Everglades of Florida who will not go to sun and moon kissed land of Oklahoma manifests such a low degree of intelligence that he ought to be an object of our solicitude and paternal care. [Laughter.]

Mr. SEARS. Perhaps the gentleman would say that is one reason why so many of his constituents are moving to my State; but I doubt it, as they show the highest degree of intelligence, and I am glad to count them among my closest friends. [Laughter.]

Mr. MILLER of Minnesota. We have so many of the good that we are willing to spare a few to help the State of Florida.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER of Minnesota. Mr. Chairman, most of my time has been taken up by the gentleman from Florida, and I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Now, Mr. Chairman, I would like some information about this matter, and I ask the chairman of the committee, the gentleman from Oklahoma, if he will tell me how much of this $10,000 was expended last year?

Mr. CAMPBELL of Kansas. If the gentleman from Oklahoma has not the data, I think I can give the information. I was the father, originally, of this item. The last year there was expended $1,725.26.

Mr. MILLER of Minnesota. For what purpose?

Mr. CAMPBELL of Kansas. For this purpose: Regular employees—I do not understand why gentlemen all over this crowded Chamber should grin and smile and laugh when I say "regular employees." Regular employees, $889.33; traveling expenses, $455.25; stationery, printing, and schoolroom supplies, $6.45 [laughter]; equipment, $3; miscellaneous, $143.65.

Mr. SEARS. Mr. Chairman, the citizens of Fort Lauderdale have permitted five Indians to go to a white school without charge, and notwithstanding the appropriations I have secured through the generosity of the Members of this House, the good ladies of Fort Lauderdale have made provision for the Indian girls to go to school, and have also made their clothing without any charge.

We could not get the money appropriated spent. I have been doing my level best. I am still working away, and I hope some day to get the department interested, so it will not be necessary for the good, charitable people of Fort Lauderdale to longer carry the burden. With this sentiment I know my colleagues are in hearty accord.

Mr. CAMPBELL of Kansas. What were those, regular employees?

Mr. SEARS. They only have one, and for six months out of last year he did not draw any salary, I presume. I understand he did not. He was in Texas with the Florida troops. He was the chaplain of the Florida regiment. Therefore, they had no supervision during about six months.

Mr. CAMPBELL of Kansas. What is the name of this employee?

Mr. SEARS. Dean Spencer.

Mr. CAMPBELL of Kansas. Had he not gone as chaplain, I presume the expenditure instead of being $800 would have been one thousand five hundred and odd dollars?

Mr. SEARS. I presume so.

Mr. MILLER of Minnesota. Mr. Chairman, I think the State of Florida is to be congratulated in having done something for these five Seminole children. The American Congress has appropriated $90,000, and has not yet had a child in school or a dress on a child's back.

Mr. SEARS. Oh, Mr. Chairman, the gentleman does not want to make an erroneous statement.

Mr. MILLER of Minnesota. Oh, the gentleman can have more time later of his own. I understand when a subcommittee of the Committee on Indian Affairs went down to see these Indians runners were sent out through the Everglades; they went out in canoes into the bayous, among the crocodiles and alligators, and now and then did catch sight of an Indian, but before they could bring him in he had escaped into the fastnesses of the Everglades of Florida. Four or five, however, they found asleep, and those they captured and brought before the committee, led by a distinguished member of the tribe, who passes under the beautiful sobriquet of "Shirt Tail Charlie." He has acquired this distinction because he is the only member of the tribe who has ever yet had the satisfaction of wearing a shirt. Manifestly he is the object of our solicitude and concern, and fills us with great pride. After 10 years and an expenditure of $90,000 we have one shirt on the back of one Seminole Indian. This should fill us with great pride. Let us not be weary in well-doing; let us keep up the good work. In another 10 years we may have another Seminole with a shirt on his back, and 10 years later still another. Pause, my friends, and contemplate the result of our 30 years' effort in behalf of the Seminoles. Three of them with shirts on their backs! At this rate of progress, just how much can we expect will be accomplished in the next hundred years? Oh, I think it is a matter that should concern us deeply, and upon which we should lavish our fondest thoughts and dreams, and a century from now it may be that we will see not only one man with a shirt on his back, but possibly a dozen children clothed and in school. Wonderful progress among the Seminoles! I am glad to see that we have spent $1,700 another year in going through the motion of aiding the Seminoles in Florida. A few years ago we expended $2,400 or $2,500 a year in going through the motions of aiding the Seminoles in Florida.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER of Minnesota. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Mr. Chairman, when I was a member of the Committee on Indian Affairs it was with much hesitancy that we included this item year after year, and I remember four years ago it was decided that if the department did not make a better showing, did not really do something, we would cut it out. I am not going to make any motion to strike this out, but if something is not done next year I trust the committee itself will strike it out. What is the use of spending hundreds of dollars out of the Treasury of the United States in salary and traveling expenses and equipment, in doing nothing—absolutely nothing? I do not want to cast any slight upon the good State of Florida. I think it is splendid that it has appropriated 100,000 acres of land. It would be still better if the State could have appropriated an additional amount to drain the water off the land so that the Indians could have a place to put their feet; but if any of these 100,000 acres is good land, it ought to take care of a few hundred Indians. I think the gentleman from Florida, active as he always is, interesting as he could not help but be, zealous for his State right up to the border line of that which is exactly right, has stated the number of Indians a little high. Nobody knows how many there are. The probabilities are there are somewhere around two or three hundred, and it may be there are five or six hundred down there, lying among the crocodiles. But nobody has seen them.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. KNUTSON. About how many gallons would these 100,000 acres make?

Mr. MILLER of Minnesota. I do not know; but it is a pertinent subject of inquiry, and I am glad that the gentleman has put it into the RECORD. Very likely this gentleman who is drawing a salary as an employee will turn his distinguished attention to that subject as soon as he is no longer a chaplain in the Army. It is a great loss to these Seminoles, especially to "Shirt Tail Charlie," that their friend and benefactor has left them in the swamps of Florida and gone to war. It is a serious moment in his life and that of his colleagues and friends down there, and I really hope that we will try our best to alleviate their suffering and sorrow by not sending anybody else down there who will try any more of this work.

Mr. JUUL. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. JUUL. I want to ask the gentleman if when he gets over on page 27, where the State of Minnesota is concerned, he will speak with equal humor of the $185,000 that Minnesota wants? If we can get, proportionately, as much humor out of that as we have now gotten out of $10,000, we ought to get considerable. [Laughter.]

Mr. MILLER of Minnesota. If my friend from Illinois, Mr. JUUL, who has just propounded this query, remains here on the floor, which he usually does, one man who is almost always here, when we arrive at the point he may be delighted by some remarks of the gentleman from Minnesota who is now speaking, but I will say for his information now that this $10,000 in this item comes out of the Treasury of the United States. The $185,000 in the Minnesota item comes out of the money of the Indians, and the State of Minnesota is the only State in this Union the Indians of which do not now receive one penny out of the Treasury of the United States for their education, support, or maintenance.

Mr. JUUL. One more question.

Mr. VENABLE. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes; I know what the gentleman is going to ask, and I want him to ask it.

Mr. VENABLE. Have not the Indians of Minnesota received gratuities in various Indian bills introduced from time to time?

Mr. MILLER of Minnesota. They have not, except in the fulfillment of a few treaty agreements——

Mr. VENABLE. They have received no gratuity?

Mr. MILLER of Minnesota. None whatever.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. MILLER of Minnesota. I will.

Mr. JOHNSON of Washington. Do not the Indians of northern Minnesota receive a bonus for giving some sort of war dance once a year?

Mr. MILLER of Minnesota. Now, I am surprised that the gentleman from the State of Washington, as quick and ready with his questions as he is handsome of countenance, should stand up here after having been in this House so many years and ask that question. Why, these Indians take a thousand dollars of their own money, not out of the Treasury of the United States but out of their own pockets and have a little affair of their own.

Mr. JOHNSON of Washington. Do not they ask the Treasury to add another thousand dollars to it?

Mr. MILLER of Minnesota. No, sir; they never have, and they never will. [Applause.]

Mr. JUUL. I want to ask the gentleman now——

Mr. MILLER of Minnesota. They are not children, or babes in the woods. Out in Minnesota there is a healthy atmosphere, and whether these Indians are walking in the summer time through the trees or standing on their feet in snow drifts——

Mr. HARRISON of Mississsippi. Or dancing.

Mr. MILLER of Minnesota (continuing). They are standing upright, and they are battling their way to civilization and success. If they were down in the Everglades of Florida I suppose they would be lying down with the crocodiles and praying the Indian Committee to send a man at $1,700 a year to give one of the bunch a shirt once in a while.

The CHAIRMAN. The time of the gentleman has expired.

Mr. NORTON. Mr. Chairman, I desire——

Mr. SEARS. Mr. Chairman——

Mr. NORTON. I will yield to the gentleman.

Mr. SEARS. Mr. Chairman, I ask unanimous consent to proceed not exceeding five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SEARS. Mr. Chairman, I thought the distinguished and learned gentleman from Minnesota was proceeding in a jocular way. I assure you when I referred to Minnesota I was speaking in that vein, because it is a great State and ably represented; but from the energy and vehemence he puts in his voice when he refers to crocodiles and "the Everglades of Florida," evidently the gentleman's ignorance as to conditions in my State is more dense even than I would dare presume. [Laughter and applause.] I want to say to the gentleman that the State of Florida has spent $4,000,000 draining the Everglades, and we will spend an additional $4,000,000 if necessary to make good our promise. We have drained thousands and thousands of acres of it, and when we shall have finished draining it it will be the garden spot of this country. There is no richer section in the country than the Everglades, but it takes time, and we are going to complete the task. You can not keep Florida down by referring to a small strip which is the Everglades and call the whole State the Everglades. As a matter of fact there is not a single crocodile in Florida, and the gentleman should study his zoology again, because we have but a few alligators existing down there, and those will not bite anybody from the State of Minnesota, not even a man who happens to be in Congress. So he can come down and visit or live with us with perfect safety. The gentleman has repeatedly stated that $90,000 has been spent on the Seminoles——

Mr. MILLER of Minnesota. Appropriated, not spent.

Mr. SEARS. No such sum has been appropriated and no such sum has been spent. He said that sometimes perhaps in my enthusiasm fighting for my State I might go too far. If he will read the hearings before the Indian Affairs Committee, he will find I stated emphatically that if the Indian Commissioner would not spend some money on these poor Indians there was no need of any more appropriations; that it is useless to go on and let the money lie there and let those people suffer. It may be unfortunate that this Shirt Tail Charlie he refers to lives very close to nature, but it might be more fortunate if more Members of Congress would get nearer back to nature so that they could see and understand what the Everglades are. Now, I am speaking——

Mr. MILLER of Minnesota. Will the gentleman permit me to put a serious inquiry?

Mr. SEARS. Both having been evidently so jocular, I would like to have a serious question from the gentleman.

Mr. MILLER of Minnesota. That is what I desire to propound. Can not the gentleman suggest something practical?

Mr. SEARS. I have suggested something practical, and I think it ought to be worked out——

Mr. MILLER of Minnesota. Certainly the gentleman does not approve of what has been going on year after year, spending $1,700 or $2,700 for nothing whatever except for clerk hire and traveling expenses?

Mr. SEARS. They do not expend all——

Mr. MILLER of Minnesota. They expend that much.

Mr. SEARS. My suggestion was that a Seminole Indian, if possible one who had been educated in some college, should be sent down to deal with these Indians——

Mr. MILLER of Minnesota. The truth is, they will have nothing to do with the whites?

Mr. SEARS. They will not. And the reason the Indian Committee could not find these Indians, as long as it has been since that war, was because a Miami daily paper published an article in which it was stated the Indian Committee was coming down there for the purpose of investigating whether or not it was advisable to take the Seminoles to Oklahoma. And the Indians went back into the Everglades, out into the interior, where the committee could not find them. This was solely because they did not wish to go to Oklahoma even yet.

I think a school should be established and that these young Indians should be taught how to farm and make a modern living, because the white people have encroached on them until they can not make a living in the usual way, to wit, by hunting and fishing. The Everglades are being drained and the water supply is therefore limited, so that it lessens the opportunity for their hunting and fishing. They must be educated and taught and reformed, or soon they will be wards of the Government. I do not want this Government to make of them the same kind of Indians that it has made of some, I am afraid, out in the West; that is, looking entirely to the Government for maintenance and support. We want them to rely on their own efforts. The following is a copy of the bill passed by the legislature of my State and which permission was granted to have incorporated as a part of my remarks:

Chapter 7310 (No. 52).

An act providing for and setting aside certain lands to the Seminole Indians as a reservation, providing for trustees, in whom the title to said lands shall be vested for the use and benefit of said Indians.

Be it enacted by the Legislature of the State of Florida:

SECTION 1. The following-described lands in the county of Monroe, State of Florida be, and the same are hereby, set aside and given to the Seminole Indians of Florida as a reservation, to wit:

All of the lands now belonging to the State of Florida in township 56 south of range 32 east, being all of sections 7 to 15, inclusive, and 17 to 36, inclusive, containing 18,560 acres, more or less.

Also all of sections 1 to 4, inclusive, 10 to 15, inclusive; 22 to 24, inclusive; and sections 35 and 36, in township 57 south of range 32 east, containing 9,600 acres, more or less.

Also all of sections 1 to 3, inclusive; 10 to 14, inclusive; 24, 25, 35, and 36, of township 58 south of range 32 east, containing 7,680 acres, more or less.

Also all of sections 7 to 15, inclusive, and 17 to 36, inclusive, of township 56 south of range 33 east, containing 18,560 acres, more or less.

Also all of sections 1 to 15, inclusive, and 17 to 36, inclusive, of township 57 south of range 33 east, containing 22,400 acres, more or less.

Also all of sections 1 to 15, inclusive, and 17 to 36, inclusive, of township 58 south of range 33 east, containing 22,400 acres, more or less.

SEC. 2. The trustees of the internal improvement fund are hereby directed to convey to the board of commissioners of State institutions the title to said described lands, in trust, however, for the perpetual use and benefit of the Indians aforesaid and as a reservation for them.

SEC. 3. This act shall become effective upon its approval by the governor.

Approved May 9, 1917.

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

Mr. NORTON. Mr. Chairman, I move to strike out the last word.

I desire to say that several members of the Committee on Indian Affairs visited Florida last spring and endeavored to see what is being done and what ought to be done for the education and civilization of the Seminole Indians. We found a surprising condition among these Indians in Florida. I think we had rather expected to find, in that sun-kissed southern land, the Seminole Indians, who are so closely connected with the earlier history of this country, among the most civilized and most enlightened and progressive Indians in the United States. But what we found there was just the opposite of that. Nowhere in this wide land of ours are there Indians so uncivilized, so lacking in education, so lacking in progress, so lacking in all the

elements of modern civilization and advancement as these Indians that we were able to see or hear of in Florida.

We went to Fort Lauderdale, and we saw there a Seminole Indian camp probably a quarter or a half a mile from the town. We were told that that was one of the best camps of the Seminole Indians in Florida. As I recall it now, it comprised three little thatched huts. The Indians there lived in huts not inclosed but merely consisting of four poles holding up a roof made of palm leaves woven together so as to keep out the rain.

The one Seminole Indian of whom all Florida seemed to be most proud was at this particular camp. He is spoken of in the hearings and is known by the name of Tony Tommy. In that camp was the distinguished Seminole to whom the gentleman from Minnesota [Mr. MILLER] referred. The boy Tony Tommy is a lad of about 16 years old. He knew how to read and write and had been to school. He had been encouraged to go to school through the work of a Mr. and Mrs. Stranahan. Mr. Stranahan is engaged in the mercantile business in Fort Lauderdale and seemed to take a great deal of interest in the Seminole Indians. He has lived in Fort Lauderdale for many years and has been engaged in trading with the Indians, and is, as we were told, better acquainted with the Seminole Indians in Florida than probably any other man in the State. He told me, personally, that the condition of the Seminole Indians in Florida was growing worse from year to year. From my own observation I do not think that conditions could possibly be worse than we saw them in this camp. These Indians made their living by fishing, trapping, and by doing odd jobs for white and colored citizens. They lived mostly upon fruits, bulbs, fish, turtles, and alligators. Some of their time was spent in working for white people in and around Fort Lauderdale at truck gardening. They showed no particular desire for education. They did not seem to have any desire or willingness to mingle much with the white people.

The CHAIRMAN. The time of the gentleman has expired.

Mr. NORTON. Mr. Chairman, I ask unanimous consent to continue for five minutes more.

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. CARTER of Oklahoma. Mr. Chairman, I ask unanimous consent that the debate on this paragraph and all amendments thereto close in eight minutes, and that I have three minutes after the gentleman from North Dakota has concluded.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that debate on this paragraph and all amendments thereto close in eight minutes. Is there objection?

There was no objection.

Mr. NORTON. The only place this camp had for getting water was a little hole a few feet deep that had been scraped out of the ground. It was filthy. It was such a watering place that in no other place in which I had ever been would a respectable farmer want to have his hogs take water from it. We were told that camp was one of the oldest Seminole camps in that section of the country; that for many, many years the Seminoles had camped there; but that now they were soon to be driven away from there, for the title to the land had been acquired by some white men, and they were to be obliged to go farther into the interior. It occurred to me, as a member of the committee, if anything could be done of real value for the education and civilization of the Seminole Indians it could best be done by the people of Florida. It amazed me to find that the people of Florida had so neglected those Indians for the last 100 years.

Mr. LITTLE. Will the gentleman yield for a question?

Mr. NORTON. Certainly.

Mr. LITTLE. What is the condition of those people as to their health and strength?

Mr. NORTON. They seem to be healthy and seem to be vigorous and active. They are given to taking up the ways of the white man. It was not surprising that the Bureau of Indian Affairs had not accomplished anything for these Indians, because I had seen elsewhere like failure on the part of the bureau. The money that has been expended by the department in Florida during the past 10 years, and considerable has been expended, I could not find had been used to any real good down there excepting whatever good it may have been to the man or men who receive it in salaries from the Government.

We met a Government inspector at Fort Lauderdale who was sent there, it appeared, by the Bureau of Indian Affairs to meet the committee. He had a great many theories that he put forward in regard to the Seminole Indians and what he was planning to do for them. He told what had been planned to be done for them by the Bureau of Indian Affairs; but it was all talk and theory. There was no substance or no real action, no real work, that would warrant the glib statements that he made.

Mr. FAIRFIELD. Mr. Chairman, will the gentleman yield?

Mr. NORTON. Certainly.

Mr. FAIRFIELD. I would like to know how many Seminoles are yet living. What is the number of the Seminoles?

Mr. NORTON. There are supposed to be 600 in Florida. I can tell the gentleman that the members of the committee did not see to exceed eight or nine Seminole Indians during the week we spent in Florida.

Mr. FAIRFIELD. I understand that 50 years ago a special commissioner was sent to look up this whole question and make a report to the department.

Mr. NORTON. Yes. Gen. H. M. Creel, of Devils Lake, N. Dak., a graduate of West Point, and for many years connected with the United States Army, made that investigation and made a report to the Indian Bureau. Gen. Creel really did try to have something done for the Indians down there. However, owing to his activity in the Indian Service, and owing to his endeavor to really do something for the Indians, he was apparently let out of the service and relegated to private life during this administration.

The CHAIRMAN. The time of the gentleman from North Dakota has again expired.

Mr. NORTON. Mr. Chairman, I ask unanimous consent that I may continue for five minutes more.

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent to continue for five minutes more. The time has already been limited, the Chair will inform the gentleman.

Mr. CARTER of Oklahoma. Mr. Chairman, I do not object to my friend from North Dakota having five minutes more, but I do want to make progress with the consideration of the bill. I do not want to run on indefinitely on this item. I understand the gentleman from Kansas [Mr. CAMPBELL] also desires to address the House. How much time does the gentleman want?

Mr. CAMPBELL of Kansas. I would like five minutes. I managed only to interject a question.

Mr. CARTER of Oklahoma. I ask unanimous consent, Mr. Chairman, that the debate on this item close in 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. NORTON. Mr. Chairman, as I was saying relative to the Seminole Indians, I want to state to the committee that I believe from the observations I made in Florida last spring that the main reason why the Indian Bureau has not been able to do anything for the Indians in Florida is the same reason for the failure of the Indian Bureau in other sections of the country to do something beneficial for the Indians, and that is they have not had men in the employ of the Indian Bureau down there who had at heart the interest of the Indians and who really attempted to do something for them. I tried to make inquiry of the representatives of the Government in Florida concerning this agent, Dean Spencer, as to what he actually knew about the Seminole Indians. I could not find that he knew much about the Seminole Indians. He was a fine, intelligent appearing gentleman, but so far as I could learn from him he had not spent much time among the Indians or in trying to learn the condition of the Seminole Indians. He had not been out to mingle with them or to actually help them. That was true likewise with the Indian inspector or special agent the committee met and talked with at Fort Lauderdale.

The Seminole Indians of Florida were supposed to have a large tract of land reserved for them in Florida by the Government, but no representative of the Government, so far as we could find down there, knew anything definite about it or where this land was located. The Indians knew nothing definitely about it.

Since the House committee was down there last spring the Legislative Assembly of Florida has given 100,000 acres of land to the Seminole Indians of Florida. This 100,000 acres that has been given to the Indians was part of the Indian land that was ceded by the Government to the State of Florida some years ago. It occurred to me that a real, live man who wanted to do something for the Indians could go down there and use a part of that 100,000-acre tract, or a part of the tract that the Government has down there already—something more than 20,000 acres—and really help these Indians to provide for themselves. But if, as in the past, the representatives of the Indian Bureau are going down to Florida to help these Indians by living at Miami or Palm Beach or Fort Lauderdale or St. Augustine, instead of going out among the Indians, we can not expect anything else but the same condition that has existed down there for many years.

The condition of those Indians is pitiful. Something should be done for them, and it seems to me it is no credit—and I say that in all kindness of spirit and with no desire to condemn the people of Florida or to impugn their motives or their methods—it is no credit to the people of Florida or the State of Florida that these Seminole Indians are in the condition that they are found to be in to-day.

Mr. TILLMAN. Mr. Chairman, will the gentleman yield for a short question?

Mr. NORTON. Certainly.

Mr. TILLMAN. I am very much interested in what the gentleman says. Is it not true, as evidence of the fact, that these people are capable of learning rapidly; that this boy, Tony Tommy, a direct descendant of Osceola, to whom the gentleman refers, was the brightest boy in his grade at the public school?

Mr. NORTON. That is true; and that is evidence that something can be done for them, if they are approached properly. I think the suggestion of the gentleman from Florida [Mr. SEARS], that some educated Seminole Indian from Oklahoma or some other State that really has a heart interest be sent down to work for them, should be followed. [Applause.]

The CHAIRMAN. The time of the gentleman from North Dakota has again expired.

Mr. CAMPBELL of Kansas. Mr. Chairman, some years ago I happened to visit Miami and saw some of the Seminole Indians. I made inquiry about them. They are a very interesting type of Indian. They are the handsomest Indians I have seen. The men and women dress alike in the gayest kind of colors. They wear a sort of long shirt made of red and blue and yellow and all the brighter and more beautiful colors. They are as wild as partridges.

I inquired how many there were of them. Nobody knew. I wanted to know how they made a living. Nobody helped them; that is, the State of Florida did nothing for them, and the Government did nothing for them. They did chores or gardening or hunting or fishing or something of that sort. Nobody seemed to think that they are unhealthy. When the next Indian appropriation bill was under consideration I asked that an appropriation be made to take a census of those Indians and to make a report to Congress as to what could be done toward maintaining them where they could make a living. I was told that the Everglades were being drained, and that ultimately the Seminoles would be without a place where they could pitch a tent or set up a tepee. The report called for in that appropriation has never yet been made. There is an estimate that there are some 600 Indians.

But a report as to what ought to be done or what can be done for their creature necessities has never been made. I was not interested in starting a school for them. They will not go to school. But the encroachments of the white men upon them seemed to be crowding right in upon them until they were getting into such a small space that they must evidently starve if some provision was not made. I was told then that probably the State of Florida would cede them some land. I am glad that has been done. I think that solves the Seminole problem. I do not think the Indian Department can ever render them 15 cents' worth of good from now on. If you can send a good missionary interested in them to start a school among them and get a few of them interested in it, and have a few of them educated and let them go out among their own people, and let the Indians teach themselves, it seems to me that is the better thing to do. A man does not need to know very much about arithmetic or grammar in order to kill an alligator or catch a string of fish or raise a head of lettuce. That is what they are doing, that is what they want to do, that is what they can do. I was interested in them sufficiently to get this item for a report as to how many there were and what could be done. We have had as yet no suggestion from the department as to what can be done for them, but the State of Florida has solved the problem by giving them land.

Mr. CARTER of Oklahoma. Mr. Chairman, the Committee on Indian Affairs, which was authorized by the last Indian appropriation act to visit different Indian tribes and reservations, spent two days in the State of Florida, beginning at Fort Lauderdale, and then on down to Miami and back up to St. Augustine and then to Jacksonville, at all of which places hearings were had which have been printed. By the time the committee reached Jacksonville on its return, I found that the usual had happened in the State of Florida, to wit, the people of the State had begun to think, as soon as a committee of investigation came to their State, that a big lot of money was to be turned loose by the Federal Government for the Florida Indians; or, to be more specific, that the investigating committee had come preparatory to having land purchased and supplies furnished to the Seminole Indians of Florida. That sentiment was so strong, or that notion seemed to be so prevalent, that I thought something ought to be done to counteract it. So before I left Jacksonville I gave to the newspapers the following statement:

I do not want the people of Florida to misunderstand the purpose of the visit of our committee to this State. We came here under a general provision carried in the Indian appropriation bill authorizing investigation of Indian affairs in any community or State. We were not directed by Congress to come to your State, but came only at the earnest and importunate solicitation of Congressman W. J. SEARS, who is a member of the committee.

He had introduced a bill for relief of the Florida Seminoles and urged its passage to such an extent that we felt the need of at least looking into conditions of the tribesmen.

I am not sure that the Congress will take any further interest in the matter and I doubt seriously if in these days of pressure for economy in administration of the Nation's affairs the Government can be induced to look seriously upon the proposition to purchase a reservation for the Seminoles.

I am inclined to the view that since the Seminoles once owned the entire peninsula of Florida and the public lands within the State have been given to them by the Federal Government, the Washington authorities will look upon the proposition more as a question of State problem than as one for the Federal Government.

I have no authority to speak for other members of the committee, much less the entire Congress. I am not even attempting to express my own feelings in the matter, but simply trying to give my idea of the way I think the Washington authorities will look upon the problem.

From what I have seen of the Seminoles of Florida they are a people of inherent strength of character, and under proper opportunity should make as valuable citizens of your State as their fellow tribesmen in the Seminoles of Oklahoma. If, however, they are not given some opportunity they will gradually become paupers and a burden for the citizenship of your State to take care of. I sincerely hope something may be done to save them from pauperism and extinction.

Mr. Chairman, that expresses my views about as fully as I could place them before the committee with reference to the Florida Seminoles. They are a people of inherent strength of character. They have lived right up against the white man for generations and generations, and yet have taken on not one iota of his civilization. Their strength of character has been sufficient so that although surrounded and outnumbered by large numbers of white people they have steadfastly hurled back and refused to accept his civilization. It takes strength of character to perform such an act as that, and I believe if the Seminoles are given an opportunity they will make as good citizens as exist in Florida or any other State of the Union. After our trip to Florida I had a letter from a Mrs. Wilson, of Kissimee, who asked me if I would not write a letter over my own signature verifying the interview that had been published, in order that she might use it with the Florida Legislature in order to persuade them that the Federal Government would not do anything in the way of purchasing land for the Florida Seminole Indians, and that if they were taken care of it was necessary for the State to do it. I sent the letter, and she stated afterwards that lands had been ceded to these Indians to the amount of 100,000 acres. Now, a word as to the character of the lands. These lands are in the Everglades.

The Clerk read as follows:

SEC. 6. For support and education of 750 Indian pupils at the Indian school, Haskell Institute, Lawrence, Kans., and for pay of superintendent, $141,350; for general repairs and improvements, $15,000; in all, $156,350.

Mr. ANTHONY. I offer an amendment.

The CHAIRMAN. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. ANTHONY: Page 26, line 15, insert as a new paragraph the following:

"For support and education of 80 Indian pupils at the Indian school, Kickapoo Reservation, Kans., including pay of superintendent, $17,400; for general repairs and improvements, $4,000; in all, $21,400."

Mr. CARTER of Oklahoma. Let me ask the gentleman before reserving a point of order if this is the same school that was carried in the bill originally? If so, I do not think it is subject to a point of order.

Mr. ANTHONY. Yes; it is the same item that was in the bill last year.

Mr. CARTER of Oklahoma. And was recommended by the estimates for this year?

Mr. ANTHONY. Yes.

Mr. CARTER of Oklahoma. I do not think it is subject to a point of order.

Mr. ANTHONY. Mr. Chairman, as the chairman of the committee has indicated, this is the same item that was in the bill for a number of years. It was in the bill last year, but for some reason was left out of the bill this year. It is for the school on the Kickapoo Reservation, Kans., where there are 80 Indian pupils. I understand that the Commissioner of Indian Affairs desires the school continued. The school is doing a good work; and while in the near future there might be some ground for the discontinuance of the school, as the pupils are gradually absorbed by other schools, yet the information I get

is that that time has not yet arrived; and I ask that the item be restored to the bill, as the department desires.

Mr. MILLER of Minnesota. Mr. Chairman——

Mr. CARTER of Oklahoma. Mr. Chairman, does the gentleman from Minnesota desire to take the floor?

Mr. MILLER of Minnesota. I was going to ask a question. I would rather have the gentleman from Oklahoma discuss the question of the advisability of incorporating this paragraph.

Mr. CARTER of Oklahoma. I was under the impression that the gentleman from Kansas [Mr. ANTHONY] had yielded.

Mr. ANTHONY. I will yield the floor now.

Mr. CARTER of Oklahoma. Then I will take the floor in my own right. Mr. Chairman, this school was estimated for by the department and a justification presented at the hearing, but when the subcommittee came to take action in the premises the committee were advised by a member of the subcommittee that he had visited this school, that the pupils could all be taken care of in another Indian school, that there was no necessity whatever for this school, and, there being no dispute of that fact before our subcommittee, we felt that the school should be eliminated, and it was eliminated.

I now yield to the gentleman from Kansas [Mr. CAMPBELL]

Mr. CAMPBELL of Kansas. Mr. Chairman, last spring I went out among others to the Kickapoo Agency, at Mayetta, Kans., and looked over the matter there. I decided that as far as the work being done was concerned that they had altogether too much of an organization. However, that applies in California, in Idaho, Montana, Oklahoma, and every State in the Union where there are Indians, and I think the matter of eliminating these agencies from the Indian Service should be taken up as a whole program rather than one at a time. This is the only one that has been stricken out. It was done on my motion, because I thought it was absolutely unnecessary; but it is in a class with many others, and I think the subject should be taken up and a general elimination made.

Mr. MILLER of Minnesota. Is this school on a reservation or on no reservation?

Mr. CAMPBELL of Kansas. It is on a reservation. You would not know that there was a school there.

Mr. MILLER of Minnesota. How many Kickapoo Indians are there in Kansas? I thought the most of them were in Mexico.

Mr. CAMPBELL of Kansas. There are not many of them there. The fact is that there are no tepees and no blanket Indians. The Indians live in severalty. They are as good farmers as their white neighbors. They are bringing up their children in their own homes. They have five, seven, and nine room houses, and some of them have steam heat. They have as fine farms as lay out of doors.

Mr. MILLER of Minnesota. Are the white schools maintained in their locality where they live?

Mr. CAMPBELL of Kansas. Yes.

Mr. MILLER of Minnesota. And the Indian children allowed to attend the white schools?

Mr. CAMPBELL of Kansas. Yes; if they wish. These Indians ought to be taxed, however, and made to pay their share of the expenses of sending their children to school as other people do.

Mr. MILLER of Minnesota. Can the gentleman state how much per capita it costs?

Mr. CAMPBELL of Kansas. I think this one probably cost $175.

Mr. MILLER of Minnesota. As a matter of fact, it cost $212. I mean, what is the average cost in the State of Kansas of sending white children to school?

Mr. CAMPBELL of Kansas. I do not know.

Mr. ANTHONY. The gentleman from Minnesota is talking about public schools, while this is a boarding school, and you can not compare the cost of a boarding school with that of a public school.

Mr. MILLER of Minnesota. This is a boarding school where they give soup for dinner and they go home at night? It is a sort of soup kitchen maintained for children, is it?

Mr. CAMPBELL of Kansas. I do not object to this item being put back in the bill, but I now give notice to every man interested in these agencies that they had better get ready to defend their agencies next year. Unless the agency does something more than spend the money for salaries, for telegrams, and traveling expenses it ought not to be longer maintained. [Applause.]

Mr. MILLER of Minnesota. Mr. Chairman, I would like to come to the aid, relief, and support of the Committee on Indian Affairs and to the aid and support of the Treasury of the United States and to the aid and support of the people of the United States. The statement just made by the gentleman from Kansas [Mr. CAMPBELL] is sufficient to compel every man in this House to vote against the amendment offered by his colleague from Kansas. Apparently here is a group of Indians in Kansas who have breathed the air and imbibed the industry prevalent in that great State. They are not Indians any more except by name. They are living an industrious life in comfortable homes, in the midst of their white brethren. The proper place for their children is the public schools. There is not an atom of sense in having them go to this Indian school.

Mr. JOHNSON of Washington. Do these Kickapoo Indians have to pay taxes for the support of the school?

Mr. MILLER of Minnesota. I do not know and I do not care whether they do or not. If the parents do not pay taxes and these children go to white schools, the gentleman from Kansas should offer an amendment that there shall be taken out of the Treasury of the United States a sufficient sum to pay their pro rata share in the white schools, and if the gentleman will do that I will support it.

Mr. CAMPBELL of Kansas. Mr. Chairman, may I suggest this to my friend from Minnesota: Some provision ought to be made in all these cases, and I confess now that I left the item out of the bill in order to call the attention of the House and the Indian Office to the abuse that there is in maintaining many of these agencies and schools. Let this item be restored and provisions made to dispose of all Indian property of this character. There is about $50,000 worth of Indian agency property at Mayette, Kans., and some disposition ought to be made of that at the time that the agency is disposed of.

Mr. MILLER of Minnesota. How many Indian children are there?

Mr. CAMPBELL of Kansas. It is claimed about 82.

Mr. MILLER of Minnesota. What is the average attendance?

Mr. CAMPBELL of Kansas. Eighty, I understand; a very large percentage.

Mr. HAYDEN. Mr. Chairman, last year we passed a general authorization which permitted school buildings, where they were no longer used, to be sold, so that there is no necessity of any special legislation in order to sell these buildings.

Mr. CAMPBELL of Kansas. The Indian Office should know that Congress contemplates the abolition of these agencies, so that it can be prepared to defend them.

Mr. MILLER of Minnesota. I trust that the gentleman from Kansas [Mr. ANTHONY] will rewrite his amendment, if he urges it, to provide that a sufficient sum may be taken out of the Treasury of the United States to pay for the schooling of these children in white schools. If he will do that, I think he will find that it will cost about one-fifth of the sum asked for.

Mr. ANTHONY. Mr. Chairman, I have no objection to a policy of economy being inaugurated by the Committee on Indian Affairs, and I believe, with my colleague from Kansas [Mr. CAMPBELL] and the gentleman from Minnesota [Mr. MILLER], that useless Indian schools should be abolished; but I do object to the committee, and especially to my colleague from Kansas, coming into my district and picking out at random some one Indian school out of the whole number of schools in the United States and holding it up as a horrible object lesson to Congress of the extravagant maintenance of these Indian schools, and especially because of the fact that if we wipe out this school you leave 80 young Indians not without means of obtaining an education, because, while it would be a great inconvenience to many, they could perhaps go to the public schools located near by the reservation.

Mr. MILLER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. ANTHONY. Yes.

Mr. MILLER of Minnesota. We have usually carried in this bill a lump-sum appropriation of $1,000,000, or something like that, for the education of Indians generally. It is out of that sum that the department now, without any further legislation, can pay for the tuition of these Indians in the white public schools.

Mr. ANTHONY. The Committee on Indian Affairs proposes to take these 80 pupils at the Kickapoo school and transfer them to the Haskell Institute, 75 miles away. The per capita cost of maintaining the 80 at the Kickapoo school is $47 less than at Haskell, so if the recommendations of the gentleman from Minnesota and of the Indian Committee are adopted you will stick the Government for eighty times $47.

I think the best thing to do is to follow the recommendations of Mr. Meritt, whom I called up on the telephone yesterday. He said that the department desires that this school shall be maintained, that it will interfere with the present plans of the department if the Kickapoo Indians are deprived of this school. He says perhaps the time will come when it should be abolished, and perhaps next year they may be able to do that, but he suggested that the appropriation be continued this year with a

proviso that the department bring in a special report as to the advisability of closing the school.

Mr. HARRISON of Mississippi. How many teachers are employed at this school.

Mr. ANTHONY. Four or five.

Mr. HARRISON of Mississippi. How many students attend?

Mr. ANTHONY. Eighty.

Mr. HARRISON of Mississippi. And the school has been continued for a long while?

Mr. ANTHONY. It has been continued for a long time. It is not a school for ordinary instruction, but there is a farm there for instruction in agriculture, and they are instructed in farming and in trades.

Mr. HARRISON of Mississippi. Is this the only school in the United States carried in this bill that has been abolished?

Mr. ANTHONY. It is the only one that has been abolished, so my colleague from Kansas tells me.

Mr. HARRISON of Mississippi. And the Indian Office did not recommend its abolishment at all?

Mr. ANTHONY. It did not.

Mr. CARTER of Oklahoma. Mr. Chairman, the gentleman from Kansas [Mr. ANTHONY] and myself have always been the very best of friends since I have been a Member of Congress. I think I have been able always to call on him for anything that is reasonable, and I am the last man in the House who would undertake to do his district an injustice. I knew nothing whatever of the conditions at this school or the necessity or the lack of necessity for it until our attention was called to it by his colleague, the gentleman from Kansas [Mr. CAMPBELL]. I may have been mistaken, but I got the understanding that this school was in the district represented by the gentleman from Kansas [Mr. CAMPBELL]; and when a Member of Congress comes to me and tells me of an institution in his own district that is unnecessary and ought not to be carried I certainly feel I ought to assist him in relieving the Government of the expense.

Mr. CAMPBELL of Kansas. I hope I did not leave the impression on the gentleman that this agency was in my district.

Mr. CARTER of Oklahoma. I could not say positively that the gentleman told me that, but that was the impression I received.

Mr. CAMPBELL of Kansas. It is in my State, but not in my district.

Mr. CARTER of Oklahoma. If I had know the school was in the district of the gentleman from Kansas [Mr. ANTHONY], I would have consulted the gentleman before my approval was given to knocking the school out; but, Mr. Chairman, I still believe the report of your committee should be sustained. The gentleman from Kansas [Mr. CAMPBELL] told us on the floor of the House again earlier in the day that this institution was unnecessary and that this item should not be carried in the bill. The report of a committee should have some standing on the floor of the House, but that can not be possible so long as committee members request that things be done in committee and reverse their attitude when the bill reaches this Chamber. No reason has as yet been given why this school should be continued. The pupils have been provided for at Haskell school, a short distance away. No damage can be done the service by the discontinuance of the school and considerable expense might be saved.

Having supported the provision in the bill and reported it to the House, I feel that I ought to vote against the amendment offered by the gentleman from Kansas unless some good reason is given for contrary action.

Mr. ANTHONY. Mr. Chairman, I call attention to the fact that if he does not make provision for this school, he not only abolishes the school but wipes out the superintendent for the Kickapoos, whose salary is also provided for in the appropriation for this school, so that when the committee drops out the appropriation for the school it drops out the appropriation for the superintendent.

Mr. CARTER of Oklahoma. That is what the gentleman from Kansas [Mr. CAMPBELL] told us ought to be done.

Mr. CAMPBELL of Kansas. I want to provide for the school, but the agent ought to be abolished.

Mr. MILLER of Minnesota. What does the agent do?

Mr. CAMPBELL of Kansas. Nothing.

Mr. ANTHONY. He does do something. I will state to the gentleman that while he has called attention to the great progress that those Indians have made in civilization, speaking about their steam-heated houses, that but a very small minority of the Indians have made any progress. They do not farm their own farms. Two-third of the land on the reservation is rented to white men. The superintendent performs very valuable service to the Indians in preparing these farm leases and seeing that the Indians do not get swindled, and if you wipe out that superintendent there you turn the Indians over absolutely to the mercy of the white men who speculate on the lands; so if you want to leave them helpless and powerless, wipe out the agency and the school.

Mr. HARRISON of Mississippi. Mr. Chairman, I move to strike out the last two words. Mr. Chairman, I am highly in favor of this amendment. I think the Indians all over the country ought to be looked after. I can not understand why the committee should disregard the conditions that gentlemen say exist out there in Kansas. The department does not recommend it; the conditions certainly require the maintenance of the school, and I think the conditions in other parts of the United States are quite like those in Kansas. Now, in the State of Mississippi there is a condition also existing. I got a letter the other day from a good woman down there who is taking on herself the burden of attempting to educate these poor, unfortunate children without getting a cent of salary. She is teaching school there five days in a week, and I hope this amendment will prevail. In the course of a little while we will offer an amendment touching the unfortunates of Mississippi, which I hope also will prevail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas.

The question was taken, and the amendment was agreed to.

Mr. HAYDEN. Mr. Chairman, before we leave the Kansas items, permit me to suggest to the gentleman from Kansas that we allowed the number of pupils at the Haskell Institute to remain at 750 upon the theory that 80 students were to be transferred from the Kickapoo school to Haskell.

Mr. CAMPBELL of Kansas. Oh, no. That was not the intention.

Mr. HAYDEN. At the Haskell Institute the average attendance was 628, enrollment 711, and we are now appropriating for 750 pupils.

Mr. CAMPBELL of Kansas. I am sure the gentleman from Arizona is in error when he assumes these children were to go there. What I said to the committee with respect to this was that the children would be provided for in the neighborhood schools.

Mr. HAYDEN. I understood that the pupils at Kickapoo were to be transferred to the Haskell Institute.

Mr. CAMPBELL of Kansas. Oh, no; the increase at the Haskell school was from other sources rather than from this agency.

Mr. HAYDEN. We are increasing the per capita at the Haskell Institute from $167 to $185 and allowing the number of pupils to remain at 750, which makes the total increase at that school $13,600 over the amount allowed last year. We allowed no such increase in any other school where the average enrollment or attendance was so far below the number specified in the current law.

Mr. CAMPBELL of Kansas. I am sure the estimate of the Indian Office was not made with a view to the abolishment of the Kickapoo Indians.

Mr. CARTER of Oklahoma. We did not give the Indian Bureau's estimate in any of these, I will say to the gentleman from Kansas.

Mr. CAMPBELL of Kansas. I think the Haskell estimate should remain as it is in the bill.

Mr. HAYDEN. It would not have remained undisturbed if we had known the Kickapoo school was to be appropriated for in this bill.

Mr. MILLER of Minnesota. If the committee had absolutely stood up to their bill, the amendment just adopted would hardly have been adopted. There was just one vote against it, and that was my own.

Mr. CARTER of Oklahoma. I will state to the gentleman that here is one gentleman who stood by the bill——

Mr. MILLER of Minnesota. But the gentleman spoke so feebly that I did not hear——

Mr. CARTER of Oklahoma. I am surprised at the gentleman from Minnesota——

The CHAIRMAN. Both gentlemen are out of order, and the Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, the sum of $185,000 or so much thereof as may be necessary, of the principal sum on deposit to the credit of the Chippewa Indians in the State of Minnesota, arising under section 7 of the act of January 14, 1889, entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," and to use the same for the purpose of promoting civilization and self-support among the said Indians in manner and for purposes provided for in said act.

Mr. KNUTSON. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. KNUTSON: Page 27, strike out all of lines 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, and 14.

Mr. CARTER of Oklahoma. Mr. Chairman, I reserve the point of order.

The CHAIRMAN. The gentleman merely makes a motion to strike out, but does not insert anything.

Mr. CARTER of Oklahoma. I thought the gentleman had something to insert.

The CHAIRMAN. No; the gentleman merely moves to strike out.

Mr. KNUTSON. Mr. Chairman, I understand this item has been in each Indian appropriation bill for the last 15 or 20 years. The Chippewa Indians have, through their attorney, Mr. Ballinger, introduced a suit in the District Supreme Court to prohibit the Government from spending this money, which is taken from the principal now held in trust for the Chippewas of Minnesota. The District Supreme Court overruled the contention of the Chippewas and the case was appealed to the Court of Appeals of the District, and this court decided that the Government did not have the right under the statute to make this appropriation. The Indian Department thereupon appealed the case to the United States Supreme Court, and I understand it will be several years before it can be reached. Now, it would seem to me, Mr. Chairman, in the face of the decision made by the court of appeals, that Congress should not make this appropriation; hence the amendment.

The CHAIRMAN. The question is on the amendment.

Mr. MILLER of Minnesota. Mr. Chairman, I would like to hear from the committee on this.

Mr. CARTER of Oklahoma. What does the gentleman want to hear? The committee is opposed to the gentleman's amendment to strike out.

Mr. MILLER of Minnesota. I would like to hear upon what ground. I am looking for information.

Mr. CARTER of Oklahoma. Of course the gentleman from Minnesota is very familiar with this item, and he knows it was precipitated——

Mr. HAUGEN. Mr. Chairman, may we have the amendment again reported?

Mr. CARTER of Oklahoma. The amendment is simply to strike out the item.

The CHAIRMAN. The Chair will state to the gentleman from Minnesota that the amendment strikes out the paragraph on page 27, lines 4 to 14, inclusive.

Mr. CARTER of Oklahoma. Mr. Chairman, the gentleman from Minnesota [Mr. MILLER] well knows that this item has always been the subject of considerable discussion, and I had hoped that it might be straightened out at this session of Congress for the satisfaction of the interested parties. But we found, when we went into the item, that there was a case now pending in court with reference to this matter which goes to the point whether the Federal Government had a right to expend these funds in this manner. The case being in court, our committee thought that the regular rule that we had always followed in the past had better be followed now; that we should not attempt to interfere with a matter that was in process of settlement by the court, but consider the appropriation we were carrying until the case was settled. Now, when that case is settled, I am sure the Committee on Indian Affairs will be glad to go into the matter in full and find out just what ought to be done with the Chippewas in Minnesota. It is a very complicated question. I do not understand myself, I admit, whether the Government has the right to take these funds or not, but the court will decide that question, and when that is decided we can then make some proper adjustment of the matter. And I do not believe we can do it until the court renders a decision.

Mr. SHERWOOD. In what court is it now?

Mr. CARTER of Oklahoma. In the Supreme Court of the United States.

Mr. SHERWOOD. I thought it had already been decided.

Mr. CARTER of Oklahoma. By the district court of appeals, but it has been appealed to the Supreme Court of the United States.

Mr. JOHNSON of Washington. Was this same sum, or approximate sum, withdrawn from the Chippewa funds last year?

Mr. CARTER of Oklahoma. Yes.

Mr. KNUTSON. For about 20 years.

Mr. JOHNSON of Washington. There is also an appropriation of $4,000 mentioned in lines 1, 2, and 3.

Mr. MILLER of Minnesota. Those items are for the fulfillment of treaty obligations.

Mr. CARTER of Oklahoma. That is a treaty item.

Mr. KNUTSON. If I may say to the chairman of the committee, for whom I have the highest regard, I dislike very much to disagree with any committee, but I was requested to make this objection by the committee representing the Chippewas who appeared before the gentleman's committee. I have an amendment here that I would like to offer to the second item, which will specifically restrict the Indian Department in the spending of the $4,000.

Mr. CARTER of Oklahoma. Let me ask the gentleman if this matter is not in the process of settlement by the court? There is a case now pending——

Mr. KNUTSON. The last decision was rendered by the district court of appeals, which said that the Government had not the right to spend this money, which was being taken from the principal sum. And I might add that had the Chippewa funds been administered as they should have been they would have $18,000,000 or $20,000,000, whereas now they have only between $5,000,000 and $6,000,000.

Mr. CARTER of Oklahoma. The gentleman may be correct about that, but so long as the matter is in process of settlement by the courts I do not think that Congress should attempt to make any change in this item.

Mr. STAFFORD. Will the gentleman yield in that particular?

Mr. CARTER of Oklahoma. I yield.

Mr. STAFFORD. I understand that the higher court, the district court of appeals, has reversed the decision of the lower court, the supreme court of the district, and has decided in favor of the contention of the Indians that this——

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CARTER of Oklahoma. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. STAFFORD. The court has decided in favor of the contention of the Indians, that the Government has no right to use these funds, which were regulated by treaty arrangement, for the purposes as stated in this bill. If that is the fact, why should not the committee take the last decision of the court, which is in favor of the Indians, as the expression of the law until that is reversed by a higher court?

Mr. CARTER of Oklahoma. Because the gentleman knows as well as I know that it has never been the policy of Congress to interfere in any matter that is in process of settlement in the court. We have a matter here which has been appealed to the Supreme Court of the United States. We might put some provision in here that would conflict with that decision. Now, then, why not let it go? It has run on all these years. Why could it not go on for this short time, until the Supreme Court of the United States could decide it and give Congress some definite basis on which to stand in the future?

Mr. STAFFORD. The committees of Congress have always acted on the decision of the court as last stated. These are trust funds of the Indians, and the Indians say they are not being properly used. The highest court to which this question has been appealed has confirmed that contention; and, in spite of the decision of the appellate court, you go contrary to that, and say the funds shall continue to be misappropriated, against the contention of the highest court to which this has been submitted.

Mr. CARTER of Oklahoma. Just a moment. The gentleman from Wisconsin [Mr. STAFFORD] has been here longer than I and ought to know procedure. I do not understand that the position of Congress in the past has been that Congress would legislate in reference to any matter that was pending in the court and on which there had not been a final decision. If I am wrong in that I am wrong in this. Take, for instance, the 30,000 land-suit cases from Oklahoma. We sought relief in some cases before the Committee on Appropriations, and they refused to consider our matter because they said "these matters that have been decided in your favor are in process of settlement by the court, and as long as they are on appeal we will not legislate on them." Then we brought the matter to the floor of the House, and the RECORD shows that exactly the same statement was made on the floor.

Now, I am simply following out what I thought the will of Congress has been in the past. I have no feeling in the premises. I would just as lief do it in one way as another, except that I think that Congress ought to be consistent about these matters and follow out the rule it has always followed in the past, and that has been not to permit interference with any proposition which the courts had in hand until a final decision had been rendered by a court of last resort, or at least until evident that no further appeal would be pursued.

Mr. STAFFORD. I will remind the gentleman that this was a decision of an appellate court on an appeal.

Mr. CARTER of Oklahoma. So was our case, and it was then pending in the Supreme Court of the United States.

Mr. FERRIS. Mr. Chairman, will my colleague yield?

Mr. CARTER of Oklahoma. Yes.

Mr. FERRIS. Is it admitted that practically all of this $180,000 is expended for salaries and none of it gets to the Indians at all? That has been charged, I know.

Mr. CARTER of Oklahoma. From the hearings, that appears to be largely so. The gentleman from Minnesota [Mr. KNUTSON] can give you more information about that than I can. I think that there is little doubt but that most of this money is expended for the administration of the affairs of the Chippewas.

Mr. KNUTSON. That is true.

Mr. JOHNSON of Washington. It is for salaries in schools with as low as six pupils in daily attendance.

Mr. FERRIS. I was just wondering if it would not be a good idea to choke off some of those employees up there. [Laughter.]

Mr. KNUTSON. Yes; you are right. [Laughter.]

Mr. MILLER of Minnesota. It is a good State, and it is a very important State, and it is very well worth the attention of such a distinguished statesman as the gentleman from Oklahoma, although I understand he has not been up there.

Mr. FERRIS. I regret I have not been up there. I know I would be delighted to go there. But I want to say, Mr. Chairman, that a committee of these Indians came to my office representing the Indian tribes, and they told me, with a great deal of emphasis, that $185,000 purporting to be for the support of education was really all paid out in salaries. It is a fact that there is a case pending in court to shut this thing off.

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. CARTER] has again expired.

Mr. FERRIS. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The motion pending now is to strike out the paragraph.

Mr. FERRIS. I want to speak in favor of it. If that will not get me time, I will speak against it. What I want to do is to find out what is going on up there.

The CHAIRMAN. The gentleman from Oklahoma is recognized.

Mr. FERRIS. Mr. Chairman, perhaps the committee in charge of this bill is doing what is right about this matter, but a committee from the White Earth Reservation came to my office and stated to me very positively that practically all of this $185,000 was being paid out in salaries, and none of it is actually distributed among the Indians.

I want to say that we have had too much of that going on everywhere, having items carried on here as education and support items, but when you come to figure it out it is simply paying out money in salaries. The Indians who came from the White Earth Reservation seemed to be well informed on their affairs. They were well informed. They are very intelligent people.

I simply wanted to make that statement. I do not know enough about it to urge any particular action in the matter. I simply think it ought to be given careful attention.

Mr. MILLER of Minnesota. Mr. Chairman, it seems to me the opinion of the distinguished chairman of the committee, the gentleman from Oklahoma [Mr. CARTER], is that this item should remain in the bill, pending the decision of the court. That decision of the court simply goes to the question of whether or not Congress has the legal right to make the appropriation.

But there is another question that to me is deeper and more important than that. It is this: That if Congress has the power, ought it to make the appropriation? My judgment—and you can take it for what it is worth—is that Congress has the power to make the appropriation. Why? Because in the Treasury of the United States are the funds belonging to those Indians. Whether it is good law or bad law, it is the law, as decided by our Supreme Court many, many times, that Congress has plenary power to do almost anything it pleases with the wealth and property of the Indians in the United States under the control of the United States Government.

But let us just forget that for a moment, and direct our attention to the question whether or not Congress ought to exercise the authority if it possesses it. Two years ago, when this item was before the committee, I took occasion, as the result of some investigation, extending over two or three years, to direct the attention of the committee to the question of whether or not this item should not be excluded from the bill. I did not make any definite recommendation, nor did I make a motion, but did presume to address myself to the propriety of retaining in the bill an item of this character.

Some of these Indians are in my district. Some of them are in the district of the gentleman who made the motion [Mr. KNUTSON]. Most of them are in the district represented so ably in this House by my colleague [Mr. STEENERSON]. We are all interested. The opinions of all are worth considering in the case, and I shall be glad to hear from every one of them. I am telling you now the result of my own experience. I think the appropriation a few years ago was $145,000, was it not?

Mr. KNUTSON. I think so.

Mr. MILLER of Minnesota. I ask my colleague, Mr. STEENERSON. Then it became desirable to build a hospital or something, and we increased the amount so as to take care of that. Then the next year it was found desirable to do something more, and we increased the amount then, and it was finally got up to $185,000.

This is an illustration of that principle that prevails here so often, that when you increase an appropriation for any purpose it seems you can never cut it down again; you can never reduce it when once it is raised. And this appropriation, starting at $145,000 some years ago, has gradually crept up until it is now $185,000.

Mr. KNUTSON. Mr. Chairman, will my colleague yield?

Mr. MILLER of Minnesota. Certainly.

Mr. KNUTSON. There is no assurance that this will not creep up to $225,000 before we get through with it?

Mr. MILLER of Minnesota. None whatever.

Mr. GANDY. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. I yield to the gentleman.

Mr. GANDY. What will be the effect if this item is stricken out of the bill?

Mr. MILLER of Minnesota. I will get to that in a moment. What is this item expended for? The answer is quick and immediate. It is expended for everything in connection with the management of Indian affairs in that State. It is expended for employees—employees whose duties are exclusively those of administration, representing the Government of the United States. The biggest part of it goes for that purpose. Some of it is expended in the maintenance of schools and school-teachers. Some of it is probably expended for essential purposes, while quite a lot of it—or at least some of it—is perhaps improperly expended. I called attention once before on the floor of this House to the fact that at one Indian school they had six farmers as instructors, and there was not enough work for one man. At least one good man would have done all that the six did, and a lot more. The Indian Office thereupon, having had that brought to their attention, discontinued all but one.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MILLER of Minnesota. I ask for one minute more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield for a question?

Mr. MILLER of Minnesota. Certainly.

Mr. JOHNSON of Washington. I wanted to ask the gentleman if an opportunity is offered in Minnesota for these Chippewas to attend the public schools?

Mr. MILLER of Minnesota. Yes.

Mr. JOHNSON of Washington. Do these Chippewas pay anything toward the taxes for the support and maintenance of the public schools?

Mr. MILLER of Minnesota. They do not, because their property is in the same situation as that of the Indians in other States.

Mr. VENABLE. Will the gentleman yield?

Mr. MILLER of Minnesota. Certainly.

Mr. VENABLE. I understand from what the gentleman says that a good portion of this $185,000 is properly expended for schools, is it not?

Mr. MILLER of Minnesota. Yes.

Mr. VENABLE. What is the purpose of knocking it out completely? Is it to discontinue these schools? And, if so, where do these people expect to get the funds to continue the enterprises?

Mr. MILLER of Minnesota. It is not intended to knock out the schools by knocking out this paragraph, although the inquiry is a most pertinent one. I will come to that in just a moment, if the gentleman will permit.

The $185,000 is being expended for the purpose which I have indicated and for some additional purposes. There are a great many employees up there in the State of Minnesota who are not doing anything of any value to the Indians. There has

grown up a complex system of administration, and there is no way to check it up. I tried for two years to find out how this $185,000 was expended, and when I got through at the end of two years I gave it up. I could not find out—that is, in any detailed way.

Mr. MADDEN. Will the gentleman from Minnesota yield?

Mr. MILLER of Minnesota. Certainly.

Mr. MADDEN. Does the gentleman from Minnesota mean to insinuate that the executive branch of the Government has refused to give the detailed information as to the expenditure?

Mr. MILLER of Minnesota. No; they did not refuse. They kept giving it repeatedly in a way satisfactory to them, but in a way that I could not understand. I wanted to find out just who was getting the money and what kind of service the man was performing, and I could not find out. They told me they did not have a clerical force and a bookkeeping system that would enable them to furnish me with this information.

Mr. MADDEN. So it was rather a system of camouflage which the gentleman got instead of real information?

Mr. MILLER of Minnesota. I did not know it by that name at that time, but I know now that that is exactly what it was.

Mr. MADDEN. In other words, it was a system of deceit.

Mr. MILLER of Minnesota. Well, I would not quite use that language.

Now, of course, not all the work that the Indian Office is doing in Minnesota could be described as improper, but the Chippewa Indians of Minnesota are not like the Seminole Indians of whom we have heard so much this afternoon. There are practically no full-blood Chippewas in the State. They are nearly all of mixed blood. Of the 11,000 Indians accredited to the State, I presume 9,000 of them at least are capable of handling their own affairs to a greater or less extent. There may be some who are not. But the great majority of these Indians are of mixed blood, and are performing their daily duties and handling their business enterprises just like their white neighbors. Personally I am in favor of the Indian children and the white children going to the same school, being taught by the same teachers, with the same flag over the building, and the same instruction for them both.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Certainly.

Mr. JOHNSON of Washington. The figures here seem to show that out of a total of 1,576 Chippewa children, 954, or practically two-thirds do go to the public schools, and that 205 attend these mission and private schools and 411 nonreservation boarding schools, and with this money there are maintained 9 day schools and 6 boarding schools for that limited number of children.

Mr. MILLER of Minnesota. That is correct.

Mr. JOHNSON of Washington. Only two places here showing more pupils than the place in Kansas that had 80 pupils, that the gentleman himself voted to abolish.

Mr. MILLER of Minnesota. Certainly; and I will vote to abolish any of the character the gentleman describes, and I am going to vote for it in just one minute, and I hope the gentleman will vote with me.

Mr. JOHNSON of Washington. And such schools ought to be abolished.

Mr. VENABLE. Will the gentleman yield again?

Mr. MILLER of Minnesota. Certainly.

The CHAIRMAN. The time of the gentleman has expired.

Mr. VENABLE. I ask unanimous consent that the gentleman may have one minute more.

Mr. MILLER of Minnesota. I want three minutes, because there is another item I want to speak about.

Mr. CARTER of Oklahoma. Reserving the right to object, I ask unanimous consent that all debate on this item be closed in 10 minutes.

Mr. STEENERSON. Mr. Chairman, I desire 10 minutes. Can not the gentleman make it 15? Most of these Indians are in my district.

Mr. CARTER of Oklahoma. Does the gentleman from Minnesota want three minutes?

Mr. MILLER of Minnesota. Yes.

Mr. CARTER of Oklahoma. Then, make it 15 minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Minnesota [Mr. MILLER] is recognized for three minutes.

Mr. MILLER of Minnesota. What should be done is exactly this——

Mr. VENABLE. Will the gentleman yield for a question?

Mr. MILLER of Minnesota. I hope the gentleman will make his question short.

Mr. VENABLE. This $185,000 provided for in this appropriation is money that belongs to the Indians, taken out of the Indian fund?

Mr. MILLER of Minnesota. Yes.

Mr. VENABLE. If this is stricken out, is it the purpose to have these schools that the gentleman has mentioned maintained by general appropriation out of the Treasury of the United States?

Mr. MILLER of Minnesota. I will say "no" emphatically. What should be done is this: Some money should unquestionably be appropriated for the administration and maintenance of schools, but I would have specific items enumerated definitely with the purpose stated, and the amount; and there is just one way to get at that, and that is to wipe out this entire lump sum, to strike it out of the law and compel the Indian Office to make an estimate in detail, and the appropriate committee of Congress can then go over this itemized list. The Indians of the State who are paying the bill, and who have sufficient intelligence to form an accurate judgment thereon, can then know that for which it is proposed to expend their money. They can criticize it, they can give suggestions, and cooperating with the committees of Congress you can get a legitimate expenditure for legitimate purposes, and the amount will probably be greatly less than this; and very likely before the bill becomes a law a sufficient appropriation for specific purposes will be made to take care of the needful part of the administration and the schools.

Mr. HASTINGS. Will the gentleman yield?

Mr. MILLER of Minnesota. Certainly, if I have the time.

Mr. HASTINGS. I want to ask the gentleman if he himself has read the decision of the court of appeals, to which reference has been made both by himself and his colleagues?

Mr. MILLER of Minnesota. I have not.

Mr. HASTINGS. I want to say that a committee came before the subcommittee that had the preparation of this bill in charge, and a brief was filed, and an excerpt given, taken from this opinion, but the full opinion was not filed. Now, as the gentleman has made reference to it, and as his colleague [Mr. KNUTSON] from Minnesota has also referred to it, I was wondering if either of them had read the opinion, and if they were prepared to say that the court had decided against the contention of the Government?

Mr. MILLER of Minnesota. I do not know.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEENERSON. I ask unanimous consent to proceed for 10 minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from Minnesota [Mr. STEENERSON] asks unanimous consent to proceed for 10 minutes out of the 15 minutes which have been allowed. Is there objection?

There was no objection.

Mr. STEENERSON. Mr. Chairman, I can not entirely agree with my colleague, Mr. KNUTSON, to strike out this item, although I admit that on the face of the bill there seems to be some merit in the proposition. I have not read the whole decision referred to, but I think I understand what the purport of it is. This $185,000 is a part of the permanent fund to the credit of the Indians, upon which they are drawing 5 per cent interest. The treaty with the Indians authorizing the sale of their lands with the timber thereon had a provision that authorized Congress to set apart such an amount of the principal as it might deem proper for the "relief, civilization, and self-support of the Indians." Now, the contention is that "civilization and self-support" of the Indians did not have for its object the paying of the ordinary expenses of the agents, the superintendent, and the civil-service employees, and such use of this money, which was their patrimony placed to their credit, is a diversion of the funds from the purposes specified in the treaty. The representatives of the Chippewa Indians make this claim against the Interior Department.

The treaty provided that at the end of 50 years the whole fund might be distributed to them per capita. If you will look at the language of this appropriation, you will see that it reads "to use the same for the purpose of promoting civilization and self-support among the said Indians in manner and for purposes provided for in said act." That is the act of January 14, 1889, which is a part of the treaty.

The claim of the department is that by paying and maintaining the superintendent and all of these employees of the service to the number of 127 in the whole State they are carrying out the objects of the treaty; that they are thereby promoting civilization and self-support among the Indians.

The question raised by this lawsuit was whether that was a diversion of the fund, and the Court of Appeals decided that it was. If that decision is sustained by the Supreme Court of the United States the Indians would have a good cause of action against the United States for the recovery of two or three million dollars appropriated in a similar way heretofore.

Of course, the result would be that the Government would have to pay it out of the Treasury. The Supreme Court has already decided that under that treaty the United States is the trustee of an express trust and is bound to use the money derived from the lands for the purpose therein mentioned. If the maintenance of the Indian Service, the superintendents, teachers, doctors, farmers, and nurses and hospitals is a diversion, if it is not for the relief, civilization, and self-support, as contemplated by the treaty, the United States would be liable to refund and restore the amount diverted to the principal sum in the Treasury.

The alternative would be that if we strike out the appropriation at this time the Indian Bureau would have no other appropriation with which to pay for the Indian service in Minnesota. There are a large number of incompetent full bloods unable to take care of themselves, and there are many sick, especially old people, many of whom are blind from the ravages of trachoma, and many consumptives, who are in hospitals. It would be unjust and wrong to deprive them of the Indian service, which now administers to their wants.

Mr. KNUTSON. Does the gentleman mean to contend that money heretofore appropriated has been for the purpose provided for in the treaty?

Mr. STEENERSON. I was trying to make it plain that that question was before the court—whether it was a violation of the trust. The result would be, as I say, that if the Supreme Court of the United States sustains the contention of the Indians, then the Indian tribes could recover from the United States the whole amount, not only what has been diverted in the past but this appropriation.

On the other hand, if we strike it out and the Supreme Court decides the other way, then the Indian Bureau would be deprived of funds with which to pay for the Indian Service. It is a very sudden proposition to spring upon us at this time, because it might be disastrous to take away the Indian Service in Minnesota without notice. It does seem to me that to leave it in will not be a great injury to the Indians. If they are right in their contention, they are bound to get it back. When this was brought before the committee the chairman of the Indian Committee indicated that it would recommend authority be given to bring the question up in an appropriate action in the court. If the use of this money as proposed is a violation of the treaty, it is a diversion, and therefore by taking the money out wrongfully we would be obligated to put it back again. On the other hand, if it is a proper use of the fund, as indicated by the treaty, then the taking away of this appropriation—striking it out—would leave the Indian Service without any employees. There are many full bloods and incompetents on the reservation in my district—probably a thousand that need the care of an Indian agent It seems to me that the safe thing to do at this session would be to let the appropriation go as the committee recommended, and if the Supreme Court decides as the lower court has, then, of course, we would have to appropriate the money out of the Treasury of the United States. In that case the Indians would not suffer, for they would get the care and assistance they need, and the money also.

Mr. KNUTSON. Is it the gentleman's opinion that the item should be stricken out?

Mr. STEENERSON. I doubt the wisdom of striking it out. I do not think I shall vote to strike it out now. If by striking it out you destroy the Indian Service in Minnesota it would be a great calamity.

Mr. KNUTSON. I think it better for the Indians that it be left out of the bill.

Mr. CARTER of Oklahoma. Mr. Chairman, I have looked through the hearings for the court decision but do not find any statement of it. I find what some gentleman said about it, but no quotation in the hearings except a short one which does not touch upon the point at issue.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. CARTER of Oklahoma. Yes; for a short question.

Mr. KNUTSON. Does not Mr. Meritt, the Assistant Commissioner, admit in the hearings that the court of appeals——

Mr. CARTER of Oklahoma. I understand that, but what I say is no quoting has been made of any court decision. What the Commissioner of Indian Affairs or anyone else says is nothing more nor less than hearsay testimony. All this is hearsay testimony. I agree with my friend that perhaps these Indians may be mistreated, but the court is the remedy. The matter is in the court and when the court decides it Congress can legislate intelligently, but until then I think it is better for Congress to pursue the course it has pursued in the past and let this item go in the bill just as it was in the last year and the year before.

Mr. VENABLE. If this item is stricken out has the gentleman's committee any specific information as to what will be substituted for it?

Mr. CARTER of Oklahoma. The agency will have to be taken care of and that means an appropriation from the funds of the Treasury.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. CARTER of Oklahoma. I only have two minutes left.

Mr. MILLER of Minnesota. The gentleman can get more time.

Mr. CARTER of Oklahoma. We have had the time closed.

Mr. MILLER of Minnesota. My idea is that the Indian Office will be compelled to bring in an itemized statement of the necessities, which the Senate committee can go over and allow as much as they see fit, and it will come back to the House and we will then have an opportunity to vote upon it.

Mr. CARTER of Oklahoma. The gentleman knows that that would not give the House proper consideration of it.

Mr. MILLER of Minnesota. I confess that it is a weakness.

Mr. CARTER of Oklahoma. We do not have itemized consideration of a conference report. I think the item ought to go into the bill as it is.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken; and on a division (demanded by Mr. KNUTSON) there were—ayes 23, noes 29.

Mr. JOHNSON of Washington. Mr. Chairman, I demand a division.

Mr. KNUTSON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. KNUTSON——

Mr. JOHNSON of Washington. Mr. Chairman, I ask for tellers.

The CHAIRMAN. Is not the gentleman a little late? An amendment has already been sent up to the desk. Did the gentleman mean to ask for tellers when he demanded a division?

Mr. JOHNSON of Washington. Yes.

Mr. KNUTSON. Mr. Chairman, I am not very conversant with parliamentary usage; I intended to use every expedient to protect my interests.

The CHAIRMAN. The gentleman from Washington demands tellers. All in favor of taking the vote by tellers will rise and stand until counted. [After counting.] A sufficient number and tellers are ordered.

Mr. CARTER and Mr. KNUTSON were appointed to act as tellers.

The committee again divided; and the tellers reported—ayes 33, noes 28.

So the amendment was agreed to.

The CHAIRMAN. Does the gentleman from Minnesota desire to offer the amendment which he has sent to the desk.

Mr. KNUTSON. Mr. Chairman, I now desire to withdraw that amendment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to advance to the executive committee of the White Earth Band of Chippewa Indians in Minnesota the sum of $1,000, or so much thereof as may be necessary, to be expended in the annual celebration of said band to be held June 14, 1918, out of the funds belonging to said band.

Mr. KNUTSON. Mr. Chairman, I offer the following amendment as a new paragraph, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 27, at the end of line 21, insert as a new paragraph the following:

"That of the unexpended appropriation of $5,000 authorized to be taken out of the tribal funds of the Chippewa Indians of Minnesota for the construction of a bridge across the Mississippi River on the Cass Lake Reservation by the act entitled 'An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes,' for the fiscal year ending June 30, 1918, $4,000 be, and the same is hereby, authorized to be expended for improving the road between the Cass Lake Indian school and village, a distance of 6 miles, upon the condition that the counties of Cass and Beltrami, in the State of Minnesota, shall file with the Secretary of the Interior a written agreement to reimburse the Government within five years to the extent of one-half of the amount expended upon said road."

Mr. CARTER of Oklahoma. Mr. Chairman, on that I reserve the point of order.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order? It is evidently subject to the point of order.

Mr. KNUTSON. Mr. Chairman, I ask the chairman of the committee to withhold his point of order for a moment.

Mr. CARTER of Oklahoma. Very well; I reserve it.

Mr. KNUTSON. Mr. Chairman, the road between the Indian school at Cass Lake and the village of Cass Lake, a distance of about 7 miles, has been repaired by Cass County up to the reservation line. This proposed amendment has for its purpose appropriating $4,000 for the improvement of the road on the reservation which passes over a section of the country that in the summer time is practically impassable by reason of sloughs and bogs, and we would like to get it into shape so that the Indians who travel over that road will not have so much difficulty in getting to town. Horses frequently mire on this piece of road and vehicles break down.

Mr. STEENERSON. This item, I believe, is recommended by the Secretary of the Interior.

Mr. KNUTSON. Yes.

Mr. STEENERSON. It is not a new appropriation; it is a reappropriation of an old appropriation, an unexpended balance.

Mr. KNUTSON. The item is recommended by the Indian Department, but we did not get around to it in time to get it into the original bill. I have a letter here from the Indian Department, under date of January 10, indorsing this appropriation.

Mr. CARTER of Oklahoma. The item has not had any consideration by the committee, and on behalf of the committee, who have not had an opportunity to consider it, I should feel obliged to make the point of order.

Mr. MILLER of Minnesota. I trust the gentleman will withhold that for a moment, as I would like to develop this matter somewhat.

Mr. STEENERSON. The money has already been appropriated.

Mr. MILLER of Minnesota. This is a reappropriation of $5,000.

Mr. KNUTSON. $4,000.

Mr. MILLER of Minnesota. Appropriating $4,000 of $5,000. As I recall, we appropriated $5,000 a year or so ago to build a bridge across the river.

Mr. KNUTSON. Yes.

Mr. MILLER of Minnesota. Why was not the bridge constructed?

Mr. KNUTSON. For the reason that the place stated in the bill for the site of the bridge was afterwards found to be off the reservation.

Mr. MILLER of Minnesota. May I inquire what arrangements are being made to construct a bridge over that river?

Mr. KNUTSON. I will state to my colleague the bridge is being built by, I think, the counties of Cass, Itasca, Beltrami, and the State of Minnesota.

Mr. MILLER of Minnesota. I think the three counties of Cass, Beltrami, and Itasca. Is my colleague sure of that?

Mr. KNUTSON. That is my impression.

Mr. MILLER of Minnesota. They have received authority recently from Congress to construct two bridges across the Mississippi River in that region, and is one of these bridges to take the place of this one?

Mr. KNUTSON. Yes; I believe so.

Mr. MILLER of Minnesota. Is my colleague sure of that?

Mr. KNUTSON. The money appropriated by the Sixty-fourth Congress for that bridge can not be used.

Mr. CARTER of Oklahoma. I think bridges, I am not sure, come under the same rule as buildings and other construction work. In the construction of buildings the amount appropriated is available for three years, and after that time the contract expires therefor.

Mr. MILLER of Minnesota. It is of the utmost importance that a bridge be constructed across the Mississippi River in this region. Now, if it be taken care of by the three counties, all right; I heartily indorse the amendment which my colleague offers.

Mr. STEENERSON. Let me suggest, while the gentleman withholds the point of order, that the letter from the Interior Department be read recommending this.

Mr. KNUTSON. If the gentleman has no objection, I send the letter to the Clerk's desk and ask that it be read.

The CHAIRMAN. Without objection, the Clerk will read.

The Clerk read as follows:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, January 10, 1918.

Hon. HAROLD KNUTSON,
House of Representatives.

DEAR MR. KNUTSON: I have your letter of December 21, 1917, in regard to the $5,000 made available by the Indian act for the fiscal year 1918, from the tribal funds of the Chippewa Indians of Minnesota, as a contribution toward the construction of a bridge across the Mississippi River near Cass Lake. None of this money has been expended, and the suggestion has been made that $4,000 thereof be made available for improving the road between the Cass Lake School and village, a distance of 6 miles, and $1,000 for improving the school grounds and building roads thereon.

In this connection I may say that the greater portion of this road is on the opened part of the reservation in Cass and Beltrami Counties, which, it is understood, have already spent some money on the road, but from lack of funds are unable to do anything further at present. While it is true that the road is used by several hundred Indians living north of Cass Lake in going to and from the village, and also for the freighting of supplies to the school, at the same time, as that part of the reservation has been opened and is interspersed with white settlers who also use the road, I feel that the two counties should be willing to defray at least half the expense of repairing it. However, as they have not the necessary funds at this time, I would have no objection to the utilization of $4,000, or as much thereof as may be necessary, of tribal funds for this purpose, on condition that the counties agree to reimburse the Government to the extent of one-half the amount expended on the road, in proportion to that part of the road in each county, when those funds become available, but in any event within five years. Should an amendment to the Indian bill to this effect be referred to the department for report I will give it friendly consideration.

So far as concerns the expenditure of $1,000 for improving the Cass Lake School grounds and building roads thereon, I do not think it advisable to recommend this in view of the war situation, the heavy demand upon the Treasury for funds, and the fact that the improvement of the school grounds can be deferred without serious harm to the interests of the service.

Sincerely, yours,

CATO SELLS, *Commissioner.*

Mr. STEENERSON. As I understand the amendment sent up it complies exactly with this recommendation and leaves out $1,000.

Mr. KNUTSON. Yes.

The CHAIRMAN. Does the gentleman from Oklahoma make the point of order?

Mr. CARTER of Oklahoma. Mr. Chairman, I dislike very much to disoblige the gentleman from Minnesota, but this amendment has not had any consideration by the committee, there is not a member of the committee who knows anything about it, and I feel obliged to insist on the point of order.

The CHAIRMAN. The gentleman insists upon the point of order, and the point of order is sustained.

Mr. MILLER of Minnesota. Mr. Chairman, I desire recognition before we leave the subject of Minnesota, just to make a unanimous-consent request, and that is to file some remarks in the RECORD.

The CHAIRMAN. The gentleman will state his request.

Mr. MILLER of Minnesota. The Indian committee representing all the Indians of our State have compiled a somewhat elaborate statement setting forth their views relative to their needs and the expenditures of their funds, and as the subject is one of interest I would like for the membership of the House to have an opportunity of reading it, and, therefore, I ask unanimous consent to extend my remarks in the RECORD for the purpose of printing this.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD as indicated. Is there objection? [After a pause.] The Chair hears none.

The matter referred to is as follows:

WASHINGTON, D. C., *January 2, 1917.*

The COMMISSIONER BUREAU OF INDIAN AFFAIRS,
Department of the Interior, Washington, D. C.

DEAR SIR: In response to the request of the commissioner that the legislative committee of the general council of the Chippewa Indians, of Minnesota, submit to the bureau a detailed statement of the particular matters pertaining to their tribal affairs that necessitate its members coming to Washington and remaining during the present session of Congress, we present the following statement:

Prior to 1889 the United States dealt with the various bands of the great Chippewa Tribe of Indians by treaty or otherwise as separate and distinct tribes. Many of the promises made by the United States in its previous treaties with the separate bands had been ignored, disregarded, or broken, and in 1889 remained unfulfilled. In that year the Congress of the United States passed a law commonly known as the Nelson Act, approved January 14, 1889 (25 Stat., 642).

The object and purpose of the act of 1889 was to bring all the various bands or tribes located in Minnesota together and deal with them as one tribe; to compose the differences existing between said bands over the ownership of the lands to be ceded and to be allotted, and the differences existing between the various bands and the United States relating thereto, and to dismember the consolidated tribe and distribute the tribal property among the individual members and their issue share and share alike. To effectuate this purpose Congress dealt with the Indians by agreement and not in the exercise of its plenary power over their property, in contradistinction to the manner in which it dealt with the Kiowas, Comanches, and Apaches (Lone Wolf *v.* Hitchcock, 187 U. S., 553, 564, 568) and with the Cherokees (Cherokee Nation *v.* Hitchcock, 187 U. S., 294, 307, 445, 448), as held by the Supreme Court of the United States in United States *v.* Mille Lac Chippewas (229 U. S., 458, 509–510).

Section 1 of the act of 1889 authorized the President of the United States, through a commission to be appointed by him "to negotiate with all the different bands or tribes of Chippewa Indians in the State of Minnesota for the complete cession and relinquishment in writing of all their title and interest in and to all the reservations of said Indians in the State of Minnesota except the White Earth and Red Lake Reservations, and to all and so much of these two reservations as in the judgment of said commission is not required to make and fill the allotments required by this and existing acts, and shall not have been reserved by the commissioners for said purposes, for the purposes and upon the terms hereinafter stated."

The same section then prescribed the manner in which the assent of the Indians to the taking of allotments and the cession of the residue of their lands to the Government should be ascertained and determined. Sections 1 and 3 made provision for allotments of land in severalty to each and every member of the consolidated tribe. Sections 4, 5, and 6 made provision for the survey of the lands and the disposition of the timber on, as well as the lands ceded, which latter amounted in the aggregate to nearly 7,000,000,000 acres. Section 7 provided that all money accruing from the disposal of the ceded lands and timber should, after deducting all the expenses of making the census, of obtaining the cession and relinquishment, of making the removal and allotments, and of completing the surveys and appraisals, "be placed in the Treasury of the United States to the credit of the Chippewa Indians in the State of Minnesota as a permanent fund, which shall draw interest at the rate of 5 per cent per annum, payable annually for the period of 50 years, after the allotments provided for in said act have been made, and which interest and permanent fund should be expended for the benefit of the Indians in manner following." Then followed express provisions for the distribution of the interest money and the final disposition of the principal fund, which we will hereinafter deal with in detail.

The members of the separate bands residing in Minnesota at first refused to negotiate with the commissioners appointed by the President under the act of January 14, 1889, for the stated reason that the United States had not lived up to its treaty agreements, and while those agreements remained unfulfilled the Indians declined to have further dealings with the United States. Upon the solemn assurance of the commissioners representing the United States that if the Chippewa Indians would enter into an agreement with the United States in accordance with the terms and provisions of the act of January 14, 1889, the United States would faithfully and honestly discharge its duties and obligations thereunder and would make restitution for its failure to carry out its previous treaty agreements, the Chippewa Indians reluctantly ratified the act of 1889, consented to the allotments to be made thereunder, and ceded to the United States in trust their excess lands and timber thereon. This is referred to in the message of President Harrison to the Senate of the United States, dated March 4, 1890 (H. R. Ex. Doc. 247, 51st Cong., 1st sess.), accompanying which message the President transmitted the record of the negotiations and cessions, and in which message (p. 1) President Harrison says:

"The commissioners did not escape the embarrassment which unfortunately too often attends our negotiations with the Indians, viz, an indisposition to treat with the Government for further concessions while its obligations incurred under former agreements are unkept. I am sure it will be the disposition of Congress to consider promptly, and in a just and friendly spirit, the claims presented by these Indians through our commissioners, which have been formulated in the draft of a bill prepared by the Secretary of the Interior and submitted herewith."

The draft of the bill transmitted by President Harrison, appearing on pages 12 and 13 of the same document, was never enacted into law, and the broken treaty promises then recognized by the United States to-day remain unfulfilled, notwithstanding 28 years have come and gone.

Placing reliance and confidence in the representations of the commissioners, the Chippewa Indians ratified said act and consented to the allotment of a part of the land in severalty and the cession of the remaining, about 7,000,000 acres, to the United States in trust, to be sold and disposed of as provided by section 7 of said act. Not a single provision of that act, affecting the property of the Indians, has been carried into effect by the administrative officers of the United States as the agreement directed. In order that there may be no misunderstanding as to our position we herewith set out in detail the violations by the administrative officers of the Government of our property and civil rights secured to us by the agreement of 1889:

1. The illegal diversion of our school funds.

Section 7 of the act of 1889 provided: "And the remaining one-fourth of said interest shall, during the said period of 50 years, under the direction of the Secretary of the Interior, be devoted exclusively to the establishment and maintenance of a system of free schools among said Indians, in their midst, and for their benefit."

About 25 per cent of this money is now and has been for years used in paying the salaries of the Indian superintendents who perform no work in connection with our school service, and whose entire time is consumed in the administration of the general laws of Congress relating to the Indians. This is not using our school fund "exclusively for the establishment and maintenance of a system of free schools" as the law requires, and is an illegal diversion of our fund. The greater portion of the remaining school fund is now and has for years been wasted in the payment of salaries of useless employees. According to the annual report of the Commissioner of Indian Affairs for the year ending June 30, 1916, there were 113 employees at 9 day and 6 boarding schools who received in salaries that year $71,870. The average attendance at the 9 day schools was 141.6 and at the 6 boarding schools 324.5. After paying these salaries there was about $2,000 of our school funds left and the deficiency was in part made up by illegally taking a part of our principal trust fund and using it for the support of "the school system." The system of boarding schools maintained is in violation of the agreement of 1889. That agreement contemplated an equal division of the property and equal school facilities and opportunities to all children of our tribe. Under the boarding-school system maintained only a small percentage of the Chippewa children can be accommodated. Those admitted are clothed, fed, educated, and cared for while in school wholly at the expense of the tribe, while the parents of a great majority of our children must educate their children at their own expense, which is a gross inequality. The children of these Indians who are subserviant to the Government agents are freely admitted to these boarding schools and brought within the favored class, while the children of many of those members of our tribe who are men and women, unwilling to "bend the pregnant hinges of the knee, that thrift may follow fawning," are excluded. A "free-school system" as used in the agreement of 1889 never contemplated a system of "boarding schools" for the exclusive benefit of a few of our children, but contemplated the establishment and maintenance of a system of free schools among our people holding forth equal opportunities and benefits to all without fear or favor. Fifty per cent of our people are compelled to educate their children at their own personal expense in public schools, bearing their share with the white citizens of the State in taxation and the share of the tribal school funds to which their children are entitled is arbitrarily taken and used for the education of the children within the favored class. A complete change in the school system as at present conducted is imperatively demanded, and we insist that our trust funds shall, first, be used exclusively for the support of our schools as the law directs, and, second, that they shall be economically and wisely expended so that all our Indian children will receive full benefits and equal rights.

2. The illegal diversion of our principal trust fund.

Section 7 of the act of 1889 contained this provision:

"*Provided*, That Congress may, in its discretion, from time to time during the said period of 50 years appropriate for the purpose of promoting civilization and self-support among the said Indians, a portion of said principal sum, not exceeding 5 per cent thereof."

The commissioners, when negotiating with our people for the cessions of lands under the act of 1889, construed, interpreted, and explained this provision to mean that Congress would only encroach upon our principal trust fund in the event of "failure of crops or any other unforeseen misfortune" (H. R. Ex. Doc. 247, 51st Cong., 1st sess., pp. 88, 164). The agreements of cession (id. 38) recite that—

"After such explanation and understanding" the Indians consent to the cession—

"For the purpose and upon the terms stated in said act." In Minnesota v. Hitchcock (185 U. S. at p. 402) the court construing the agreement of 1889 held:

"In construing provisions designed for their education and civilization as fully, if not more than in construing provisions for their material wants, it is a duty to secure to the Indians all that by any fair construction of treaty or statute can be held to have been understood by them or intended by Congress."

Upon the pretext that funds were needed for the support and civilization of our people, the department has for years applied to Congress for annual appropriations ranging from $150,000 to $205,000 out of our principal trust funds, and notwithstanding Congress has in every authorization limited the expenditure of the money appropriated to "the purpose of promoting civilization and self-support among the said Indians in manner and for purposes provided for in said act" of January 14, 1889, the department has withdrawn the money from the principal fund and illegally expended it in the payment of the salaries and expenses of the Indian Service of the United States. True probably the entire amount has been expended in paying the salaries and expenses of the United States employees in the Indian Service stationed in Minnesota, but by using our trust funds for this purpose it enabled the department to expend the entire lump-sum appropriations carried in the Indian appropriation bills for the entire service exclusively on the service among the other Indian tribes, and thus the entire Indian Service—not the Chippewas of Minnesota—was the beneficiary of the unlawful diversion of our trust funds. In some instances in years past Congress made specific appropriations out of the public funds for the support of the Indian Service at the White Earth and Leech Lake Agencies, and the money thus appropriated was diverted and expended at agencies not located in the State of Minnesota and our trust funds used to pay the governmental expenses at the White Earth and Leech Lake Agencies, for which Congress had made specific appropriations out of public funds.

In this way more than $3,000,000 of our principal trust fund has been illegally diverted and expended, notwithstanding the prohibition contained in section 2097, United States Revised Statutes.

3. Trust funds appropriated and used for other illegal purposes.

Large amounts of our principal trust funds have been appropriated from time to time for drainage, building roads, construction of buildings, dams, etc., without our consent or approval, contrary to the express provisions of section 7 of the agreement of 1889.

4. The illegal taking of more than 400,000 acres of our land.

Section 3 of the agreement of 1889 provided that allotments of land should be made to all the Indians "in conformity with the act of February 8, 1887," commonly known as the general allotment act. The general allotment act provided for the allotment of lands, as follows:

"To each head of a family, one-quarter of a section; to each single person over 18 years of age, one-eighth of a section; to each orphan child under 18 years of age, one-eighth of a section; and to each other single person under 18 years * * * one-sixteenth of a section."

No allotments were made in conformity with the agreement of 1889, except to a limited number of our people on the Fond du Lac Reservation. By the act of February 28, 1891 (26 Stat., 794), the general allotment act of 1887 was amended to read as follows:

"That in all cases where any tribe or band of Indians has been or shall hereafter be located upon any reservation created for their use, either by treaty stipulation or by virtue of an act of Congress or Executive order setting apart the same for their use, the President of the United States be, and he hereby is, authorized, whenever in his opinion any reservation, or any part thereof, of such Indians is advantageous for agricultural or grazing purposes, to cause said reservation, or any part thereof, to be surveyed, or resurveyed, if necessary, and to allot to each Indian located thereon one-eighth of a section of land."

The commission erroneously held that the allotments should be made in conformity with the act of 1887 as amended by the act of 1891 and proceeded to allot to all Chippewa Indians not theretofore allotted on the Fond du Lac Reservation 80 acres of land. Upon the recommendation of the department, and without consulting the Chippewa Indians other than possibly a few of those on the White Earth Reservation, Congress passed the act of April 28, 1904 (33 Stat., 538), by which the President was authorized to allot to each Chippewa Indian then legally residing on the White Earth Reservation and to those Indians who might thereafter remove to said reservation additional allotments of 80 acres. Under this act of Congress, which was in disregard of the agreement of 1889, about 5,000 allotments of 80 acres each were made to those Indians residing on the White Earth Reservation. By the agreement of 1889 all lands not necessary to make and fill the allotments provided for therein were ceded to the United States in trust, to be sold by the United States and the proceeds placed in the principal fund, and in which principal fund all the members of the tribe had an interest. Thus, instead of selling the land not necessary to make and fill the allotments authorized by the agreement of 1889, Congress arbitrarily took about 400,000 acres of our trust estate and gave the land thus illegally taken to certain members of our tribe. This was done upon the recommendation of the department, was in violation of the terms of our agreement of 1889, and we insist the United States is liable therefor in money damages to the tribe.

5. The losses sustained by failure to dispose of timber as agreed.

The failure of the United States to dispose of the timber on the ceded lands in conformity with the agreement of 1889 has resulted in great loss to our people. The selection and appointment of incompetent or corrupt men to survey, cruise, cut, and sell our timber and the thefts and corruption practiced upon us under their administration became so notorious that in 1898 a part of our people rose in rebellion against the Government authorities. The congressional and departmental investigations that followed disclosed a loss to our people of large quantities of timber and waste of our funds. Practically all the work theretofore done at our expense in the scaling, appraising, and surveying of the timber and timberlands was discarded, and under the act of June 27,

1902, the work that should have been done in the first instance was done again at our expense. There was no substantial restitution for the timber stolen or given away and no restitution for our funds expended by the previous corrupt and incompetent officials who were in charge of the work. We insist that this matter should be adjusted.

6. The illegal patenting of our lands to the State of Minnesota.

The United States, contrary to the agreement of 1889, has patented to the State of Minnesota large quantities of our lands upon the erroneous theory that the State acquired title thereto under the swamp-land act. For these lands thus erroneously taken by the United States and patented to the State of Minnesota our people have received no consideration.

7. Lands illegally taken and given away or used for purposes not authorized by the agreement of 1889.

Large tracts of our lands have been arbitrarily taken by the United States and either given away or used for purposes not authorized by the agreement of 1889. As an illustration, by the act of June 21, 1906 (34 Stat., at p. 352), large tracts of our lands ceded under the agreement of 1889 were arbitrarily taken by the United States and given to the State of Minnesota to "be used as a State forest reserve or public park." Other large tracts of our lands have been taken. For these lands we have never received a dollar of compensation. All the lands thus arbitrarily taken since 1889 were within the terms of the agreement of that year. We insist that the United States should compensate us for the losses we have sustained as the result of these illegal acts.

8. Large tracts of our lands improperly classified and disposed of to our loss.

Large tracts of our lands ceded under the agreement of 1889 covered with heavy stands of white pine and other valuable timber, were erroneously classified as "agricultural lands" and were entered by homesteaders under the homestead laws and the timber sold to timber companies. For these lands and the great quantities of timber thereon we have received nothing, contrary to the agreement of 1889. This matter was, in about 1897, investigated and reported upon by J. George Wright, and his official report thereon is one file in the department, to which we refer for greater particularity.

9. No allotments made to the Red Lakes.

Notwithstanding the plain provisions of the act of 1889, no allotments have been made to about 1,100 Indians residing on the Red Lake Reservation. This will be further referred to in a subsequent paragraph.

10. The illegal conversion of the lands on the Red Lake Reservation.

In 1902 the department, contrary to the agreement of 1889, sent a representative to the Red Lake Reservation to negotiate with the Red Lake Indians for the cession of a part of the lands on that reservation which were embraced within the agreement of 1889. On March 17, 1902 (33 Stat., 48), a pretended inchoate agreement was finally signed with the Red Lake Indians by which it was attempted to confer the absolute ownership of all the lands on the Red Lake Reservation on the Red Lake Indians, in disregard of the agreement of 1889 and the cessions thereunder. In order to induce the Red Lake Indians to sign the agreement the United States agreed to pay the Red Lake Indians for the 256,152 acres of lands ceded $1,000,000, to be paid to them in per capita payments in cash. The Red Lakes—notwithstanding they did not own the lands to be ceded, but merely had an interest therein, the same as all other Chippewa Indians who were parties to the agreement of 1889—accepted the terms offered by the Government and signed the agreement. This inchoate agreement was never ratified by Congress, but in lieu thereof Congress passed the act of February 20, 1904 (33 Stat., 48), in which it was attempted to effectuate the purposes for which the alleged agreement was negotiated. Practically the entire amount received from the sale of said 256,152 acres of lands, which belonged to all the Chippewas of Minnesota, was paid to about 1,100 Red Lake Indians exclusively and all the remaining Chippewas denied any participation therein. There were then less than 1,100 Indians on the Red Lake Reservation entitled to allotments of 80 acres each. Less than 88,000 of the 256,152 acres taken would have made allotments to all of them equal to those received by the remainder of our people under the agreement of 1889. Thus by that transaction alone the United States took from all our people nearly three times enough land to allot all the Indians on the Red Lake Reservation and gave the entire proceeds to the Red Lakes, and those proceeds have been spent and the Red Lake Indians are without allotments to-day. The United States, we insist, is liable for this illegal diversion.

11. The illegal inclusion of the ceded lands in forest reserves.

The illegal cutting and theft of our timber upon the lands ceded by the agreement of 1889 resulted in 1898 in a part of our people rising in rebellion against the United States authorities. This was followed by investigations by both the department and Congress, and to prevent recurrences of the violations found to exist the act of June 27, 1902 (32 Stat., 400), was passed. In that act, at the instance of the department, and without the consent of our people and contrary to the terms of the agreement of 1889, the following provision was inserted at page 402:

"*Provided further*, That in cutting the timber on 200,000 acres of the pine lands, to be selected as soon as practicable by the Forester of the Department of Agriculture, with the approval of the Secretary of the Interior, on the following reservations, to wit, Chippewas of the Mississippi, Leech Lake, Cass Lake, and Winnebigoshish, which said lands so selected shall be known and hereinafter described as 'forestry lands,' the purchaser shall be required to leave standing 5 per cent of the pine timber thereon for the purpose of reforestation, as hereinafter provided, said 5 per cent to be selected and reserved in such manner and under such rules and regulations as may be prescribed by the Forester of the Department of Agriculture and approved by the Secretary of the Interior: *Provided further*, That there shall be reserved from sale or settlement the timber and land on the islands in Cass Lake and in Leech Lake, and not less than 160 acres at the extremity of Sugar Point, on Leech Lake, and the peninsula known as Pine Point, on which the new Leech Lake Agency is now located, which peninsula approximates 7,000 acres, and in addition thereto 10 sections in area on said reservations last aforesaid, to be selected by the Forester of the Department of Agriculture, with the approval of the Secretary of the Interior, in lots not less than 320 acres each in contiguous areas, and nothing herein contained shall interfere with the allotments to the Indians heretofore and hereafter made. The islands in Cass and Leech Lakes and the land reserved at Sugar Point and Pine Point Peninsula shall remain as Indian land under the control of the Department of the Interior."

The department thereupon established a forest reserve embracing therein great tracts of our lands ceded under the act of 1889 and which were to have been sold and the proceeds placed in our trust fund. By the act of May 18, 1916, another forest reserve was created on the Red Lake Reservation, to be administered under the direction of the Secretary of the Interior, the net proceeds derived from the sale of the timber to be placed in the Treasury of the United States to the credit of the Red Lake Indians. The act also authorized the sale of the timber on the lands not included in the forest reserve, the funds derived therefrom to be placed in the Treasury of the United States to the credit of the Red Lake Indians. The act also authorized the allotment of agricultural lands not covered with standing merchantable timber to individual Red Lake Indians. All of the things provided for in the act of May 18, 1916, were in disregard of the plain terms and provisions of the agreement of 1889 and we insist are illegal. The evil effect of this legislation is threefold: (a) It is a gross injustice to the Chippewas of Minnesota not members of the Red Lake band, who are deprived of lawful property rights in and to the property on the Red Lake Reservation secured under the agreement of 1889; (b) it deprived the Red Lake Indians of allotments of timber lands to which they were entitled under the agreement of 1889, and which allotments and timber thereon were to be owned by them in severalty, and compels the Red Lake Indians to take 80 acres of land, denuded of the timber, which is worth only a fractional part of what the land with the timber thereon would be worth; and (c) both acts attempted to confer rights which the United States could not legally confer. Under the agreement of 1889 all these lands were to have been sold and the proceeds placed in the Treasury of the United States to the credit of all the Chippewa Indians. The fund was to bear interest at the rate of 5 per cent per annum. Every 20 years the accrued interest aggregated the amount of the principal fund. Twenty-eight years have passed since the agreement of 1889 was entered into and neither the allotments provided for in that act have been made to the Red Lakes or the ceded property sold, but, on the contrary, the proceeds derived from the 256,152 acres sold have been illegally diverted; the proceeds derived from the sale of the timber under the latter act illegally diverted, and the remainder of the land locked up in forest reserves, contrary to the agreement of 1889 and to our loss and detriment. If this property now locked up in forest reserves contrary to our agreement had been sold, as the act of 1889 provided, the interest derived from the fund would have aggregated more than the principal. Under the plan provided for in the act of May 18, 1916, the Red Lake Indians will be left virtually paupers, as the allotments that will be made to them will have practically no value. The proceeds derived from the 256,152 acres illegally taken by the Government under the act of February 20, 1904, have been spent, and unless the funds belonging to all the Chippewas of Minnesota are used for the support of the Indians on the Red Lake Reservation, contrary to the agreement of 1889, those Indians will be left practically penniless. All the timber on the forest reserve should be cut and sold, but the proceeds should go into the Chippewa principal fund and not to the credit of the Red Lakes alone.

12. New-born children being denied lawful rights.

Section 7 of the act of January 14, 1889, provided that "at the expiration of the said 50 years the said permanent fund shall be divided and paid to all of said Chippewa Indians and their issue then living in cash in equal shares." The words "said Chippewa Indians" relate and refer to those persons whose names appear on the census rolls prepared by the commission and who have been allotted or who are entitled to allotments. The words "their issue" relate and refer to the "descendants" of those persons who were enrolled by the commission, and was used advisedly to denote an indefinite succession of lineal descendants who are to take by inheritance. The agents of the department have for years maintained rolls of new-born children as a basis for interest payments and the distribution of the principal fund, but have refused to inscribe thereon the names of the children of enrolled and allotted Indians who have been born or who reside outside of the territory within which allotments were taken, and by refusing to enroll these children have denied them any participation in the annual interest, other and final payments. These children are as much entitled to share in the interest and other payments as the new-born children born to parents residing on their allotments, as the act of 1889 made no distinction. The very object and purpose of the act of 1889 was to dismember the tribe, divide, or make provision for the division of all the tribal property in severalty, to make men and women endowed with all the rights, privileges, and immunities of other citizens of the United States out of our people, who had previously been held in a state of dependency and tutilage. The policy adopted by the department, through its agents, of refusing to enroll the new-born children of Indians who leave the country formerly within the reservation is the greatest impediment to the progress of our people, as it is a deceptive notice to them by the administrative officers that if they leave their allotments or the territory formerly included within the several reservations their children and their children's children will be denied any participation in either the interest payments or the final distribution of the principal fund. It is a deceptive notice to them that if they continue the habits of the former tribal Indian and remain in the Indian country they will be rewarded therefor. This is detrimental to our people, impedes their development and progress, and is in open violation of rights secured to them by the agreement of 1889.

13. Indians who have been denied allotments.

A limited number of our people, some of whom are on the rolls prepared by the commission, and some of whom are clearly entitled to be on said rolls, have not been allotted lands. Some of these people are full-bloods, and their right to allotments and participation in the disposition of the tribal property is conceded and acknowledged by all our people. We insist that they should be protected.

14. There is no necessity for the elaborate administrative machinery maintained among the Chippewas.

The allotments to our people commenced in the early nineties, and by 1900 had been practically completed. Indians born after about April, 1900, as we understand it, were not allotted. Therefore the great majority of our people who received allotments are adults, there being a comparatively small percentage of minors. Practically all the allottees, being adults, are fully capable of managing their property. This has been recognized by Congress in removing the restrictions upon all allotments made to mixed-blood adults on the White Earth Reservation and upon the allotments to all mixed-blood minors as they thereafter become of age. This embraces a large majority of the allottees on the White Earth Reservation, numbering between five and six thousand, and the Indians allotted off the White Earth Reservation are possessed of an equal degree of intelligence and business capacity to those allotted on the White Earth Reservation. These people do not need governmental supervision and control. Surely if they are capable of managing and controlling their lands they are certainly capable of handling the few dollars paid to them annually in interest money and the shares they will receive when the principal fund is divided. Under the agreement of 1889 the department has no control over the annual interest payments other than to make the same to the "heads of families" and "guardians of minor orphan children" and to all others entitled to receive the same, and said payments under the law must be made to them in cash. The principal fund is to be dis-

tributed in cash in equal shares. Therefore there is no necessity for governmental supervision over the money and no authority of law for such supervision. The 25-year restrictive period upon all allotments will shortly expire. The only necessity, if necessity at all exists, for the continuation of governmental agencies among the Chippewas of Minnesota is to look after the allotments made to old and indigent Indians, the allotments of those full bloods who are not capable of looking after their property, the allotments to the few persons who are minors, and then only during the period of their minority, and to make the payments to all Indians which the law directs. All funds belonging to other classes should be immediately paid out and the accounts with more than 10,000 of our people closed. Many of the full bloods are capable of handling their property, and they should be given it without further delay. As stated by the Supreme Court in Johnson v. Gearlds (234 U. S., 443), the tribal organization has been continued among the Chippewa Indians of Minnesota since 1889 for the purposes "of disposing of annuities under the Nelson Act"—the agreement of 1889. Notwithstanding such is our condition, according to the report of the Secretary of the Interior dated December 3, 1917 (H. Doc. No. 399, 65th Cong., 2d sess.), the cost of administration among the Chippewa Indians of Minnesota during the fiscal year ending June 30, 1917, amounted to $504,475.70, more than $475,000 of which was taken from our trust funds, from which we derived only incidental benefits, and the great majority of which was spent for purposes prohibited by law and which were an actual detriment to our people.

When the agreement of 1889 was entered into Congress recognized the fact that we were no longer uncivilized tribal Indians, but were, in fact, ready to assume the duties and obligations of citizenship. When we took our allotments pursuant to the agreement of 1889, under the general allotment act of 1887, we became, by the express provisions of the latter act, "entitled to all the rights, privileges, and immunities" of all other citizens of the United States. But the administrative officers of the United States, instead of relaxing their rigid and arbitrary control over our personal and property rights as tribal Indians, have used every effort to make more rigid and arbitrary their control over the person and property of our people since Congress made us citizens of the United States. Our people are held as "incompetents" and thus placed at a disadvantage in all business pursuits. Although fully capable of competing with the whites, the business public looks upon our men and women as "incompetents" because of their designation and treatment as such by the administrative officers of the United States, and they are thereby deprived of equal opportunities in the struggle for life. They can obtain employment only in the more menial positions and are refused employment in positions requiring ability solely because of the arbitrary action of the administrative officers in holding them as "incompetents." While they are held as "incompetents" by the Interior Department, they are held to be "competents" by the War Department, and when the life of this Nation is at stake they are compelled to serve, the same as the competent white citizen, in the military service. The "incompetent" whites are exempt from military service; the "incompetent" Indian is compelled to serve. We have been despoiled of our property and civil rights, contrary to our agreements and treaties, by the administrative officers who have, in order to hold us in a state of subjugation as "savages" and to thereby build up a great army of officers and employees among us, ostensibly for our civilization and protection, denied us the right to use a dollar of our funds for the employment of an attorney to protect our interests, notwithstanding Congress has expressly given us that right. When we have sought to employ an attorney to protect us the administrative officers have so restricted and limited the compensation to be paid that we could not obtain the service of a man of ability and standing in his profession to represent us. We have reluctantly been forced to the conclusion that the administrative officers do not intend that we shall have an attorney capable of protecting our interests, but that if we are allowed an attorney he shall be a man of departmental selection and one who will not protect our interest if in so doing it becomes necessary to disclose the shortcomings of the administrative officers whose illegal acts are responsible for the condition against which we complain.

This condition became so intolerable that in 1913 our people, for their protection, organized our general council, which has been since repeatedly recognized by Congress. Our people, at great individual sacrifice, have taken the preliminary steps to put an end to the despoliation of their property and civil rights, and to bring to an end the insults and indignities heretofore heaped upon our people by administrative officers of the United States. We are determined that this condition shall end; that our treaties and agreements shall no longer be treated as "mere scraps of paper" by the United States and its officers; that our tribal property shall be administered as the Government of the United States agreed that it would be, and that restitution shall be made for the previous wrongs to our property and civil rights heretofore inflicted upon our people by the administrative officers of the United States.

We insist that our people should be appointed to all positions of trust and confidence in the Indian Service among the Chippewas of Minnesota. The bad condition existing with reference to our tribal affairs is directly attributable to the incompetent white officers and agents who have been sent among our people and clothed with official position and power. Most of these officials have been strangers to us. They do not know our people and make no attempt to acquaint themselves with our rights under the law. In many instances they are brutal and insulting to our people and are a serious detriment to the progress and development of the Chippewa Indians of Minnesota. We ask the privilege of having our own people appointed to all positions of trust and confidence in the service among the Chippewas of Minnesota, in order that we may secure to our own race that degree of assistance and protection which the law contemplates, and relieve them from further vexatious annoyance, insults, and denial of lawful rights to which they have been subjected in the past.

As the time is rapidly approaching when our tribal status will become extinct it is necessary that we should secure an adjustment of our tribal affairs with the United States Government without further delay. The above are some of the matters we insist should be adjusted at an early day, and are the principal matters which necessitate our coming to Washington and remaining here during the present and future sessions of Congress until they are adjusted. In our effort to adjust our affairs with the Government in accordance with its agreements and in order that justice may be done our people we ask the cooperation of your office.

Approved by the entire legislative committee.

Very respectfully,

JOHN W. CARL, *Chairman.*
B. L. FAIRBANK.
HENRY W. WARREN.
J. G. MORRISON, Jr.

Mr. VENABLE. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. VENABLE: Page 27, line 22, after the word "band," insert a new paragraph as follows:

"Mississippi: For the relief of distress among the Choctaw Indians of Mississippi and for the purpose of their civilization and education, including the purchase of land, to be expended under such rules, regulations, and conditions as the Secretary of the Interior may decide, $150,000, to be immediately available."

Mr. CARTER of Oklahoma. Mr. Chairman, I reserve the point of order against it, and pending that I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 8696, the Indian appropriation bill, and had come to no resolution thereon.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, by direction of the Committee on Agriculture I present the Agricultural appropriation bill with the report (H. Rept. 249) of the committee thereon.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919.

Mr. MONDELL and Mr. MADDEN. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. Two or three of the gentlemen reserve all points of order on the bill, and the bill is referred to the Committee of the Whole House on the state of the Union and ordered printed.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696, the Indian appropriation bill, with Mr. GARNER in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696, the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 8696) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1919.

The CHAIRMAN. The gentleman from Oklahoma reserves the point of order on the amendment offered by the gentleman from Mississippi. The gentleman from Mississippi [Mr. VENABLE] is recognized.

Mr. VENABLE. Mr. Chairman, about a year ago, pursuant to an item in the Indian appropriation bill, $1,000 was appropriated to investigate the conditions of the Choctaw Indians in Mississippi. And, pursuant to that appropriation, a commissioner of the Indian Office did make an investigation and filed his recommendation. This amendment that I have offered incorporates the recommendation of the Indian Office, based on facts and conditions as found by that special commissioner. As I understand it, the chief objection to giving any relief to the Mississippi Choctaw full-blood Indian has been based upon the suggestion that it was wrong to take over the supervision of any more Indians or Indian tribes in the United States, on the ground—a hardly logical one, I think—that it was erroneous to extend the activities of the Indian Bureau any further. No objection is made, as I understand it, on the ground that the condition of these Indians is not as depicted or that they are not worthy objects of aid. But the objection that I have mentioned seems to be the only one that has been seriously presented, at least on the floor of this House.

Mr. BORLAND. Will the gentleman yield?

Mr. VENABLE. I will.

Mr. BORLAND. As I recollect the history of these Mississippi Choctaws, the Government made a treaty with the Choctaw Tribe by which a large percentage of them should be removed to the Indian Territory.

Mr. VENABLE. That is true.

Mr. BORLAND. And given a grant of land in exchange for their land east of the river.

Mr. VENABLE. That is true.

Mr. BORLAND. And a certain small fragment of them declined to enter into that treaty, but preferred to take their chances of becoming citizens of Mississippi, and those who remained in Mississippi did so with the idea of becoming citizens of Mississippi. Is not that the situation?

Mr. VENABLE. Yes, sir. Coupled with this further fact, that every commissioner that has been sent to Mississippi to acquaint the Indian with his legal rights under the treaties has been a scoundrel and blackleg, and, as a matter of fact, has deprived the Indians of Mississippi of all opportunity, as far as the facts are concerned, of availing themselves of their rights under the various treaties.

Mr. BORLAND. The gentleman is not seeking to put the Indian under that kind of management, is he—of scoundrels and blacklegs?

Mr. VENABLE. I said these commissioners who had been sent down there, if the gentleman is familiar with the history of the Mississippi Choctaws.

Mr. BORLAND. The gentleman means back to 1830?

Mr. VENABLE. Yes, sir.

Mr. BORLAND. The Dancing Rabbit treaty——

Mr. VENABLE. I have only five minutes, and I wish to make one point, and that is all; otherwise I would be very glad to yield to the gentleman.

Mr. BORLAND. I wanted to get some light on the subject.

Mr. VENABLE. Now, then, it is argued that because the Federal Government has done certain things for the Indians in the past, or given them opportunities, it should preclude them. Now, if there be any logic in that position, it precludes 99 per cent of all the Indians of the United States from receiving any gratuity from the Government at all, and this Indian bill, as every Indian bill reported out by the committee for years past, consists principally of gratuities, pure gifts by the Government to the Indians, not based on any legal demand, not based on any legal equity, and, as a matter of fact, not based on anything except the idea that these people, having once owned this country and having been badly treated and defrauded in many instances by the white people of this country, there is a moral obligation to take care of them, as it were, as wards of the Nation. For that reason and on that principle, the fact that every Indian in the United States has received something from the Government under treaty and has been paid what the treaty called for, a complete discharge of governmental treaty obligation does not preclude him from receiving other things at the hands of the Government in further discharge of the moral obligation that lies upon the people of the United States. And within that category and on that basis, the full-blooded Indian of Mississippi—I am not talking about the so-called Indian claimants; that is another matter—on that theory and on that principle the Indian of Mississippi, the Choctaw Indian of Mississippi, or the Indian of Kansas, if he needs it, the Indian of Florida, and the Indian of Louisiana, is entitled to such aid on the part of the Government of the United States as will make him self-supporting.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. CAMPBELL of Kansas. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes more.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent that the gentleman from Mississippi may proceed for five minutes more. Is there objection?

There was no objection.

Mr. CAMPBELL of Kansas. How many full-blooded Choctaws are in Mississippi, if the gentleman knows?

Mr. VENABLE. About a thousand, according to this report. Their condition, according to this report, is pitiable. The subcommittee which went there to investigate the condition of these Indians, I think, had sufficient testimony, and the hearings are printed, I understand, to show that their condition is pitiable.

Mr. LITTLE. Will the gentleman yield?

Mr. VENABLE. Yes.

Mr. LITTLE. I would like to ask whether they live in one body or in scattered bodies?

Mr. VENABLE. They are all scattered in a radius of about 50 miles from the little town of Union, Miss.

Mr. LITTLE. May I ask just what they do? How are they occupied?

Mr. VENABLE. Well, they are engaged as farm hands—some of them. They do little odd jobs around.

Mr. LITTLE. Do they speak Indian or English?

Mr. VENABLE. Indian. A great many of them can not speak English at all.

Mr. BRUMBAUGH. Mr. Chairman, will the gentleman yield for a question?

Mr. VENABLE. Yes, sir.

Mr. BRUMBAUGH. Do they own any property, or does the law of the State of Mississippi prevent them from acquiring title to property?

Mr. VENABLE. Oh, no. A few of them, as shown by this report, own property, or have owned property in the past—poor land, piney-woods land, the soil being very thin.

Mr. BRUMBAUGH. Do any of them own their own homes?

Mr. VENABLE. I should say a few of them; but they are ignorant and improvident, and do not understand the English language very well. They have mortgaged their lands. Some of them now hold equities in certain lands, but as a matter of fact they will lose them. The value has been used up in advances from merchants and others.

Mr. BRUMBAUGH. One further question.

Mr. VENABLE. Yes.

Mr. BRUMBAUGH. Does the gentleman think they will have an equal opportunity to earn a living or acquire property as the foreigner unable to speak English would have in that locality?

Mr. VENABLE. No, sir; so far as rules or laws are concerned, they would; but they would never have the same opportunity, because the Indian is an Indian and the foreigner is a white man.

Mr. BRUMBAUGH. Is there race prejudice against these Indians?

Mr. VENABLE. Oh, no. There is the greatest sympathy for these Indians there. As a matter of fact, I think a great many of them would have starved to death if the white people had not taken care of them.

Mr. BRUMBAUGH. No one refuses to employ them because of the fact that they are Indians?

Mr. VENABLE. No. There is no prejudice against them at all.

I am in hearty accord with any movement that looks to devising some scheme by which the Indian in America can be given an opportunity within a reasonable time to become competent, and then to turn all his property over to him and bid him Godspeed, thus getting rid of the problem. I do also think that, regardless of where the Indian lives and regardless of whether he has received anything under treaties from the Government or not, provision should be made that the young Indian—because the old Indian can not be reached very well—be given an opportunity to acquire enough practical knowledge of farming and things of that character to enable him, if he takes advantage of his opportunities, to become self-supporting. If he does not, the Government has discharged its obligation to him and is under no further obligation to play nurse to him through the next hundreds of years. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. MADDEN. One minute. Has the gentleman ever taken this matter before the Committee on Indian Affairs?

Mr. VENABLE. Yes. They recommended last year that I offer it as a separate bill.

Mr. MADDEN. They did not give it consideration in committee at all?

Mr. VENABLE. I think the question has been considered by members of the committee. In fact, several members of the committee went down there and investigated the conditions at first hand.

Mr. CARTER of Oklahoma. The status of the matter, I will say, is this——

Mr. VENABLE. And report was made by the committee to the Indian Office and to the Indian Commissioner, and all the facts are before the committee.

Mr. CARTER of Oklahoma. Mr. Chairman, I would state this, if the gentleman will permit: The gentleman spoke about this while we were considering the Indian appropriation bill last year, he then being a member of the Committee on Indian Affairs.

Mr. VENABLE. Yes.

Mr. CARTER of Oklahoma. And the suggestion we made was that he prepare a separate bill and refer it to the committee and we would endeavor to dispose of the matter.

Mr. MADDEN. Has that been done?

Mr. CARTER of Oklahoma. No; it has not been done.

The CHAIRMAN. The time of the gentleman from Mississippi has expired. Does the gentleman from Oklahoma reserve a point of order?

Mr. CARTER of Oklahoma. Yes.

Mr. HARRISON of Mississippi. Mr. Chairman, of course we have had the Choctaw——

Mr. CARTER of Oklahoma. One moment. How much time has the gentleman?

The CHAIRMAN. The gentleman can cut off debate at any time he desires, because this is on a point of order.

Mr. CARTER of Oklahoma. I wanted to fix the time so that everybody could be heard.

The CHAIRMAN. The gentleman from Mississippi will proceed.

Mr. HARRISON of Mississippi. Mr. Chairman, this Choctaw question has been before the committee for quite a long time. There is an item carried further on for a per capita payment to the Oklahoma Choctaws that precludes the Mississippi Choctaws from taking any part of it. I think that is wrong. I think the action of the committee in that regard should be condemned. I do not think that this House every year ought to appropriate this money for those Oklahoma Indians without caring for those in Mississippi. I have stated on the floor that I would not ask for money to come to Mississippi Choctaws out of the Treasury of the United States. I have never thought it ought to come out of the Treasury of the United States. I have thought that relief should come to those unfortunate people out of the tribal funds. But this House has passed on the question of whether or not the Mississippi Choctaws shall participate in the fund of those tribes three or four times. I have made myself probably obnoxious to Members of this House by trying to convince the House of the justice of the claims of the Mississippi Choctaws.

Item after item is carried in this appropriation bill for the support, civilization, and education of Indians in the various States of the United States. Every one of these paragraphs is subject to a point of order. Now we are placed in the attitude that a report comes in, made by some gentleman in the commissioner's office who has investigated the condition of the Mississippi Choctaws, made at the instance of this Congress by express appropriation and provision. It can not be doubted as to what the condition of the Mississippi Choctaw is. A subcommittee of the House Commitee on Indian Affairs visited Mississippi last year. They saw the plight that these Indians were in. I want to read to you this report that was filed in the Interior Department by Mr. W. H. Ketcham on December 1.

Mr. MADDEN. Who is he?

Mr. HARRISON of Mississippi. Mr. Ketcham is a man appointed by the Indian Office to go there and make this investigation. His report is as follows:

DECEMBER 1, 1917.

Hon. GEORGE VAUX,
Chairman Board of Indian Commissioners.

SIR: I have the honor to report that I visited the Choctaw Indians of Tucker, Neshoba County, Miss., September 30 to October 9 and two settlements in Leake County October 10 and 11, 1917.

The bulk of the Mississippi Choctaws live adjacent to the towns of Tucker, Stratton, and Union, in Neshoba and Newton Counties; in fact, practically one-half live in Neshoba County. A number live in Leake, Scott, Kemper, and Attala Counties, and there are families scattered over various other portions of the State. It is claimed by some that there are to-day in the States of Mississippi and Louisiana about 1,700 full-blood Choctaw Indians. This claim may be very nearly correct. There can scarcely be less and there may be more than 1,000 full-blood Choctaws in Mississippi. Mr. John R. S. Reeves, special supervisor of the Indian Office, Washington, D. C., has made a valuable report on the Choctaws in Mississippi, particularly as regards their numbers and their land holdings. (See H. R. Doc. No. 1464.)

During my stay at Tucker I met a great many Indians, three to four hundred, most of them from the immediate neighborhood and from Stratton and Union and some from Scott and Leake and other counties. I had an opportunity to observe them closely and to make careful inquiry into their condition. I visited a number of homes in the vicinity of Tucker, which, despite extreme poverty, did not appear to be uncomfortable. They were clean and the occupants seemed to have the bare necessaries of life, such as one might find in the cabins of very poor white people. The grounds around the houses were well kept, and in some instances flowers were growing in profusion and there were evidences of gardening and farming on a small scale.

In Leake County I visited a number of families, some in the cotton patches, where they were at work, and others in the homes. The few houses visited were clean and well kept, and would correspond to the homes of cleanly white people in very poor circumstances. Wherever I went I found Indians suffering from tuberculosis. I am convinced that these Indians, generally speaking, do not have sufficient food and that their meals are very irregular and by no means frequent.

GENERAL CONDITIONS.

I had visited Tucker the year before, and since that visit it seemed to me I could see an improvement in the dress of the men, particularly the young men. The majority were neat and made a good appearance; as for the women, they, generally speaking, were neatly but poorly clad. It is evident, however, that in many instances they do not have sufficient clothing to keep them comfortable during the cold weather.

The number of those who own land is so small that the question of land holding may be omitted from any survey made of these people.

They are in urgent need of medical attention and medicines. Very often the physician will not visit a sick Indian until an exorbitant fee has been paid or made secure in advance. The result is that those who are ill rarely have more than one visit of a physician and many can have no attention whatever. This condition applies to the druggist and medicines required by the sick. The sick usually have to depend on the uncertain charity of white people for proper food, medicines, and medical attention.

The Choctaws of Mississippi have a very good name as regards honesty, truthfulness, cleanliness and general morality. They are, in a sense, industrious, yet inconstant and unthrifty.

In many instances they still marry according to Indian custom, and the old ideas concerning marriage are much in evidence. Man and wife frequently separate and contract new relations. The fee for the marriage license required by the State of Mississippi is partially responsible for marriages in Indian fashion, but there are a number of Indians who have not accepted Christianity and who still prefer the old customs. Although the Christian Indians are well informed on Christian ideas concerning marriage, they now and then fall into the habits of their non-Christian relatives and friends. Apart from this, probably, as regards morals, the Mississippi Choctaws are superior to many Indian tribes and to many white people.

INDIANS ENGAGED IN FARMING.

The Mississippi Choctaws realize that they must earn their bread by the sweat of the brow. They seem willing to work, and there are certain things they can do particularly well. They are adepts with the shovel and ax and understand the growing of cotton; the women appear to be capable of doing well the work that women are accustomed to do. The chief fault of the men is that they too easily take a day off and permit trifles to interrupt them in their work. For this reason they are not successful as day laborers for concerns that require their employees to begin work at a certain hour and to put in a fixed number of hours a day and a fixed number of days per week.

For the work they are accustomed to do they receive very small compensation, and they are practically helpless in the event that their employer chooses to cheat them or to impose on them. This holds true in the growing of crops on shares; in fact, in everything they do. It is the white man who keeps the accounts and who dictates the settlements; and some white men are honest and some are not; and because of his nature and the conditions of society in which he lives, the Indian is practically without any redress and has no one to whom to appeal when he is browbeaten and cheated; hence he is practically a peon in the make-up of Mississippi society.

Whatever the Indian needs for farming must be supplied by the landlord and on the landlord's terms. If he could remain on his farm and work it properly; if he could be assured a square deal on the part of the landlord; and, finally, if he could break away from Indian custom so far as to refuse to divide with the improvident what he lays up over and above his needs of the moment, he could make a living and take care of himself. Usually, however, he has to neglect his farm, now and then, to get a day's labor somewhere in order to earn the necessary cash for a few days' actual living expenses, and such interruptions account largely for his failure to reap a normal harvest. Hence (a) he needs some one to stand between him and the unscrupulous employer; (b) he should receive aid from the Government for one or two years; and (c) means must be devised to educate him up to the point of ignoring such Indian customs as result in the indolent living off the thrift of the industrious.

LACK OF EDUCATIONAL FACILITIES.

As to education, most Mississippi Choctaws do not appear to have even the rudiments of an English education and yet, remarkable as it may seem, a great many can read and write the Choctaw language. All, without exception, speak the Choctaw language, and while a number of the older people speak English after a fashion and understand it for ordinary purposes, the majority, particularly the women, seem loath to make use of it—the result, no doubt, of bashfulness and a certain indolence, it being easier to use the language that comes to them naturally than to exert themselves to master the white man's speech.

As for schools, while it is true that they have not many opportunities in this regard, it is just as true that they fail to make use of the opportunities they have. The Mississippi Choctaws would not wish to send their children away from home to boarding schools and they do not send them regularly to the day schools. In the day school conducted by the Catholic Church at Tucker there is an enrollment of 40 and an average attendance of 10. It is a matter of note that in Oklahoma the removed Mississippi Choctaws are loath to send their children to boarding schools and are irregular in sending them to the day schools.

In fact, it is a question as to whether it would be advisable for these children to be educated in a boarding school. In the boarding school they would learn more and be better cared for, but they would become accustomed to conditions and to comforts they can never enjoy when they return home, and this would tend to make them dissatisfied and unfit them for life amid conditions they must necessarily face. Mississippi offers few or no opportunities for an educated Indian. Such an Indian probably could find no suitable employment of any kind. In Mississippi, if the Indian does not wish to associate with the negro (and experience proves that he does not) he must live exclusively with his own people. There are certain kinds of manual work open to him, but, generally speaking, it is on the farm that he must earn his daily bread.

BOARDING SCHOOL UNDESIRABLE.

Having talked this matter over very carefully with well-meaning people and with the older Indians, I advise strongly against the establishing of a boarding school for these people. If there are certain individuals found here and there who desire a higher education they can be sent to Carlisle or other similar schools and later they may be able to make use of their education somewhere in the North or West, or they might go back to their people as teachers. I am not prepared, however, to advocate a measure which, if it prove a success, must necessarily mean that the Indian will have to leave his native country (and the Choctaw is religiously attached to his native Mississippi) and become an exile among strangers.

As for attendance at day school, this should be compulsory if it be possible to make it so, but it should not be compulsory so long as the child and the parent are underfed and not comfortably clothed, and so long as parents at times really have need of the services of their children at home; so long, in fact, as the problem of supplying a half-starved people with sufficient food remains unsolved and adequate means for the conservation of their health are unprovided.

Everyone with whom I talked on the subject at once said that it would be folly to distribute cash payments among these Indians; that in two days every cent would be in the hands of the whites.

If the Indian were given land probably he would not be able to maintain his ownership of it unless trained to this by some sort of supervision. The question of taxpaying seems to have been the bane of the Mississippi Choctaw. An old Indian said to me that formerly he owned a number of horses, but that the white authorities took all his horses away from him and he found out afterwards this was done because the State had placed a tax on horses. I asked another Indian if he would like for the Government to give him a team of mules, and he said no, he would have to pay tax on the mules and he would lose

them, and, also, that the mules would have to be fed and this would be an additional expense to him. He thought he could make out better by farming with a hoe, because the hoe did not eat and would not be taxed.

RECOMMENDATIONS.

I am not prepared to advocate a reservation for these people, because the day of the reservation would seem to have passed. The reservation, in the course of time, would be broken up and allotted, and 25 or 30 years from now the Indians would be in the same condition they are at present. Under the circumstances, I think the best that can be done for them is to help them get on their feet and guide their steps until they can walk alone.

I therefore recommend—

1. A special agent for the Indians living within the boundaries of the State of Mississippi, with headquarters at Tucker or Stratton or Union, whose duty it will be to visit the Indians throughout the State, inquire into their needs, advise them, and stand between them and the rapacity of the white man. The agent should supervise their agreements with individual whites, procure employment for them, and see that they receive their wages.

2. A doctor, located at one of the above-mentioned places, who could be relied on to visit the Indians gratis in case of need. Medicines should be supplied gratis.

3. A field matron, located at one of the above-mentioned villages, to look after the sick, to visit the homes, and give advice to the women in all matters pertaining to cleanliness and health. The agent, doctor, and matron should be supplied with facilities for transportation.

4. Under the supervision of the agent the Indians should lease farming lands and the Government should supply them with implements, necessary stock, and means of subsistence for one or two years. The Indians should not be allowed to give away, sell, or mortgage anything that has been furnished them by the Government. They will need subsistence so that they can devote their entire attention to the growing of their crops. Probably at the beginning of the second or third year they may be able to sustain themselves and provide their own seed. Whenever it is feasible and advisable to do so, the agent should make arrangements for individuals to purchase, on easy yearly payments, the lands they occupy. Under his careful supervision the Indians might be able, in the course of time, to acquire title to the lands they occupy, and if they thus succeed in purchasing their lands it is possible that in the future they will understand how to meet the obligation of taxpaying.

5. As for schools, for the present the Government should assist the day schools that are now in operation and provide new ones in localities where a sufficient number of families is located. The agent and the field matron may devise some plan whereby the Indians will be induced to send their children to school regularly.

6. It would be good policy for the Government to establish an experimental farm near the center of Indian population.

7. It would be advisable, as a matter of economy, that a physician be appointed as the first special agent and the office of agent and physician united. It is not at all unlikely that, within a couple of years, an active, conscientious agent will be able to induce the majority of the scattered Indians to remove nearer the center of the Indian population. This would simplify the work and reduce expenses.

In conclusion, while the treatment the Indians of Mississippi have received at the hands of certain unscrupulous persons can not be too severely condemned, it is only just to say that many citizens of the State take a very kindly interest in the Choctaws, and but for the assistance that has been rendered them year after year by many white people the race long since would have perished entirely.

Respectfully submitted.

(Signed) W. H. KETCHAM,
Member Board of Indian Commissioners.

Approved for transmission December 15, 1917.

GEORGE VAUX, Jr., *Chairman.*

I may say that the only school for these Indians was established by a woman who has taken great interest in them. She has a number of them now at school. She has given her time and this whole work out of the goodness of her heart, and they are getting along well.

Mr. MADDEN. How much money would it take to do what the gentleman thinks ought to be done?

Mr. HARRISON of Mississippi. I discussed that question informally with the Indian Office, and we thought it best to put this item at $150,000.

Mr. MADDEN. Will it take that much each year?

Mr. HARRISON of Mississippi. I should not think it would take that much after awhile. To begin with, to lease some lands for them and start them out—it will take more than it will afterwards.

Mr. MADDEN. It seems to me that the Government can do no more charitable work than this, and it ought to be done.

Mr. HARRISON of Mississippi. I thank the gentleman.

Mr. MONDELL. These so-called Indians are citizens of the State of Mississippi?

Mr. HARRISON of Mississippi. Yes; they are citizens.

Mr. MONDELL. They always have been, and their fathers before them for many generations?

Mr. HARRISON of Mississippi. Oh, yes; the Choctaws of Oklahoma went from Mississippi to Oklahoma.

Mr. MONDELL. Are there any more poor folks down in Mississippi?

Mr. HARRISON of Mississippi. Yes.

Mr. MONDELL. Any who you think ought to be provided for by the National Treasury?

Mr. HARRISON of Mississippi. I am sure that the gentleman would not want to discriminate against the Indians of Mississippi in favor of the Indians of some other State?

Mr. MONDELL. No; but I think we had better make up our minds that at some time or other the Federal Government be relieved from the care of the citizens of the States, even though there may be a dilution of Indian blood in their veins.

Mr. VENABLE. Will the gentleman yield?

Mr. HARRISON of Mississippi. I yield to the gentleman.

The CHAIRMAN. The time of the gentleman has expired.

Mr. NORTON. Mr. Chairman, during the past five years I have heard a great deal on the floor of this House about the Indians in Mississippi. The very able, brilliant, and admirable gentleman from Mississippi [Mr. HARRISON], who has just spoken, has time and again elucidated the question to the House and has presented it in the most forceful, attractive, and convincing way that anyone could possibly present it.

Last spring I had the pleasure of visiting Mississippi and meeting a large number of the Indians in Mississippi, and comparing their condition with conditions of white and colored citizens in that State.

Mr. Chairman, there is a very great difference between giving a gratuity to the Indians in Mississippi, who have dwelt among civilized people for the last hundred years or more, and giving a gratuity to Indians in the Northwestern States, in Montana, in the Dakotas, and in Wyoming, who have but ceased to use the scalping knife and to travel the warpath within the last 30 years; who have held to all their tribal relations and customs up to within a very few years; and many of whom, up to within the last two decades, had not been touched by the influences of modern civilization or education.

I believe that the time is long past when the Government should extend a gratuity to the Indians in Mississippi. When I saw the Indians in Mississippi last spring they were in not much poorer condition than the average white man in that particular section of the State around Union, where they live. For the most part they were a great deal more prosperous and more successful than the average colored man in that section of the State.

I went to Mississippi without any prejudice against the Indians there, and, after hearing their case from themselves, I was forced to the conclusion that a great harm had been done to the Indians there by holding out to them the hope that some day the Great White Father at Washington would come down with a cornucopia filled to overflowing with food, clothing, silver, and gold, and all of the good things desired by the most vivid Indian imagination, and empty it into their hands; and by holding out to them the hope that there is no particular need for them to be frugal, saving, and building up permanent homes for themselves. I came to the conclusion that there had been a great harm done to the Indians there by those who have for years preached to them and encouraged them to believe that the Federal Government owes them some large amount of money, and that it is certain that this great amount of money will some day come to them from the Government, and that they can then recoup their fortunes and for the remainder of their lives live in contentment, happiness, luxury, and ease.

Mr. QUIN. Will the gentleman yield?

Mr. NORTON. Certainly.

Mr. QUIN. Does not the gentleman think that the Government does owe something to the Mississippi Choctaws?

Mr. NORTON. No; I do not think the Federal Government owes them a single nickel or a single cent.

Mr. VENABLE. Will the gentleman yield?

Mr. NORTON. Certainly.

Mr. VENABLE. What is the difference, if the gentleman will be kind enough to state, between giving gratuities out of the Treasury of the United States to the Indians all over the country because we have given them gratuities in the past and giving a different set of Indians a gratuity for the first time.

Mr. NORTON. I have just tried to make clear the difference. These Indians have lived among white people for more than a hundred years. They have been surrounded by and have been in touch with white people and with the influence of civilization for many generations. They have been independent and self-supporting for nearly a hundred years. I consider it a mighty poor policy for the Government to now take such a backward step as to begin to hand out gratuities through large or small appropriations to Indians such as these.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. NORTON. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. NORTON. On the other hand, I consider it a proper policy for the Government to take supervision of Indians who are in an uncivilized state and who have been within a very short time on the warpath, and to help them to understand the benefits of civilization and the white man's ways.

Mr. VENABLE. Does the gentleman mean to say that the Indians we are giving gratuities to every year are in an uncivilized state and have not been in contact with the white man and civilization for years and years?

Mr. NORTON. Most of them have not. I would say to the gentleman that as far as I know those to whom gratuities are now being given, except the sun-kissed, everglades-dwelling Indians of Florida, have not been in contact with white people and the influence of white civilization for but a very few years.

Mr. BRUMBAUGH. Mr. Chairman, will the gentleman yield?

Mr. NORTON. Has the gentleman from Mississippi [Mr. VENABLE] a further question?

Mr. VENABLE. That is a pure question of fact.

Mr. NORTON. Does the gentleman contradict it?

Mr. VENABLE. Yes; I do not think that is an accurate statement.

Mr. NORTON. Will the gentleman specify any Indians who are receiving gratuities and who are in any condition comparable with the Indians in Mississippi?

Mr. VENABLE. Are the Oklahoma Indians receiving gratuities?

Mr. NORTON. Some of them are; yes.

Mr. VENABLE. Have they not been in contact with civilization as long as the Mississippi Choctaws?

Mr. NORTON. No; I would not say they had been.

Mr. VENABLE. A great many of them came from there.

Mr. HARRISON of Mississippi. Let me ask the gentleman about the Turtle Mountain Band of Indians.

Mr. NORTON. They were on the warpath within the last 30 years. Outbreaks occurred among these Indians on the Turtle Mountain Indian Reservation within the last 30 years.

Mr. HARRISON of Mississippi. Are we not spending some money in educating those Indians?

Mr. NORTON. At the present time?

Mr. HARRISON of Mississippi. Yes.

Mr. NORTON. I think about $13,000 is appropriated for the agency there.

Mr. HARRISON of Mississippi. You have $32,600 here for the Indian school at Bismarck, N. Dak. Are not those Turtle Mountain Indians?

Mr. NORTON. No. They belong, for the most part, to the Standing Rock Indian Reservation. They belong to the Sioux Tribe of Indians.

Mr. HARRISON of Mississippi. How about the Fort Berthold Reservation?

Mr. NORTON. The Indians on that reservation belong to the Arikara, Gros Ventre, and Mandon Tribes.

Mr. HARRISON of Mississippi. Are they on the warpath?

Mr. NORTON. They are a very intelligent class of Indians, although they have not been under the influence of white civilization but for about 30 years.

Mr. VENABLE. Does the gentleman suggest that our Indians go on the warpath in order to qualify for relief?

Mr. NORTON. I would say if they had not been under the influence of white civilization but for a short time and were only semicivilized, to give them Federal Government assistance.

Mr. HARRISON of Mississippi. I admire the gentleman's candor, but does he not think that something ought to be done for those Indians in Mississippi?

Mr. NORTON. Yes; I think so.

The CHAIRMAN. The time of the gentleman from North Dakota has again expired.

Mr. NORTON. Mr. Chairman, I ask unanimous consent for two minutes more. Answering the question of the gentleman from Mississippi [Mr. HARRISON], I would say I believe that the Government and others should give these Indians to clearly understand that there is nothing due or coming to them from the Government, and that it is up to them to maintain and provide fully for themselves for all time in the future.

The CHAIRMAN. The time of the gentleman from North Dakota has again expired.

Mr. NORTON. Mr. Chairman, I ask for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BRUMBAUGH. Mr. Chairman, will the gentleman yield for a question?

Mr. NORTON. Certainly.

Mr. BRUMBAUGH. Does the gentleman not think it would be a splendid thing to give the Indians all over the United States to understand the very thing he says these Indians ought to be be given to understand, that in about 10 years from now this Government would withdraw gratuities and put it on them to enter the race of life and make their own living?

Mr. NORTON. I believe that the Government should withdraw gratuities just as rapidly as practicable. The sooner the Indians are placed on their own resources and required to depend upon themselves for their own support the better it will be for them, in the East, in the West, in the North, and in the South.

Mr. DUPRÉ. Are not the gentleman's remarks an incitement to the Indians to continue these uprisings, so that they may hereafter have the aid of the Government?

Mr. NORTON. The gentleman's deep sense of humor and his facetiousness may cause him to believe that.

Mr. DUPRÉ. I invite the attention of the House to the gentleman's argument.

Mr. FERRIS. Mr. Chairman, the gentleman from Mississippi [Mr. VENABLE] has just offered an amendment providing for the creation and establishment of a small Government agency to preside over and serve as a protectorate over some 1,100 Choctaw Indians living in Mississippi. This presents a new phase of it; it deserves attention.

The Choctaw question is not a new one in this House. It has been debated and voted upon many times. In a word, the contention of the Mississippi delegation has always been in the past that they were entitled to share in the funds of the Oklahoma Indians, although they refused to move west and take up residence with them, and still so refuse.

I have always opposed the adoption of the latter course and oppose it to-day. No one, either in law, equity, or good morals, I think, can justly advocate such a course.

More than 90 years ago the Choctaw Tribe of Indians resided in the State of Mississippi. They then owned approximately 15,000,000 acres of land in Mississippi.

By the treaty of 1820 they traded 4,000,000 acres of that land for what now comprises the Choctaw and Chickasaw Nation in the State of Oklahoma, an area in the treaty described by metes and bounds which originally comprised what was then the Indian Territory, now a part of Oklahoma. The treaty contained a provision which provided for the removal of the Choctaws from the State of Mississippi west, leaving 10,000,000 acres of their land behind in Mississippi.

Ten years later, in 1830, an additional treaty was entered into between the Choctaw Indians and the Federal Government, which treaty intended to more effectually carry out the provisions of the treaty of 1820, and which contains the fourteenth article, which has always been the bone of contention, and is and can be the only basis of the pretended claims of these Mississippi Indians to share in the estate of the Indians that moved west.

The total number of Choctaws in 1830 was 18,200. Of these, 15,000 removed as per the terms of the treaty, and approximately 4,000 of them remained behind in Mississippi, refusing to abide by the treaty. These 4,000 Indians that remained in Mississippi from 1830 to 1842 had the right to take up residence and be allotted land on the 10,000,000 acres in Mississippi, and, as fast as they could be identified, were allotted and given allotments from this land.

Only 143 families were induced to take lands from the 10,000,000 acres in Mississippi, while 3,885 for some cause refused to take allotments during the 12-year period. These 3,885 Indians who had refused to accept allotments were by the Federal Government later given land scrip to the amount of 640 acres for each and every head of the family, 320 acres for every child from 10 years of age, and 160 acres for every child under 10 years of age, one half to be delivered to them in Mississippi by the Federal Government and the other half after they removed from Mississippi to the then Indian Territory.

The records of the Indian Office show conclusively, without any question of doubt, that this scrip was actually delivered to them and that they actually received the benefits under it.

It can be had by consulting House Document 898, Sixty-second Congress, second session.

The last half, or remainder, of the scrip was capitalized at $1.25 per acre and paid to these Choctaw Indians in person by the Indian agent for the Federal Government. (See muster rolls of the Indian Office and vouchers, which show precisely that the Indians first received the land and, second, the money.) The total amount of money paid to the Indians was $872,000, which was in lieu of the last half of the scrip, which they had up to that time been unwilling to accept.

Thus it will be observed that these Indians have received more land and more money than the Indians who obeyed the treaties, removed west, and suffered the hardships and outrages committed by the wild western tribes of Indians who then lived upon the prairies.

In addition to this, four Secretaries of the Interior have held that they had no rights to the Indian estate in Oklahoma and that they had had their patrimony, had disposed of it, and were without any claim whatever upon the Oklahoma Indians. Four Secretaries of the Interior shared this view. The Dawes Com-

mission shared this view. The Federal courts in the Jack Amos case adopted this view. This House has four times passed on the matter by an affirmative vote, and each time denied that they had any rights. Both House and Senate Indian Committees have repeatedly passed on it, and always held they had no rights.

If there ever was a case of res adjudicata, this is one of them, and I assume that the Mississippi delegation have at last adopted the correct theory. However, in the face of all this, it is true that there are some 1,100 dependent Indians in the State of Mississippi without homes, without education, without employment, and without proper attention. To me there can be no great wrong in having the Federal Government, not as a matter of right but as a matter of charity, establish this agency, adopt the gentleman's amendment, and do for these dependent, helpless Indians what we are doing for other tribes in a similar condition in other States.

There will be good men who will disagree with me about this proposition, both in and out of the Congress of the United States, both on and off the Indian Committee, but for me and mine I have always felt that the Federal Government should not allow the original occupant of the land—I mean the American soil—to go in want, his own improvidence notwithstanding.

Mr. QUIN. Mr. Chairman, I appreciate very much what the gentleman from Oklahoma [Mr. FERRIS] had to say. His heart is in the right place and he has spoken to the point. He stated that the Government owes it to itself to protect these Indians down in Mississippi and Louisiana. In answer to the gentleman from North Dakota who said that the Government did not owe it to the Indians, I say the Government owes it to its self-respect, to the white citizenship who compose the great majority of the population of this Republic, at least, to grant this little request in the shape of this amendment relating to the penniless Indians of Mississippi.

The gentlemen have argued that because some Indians were on the warpath in the last 10, 15, 20, or 30 years it is justification for certain funds being contributed out of the Federal Treasury to them, and that the reason why the Mississippi Choctaws should not have any money out of the Treasury is because they have been surrounded by white people and civilization, and have been peaceful and dutiful citizens for all of these years. What process of ratiocination causes them to reach such a conclusion as that, because the Mississippi Choctaws have been good and peaceful citizens and peaceful Indians, they should not have anything out of the Treasury to compensate them for their patrimony which was taken from them many years ago?

I can not understand why the gentleman from Wyoming [Mr. MONDELL] or why the gentleman from North Dakota [Mr. NORTON] should have all these years had funds out of the Treasury to protect, and properly so, the Indians of that territory, and then, forsooth, when these Indians down in Mississippi call for a little bit of the rights which have been long deprived them, should object and set up these fabrications and excuses here why they should not have it.

The gentleman from Oklahoma [Mr. FERRIS], in a magnanimous spirit, having seen these Indians, and knowing what they have gone through, having in a measure observed the pennilessness and absolute poverty of them, their needs, and the ignorant condition in which they are, confesses the righteousness of this amendment.

Mr. MONDELL. Will the gentleman yield?

Mr. QUIN. I have not time to yield.

The gentleman knows that this relief is just, honest, and right. The chairman of this committee, the gentleman from Oklahoma [Mr. CARTER] even went down there on this commission and talked Choctaw with these Indians, and in response to my friend from Wyoming, who said they might have a fragment of Indian blood in their veins, I ask no better witness than the chairman of this committee, who has the honor of having some Indian blood in his veins, and who talked with these people down there in the Choctaw language. So that ought to be sufficient to relieve the gentleman from Wyoming——

Mr. MONDELL. Will the gentleman yield?

Mr. QUIN. I have not time right now. It seems to me the gentleman from Wyoming ought to appreciate the fact that the chairman of this committee would not have made the report back, and that that commission would not have made the report that they did make under the laws of this Congress unless the conditions warranted it.

Mr. MONDELL. Will the gentleman yield at that point?

Mr. QUIN. I will yield. [After a pause.] I will not proceed to yield to the gentleman any further when he requires so much of my time to ask me a question. It strikes me that out of their munificent hearts the gentleman from Wyoming and the other gentlemen on that side ought to support this measure. They ought to do the right thing by the poverty-stricken people that have been denied their rights all of these long years.

Mr. BORLAND. Mr. Chairman, the other day, after considerable debate here, the chairman of the Appropriations Committee defeated a measure providing for $50,000 appropriation for investigating into the subject of old-age pensions and other disabilities of poor white people among the 100,000,000 people of this country. Now, here is a proposition for $150,000, three times as much money, to be expended on about 1,000 Indians, or about $150 an Indian.

Now, when this matter has been fought over three or four times before in this House the gentleman from Mississippi, with his wonderful burning eloquence, almost convinced some of us that this money ought to be paid out of the tribal funds of the Oklahoma Indians, and the gentleman from Oklahoma, with his overpowering eloquence, has completely upset that opinion and convinced us that these Mississippi Choctaws did not have any claim, legal or equitable, on anybody; that they had long since severed their tribal relations, receiving their money under the Dancing Rabbit treaty, and became citizens of Mississippi 90 years ago, and that there was not a man left among them who had not been born a citizen of Mississippi. Now, the gentleman from Oklahoma completely convinced me of those facts. He also convinced me of the fact that there was not anybody back of this thing except a firm of grafting lawyers that had gotten a lot of powers of attorney from these Indians to prosecute some kind of a claim somewhere against somebody for some money. He even read the contracts and told the plot in detail.

Mr. FERRIS. Will the gentleman yield?

Mr. BORLAND. I can not yield, I am sorry to say. He even got up here and told in detail about the operations of this grafting firm of lawyers that he described in such burning language.

Now, the trouble with these gentlemen is that they protest too much. They protested both sides out of any possible case for these Choctaws.

Mr. VENABLE. Will the gentleman yield?

Mr. BORLAND. I can not yield to my eloquent friend. We find to-day that both of these gentlemen are here together demanding this appropriation. Why? They fought vigorously once, but the fight at that time was to take this money out of the Choctaw tribal funds; to-day both are banded together on the proposition of taking it out of the Federal Treasury—$150,000 they propose to saddle on the Government this year.

Mr. VENABLE. Mr. Chairman, will the gentleman permit a short question?

Mr. BORLAND. How much more that is going to lead to in the future nobody has discovered.

Mr. VENABLE. Will the gentleman yield?

Mr. BORLAND. No; I can not yield to my friend.

The CHAIRMAN. The gentleman declines to yield.

Mr. BORLAND. It is assumed that this money is going to be spent to civilize these Indians. They lived in Mississippi prior to 1830, because in 1830, under the Dancing Rabbit treaty, the large majority of the Choctaw Tribe were settled in Oklahoma, and those who did not go to Oklahoma received a gratuity in money. There is not a man among them living in Mississippi to-day who claimed to be a member of the Choctaw Tribe in 1830. Every one of these men was born a citizen of Mississippi, and for 90 years these Indians have lived as citizens of Mississippi. If they are not civilized now, what can the State of Mississippi do for people who live for 90 years in that vicinity? [Laughter.] Why, if they can not be civilized among the splendid influences of the State represented by my friend HARRISON and my friend VENABLE, how can they be civilized by a few agents sent down there from the department in Washington? [Laughter.] They have had the most magnificent opportunities for education that any of us have enjoyed, and yet they are coming in here and asking for an appropriation of $150,000 to civilize and educate them. The thing is absurd. The chairman of the Committee on Indian Affairs ought to make the point of order. I think the thing ought to be quickly killed. If he does not do it, it falls to the duty of some member of the Committee on Appropriations to make it, and I make it for that purpose.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. CARTER of Oklahoma rose.

The CHAIRMAN. Does the gentleman from Oklahoma desire to speak on the point of order?

Mr. CARTER of Oklahoma. Yes.

Mr. Chairman, I have no objection whatever to the gentlemen from Mississippi coming before the Committee on Indian Affairs with a bill and giving the bill proper consideration.

It was my privilege to make a visit to the State of Mississippi last year with our committee, and upon that visit we found several hundred Choctaws in Mississippi. They seemed to be getting along somewhat like the poorer class of white people do in most of the States. Perhaps some of them were in a little bit worse condition. They were intelligent and seemed to be a trustworthy class of people.

The Government has taken the position repeatedly in the past that it should not take any of the funds of the Choctaws and Chickasaws in Oklahoma and divide it among the Choctaws of Mississippi. The courts on two occasions have held the same thing. Two commissions have decided the matter, and three Secretaries of the Interior, and two Presidents of the United States, and Congress has on four different occasions settled that proposition.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. CARTER of Oklahoma. Yes; I yield.

Mr. MONDELL. What did your committee find to be the condition of those Indians compared with the colored people of that section?

Mr. CARTER of Oklahoma. We saw little of the colored people in the State of Mississippi.

Mr. MONDELL. You were in Mississippi and saw no colored people?

Mr. CARTER of Oklahoma. Not at the town of Union. I do not think we saw a dozen colored people at the town of Union while we were there, and that is the only place where we held an investigation.

Mr. SISSON. There are very few negroes where the Indians are down there.

Mr. CARTER of Oklahoma. I do not know what the condition of the negroes was. Perhaps the gentleman from Mississippi can tell you that. But the condition of these Indians was not in some instances just what a man would hope his condition to be. But be that as it may, Mr. Chairman, any measure contemplating the appropriation of $150,000 out of the Treasury ought to come before some committee of this House and have careful consideration.

I had hoped at first that I might withdraw this point of order and submit this matter to a vote, but upon consultation with some members of the Committee and some Members of the House it was thought better that the point of order should be made.

Mr. SISSON. Mr. Chairman, will the gentleman yield?

Mr. CARTER of Oklahoma. Yes.

Mr. SISSON. Will the gentleman withhold his point of order? I would like to make a statement about the matter. I do not know that I differ from the gentleman from Oklahoma at all.

Mr. CARTER of Oklahoma. I will yield to the gentleman to make a statement.

Mr. SISSON. Mr. Chairman, with the permission of the gentleman from Oklahoma [Mr. CARTER], I want to take the time to make just this statement: I am in entire sympathy with the proposition to pay the Mississippi Choctaws any fair sum of money. They occupy an entirely different relation to the Government from that of any other people. They are the wards of the Government, and while the Government on several occasions made an effort, as the gentleman in charge of this bill knows, to get the Mississippi Choctaws properly enrolled, so as to be carried to Oklahoma and given their lands in Oklahoma, yet here are the facts: The more intelligent of the Indians are the ones who would keep up with the course of events and know what was going on, and they were enrolled; but the unfortunate Indians who needed the guardianship of the Government the most in every case have been almost abandoned by the Government in Mississippi.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Yes.

Mr. MONDELL. I do not know what the gentleman meant when he referred to these Indians as being "wards of the Government." I have understood that for generations they have been citizens of the State of Mississippi. Surely no citizen of the State of Mississippi could be a ward of the United States Government.

Mr. SISSON. As a matter of fact they are wards of the Government; and the fact that the State of Mississippi, or any State, has given citizenship in the State to an individual who is a ward of the Government does not relieve the Government of the pledge it is under or of its treaty obligations to the individual. Now, I made an effort here on two occasions to get these 1,100 full-blooded Choctaws enrolled so that they might get their pro rata share of the funds arising from the lands of the Choctaws in Oklahoma, but the Representatives from the State of Oklahoma were unwilling that the rolls should be opened. I am not blaming the Representatives of the State of Oklahoma at all. But the result has been that between the opposition of the Oklahoma delegation and the condition in which the Choctaws find themselves, it is utterly impossible without legislation for the Government to do justice to these people. I want to appeal to the justice of every man here, and I believe that you men want to be just. I believe every Member of Congress desires to be just.

Practically none of these Indians are in my district—only a very few in the southern portion. Most of the Indians are in the district represented by my colleague [Mr. VENABLE], formerly represented by Mr. Bird. Now, if the Government is going to be just and fair to the Indians it must do one of two things. Either it must give to the Indians that to which they are entitled in the Choctaw Nation in Oklahoma, or, failing to do its duty to these unfortunate Indians, then, in order to carry out the contract that it made when it assumed control of the Indians, the Government should see to it that they at least get some land.

What I rose to say was this: I agree with the chairman of the committee that this money should be properly safeguarded, so that the head of each family may get 40 or 80 acres of land, and that the land should then be turned over to the Indians and held by them near enough together so that they can have their schools maintained by State taxation, but that the land should be inalienable for a certain number of years or generations, until these Indians can be properly educated to take care of themselves. For that reason I have no serious objection to the understanding that I feel we have with the Oklahoma delegation and with the chairman of the committee that the matter will be given consideration by the Committee on Indian Affairs, and that they will bring in a well-considered bill taking care of these Indians, to see that this money is properly invested, so that the Indians may be dealt with justly and fairly, and that is all we ask. [Applause.]

Mr. GANDY. Mr. Chairman, there is one statement in this discussion of the Mississippi Choctaw situation that I can not permit to go unchallenged. That is the linking of the dependency of the Choctaws of Mississippi with that of the Indians of North and South Dakota and other Northwestern States.

I was a member of the committee that visited Union, Miss., about 10 months ago. We did find Indians in real dependency, Indians in squalor and poverty, but Indians whose claim on the United States was long ago extinguished, except that obligation that this Government generally owes to its citizenship. It is true that this bill appropriates money for the civilization and support and care of the Indians of the Northwest, but I would remind you that those appropriations are made pursuant to certain agreements between this Government and those Indians of the Northwest when land was ceded by the Indians to the Government. If you will read the agreements and treaties that were made, you will be convinced that even yet, with all of the appropriations that have been made and the schools that have been provided, this Government has not carried out its agreements with the Indians of the Northwest in return for the great areas of land which were ceded by those Indians to the Government; so that the matter of dependency is not the same at all.

I agree with the gentleman from Mississippi [Mr. SISSON] that some provision at some time ought to be made as a general governmental proposition to take care of the conditions of distress that exist among the Choctaw Indians of Mississippi; but they are not on a par in any way with the Indians of the Northwest, who have given in lands, time and time over again, a return for every particle of support that has been meted out to them. [Applause.]

Mr. MONDELL. Mr. Chairman, I rise as a defender and champion of the original American, the real native American, the only man in the world who can beyond question call himself a true American—the man of Indian blood; and I would protect him and his children against those who would make him, to the end and limit of time, a professional and official pauper. [Applause.] Great heavens, is the time ever going to come when the red man, becoming a citizen, caring for himself, with independent thought and feeling, is to be safe from these misguided friends of his who would drag him from a splendid station of independent, self-supporting citizenship to chain him to the miserable condition of a ward and dependent of the Federal Government? A century ago, nearly, certain red men in Mississippi made their choice, decided their status, and for generations they have been citizens of that great State. If I were a citizen of Mississippi I should resent the thought or suggestion that men who had thus been citizens of my State with all of its magnificent opportunities and advantages for nigh a century were in such a condition that it was necessary to unload them on the doubtful charity of the Federal Government.

Is the time ever going to come when a red man, having separated himself from the public crib and become an independent, self-respecting citizen, is to be safe from those who would hunt

him out from the Everglades of Florida, the mountains of California, and the fertile lands of Mississippi, and drag him back to a state of dependency and perpetual pauperism? Those who propose these things are not the friends of the Indian; they are not the friends of their country.

We have Indians in our country. We bought great estates from them, and they are being paid for those estates and assisted to become self-supporting; but I hope the time will never come when I shall be tempted to advocate that any of these men after they have separated themselves from the Government tutelage, ceased to be wards, shall again become the objects of Federal appropriations.

The great State of Mississippi, if she has men of white blood or black or red who are not progressing as they should, citizens of her communities for a century, it is the duty of that great State to make such provision for such citizens as may be necessary or for their good, and if the goodly influence of Christian enlightenment and intelligence in Mississippi, the association and example of their fellow citizens, can not bring these men to a self-supporting, self-respecting, and self-sustaining condition, the charity of the Federal Government and the doubtful benefactions of Federal agents will never accomplish it, never so long as time runs. [Applause.]

Mr. HARRISON of Mississippi. Mr. Chairman, I ask for five minutes.

Mr. STAFFORD. I would like to ask the chairman of the committee if he has any intention as to when the committee will rise?

Mr. CARTER of Oklahoma. I have had no understanding, but I expect to make a point of order on this matter as soon as the gentleman from Mississippi consumes his five minutes.

Mr. HARRISON of Mississippi. Mr. Chairman, I did not think of speaking again upon this matter, but I am surprised at the gentleman from Wyoming [Mr. MONDELL]. When I look through this bill I see that Wyoming has more appropriations given to the Indians in that State out of the Federal Treasury than any other State except Oklahoma. I see appropriations for the support and civilization of this tribe and that tribe, and not only that, but for the education of tribe after tribe in that State, and then they appropriate money to irrigate the lands of that State. Now, the people of my State have been good to these Indians. They have taken care of them when the Federal Government refused to do it.

Mr. VENABLE. Will the gentleman yield?

Mr. HARRISON of Mississippi. Yes.

Mr. VENABLE. Is it the gentleman's understanding that the position of the gentleman from Wyoming [Mr. MONDELL] is that he wants all the appropriations for Indians in his State withdrawn in order that the Indians in his State may enjoy full, free citizenship?

Mr. HARRISON of Mississippi. That would seem to be the result of his argument. Now, in 1830 a solemn agreement was entered into between the Mississippi Choctaws and the Government that if these Indians wanted to remain in Mississippi they could do so and not lose any rights as Mississippi Choctaws, but it was the commissioners that went from this Government there and perpetrated fraud after fraud on the Indians which prevented them from a proper enrollment and securing their rights under the treaty.

Mr. MONDELL. Will the gentleman yield?

Mr. HARRISON of Mississippi. Yes.

Mr. MONDELL. If the Government owes the Mississippi Choctaws or any other Indians or white men or black men anything, the Government ought to pay. What I protest against is the pauperizing of men by bringing them under Federal control.

Mr. HARRISON of Mississippi. I understand the gentleman; the gentleman objects to pauperizing the Indians in other States after the Government has pauperized the Indians in his State time after time.

Mr. MONDELL. Let me correct the gentleman. No Indian in my State has ever secured anything from the Federal Government for many years except as he has received it out of his fund, except we are carrying items for his education in this general western country.

Mr. HARRISON of Mississippi. Mr. Chairman, in 1898 this Congress passed a law at the instance of the Dawes Commission that went to Oklahoma in respect to the rights of these Mississippi Choctaws, in which it was provided that a commission should be appointed to go to Mississippi and identify every Mississippi Choctaw. They identified about 2,500 of them, full blood Mississippi Choctaw Indians, and 1,100 of those men who thought they had every right under the law are to-day kept from those rolls and denied their legal and just rights. They have rights under law and equity, and I submit that they should be permitted to share in the funds of the Choctaw Tribe. I have never thought that the Treasury of the United States ought to pay the money to them, that it ought to come out of the tribe; but this House has voted me down time after time. I tried to impress that on the House. I remember that the leader of the minority in the last discussion of this proposition told the committee that if they voted down my amendment, the time would come when the Treasury of the United States would have to respond to the Mississippi Choctaws.

Mr. MONDELL. Does the gentleman know why the leader on this side said that? He realized the persistence and the persuasive powers of the gentleman from Mississippi. He did not believe it was proper.

Mr. HARRISON of Mississippi. I will be glad now to see the House appropriate the money out of the tribal funds rather than out of the Treasury, and I dare say the gentlemen will vote a little later on for $200 per capita payment to these Indians in Oklahoma, when our Indians will not get one cent. Let me refer to the fact that a case was tried in 1872, the Choctaw Nation versus The United States, wherein the Indians of Oklahoma sued the United States for rights that the Indians in Mississippi had for injuries and outrages committed on them and obtained judgment in the Supreme Court of the United States for $8,000,000, and that went to the Oklahoma Choctaws. Not one cent to the Mississippi Choctaws for injuries committed, but to the Choctaws in Oklahoma. I submit that they have rights that should be given them by the Congress, that the people of Mississippi have treated them fairly, and that they should not be discriminated against.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. CARTER of Oklahoma. Mr. Chairman, I insist upon the point of order.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

MONTANA.

SEC. 9. For support and civilization of the Indians at Fort Belknap Agency, Mont., including pay of employees, $20,000.

Mr. HARRISON of Mississippi. Mr. Chairman, I want to say that I realize that this item for the support and civilization of the Indians at Fort Belknap Agency, Mont., is subject to a point of order. The next item is subject to the point of order, and there are at least a hundred items in the bill that are subject to the point of order, but we are going to deal with our friends and their friends a little more justly than they have been dealing with us and are not going to make the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For continuing construction of the irrigation systems on the Flathead Indian Reservation in Montana, $750,000 (reimbursable), which shall be immediately available and remain available until expended.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. CARTER of Oklahoma. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 8696, the Indian appropriation bill, and had come to no resolution thereon.

COAL AND ASPHALT DEPOSITS, CHOCTAW AND CHICKASAW NATIONS.

Mr. CARTER of Oklahoma. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

House concurrent resolution 34.

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H. R. 195) entitled "An act providing for the sale of coal and asphalt deposits in the segregated mineral lands in the Choctaw and Chickasaw Nations, Okla.," the Clerk be, and he is hereby, authorized and directed to strike out the word "applied," on page 5, line 13, and insert in lieu thereof the word "apply."

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER. The question is on agreeing to the concurrent resolution.

The resolution was agreed to.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 29 minutes p. m.) the House adjourned until to-morrow, Tuesday, January 22, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Navy submitting a supplemental estimate of appropriation required by the Navy Department to complete the purchase of land for the naval operating base, Hampton Roads, Va., for the fiscal year 1918 (H. Doc. No. 843); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of Agriculture submitting a supplemental estimate of appropriation required for the Department of Agriculture for the fiscal year 1919 (H. Doc. No. 844); to the Committee on Agriculture and ordered to be printed.

3. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Interior submitting a proposed clause of legislation for inclusion in the urgent deficiency bill (H. Doc. No. 845); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Public Printer submitting supplemental estimates of appropriation required by the Public Printer for the fiscal year 1918 (H. Doc. No. 846); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Secretary of the Navy, transmitting tentative draft of a bill to increase temporarily the enlisted strength of the Navy, and for other purposes (H. Doc. No. 847); to the Committee on Naval Affairs and ordered to be printed.

6. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Red River, and its tributaries in Texas, Arkansas, Oklahoma, and Louisiana with a view to devising plans for flood protection and determining the extent to which the United States should cooperate with the States (H. Doc. No. 848); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

7. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Petaluma Creek, Cal. (H. Doc. No. 849); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. HAWLEY: A bill (H. R. 9047) authorizing the Coos Bay, Umpqua, and Siuslaw Tribes of Indians, in the State of Oregon, to submit claims to the Court of Claims; to the Committee on Claims.

Also, a bill (H. R. 9048) authorizing and directing the Postmaster General to prepare cancellation stamps for certain post offices; to the Committee on the Post Office and Post Roads.

By Mr. GILLETT: A bill (H. R. 9049) to regulate the sale of gasoline; to the Committee on the Judiciary.

By Mr. STEPHENS of Mississippi: A bill (H. R. 9050) to authorize the Secretary of War to grant furloughs without pay and allowance to enlisted men of the Army of the United States, and for other purposes; to the Committee on Military Affairs.

By Mr. HAWLEY: A bill (H. R. 9051) authorizing the Secretary of the Interior to pay and to distribute the balance now in the Treasury to the credit of the Alsea and other Indians on the Siletz Reservation; to the Committee on Indian Affairs.

By Mr. GANDY: A bill (H. R. 9052) to provide that service in the Mexican border service, in the precautionary-measures service, and in the present war prior to the date of the proclamation of the President drafting National Guard into the Federal service by officers of the National Guard shall be counted in determining relative rank as between commissioned officers in the Army of the United States; to the Committee on Military Affairs.

By Mr. RAKER: A bill (H. R. 9053) to survey, acquire, construct, and maintain a system of national defense and military highways and post roads in the States of Washington, Oregon, and California, to protect the Pacific coast of the United States from invasion by any alien enemy with laterals, and for other purposes; to the Committee on Military Affairs.

By Mr. LEVER: A bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919; committed to the Committee of the Whole House on the state of the Union and ordered to be printed.

By Mr. MORGAN: A bill (H. R. 9055) authorizing the Ponca Tribe of Indians, residing in Oklahoma and Nebraska, to submit claims to the Court of Claims; to the Committee on Indian Affairs.

By Mr. CARY: A joint resolution (H. J. Res. 220) for the purpose of promoting efficiency, for the utilization of the resources and the water power of the United States, for lessening the expenses of the war, for the saving of fuel and providing for the employment of the power of the Great Falls of the Potomac River above Washington, D. C., and to make possible the utilization thereof; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 9056) granting an increase of pension to Lewis C. Crowl; to the Committee on Invalid Pensions.

By Mr. VENABLE: A bill (H. R. 9057) granting an increase of pension to James E. Upham; to the Committee on Invalid Pensions.

By Mr. BROWNE: A bill (H. R. 9058) granting an increase of pension to Austin A. Bierce; to the Committee on Invalid Pensions.

By Mr. CANNON: A bill (H. R. 9059) granting an increase of pension to George Tanner; to the Committee on Invalid Pensions.

By Mr. CARY: A bill (H. R. 9060) granting a pension to John Iverson; to the Committee on Pensions.

By Mr. CLASSON: A bill (H. R. 9061) for the relief of Jonas Archiquette; to the Committee on Claims.

By Mr. CURRY of California: A bill (H. R. 9062) granting a pension to James Gould; to the Committee on Pensions.

By Mr. DILLON: A bill (H. R. 9063) granting an increase of pension to Thomas McAndrews; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 9064) granting an increase of pension to Melville C. Sullivan; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: A bill (H. R. 9065) granting an increase of pension to Sarah J. Creighton; to the Committee on Invalid Pensions.

By Mr. JACOWAY: A bill (H. R. 9066) for the relief of Marion H. Henderson; to the Committee on Claims.

By Mr. KRAUS: A bill (H. R. 9067) granting an increase of pension to Paul L. Bahr; to the Committee on Pensions.

Also, a bill (H. R. 9068) granting a pension to Guido Geiser; to the Committee on Pensions.

Also, a bill (H. R. 9069) granting authority, on certain conditions, to the Secretary of the Navy to reinstate Armour Simpson Heffley in the Marine Corps; to the Committee on Naval Affairs.

By Mr. LITTLEPAGE: A bill (H. R. 9070) granting an increase of pension to Charles A. Young; to the Committee on Invalid Pensions.

By Mr. McCULLOCH: A bill (H. R. 9071) to correct the military record of Adam B. Ackerman; to the Committee on Military Affairs.

Also, a bill (H. R. 9072) to correct the military record of William Mullally, and for an honorable discharge, and to remove the charge of desertion; to the Committee on Military Affairs.

By Mr. NICHOLS of Michigan: A bill (H. R. 9073) granting an increase of pension to E. Anna McGrath; to the Committee on Pensions.

Also, a bill (H. R. 9074) granting a pension to John A. Falvey; to the Committee on Pensions.

By Mr. REED: A bill (H. R. 9075) granting a pension to Arzanna Nesbitt; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9076) granting an increase of pension to John M. Pearson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9077) for the relief of Rufus J. Hoke; to the Committee on Military Affairs.

By Mr. SHOUSE: A bill (H. R. 9078) granting a pension to Maggie A. Skinner; to the Committee on Invalid Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 9079) for the relief of Jabez Lumbert; to the Committee on Military Affairs.

By Mr. STEPHENS of Nebraska: A bill (H. R. 9080) granting an increase of pension to George D. Mayes; to the Committee on Pensions.

Also, a bill (H. R. 9081) granting an increase of pension to Eugene B. Justice; to the Committee on Pensions.

Also, a bill (H. R. 9082) granting a pension to Mary Hamilton; to the Committee on Pensions.

Also, a bill (H. R. 9083) granting a pension to William Wilson; to the Committee on Pensions.

Also, a bill (H. R. 9084) granting a pension to Harry N. Gates; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9085) to grant a gold medal to Burlington Cunningham for conspicuous bravery; to the Committee on Military Affairs.

By Mr. VENABLE: A bill (H. R. 9086) granting an increase of pension to Peter L. Chapman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9087) granting an increase of pension to W. R. Tingley; to the Committee on Invalid Pensions.

By Mr. WILLIAMS: A bill (H. R. 9088) granting an increase of pension to John P. Belt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9089) granting an increase of pension to John W. Harvey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9090) granting an increase of pension to Jesse M. Reed; to the Committee on Pensions.

Also, a bill (H. R. 9091) granting a pension to Thomas J. Krutsinger; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CARY: Resolution of the Federal Employees' Union, No. 2, protesting against the proposed repeal of the act of August 24, 1912, giving employees of the Postal Department the right to organize unions in affiliation with other like organizations; to the Committee on the Post Office and Post Roads.

Also, petition of I. T. Cross, Seattle, Wash., asking for an increase of pensions to those veterans of the Civil War not in Soldiers' Homes to $50 per month; to the Committee on Invalid Pensions.

Also, petition of G. T. Vermillion and Bruce Whitney, of Milwaukee, Wis., objecting to the wording of the section of the war-revenue bill relating to insurance, and suggesting an amendment; to the Committee on Ways and Means.

Also, petition of R. N. Hickman desiring a bill passed allowing him the right to operate motor omnibuses over certain streets and highways in the District of Columbia; to the Committee on the District of Columbia.

By Mr. CLARK of Pennsylvania: Petition of John Walsh, James Bennett, Lester Shannon, and 19 other citizens of Erie, Pa., praying for the passage of H. R. 7995, for the preservation of the *Niagara*, Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. CURRY of California: Resolution of the consolidated Chamber of Commerce of Sacramento, Cal., denouncing disloyalty to the United States and sabotage; to the Committee on the Judiciary.

Also, resolution of the Napa County (Cal.) Farm Bureau, regarding the importation of and protesting against Chinese coolie farm labor in the United States; to the Committee on Immigration and Naturalization.

By Mr. ESCH: Resolution of the National Council of the Sons and Daughters of Liberty, favoring House bill 5667, to provide for the deportation of certain aliens, and for other purposes; to the Committee on Immigration and Naturalization.

Also, resolution of the Farmers' Education and Cooperative Union of America, adopted at its annual meeting at Jonesboro, Ark., protesting against any form of universal military training; to the Committee on Military Affairs.

Also, resolution of the board of representatives of Federal Employees' Union No. 2, protesting against the repeal of the law giving postal employees the right to organize; to the Committee on the Post Office and Post Roads.

Also, resolution of the faculty of the University of Wisconsin, pledging unswerving and enthusiastic support to President Wilson's program for securing world peace and for establishing the rights of nations, great and small; to the Committee on Foreign Affairs.

By Mr. HILLIARD: Petitions of Louis A. Zeitlin and nine others, all of Denver, Colo., urging the passage of the Keating bill granting increases of pay to Government employees; to the Committee on Appropriations.

Also, memorial of the Denver Trades and Labor Assembly, of Denver, Colo., opposing legislation removing restrictions from the employment of child labor; to the Committee on Labor.

By Mr. STINESS: Petition of the Rotary Club of Providence, R. I., favoring the Chamberlain universal military service bill; to the Committee on Military Affairs.

By Mr. TIMBERLAKE: Resolution adopted by the United Presbyterian Church at Fort Morgan, Colo., protesting against the increase of postal rates on periodicals; to the Committee on Ways and Means.

By Mr. VARE: Petition of members of Federal Employees Union in Bureau of Animal Industry, Philadelphia, Pa., supporting the Keating bill for increase of salaries; to the Committee on Appropriations.

By Mr. YOUNG of North Dakota: Resolution of the campaign and financial appeals committee of Minot, N. Dak., recommending that the recreation of the men in camps and cantonments be placed under military control and that the mental and moral needs of the men be as carefully looked after as the physical; to the Committee on Military Affairs.

HOUSE OF REPRESENTATIVES.

TUESDAY, *January 22, 1918.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Father of life and light and love; Dispenser of every good gift; let Thy blessing descend upon us, to clarify our minds, mellow our hearts and make us strong for the duties before us.

That we may control our passions, especially that unruly member, the tongue; that we give no offense to our brethren, striving to do unto others, as we would be done by; that we may possess our souls in patience and in peace. In the Spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

WITHDRAWAL OF PAPERS.

By unanimous consent, Mr. STEVENSON was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of House bill 11188, Sixty-fourth Congress, for the relief of heirs of J. H. and Angie Taylor, no adverse report having been made thereon.

CHANGE OF REFERENCE.

Mr. SULZER. Mr. Speaker, House bill 8419, introduced January 7, providing for the extension of the provisions and benefits of the Federal farm-loan act to the Territory of Alaska, was referred to the Committee on Territories. Agreeable to the chairman of that committee, I ask unanimous consent that this bill be rereferred to the Committee on Banking and Currency.

The SPEAKER. What is it about?

Mr. SULZER. It provides for the extension of the Federal farm-loan act to the Territory of Alaska.

The SPEAKER. Without objection, it will be so rereferred.

There was no objection.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696, the Indian appropriation bill.

Mr. LONDON. Mr. Speaker, I make the point of order—I was on my feet to make the point of order——

The SPEAKER. There is no earthly objection to the gentleman making the point of order. What has the gentleman to say?

Mr. LONDON. I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present, and there is none. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll. The question is on the House going into the Committee of the Whole House on the state of the Union.

The question was taken; and there were—yeas 344, nays 0, not voting 83, as follows:

YEAS—344.

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. DOREMUS with Mr. CANNON.

Mr. DALE of New York with Mr. GLYNN.

Mr. SCULLY with Mr. ZIHLMAN.

Mr. GARRETT of Texas with Mr. CRAGO.

Mr. EGAN with Mr. GRAY of New Jersey.

Mr. MAHER with Mr. CURRIE of Michigan.

Mr. HUMPHREYS with Mr. LONGWORTH.

Mr. BUCHANAN with Mr. WOODYARD.

Mr. GALLIVAN with Mr. PARKER of New York.

Mr. PRICE with Mr. WOOD of Indiana.

Mr. DOOLING with Mr. MCCORMICK.

Mr. RAGSDALE with Mr. HASKELL.

Mr. EVANS with Mr. DALE of Vermont.

Mr. HAMILL with Mr. RAMSEY.

Mr. RIORDAN with Mr. COSTELLO.

Mr. HOLLAND with Mr. GARLAND.

Mr. GANDY with Mr. ROWLAND.

Mr. THOMAS F. SMITH with Mr. DAVIDSON.

Mr. SABATH with Mr. VARE.

Mr. CHURCH with Mr. GOULD.

Mr. SANDERS of Louisiana with Mr. SANDERS of New York.

Mr. GREGG with Mr. SWIFT.

Mr. SULLIVAN with Mr. ANTHONY.

Mr. CARLIN with Mr. GRIEST.

Mr. O'SHAUNESSY with Mr. PAIGE.

Mr. HOWARD with Mr. GRAHAM of Pennsylvania.

Mr. KEY of Ohio with Mr. MUDD.

Mr. TAGUE with Mr. CURRY of California.

Mr. ESTOPINAL with Mr. KIESS of Pennsylvania.

Mr. NEELY with Mr. FRANCIS.

Mr. GODWIN of North Carolina with Mr. MILLER of Washington.

Mr. LEVER with Mr. DEMPSEY.

Mr. HOOD with Mr. MEEKER.

Mr. OLNEY with Mr. TEMPLETON.

Mr. FLYNN with Mr. DRUKKER.

Mr. VAN DYKE with Mr. NICHOLS of Michigan.

Mr. WILSON of Louisiana with Mr. WINSLOW.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696, the Indian appropriation bill, with Mr. GARNER in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 8696, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 8696) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1919.

The CHAIRMAN. The recollection of the Chair is that at the time the committee rose yesterday a point of order had been reserved against the paragraph from lines 7 to 10, on page 29.

Mr. CARTER of Oklahoma. That is correct.

The CHAIRMAN. The gentleman from Wisconsin reserved the point of order.

Mr. STAFFORD. Mr. Chairman, this, I believe, is the largest appropriation that is carried in this bill to provide for construction work on an irrigation system. Seven hundred and fifty thousand dollars is appropriated to provide for the continuation of the construction work there. The hearings disclose that up to the present time, I believe, $2,500,000 has been expended on this project, and that from the estimates $3,500,000 will be required before it will be completed. I wish to inquire what is the status as to the condition of this project other than that which may be arrived at by comparing the amount that has heretofore been expended with the amount that is estimated will be required in the future, and how much of the land is under cultivation as a result of the $2,500,000 that has been appropriated in the past, and how much additional land will be cultivated when this $750,000, which we are now appropriating, will be exhausted?

Mr. HAYDEN. The area of irrigable land under the completed project will be 152,000 acres. The area of land under constructed works at the present time is 63,000 acres. The area actually irrigated is 5,000 acres.

Mr. STAFFORD. Why is there such a small portion of the land that is capable of irrigation that is actually being cultivated?

Mr. HAYDEN. The Indians who live on this project were not originally engaged in agriculture. They were hunters and stockmen and not accustomed to irrigation. For that reason it has taken more time to induce them to become farmers than in the case of the Indians who reside in the Southwestern part of the United States.

Mr. STAFFORD. Is this rather such an experiment as we had illustrated in Wisconsin, which I referred to yesterday, where the Government spent $2,000,000 of the trust fund of the Menominee Indians in the endeavor to get the Indians to work.

Mr. HAYDEN. The Indian Office is now adopting a policy that where allotments are made and the Indians are not ready or willing to go upon the lands thus given to them that such allotments are leased to anyone who cares to rent the land.

am informed by the Indian Office that there is now a great demand for land under the Montana projects. The commissioner states that he is very confident that all the land under constructed works capable of irrigation will be put in cultivation in the near future. This is due to the great increase in the price of grain and other foodstuffs that can be grown in Montana. I am satisfied that under the improved conditions a very much larger area will be placed in cultivation under this and the other Montana projects than has ever been irrigated heretofore.

Miss RANKIN. Will the gentleman from Wisconsin yield?

Mr. STAFFORD. Certainly; I will yield to the lady from Montana.

Miss RANKIN. I wish to state that one of the reasons why such a large amount is appropriated and such a small amount of water has been used on the land is because a great amount of money was required for initial construction, and the money appropriated in this bill is for laterals which will irrigate more land. The farmers in that district have been under the impression that they could raise crops without irrigation. Last year proved it would be better to have irrigation if they raised such crops as sugar beets, fruits, and so forth. And another reason is that they have not had the capital to pay for the water. Every year more water is being used, and undoubtedly very much more will be used next year than has been used in the past.

Mr. STAFFORD. Will the lady yield? As I understand, there is some irrigated land available for cultivation that has not been utilized?

Miss RANKIN. It has been utilized, but without irrigation. They have used dry-land methods in farming these lands.

Mr. STAFFORD. If there are large acreages available at the present time without the expenditure of this $750,000 additional, which, as the lady states, is for the construction of laterals, what is the present need for this appropriation, when we should not expend such large amounts unless absolutely necessary?

Miss RANKIN. Because the crops were an entire failure last year by reason of the fact that they did not use irrigation, and it is proven that they can not raise certain crops every year unless they have irrigation.

Mr. STAFFORD. The lady does not grasp the direct point I am trying to seek information upon, and that is whether there is sufficient land now capable of irrigation——

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. STAFFORD. Capable of irrigation, that could be utilized next year without the expenditure of this $750,000?

Miss RANKIN. The $750,000 is merely a part of the amount which will have to be appropriated before the entire project is completed, unless the initial investment is wasted. This project was planned on a large scale, and in order to complete it we will have to appropriate each year the necessary amount to continue the work or the entire expenditure will be wasted.

Mr. STAFFORD. Will the lady kindly elaborate on the idea as to the reason why the prior appropriations will be wasted if this $750,000 is not appropriated this year?

Miss RANKIN. The project, of course, will have to be completed. Otherwise you will have such a large part of the project under construction that is not finished and, therefore, can not be used.

Mr. STAFFORD. I presume that the lady from Montana is personally acquainted with this project. I wish to inquire whether there are many Indians working this land at the present time?

Miss RANKIN. There are a great many more white people than Indians, but the Indians are working these lands. The Indian funds will be reimbursed when the farmers pay for the water, and the sooner the water is put on the land and used the quicker the Government will be reimbursed for this expenditure.

Mr. STAFFORD. Then I assume from the statement of the lady from Montana that this is virtually an appropriation for the benefit of the whites of Montana and of other States coming there rather than for the benefit of the Indians?

Miss RANKIN. There are 2,400 Indians there. About 800 have been allotted and the others are probably minors. The allotted Indians are working their land or leasing it. All that the white men do on the land will help the Indians, for improvements on one farm tend to increase the value of all the farms in the community. By using the water from this project the white men will hasten the time when this money will be returned to the Indian funds.

Mr. STAFFORD. How much of the $2,500,000 that has heretofore been appropriated and expended on this project has been returned to the Indian fund up to the present time?

Miss RANKIN. Practically none up to this time.

Mr. STAFFORD. We have been appropriating annually on an average for several years past $750,000. The lady says that the prior $2,500,000 will be wasted unless we continue to appropriate this $750,000, yet none of the funds is being returned to the Indian fund, even though we keep on appropriating yearly this large amount of $750,000.

Mr. HAYDEN. Mr. Chairman, the lady from Montana is correct in her statement that this project should be promptly completed. There is no use wasting time and money by dawdling along in the construction of these projects. We tried that for a couple of years, and cut the appropriation down to $200,000 or $300,000, and the funds were largely consumed by overhead charges. We made an appropriation last year of $750,000, and agreed that we would make that sum continuous until the entire project was completed. It will take three or four years more to complete it.

Mr. STAFFORD. Notwithstanding the fact that there is sufficient irrigated land on the project to-day that has not been utilized?

Mr. HAYDEN. Reservoirs, diversion dams, and main canals must first be built, but the construction must proceed until the water is actually brought to the land before any kind of a crop can be grown.

Now, Mr. Chairman, I want to read a letter written by Mr. EVANS, the Congressman from Montana, on this very subject. It is very brief:

MY DEAR COLLEAGUE: For the past 8 or 10 years the Government has been engaged in the construction of irrigation projects on three Indian reservation in the State of Montana, namely, the Flathead, the Blackfeet, and Fort Peck Reservations. The appropriations for this work have annually been carried in the Indian appropriation bill made on the recommendations of the Secretary of the Interior.

I am interested in all these items, but especially for the Flathead project. There is no more meritorious project in America.

I hope the gentleman from Wisconsin will give me his attention. I am reading this letter for his benefit.

Mr. STAFFORD. I am giving the gentleman as close attenton as I gave to the lady from Montana.

Mr. NORTON. The gentleman from Montana states that there is not a more meritorious project than the Flathead project. Let me interpolate right here this fact, so far as the Indians are concerned: If it is intended to be for the benefit——

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. HAYDEN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Arizona asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. NORTON. Now, will the gentleman yield?

Mr. HAYDEN. Yes.

Mr. NORTON. Last year on this reservation 27 Indians were employed in irrigation. That was the amount of farming done by the Indians. And you will observe that that report has not been made in our hearings by the department or by the Bureau of Indian Affairs on this project as it has been made on other irrigation projects in Arizona and Wyoming and other States. That has been left out. That is the acreage used by the Indians. You will find in the commissioner's report that it states 969 acres were used last year.

Mr. HAYDEN. I gave the gentleman the reason for that a moment ago.

Mr. NORTON. It is also stated that the value of the crops raised by the Indians is $15,223. Now, this project clearly is not so much an Indian project as it is a white man's project

Mr. HAYDEN. It is conceded that the lands to be irrigated under the project belong to both the white men and the Indians.

Mr. NORTON. Fifty thousand acres do not belong to the Indians at all.

Mr. HAYDEN. Let me go on with this letter from the gentleman from Montana [Mr. EVANS], who is confined to his home to-day by illness:

There is not a more meritorious project in America. The Government has expended approximately $3,000,000 on this project, and it will take about $3,000,000 to complete it. The Secretary of the Interior last year recommended the appropriation of $750,000, which was agreed to by both the House and Senate.

Ten thousand people are now on this land awaiting the completion of the project. The moneys are reimbursable, and the people on the land are willing to pay the price for the water. So in the end the Government will be at no expense in connection with the same.

The project is now about one-half constructed and should be entirely completed without unreasonable delay. So, under the circumstances, I ask when this matter comes before the House that you give it your support.

Very sincerely,

(Signed) J. M. EVANS.

Mr. STAFFORD. Will the gentleman explain when the Indian funds or the Government funds are going to be replenished as the result of these large appropriations yearly for this project, from which up to the present time nothing has been returned, when there are thousands of acres available for irrigation?

Mr. HAYDEN. The cost of the irrigation works chargeable to the Indians, under the terms of the general law, becomes a lien upon their lands. Whenever the trust period expires and the Indians sell the land, the money due to the United States must be repaid. With respect to the lands of the white men, the construction charge must be paid upon the same terms as under the ordinary reclamation project elsewhere, which is in 20 annual payments.

Mr. STAFFORD. As I understand from the explanation of the gentleman from Arizona, supplemented by that of the lady from Montana, this $750,000 is to be employed in building laterals to make utilizable additional land on the reservation?

Mr. HAYDEN. Yes; and the Commissioner of Indian Affairs says it is his purpose and confident expectation that in the coming season a large area of this land will be placed in crop. Much new planting is to be done this next spring.

Mr. STAFFORD. If there is no better showing next year of the land being utilized than is shown by the report this year, will the committee ask us to appropriate $750,000 every year, especially in these pinching times, for a project that is not being utilized?

Mr. HAYDEN. I am so confident that substantial progress will be made that that consideration does not worry me. The Government already having invested $2,500,000 on this work, which has brought the project halfway to completion, we should go on and finish the project. That is the only way to get results, but we can not hope for an extraordinary showing before the irrigation works are entirely completed.

Mr. STAFFORD. I agree that this will be a dead loss if it is stopped now, and this additional amount is necessary to avail themselves of the amount heretofore expended; but I do not think that it is advisable to continue to appropriate nearly a million dollars a year in the future, up to four millions, without the lands being utilized.

If the gentleman states that this land is going to be more utilized, or utilized at all—which it has not been in the past—of course I am willing to allow the $750,000 to continue to be appropriated for this year, but a better showing ought to be made in these hard, pinched times.

Mr. HAYDEN. Mr. Chairman, it has been demonstrated on every irrigation project in the United States that more land is being placed under cultivation this year than ever before.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order on the showing made by the lady from Montana [Miss RANKIN], supplemented by the additional information furnished by the gentleman from Arizona [Mr. HAYDEN].

Mr. MONDELL. Mr. Chairman, if I may have the attention of the gentleman from Wisconsin, who desires information with regard to this project, I would say I am one of the very few Members of Congress who are familiar with the project, who have been over the land and who know the conditions. It is a very excellent project——

Mr. STAFFORD. Will the gentleman yield in that particular?

Mr. MONDELL. Yes.

Mr. STAFFORD. The gentleman does not mean to say that he is better acquainted with this project than the lady from Montana, who has visited it?

Mr. MONDELL. By no means. I said I was one of the few. Perhaps I should have stated it more accurately by saying that outside of those who so ably represent Montana, perhaps I have more knowledge of the facts than most other Members. It is a very excellent irrigation project. There have been conditions, not at all related to the merits of the project, which have prevented actual irrigation as rapidly as the lands were brought under water; but this is true, that of the acreage that the report of the department indicates as irrigable there is, I understand, a considerable acreage that is not actually irrigable by reason of the fact that the laterals have not all been extended to these lands. The development there has been regrettably slow, but eventually the project will, I believe, come out splendidly, and it will add a very large area of very good land to the productive acreage of Montana.

Mr. STAFFORD. I have heard the word "eventually" used with reference to some other projects coming from the Northwest. Can the gentleman define that more definitely?

Mr. MONDELL. Well, in the near future.

Mr. MILLER of Minnesota. Is this a project that requires the construction of wells to irrigate table-lands higher up?

Mr. MONDELL. It is not that sort of a project, if such project there be anywhere. The water for irrigation is derived from running streams and carried to the land by gravity.

Mr. MILLER of Minnesota. I did not use the exact language I had in mind. I did not mean wells. I meant pumps. Is it necessary in the completion of this project to pump water to higher levels than nature would permit the water to reach?

Mr. MONDELL. I believe it is entirely a gravity system.

Mr. MILLER of Minnesota. Now, is the gentleman quite sure about that?

Mr. MONDELL. I am reasonably sure about that. If there is any pumping contemplated there it must be to a minor extent compared to the project as a whole. There may be such, but in the main it is a gravity project.

Mr. MILLER of Minnesota. Is this also a project which is one-tenth Indian and nine-tenths white man?

Mr. MONDELL. No; that is not exactly true; but even if that were true——

Mr. MILLER of Minnesota. It was true five years ago, when I was on the committee.

Mr. MONDELL. Even if that were true, if these lands can be irrigated at a reasonable cost and brought under cultivation it is proper that it should be done, even though in some instances a white man rather than an Indian may hold the plow.

Mr. MILLER of Minnesota. I am going to vote for it if it comes to a vote, but I think we ought to know what we are voting on.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CARTER of Oklahoma. I ask unanimous consent that all debate on this paragraph and all amendments thereto close in one minute.

Mr. MILLER of Minnesota. Make it three minutes.

Mr. CARTER of Oklahoma. Three minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that all debate on this paragraph and amendments thereto close in three minutes. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Mr. Chairman, I am glad that the gentleman from Wyoming [Mr. MONDELL] has enlightened the House on the exact merits of this proposition. This is one of the items that is silver haired and hoary, coming up each year when this bill comes up. It is a project that I hope will be completed some day. I really believe it is meritorious, and I really believe this appropriation ought to be made. But as a matter of fact, we have wasted an awful lot of money on the project. One thing that induces me to vote for it is that some few Indians will be benefited, and without this appropriation I doubt if the whites could carry through a large project of this character. And one further——

Mr. MONDELL. Will the gentleman yield right there?

Mr. MILLER of Minnesota. In just a second. One further reason that induces me to favor it—and I always have favored the project, although at first somewhat doubtfully—is that it will develop a very large water power, as I am informed.

Mr. MONDELL. The gentleman, of course, is aware of the fact that where the lands of white settlers are irrigated, they pay the cost.

Mr. MILLER of Minnesota. It will be reimbursable. It is going to be paid for by them. I understand that, of course, and on the whole it is a very meritorious project, and one that I hope will be completed some day.

Mr. TILSON. "In the near future."

Mr. MILLER of Minnesota. Oh, no; I have no such hope.

The Clerk read as follows:

For continuing construction of the irrigation systems on the Blackfeet Indian Reservation, in Montana, $75,000 (reimbursable), which shall be immediately available, and remain available until expended: *Provided*, That not to exceed $25,000 of applicable appropriations made for the Flathead, Blackfeet, and Fort Peck irrigation projects shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles for official use upon the aforesaid irrigation projects: *Provided further*, That not to exceed $3,500 may be used for the purchase of horse-drawn passenger-carrying vehicles, and that not to exceed $4,000 may be used for the purchase of motor-propelled passenger-carrying vehicles.

Mr. STAFFORD. I reserve a point of order on the paragraph ending in line 3, page 30. This seems to be an unusual appropriation, certainly in one particular. Here we have a total appropriation authorized by the committee of $75,000.

Last year the appropriation carried under this item was $25,000. Of that appropriation last year, $15,000 was available for the maintenance, repair, and operation of motor-propelled and horse-drawn vehicles. Ten thousand dollars only of a $25,000 appropriation was for construction work on this Blackfeet Indian Reservation.

Mr. HAYDEN. If the gentleman will pardon me——

Mr. STAFFORD. This year, in time of stress and storm, we find them increasing the principal amount of appropriation to $75,000 and keeping up a corresponding pace of extravagant appropriation of $25,000 for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles.

Mr. HAYDEN. If the gentleman will pardon me——

Mr. STAFFORD. I think some explanation should be given to the committee, especially in these times, outside of what appears in the hearings, as to the need of one-third of an appropriation for carrying on irrigation work being used in conveyance by automobiles or horse-drawn vehicles on this Blackfeet Indian Reservation.

Mr. HAYDEN. If the gentleman will turn to the bill itself and read the proviso, he will note that the amount made available for the purchase of automobiles and horse-drawn vehicles—$25,000—may be taken, not from the $75,000 appropriated for the Blackfeet Indian Reservation alone, but also from the appropriations made for the Flathead and Fort Peck irrigation projects. So the appropriation for motor-propelled and horse-drawn vehicles is made available from the funds of all three of the projects.

Mr. STAFFORD. Can the gentleman inform the committee how much of this appropriation will be used for maintaining horse-drawn and motor-propelled vehicles on this reservation?

Mr. HAYDEN. I can not; all that I know is that it was said at the hearings that this increase was necessary.

Mr. STAFFORD. Here we have an instance of authorizing $25,000—$15,000 last year and $10,000 additional this year—and nothing on the manner of the expenditure.

Mr. HAYDEN. We inquired of the Assistant Commissioner of Indian Affairs, and he advised the committee that the Reclamation Service had asked for this change, and it was placed in the estimates at the request of that service. He had no information except that the reclamation officials reported that they needed more motor vehicles in order to properly care for the work on the three projects in Montana.

Mr. STAFFORD. Did the committee call the reclamation officials concerning the matter?

Mr. HAYDEN. The committee did not.

Mr. STAFFORD. Well, leaving that subject on which the committee has so much information and going to a subject on which I know the committee will furnish still more information, I wish to inquire what the status of the work is on this irrigation project for which last year $25,000 was appropriated and this year $75,000?

Mr. HAYDEN. During the last year 2,500 acres were actually irrigated.

Mr. STAFFORD. How much of these 2,500 acres are being cultivated by the Indians?

Mr. HAYDEN. I will refer the gentleman from Wisconsin to the gentleman from North Dakota [Mr. NORTON], who has the report of the Commissioner of Indian Affairs in his hand.

Mr. NORTON. The report states that 1,976 acres were cultivated by the Indians. The value of the crops raised last year was $24,563.

Mr. STAFFORD. Can the gentleman inform the committee how much up to the present time has been expended on this project? I notice that it is estimated that the additional cost of completing the project will be $2,540,000.

Mr. NORTON. The additional cost of completing the Blackfeet Reservation is $2,473,000. There has been expended $1,002,391.37. The estimated cost of construction is $39 an acre, and it is estimated that the average value of the land when irrigated will be $50 an acre.

Mr. STAFFORD. In that particular the gentleman has called attention to what the estimated cost per acre will be when it is completed as $39 and that the value of the land will be $50. Compared with other projects that difference is very small, indeed. We had instances of other projects where the difference between the cost and the value of the land was something like fourfold and some as much as fivefold. This seems to be rather a questionable project.

Mr. NORTON. I will say to the gentleman that the project is of this character. The Blackfeet Indian Reservation is a great grazing territory, particularly valuable for grazing. In the winter time it is necessary on that reservation to have feed to carry the cattle over, and it has been purposed by the Government to provide winter feed from alfalfa raised on irrigated land. The land on this project is now under the ditch, under water, and is being used mainly for raising grasses, alfalfa chiefly. This appropriation is largely for maintenance. It is not contemplated at the present time to expend additional moneys in the construction work that will ultimately cost $2,473,000.

Mr. HAYDEN. The assistant commissioner at the hearings said that the principal effort next year would be to construct laterals so as to deliver the water to the lands of the project, thus providing for an immediate production of crops.

Mr. STAFFORD. But you can not get very much in the construction of laterals for $75,000.

Mr. HAYDEN. The ordinary lateral ditch is not very wide, and will not cost a great deal. A good many laterals can be built for that amount.

Mr. STAFFORD. What has been the product of the irrigated land up to the present time as the result of the expenditure of the $1,200,000?

Mr. HAYDEN. The difficulty about obtaining detailed information upon all these matters is that the work of construction is being done by the Reclamation Service. The Indian Service merely comes before our committee and asks for the appropriation of whatever sums the Reclamation Service requests as necessary. When we had the hearings on these projects a few years ago we had the reclamation officials before the committee and they said that it was necessary to appropriate the money to carry on this work. In the rush of events this year we did not call upon the reclamation officials for direct information as we probably should and so we can not give the information desired by the gentleman from Wisconsin.

Mr. STAFFORD. Mr. Chairman, this is an infinitely small amount compared to the $750,000 which was appropriated for the Flathead Indian Reservation. I am sorry that the committee has not more information to show the real results of the enormous amount that we have appropriated in the past. In this instance we have expended already a million and more dollars, and from the hearings very little has developed as to the results of that expenditure. In the Flathead the same way. We have no definite information as to what has been the result of the large appropriations that have been sunk in irrigation projects in these western reservations. I withdraw the point of order with the expectation that next year some definite information may be obtained.

The Clerk reads as follows:

SEC. 10. For support and education of 380 Indian pupils at the Indian school at Genoa, Nebr., including pay of superintendent, $78,000; for general repairs and improvements, $7,500; for purchase and erection of water tank (in addition to the amount of $2,400 appropriated for this purpose in the act of March 2, 1917, Public, No. 369, 64th Cong., p. 14), $3,000, to be immediately available; in all, $88,500.

Mr. HAYDEN. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 30, line 19, strike out the words "Public, Numbered 369, 64th Congress, page 14," and insert in lieu thereof the words "39th Statutes at Large, page 980."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

For the pay of one special attorney for the Pueblo Indians of New Mexico, to be designated by the Secretary of the Interior, and for necessary traveling expenses of said attorney, $2,000, or so much thereof as the Secretary of the Interior may deem necessary.

Mr. MILLER of Minnesota. Mr. Chairman, reserving the point of order on the paragraph just read, I would like to ask the chairman of the committee what the special facts are that require that the Pueblo Indians shall have an attorney?

Mr. WALTON. For consultation and advice in the matters in which they are interested.

Mr. MILLER of Minnesota. Can the gentleman from New Mexico inform us more specifically the kind of things these people need?

Mr. WALTON. With particular reference to Spanish land grant matters. He maintains an office in Albuquerque, in close proximity to the Pueblos, and they go there and consult with him, and he furnishes them advice in all legal matters in which they may be concerned.

Mr. MILLER of Minnesota. Under the general law it has been the custom for a tribe desiring the services of an attorney to make a contract with an attorney, and that contract would be supervised and approved by the Secretary of the Interior or it would not be effective. Here is a specific law saying that an attorney shall be secured by the Secretary of the Interior, a special attorney, who shall act for the Pueblo Indians of New Mexico. That is changing existing law. Can the gentleman inform the committee of the circumstances that justify that?

Mr. CARTER of Oklahoma. That has been carried in the bill, as the gentleman knows, for several years.

Mr. MILLER of Minnesota. But it is changing the general law.

Mr. CARTER of Oklahoma. That is true.

Mr. MILLER of Minnesota. And the policy with respect to attorneys.

Mr. CARTER of Oklahoma. That is true; but it has been carried in the bill for several years.

Mr. MILLER of Minnesota. Not several years, has it?

Mr. CARTER of Oklahoma. Yes.

Mr. MILLER of Minnesota. By "several" does the gentleman mean two?

Mr. CARTER of Oklahoma. I would say ever since I have been in Congress.

Mr. HAYDEN. If the gentleman will look on the hearings at pages 217 to 220, he will find a very elaborate justification for this item as submitted by the Indian Office.

Mr. MILLER of Minnesota. If there is need for an attorney there, why has not the Commissioner of Indian Affairs or the Secretary of the Interior had the foresight and the sense of responsibility that would have caused him to secure the services of an attorney without actually compelling him to?

Mr. CARTER of Oklahoma. This happened some 10 or 12 years ago. I do not know which Secretary of the Interior or which Commissioner of Indian Affairs it was that began the appointment of this attorney in this way.

Mr. MILLER of Minnesota. Does he have $2,000 worth of work to do every year?

Mr. HAYDEN. Mr. Chairman, the Commissioner of Indian Affairs sates in the hearings that there are constantly matters arising peculiar to that country, and they have had an attorney for the Pueblo Indians for a great many years. He says:

> I suppose if the appropriation were not made that the Indians would continue to exist, and we probably would be able to get this legal work done through the office of the United States attorney. However, not long since we wrote a letter to the present Pueblo attorney, whose name is Edward D. Tittman, of Albuquerque, N. Mex., and he wrote to the office, giving a record of the work that he had been doing.

We inquired further as to why the United States attorney for New Mexico could not do this work for the Indians. We were advised that owing to the fact that New Mexico is on the Mexican border, where the Federal authorities are having trouble with smugglers and raiders, and because of the great amount of work in that very large State, he could not devote his time to the affairs of the Indians. The lands of the Pueblos are located in small tracts along the Rio Grande River and there are continuous disputes about boundaries due to conflicts with certain old Spanish land grants.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER of Minnesota. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Is not the additional reason for this item appearing in the bill the fact that the salary is paid out of the Treasury of the United States?

Mr. HAYDEN. The Pueblo Indians have no tribal funds.

Mr. MILLER of Minnesota. They have no property?

Mr. HAYDEN. They have their little farms, which they irrigate from the Rio Grande.

Mr. MILLER of Minnesota. And the department O. K.'s this item?

Mr. HAYDEN. Yes; and strongly advocates its adoption.

Mr. MILLER of Minnesota. And at the same time it has a policy which prohibits Indians numbering many thousands, with property in the hands of the Government amounting to many, many millions of dollars, from paying out their own money under a contract approved by the Secretary, and having an attorney look after their affairs, when their interests are diametrically opposed to the interests of the United States. Here is an instance where they are willing that the United States Government shall pay $2,000 for an attorney for some Indians who have no property in the hands of the United States. This would look as though we were afraid to let Indian tribes have the benefit of counsel if we are managing their property and handling their affairs, lest may be our conduct has not been that of the good steward, and that the services of an attorney on their part might disclose some things that would not be nice for us to have known.

Mr. HAYDEN. I would like to suggest that perhaps the Indians of New Mexico are not so contentious as they are in the gentleman's State.

Mr. MILLER of Minnesota. Well, I have no objection to this, but I want to call attention to this extremely anomalous situation of many, many Indian tribes in the United States with millions of dollars in the Treasury, with claims against the Government by reason of the way their funds have been handled, not being allowed to have an attorney of their own to protect them as against the Government, and here is an instance, and the only of its kind, where the Government is willing to hire an attorney for some people who have no property in the hands of the Government.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

> For continuing work on the Indian highway extending from the Mesa Verde National Park to Gallup, N. Mex., on the Navajo and San Juan Reservations, $25,000; said sum to be reimbursed from any funds which are now or may hereafter be placed in the Treasury to the credit of said Indians: *Provided*, That such sums shall be expended under the direction of the Secretary of the Interior in such manner and at such times and places as he may deem proper, and in the employment of Indian labor as far as possible for the construction of said highway.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. I notice that this bill extends the language for the utilization of this fund to the San Juan Reservation, in addition to the Navajo. The amount also is increased over that carried in last year's bill from $15,000 to $25,000. As I recall, it was estimated when this project was originated that $55,000 would be required to construct this road from Mesa Verde National Park to Gallup, N. Mex. I rose to inquire whether this additional language will provide for any different road than that which was originally contemplated or whether it is merely the same identical project as originally provided for?

Mr. WALTON. It is the original project estimated at a construction cost of $55,000, of which $30,000 has been expended, and the additional $25,000 will complete the project. The insertion of the words "San Juan" was made for the reason that there are two divisions of what is commonly known as the Navajo Reservation, the Navajo and the San Juan, and the road traverses both; and in order to clear up any uncertainty on that point and so it might be available for the purpose of the original project, if the gentleman——

Mr. STAFFORD. So it is not purposed to extend the road in any way?

Mr. WALTON. Not at all.

Mr. STAFFORD. It is kept within the original confines, as originally planned?

Mr. WALTON. If the gentleman will notice the statement of Mr. Wells on page 22 of the hearings——

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn.

Mr. TAYLOR of Colorado. Mr. Chairman, let me say just a few words further in relation to this Navajo Indian highway. When this Indian appropriation bill was before the House on December 11, 1916, I inserted in the RECORD, at pages 189 to 192, part 1, volume 54, quite an elaborate statement or a series of statements by the Secretary of the Interior and the Commissioner of Indian Affairs in reference to this highway. Both the Department of the Interior and the Bureau of Indian Affairs originally recommended the construction of this highway as expeditiously as possible, to furnish an outlet to the Navajo Indians in New Mexico, as well as to a certain extent for the white people of southwestern Colorado to the Santa Fe Railroad at the town of Gallup. This highway is of tremendous importance to the development of southwestern Colorado as well as for the development of the Navajo Reservation, and the reason that the Commissioner of Indian Affairs recommended the increase from $15,000, last year's appropriation, to $25,000 is in order that the road may be completed systematically and as soon as possible for the convenience of both the Indians and the white people and in order that they may have the benefit of it as well as convenience rather than for them to drag along for several years. The hearings before the committee is quite complete on this subject, and shows the manner in which the money has been heretofore expended and the necessities for finishing it at the earliest practicable date. The hearings, in part, is as follows:

Highway from Mesa Verde National Park to Gallup, N. Mex. (reimbursable).

Fiscal year ending June 30, 1918:	
Amount appropriated	$15,000.00
Fiscal year ended June 30, 1917:	
Amount appropriated	15,000.00
Amount expended	14,049.11
Unexpended balance	950.89

Analysis of expenditures:

Regular employees	$1,335.00
Irregular employees	6,612.70
Traveling expenses	383.60
Transportation of supplies	2,311.84
Telegraphing and telephoning	.60
Heat, light, and power, including fuel	127.55
Equipment	2,057.18
Miscellaneous	1,220.64
Total	14,049.11

This is an appropriation for continuing the work on the Mesa Verde National Park-Gallup Highway across the Navajo Reservation, begun under the provision in the Indian appropriation act for the fiscal year 1917, making an appropriation of $15,000 to start the project. At that time it was estimated that approximately $55,000 would be needed to establish a first-class road over the reservation.

A road engineer was placed in charge of the work and a good showing made in actual construction work. On account of the lack of equipment, however, it was necessary to expend a good part of the initial appropriation in the purchase of such equipment. A second appropriation of $15,000 was made in the Indian appropriation act for the fiscal year 1918. On October 1, 1917, there remained approximately $7,000 available of the 1918 appropriation. The balance will be expended by the end of the fiscal year.

The grading and filling and the construction of the culverts and bridges have been completed with the exception of about 3 miles between the southern reservation line and Tohatchi, a distance of about 15 miles, and for a distance of about 8 miles beyond that, leaving about 17 miles still to be completed on the portion of the road estimated for; that is, on the Navajo Reservation under the supervision of Supt. Paquette, designated as the "Navajo Reservation." It was considered that $20,000 of the estimated cost of $55,000 for the first 40 miles of the road would be sufficient for the preparation of the roadbed, the remaining $25,000 for finishing the surface. This has been accomplished in so far as could be with the equipment available. No heavy road-working machinery has been purchased. All of the work of grading has been done with light Indian teams and labor. It is considered that a remarkable amount of work has been accomplished, considering the handicap under which it was performed, and a very large portion of it is being used even in its unfinished condition. It is estimated that $25,000 will complete this highway within the "Navajo" jurisdiction, and, in view of the importance of finishing the project at the earliest practicable date, it is urgently desired that this sum be allowed in order that work on the project may proceed to an early completion and continued use of all available facilities.

Mr. STAFFORD. I recall the gentleman from Colorado was sponsor for this proposition.

Mr. TAYLOR of Colorado. Yes. I introduced the original bill for this highway, and I guess I am entitled to the distinction of being the author of the proposition, and it will afford me a great deal of personal gratification when the highway is completed because the railroad facilities for the white people in the extreme southwestern part of Colorado are very limited, the freight rates high, and the accommodations unsatisfactory, and the people from that portion of our State have for many years been looking forward to the time when they could have a good auto-truck highway from that country down to Gallup, N. Mex., where they could connect with the main line of the Santa Fe Railroad. And at the same time, it will be directly and primarily a benefit to the Navajo Indians and open up and furnish them an outlet to their reservation, which is, I guess, the largest in the United States, being about 9,000,000 acres, and most of it valuable land and a considerable portion of it containing large and valuable deposits of coal. Incidentally, it will also help the Ute Indians somewhat in Colorado, and I am very glad to see this sum of $25,000 appropriated to complete the highway.

Mr. STAFFORD. My query was directed to ascertain whether the change of phraseology meant an extension of the project or whether it was confined to the original idea.

Mr. TAYLOR of Colorado. It is the same project exactly.

Mr. STAFFORD. I withdraw the reservation.

The Clerk read as follows:

The proviso of section 1 of the act of March 4, 1907 (34th Stat. L., 1413), relating to the expenditure of proceeds derived from the sale of timber on the Jicarilla Reservation, is hereby amended so as to authorize the Secretary of the Interior to expend said proceeds with the consent of the allottee, to be obtained in such manner as he may prescribe, in the purchase of live stock, seeds, agricultural equipment, and for other community or individual purposes beneficial to the Indians belonging to and having rights as members of said tribe of Indians.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order. Here is an item where we are changing existing law, not only changing existing law but perhaps invading vested rights of Indians who have already received their allotment. As I understand this proposal, it is to appropriate some property of these Indians under their individual allotment without their consent and to utilize the fund that may arise from the sale of the timber on their allotted land for the benefit, perhaps, of these individual allottees, and also possibly for the benefit not of the individual allottees but for the benefit of the tribe of Indians living on this reservation. I think some explanation should be given as to the power of Congress, if my statement of facts is correct, to invade the vested right of an individual Indian who has already received his allotment by appropriating the timber on his individual land for the benefit of the community of Indians.

Mr. HAYDEN rose.

Mr. STAFFORD. If I am in error as to my position I wish the gentleman from Arizona would correct me.

Mr. HAYDEN. A very close legal question is raised by this legislation. The facts are that the timber from the allotted lands on this reservation was sold and placed in a fund, which is now in the Treasury to the credit of the Jicarilla Indians. No record was kept of the amount of timber cut on any individual Indian's allotment, so that there is no method whereby the money could be paid out to particular Indians.

Mr. STAFFORD. Will the gentleman yield in that particular?

Mr. HAYDEN. Yes.

Mr. STAFFORD. These Indians could have an accounting of the timber that was taken off their respective allotments?

Mr. HAYDEN. But no accurate record was kept, so we were informed.

Mr. STAFFORD. Even if no record was kept there is still something that could be ascertained as to what were the individual rights of these respective allotments?

Mr. HAYDEN. We were advised by the Indian Office that this was not done for the reason that the act providing for the sale of the timber contained a provision that the money might be spent, under certain conditions, for the benefit of the tribe as a whole, and therefore it was not deemed necessary to keep a separate account with each Indian.

Now, all that this law seeks to do is to change the purpose for which the money may be spent for the benefit of the tribe as a whole.

Mr. CARTER of Oklahoma. And it provides to expend the proceeds "with the consent of the allottees." Therefore no vested right would be invaded if you had the allottees' consent.

Mr. STAFFORD. As I recall the hearings, the commissioner had some idea that perhaps he would have authority to bind the individual allottee as far as the fruitage of his own allotment was concerned without his consent, provided he had a majority of the Indians on this reservation approve of this proposal. Am I in error as to that?

Mr. HAYDEN. The commissioner suggested that that might be done. We did not enact that proposition into law. We merely stated that the consent of the allottee should be obtained in such manner as the Secretary of the Interior might prescribe.

Mr. STAFFORD. Is not the language as incorporated in the bill the very language that was recommended by the department?

Mr. HAYDEN. That is true; but whether that language is subject to the construction placed upon it by the Assistant Commissioner of Indian Affairs or not remains to be seen. I have no doubt but that the lawyers of the Department of the Interior will advise the Secretary as to whether he can lawfully obtain the consent of the allottee in that manner. If not, it will have to be secured in some other way.

Mr. STAFFORD. I am rising to foreclose any possibility in the future—in 5, 10 or in later years—of some claim agent—and there are a great many infesting Washington even to-day—going and getting some old claim of these Indians and using that as the basis of a claim on the ground that their individual rights were invaded without their consent.

Mr. CARTER of Oklahoma. It says "with their consent."

Mr. STAFFORD. As I understand the gentleman, there is no place where the rights of the individual allottees are invaded without his consent. To carry out the idea of the committee, would the gentleman have any objection to inserting before the word "the," preceding the word "allottees," in line 10, the words "all of the," so that it would read "to expend said proceeds with the consent of all of the allottees"?

Mr. CARTER of Oklahoma. I do not think that is necessary, for the reason that he would use the proceeds of only those who gave their consent.

Mr. STAFFORD. I do not wish to put such a strict provision here that in case he does not appropriate the lumber taken off one individual Indian's allotment, and he refuses to give his consent, the whole proposition will be held up. And yet I realize the necessity, as I view it, of safeguarding the rights of the individual Indian from having his property appropriated without his consent.

Mr. CARTER of Oklahoma. The difficulty with that, Mr. Chairman, would be that you would have a lot of proceeds held away from other Indians for two or three years that could now be used in improving their property, and for other purposes.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CARTER of Oklahoma. And you would have these funds held away from these Indians at the very time when they needed them most, at the very time when the country needs the funds to be distributed most, because this is a time when we are urged to put forth all the production we can as a war necessity.

Mr. CAMPBELL of Kansas. Oh, I hope the gentleman from Oklahoma will recall that statement. We just shut down the industries of the country for five days in order to suspend production.

Mr. CARTER of Oklahoma. They have not shut down any farms, have they? This is a farm proposition.

Mr. STAFFORD. They are not invading the agricultural industries of this country, because they recognize the potency of the farmer as a political factor.

Mr. CARTER of Oklahoma. We should be thankful for that, for the farmer certainly deserves any protection that may come his way. But getting back to this item, this would necessitate getting the consent of every Indian before any person's money could be paid to him. The gentleman from Wisconsin [Mr. STAFFORD] can see what an unpractical, even impracticable, proposition that would be. You would always find some one who would object, and that would block the whole procedure. If the gentleman wants to incite claim attorneys to stir up trouble and to get Indians to bring claims in the future, I can imagine no better way to proceed than to award as he suggests, because some fellow could be found to object to this proposition and hold it up; then all the others would be back here employing attorneys to get this money for them. It would then take affirmative legislation to get the funds jarred loose, and when finally paid every one of them would be claiming interest, and would probably get it.

Mr. STAFFORD. I recognize the potency of the objection which is raised by the gentleman from Oklahoma. Would the gentleman object to an amendment reading "with the consent of those allottees whose property is appropriated"?

Mr. CARTER of Oklahoma. I do not think there will be anything wrong about that. That would be all right.

Mr. STAFFORD. My only purpose is to prevent the Treasury being robbed in years to come, and I also fully agree as to the advisability of this change of the law.

Mr. Chairman, I withdraw the reservation of the point of order and offer the following amendment, namely, to strike out the word "the" before "allottees," in line 10, page 33, and insert the word "such," and after the word "allottees" insert the words "whose property is appropriated."

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 33, line 10, strike out the word "the" after the word "of," and insert in lieu thereof the word "such." And after the word "allottees" insert the following: "whose property is appropriated."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For amount necessary for construction of a steel bridge across the San Juan River in San Juan County, State of New Mexico, at the best and most available location west or southwest and near to the town of Farmington, in said county, in addition to the $25,000 appropriated for the purpose by the act approved February 20, 1917 (39 Stat. L., p. 926), $4,000, or so much thereof as may be required, to be immediately available: *Provided*, That said additional sum shall be reimbursed from tribal funds as required by the said act.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on this item. Is this the item in which a deficiency appropriation has been asked by the department?

Mr. WALTON. I think so; yes, sir. If this is passed in this bill it should be stricken out of the deficiency bill.

Mr. STAFFORD. I may inform the gentleman and the chairman of the committee that the deficiency appropriation bill will very likely pass the House and the Congress sooner than this bill will become a law. There is no purpose on my part to prevent the additional appropriation being made available, so that this bridge can be built, because of increased cost. It rests entirely with the gentleman from New Mexico and the chairman of the committee as to whether they wish to incorporate it here or to rely upon the deficiency subcommittee making the recommendation.

Mr. WALTON. I have no knowledge as to whether or not this has been included in the deficiency bill. The gentleman is better advised than I as to that.

Mr. STAFFORD. Nothing has been included in the deficiency bill up to the present time, because the subcommittee is still engaged upon hearings; but the deficiency bill will be reported to the House in the next 10 days, as I am reliably informed. This item is incorporated in the estimates that have been submitted to the Committee on Appropriations.

Mr. WALTON. I would prefer to have it in this bill now under consideration.

Mr. STAFFORD. In that case I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn. The Clerk will read.

The Clerk read as follows:

For fulfilling treaties with Six Nations of New York: For permanent annuity, in clothing and other useful articles (art. 6, treaty of Nov. 11, 1794), $4,500.

Mr. CAMPBELL of Kansas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Kansas moves to strike out the last word.

Mr. CAMPBELL of Kansas. I want to call attention to the Seneca Indians of New York. They are an example of our conduct of Indian affairs. They are a rich band of Indians, probably the richest Indians in the country, barring the Osages, taking the whole band. They live in a community in New York on land that is worth anywhere from $100 to $300 an acre. It is well improved. They have splendid homes and pastures and fences and orchards, windmills, waterworks, and steam-heated houses, but they pay no taxes, and we are making a donation of some $11,000 a year to them.

Mr. CARTER of Oklahoma. This is not a donation, Mr. Chairman.

Mr. CAMPBELL of Kansas. It is a treaty item.

Mr. CARTER of Oklahoma. Certainly; it is an obligation. It is a debt we owe in consequence of a treaty we made with these Indians.

Mr. CAMPBELL of Kansas. How long is this to run?

Mr. CARTER of Oklahoma. It is to run until it is capitalized.

Mr. CAMPBELL of Kansas. While water runs and grass grows?

Mr. CARTER of Oklahoma. It can be capitalized at any time that the Federal Government desires.

Mr. CAMPBELL of Kansas. That is what I was coming to. There has not been a recommendation from the Indian Office that this be capitalized and that this injustice to the neighbors surrounding those people in New York be done away with. It ought to be capitalized. The land ought to be given to these Indians in severalty, and they should be given their place among the citizens of New York and be made to live as other citizens do. I see no reason why the Seneca Indians of New York should be exempt from taxation. The Indians in and around the Tammany Wigwam in New York City, it is said, are not exempt from taxation. Some of them may be; I am not sure. [Laughter.] But there is no more reason why, upon the statutes, they should be exempt in the one place than in the other. The Senecas are highly civilized people, and there is no reason, except that the Indian Office is always holding on to something to give them something to do, as a reason for their existence, a reason for the employment of clerks, bureau chiefs, and inspectors. Giving employment to white men has been the business of the Indian Office, of the Indian Bureau, not during this administration alone but for the past quarter of a century. There is no reason why these treaty items should not be capitalized and the matter closed up, so far as the Seneca Indians are concerned, so that they may be catalogued among the other citizens and taxpayers of New York.

The CHAIRMAN. The time of the gentleman from Kansas has expired. The Clerk will read.

The Clerk read as follows:

For the construction of a bridge across the Oconalufty River, at or near the Indian school at Cherokee, N. C., $8,000, to be expended under the direction of the Secretary of the Interior: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the State of North Carolina, or the county of Swain, satisfactory guaranties of the payment by the said State of North Carolina, or by the county of Swain, or at least one-half of the cost of the construction of said bridge, and that the proper authorities of the said State of North Carolina, or the said county of Swain, shall assume full responsibility for, and will at all times maintain and repair, said bridge and the approaches thereto: *And provided further*, That any and all expenses above the amount herein named in connection with the construction of said bridge shall be borne either by the said State of North Carolina or the said county of Swain.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the item.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order on the item.

Mr. STAFFORD. I wish to inquire whether this was recommended by the department, and whether any reference to this proposed bridge is included in the hearings?

Mr. CARTER of Oklahoma. I yield to the gentleman from North Carolina [Mr. WEAVER] to answer.

Mr. WEAVER. Mr. Chairman, I do not think that the Commissioner of Indian Affairs made any recommendation in regard to this item. The superintendent of the Indian school at Cherokee, in the recommendation that he made in regard to this school, said that the following were absolutely necessary.

Mr. STAFFORD. What page of the hearings is the gentleman going to read from?

Mr WEAVER. Page 231 of the hearings. He asked for the support of the school, $32,958; for repairs and improvements, $10,000; for new buildings, $75,000; special appropriation for road and bridge building, $35,000.

Now, Mr. Chairman, the committee, after hearing the facts in regard to this matter, made a report that was unanimous, in so far as the members present were concerned. They recommended the amount of $8,000 to build this bridge across the Oconalufty River, at the Cherokee school, in Swain County, N. C.

Mr. Chairman, I call the attention of the gentleman from Wisconsin to the further fact that the Commissioner of Indian Affairs did recommend a total appropriation of $57,600 for this school. Now, giving the appropriation of $8,000 for this bridge, the committee still has allowed only $47,600 of the amount recommended by the Commissioner of Indian Affairs.

Mr. STAFFORD. Of course, I have no objection to the gentleman elaborating and going ahead as to the other items, but I am directing my inquiry particularly as to the bridge item.

Mr. WEAVER. I am coming to that now. The Indian school at Cherokee is situated on land now owned by the Government of the United States and within the Indian reservation. This Indian reservation lies at the head of the Oconalufty River. The Indians have but one way to get out. On three sides they are hemmed in by the high walls of the Great Smoky Mountains. Some of those mountains are almost as high as Mount Mitchell, which is the highest land east of the Rocky Mountains. To the north and east of them is a wilderness of woods. They get out to the Southern Railroad, that runs down the Tuckasegee, by a little railroad going down the Oconalufty River. I think this bridge would be an improvement to the Indian school, which heretofore has been carried in this bill.

I want to call to the attention of the House, and particularly to the attention of the gentleman from Wisconsin, the language of a letter which I have received from Mr. Henderson, the superintendent of the school, since this item was put in the bill. And I would like to say to the gentleman from Wisconsin that if he will examine the reports made by the Commissioner of Indian Affairs, he will find that this school is doing a most magnificent work for these Indians. Mr. Henderson says:

> The matter of getting better roads and bridges on this reservation is one of vital importance, even much more so than it is on most of the reservations of the West. The exceeding high mountains which wall this reservation in form natural barriers that have served for the last hundred years to keep progress and civilization out and are the cause of the Cherokees not having done more in advancement. We educate the young Indians and turn them out several miles from the railroad, with no roads over which they can haul their farm products. A few thousand dollars well spent on roads on the Cherokee Reservation for a few years would be one of the greatest civilizers that we could possibly get.
>
> As to the bridge across the Oconalufty River at Cherokee, I see no reason why the appropriation could not be made with all good conscience, for the reason that one end of it would rest upon not Indian land but land actually owned by the United States Government and upon which the Cherokee Boarding School is now located.

And I wish to say to the Members of the House and to the gentleman from Wisconsin that there is no graft in this matter. These Indians have been asking for this year in and year out. I think it went out of this bill once before after having passed the Senate. I hope the gentleman from Wisconsin will not make the point of order. Mr. Henderson further says:

> All freight, including several hundred tons of coal each year, must be hauled over this river, which frequently can not be forded on account of floods. Just at the present time and for several weeks past few teams have been able to cross on account of the ice. This works a great hardship upon the Cherokee school.

And I can say to the Members of this House that that country is now frozen in the icy hand of winter, so that they can not cross that river as it is, and they have no other way of getting their supplies in from the railroad.

Now, one other thing is this: The little mountain county of Swain went to its limit in voting a bond issue upon itself of $350,000 for constructing roads in that little county. It means something to try to build roads there. It is not as it is on the prairies of the West. You have got to cut through hills and bridge chasms, and that costs money.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent for five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent for five minutes. Is there objection?

There was no objection.

Mr. STAFFORD. I yield to the gentleman from North Caroline [Mr. WEAVER] to continue.

Mr. WEAVER. I thank the gentleman very much. Of the $350,000 voted by the county of Swain, over $60,000 has been used in constructing the road upon the Indian lands.

Mr. STAFFORD. If the gentleman has finished his statement, will he permit an inquiry, so that I may obtain the facts that I am seeking?

Mr. WEAVER. I shall be glad to answer anything I can.

Mr. STAFFORD. What does the gentleman estimate will be the total cost of this bridge?

Mr. WEAVER. The estimate is that it will cost about $16,000.

Mr. STAFFORD. I am specially desirous of ascertaining whether this bridge is on the reservation or off the reservation.

Mr. WEAVER. The Government owns the land on which the school is actually situated. These lands are embraced within a big reservation belonging to the Indians. All of the lands surrounding the school are Indian lands, but one end of the bridge will rest on the Government land and the other, across the river, on the Indian reservation land.

Mr. STAFFORD. Then, the bridge proper, as I understand it, is entirely on the Indian reservation?

Mr. WEAVER. Absolutely.

Mr. STAFFORD. The case is not parallel to that which was considered yesterday, in California, where the bridge was entirely off the reservation?

Mr. WEAVER. Oh, no; it is entirely on the reservation.

Mr. STAFFORD. Will any persons be benefited by this bridge other than the Indians?

Mr. WEAVER. No; as I explained the situation there, the Indian lands comprise the head of the river. Now, there are no or few whites living up there, unless somebody comes in to do some lumbering or something of that kind. All the whites live below on the lower reaches of the Oconalufty and Tuckasegee Rivers.

Mr. STAFFORD. Can the gentleman give any assurance that if this item is allowed to stand the Congress will not be called upon for any additional appropriations other than that which is herein carried?

Mr. WEAVER. I do not know how I could give that assurance, but I do not think so. I think they want to go ahead, and I will say that I have a letter——

Mr. STAFFORD. This item is conditioned upon the State or county authorities contributing one-half.

Mr. WEAVER. One-half.

Mr. STAFFORD. I want to have some assurance that the whole burden is not going to be cast upon the National Government.

Mr. WEAVER. It will not be, because the other half will be paid by the State and county.

Mr. STAFFORD. The gentleman can give that assurance?

Mr. WEAVER. I am sure of that; yes. They want to build it.

Mr. STAFFORD. And there will not be any additional appropriation hereafter, above this $8,000?

Mr. WEAVER. I think not. I have in my hand a letter from the chairman of the Highway Commission, and he says in regard to this that while they would like to have more—and I have been hoping the gentleman from Wisconsin would offer to increase it up to $16,000—still, that they will try to get along with that.

Mr. STAFFORD. I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. STAFFORD. Mr. Chairman, I was under the apprehension that this bridge was off the Indian reservation. Of course this money comes out of the National Treasury and not out of Indian funds. There is that exception that is going to be made in this instance.

Mr. HAYDEN. If the gentleman will pardon me, he will note that if we had allowed the amount of $200 per capita normally allowed to schools of this kind, there would have been appropriated $41,600; but the superintendent of this Indian school, by his careful management, conducts it at a less cost per

capita than any other Indian school in the United States—$132 per capita.

Mr. STAFFORD. Will this bridge be under the supervision of this superintendent in its construction?

Mr. WEAVER. Yes.

Mr. STAFFORD. Mr. Chairman, on the statement made by the gentleman from North Carolina [Mr. WEAVER] and the gentleman from Arizona [Mr. HAYDEN], I withdraw the reservation of the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For support and civilization of Indians at Fort Berthold Agency, in North Dakota, including pay of employees, $15,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word.

Mr. WALSH. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. WALSH. Does the gentleman from Wyoming desire to discuss this very important amendment which he has offered in the absence of the gentleman from New York [Mr. LONDON]?

Mr. MONDELL. I think it might enlighten the gentleman from New York if he were here, but in his regrettable absence I will have to go on without him. Mr. Chairman, we have passed quite a number of bridge items, and because they have been passed I feel perfectly free and safe in saying what I am about to say, because I would not want to prejudice any item in the bill. I am of the opinion that every item in this bill relating to bridges is justified. I have given some little attention to this subject, because I have some views and opinions in regard to it.

There is an Indian reservation, the only one in my State, of a wedge shape, of something over a million and a half acres, lying right across the highways of travel, every boundary of which is a water boundary except the base of the triangle, which is formed by a very high and impassable mountain range. Every approach to the reservation, therefore, is across a bridge, one end of which is on the Indian reservation and the other end on a public highway of the county. The lands of that reservation are not taxed.

Mr. MADDEN. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. MADDEN. Who has paid for the construction of the bridges?

Mr. MONDELL. That is what I am coming to; that is what I am going to talk about. It would seem proper and reasonable, I think, that the Indians on that reservation should pay half of the construction of these bridges. I have tried to be reasonable, and more than reasonable, in the things I have asked in connection with the Indian reservation in my State. We have never asked for the contribution of a dollar for the construction of these bridges. The county has constructed a number of steel bridges of considerable length—for these streams are good-sized streams—costing from $5,000 to $15,000 each, and the county has paid for them.

I have never asked a penny on the Indian bill for these bridges. I am not saying this in a spirit of criticism either of those who do ask for appropriations for the construction of bridges nor in a spirit of criticism of the committee for the action it has taken in regard to a number of these projects. But I do think it is entirely proper that it should be understood here that we try to be reasonable in these things that we ask for in connection with the Indians and the Indian reservations.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. I ask for three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

Mr. MONDELL. I make no promises that I may not in the future ask for some contribution in behalf of other bridges that may be built spanning the streams that bound the reservation, but I want to impress on the committee and the country the fact of our reasonableness in this matter in the past, and the fact that we have refrained from making requests that we might have made with very good reason.

Mr. CARTER of Oklahoma. Will the gentleman from Wyoming yield?

Mr. MONDELL. Yes.

Mr. CARTER of Oklahoma. Mr. Chairman, the policy of the House, as the gentleman knows, and of the Indian Committee in the past has always been not to appropriate for bridges out of the Federal Treasury on Indian reservations. The only exceptions that have been made are in the case of schools where the property belongs to the Government rather than to the Indians. Here we have a school and the property belongs to the Government and does not belong to the Indians, so that when the Government constructs the bridge it constructs it on its own property. We have a similar case suggested by the gentleman from Kansas [Mr. CAMPBELL] at the Chilocco school.

Mr. MONDELL. Of the steel bridges that we have constructed, one end rests on Government property and one on the highway.

Mr. CARTER of Oklahoma. Not on Government property, but on Indian property.

Mr. MONDELL. One end is on Government property. What is the difference, it is carried in the Indian bill? In some cases the title is in the Government rather than in the Indians.

Mr. CARTER of Oklahoma. Here is a case where the property belongs to the Government.

Mr. MONDELL. That is the difference between tweedledum and tweedledee. I am not criticizing that item; there are other items in this bill, that the gentleman knows as well as I do, where one end only of the bridge is on a reservation, and while they provide for reimbursement they are not all certain to be reimbursed because the conditions are such that the provision for reimbursement is certain to lead to reimbursement.

Mr. CARTER of Oklahoma. I do not know that.

Mr. MONDELL. The gentleman has a fair notion of them. I am not criticizing anything in the bill.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. MONDELL. I ask for two minutes more.

Mr. CARTER of Oklahoma. Reserving the right to object, the gentleman has consumed eight minutes with nothing before the House, and we ought to make some progress on the bill.

Mr. MONDELL. I agree with the gentleman that we should make progress, but I have taken up but very little time.

Mr. CARTER of Oklahoma. I want to expedite the bill.

Mr. MONDELL. I am delighted that my friend has at last reached the point where he wants to expedite the bill, because I agree with him in that. I simply want to emphasize the fact that while the action of the committee in these cases in the bill and those provided for in other bills have, in my opinion, been justified, there are many other cases where a similar request might have been made with an equal basis of reason and reasonableness.

The Clerk read as follows:

That the act of May 29, 1908 (35 Stat. L., p. 460), and the act of February 14, 1913 (37 Stat. L., p. 675), are hereby amended so as to authorize the Secretary of the Interior, in his discretion, and in such manner and under such rules and regulations as he may prescribe, to make per capita distributions to the Standing Rock Indians from the funds, principal and interest, accruing under said acts.

Mr. MADDEN. Mr. Chairman, I make a point of order against the paragraph, and I wish to ask the gentleman in charge of the bill why it is thought necessary to insert this new legislation at this time?

Mr. CARTER of Oklahoma. Mr. Chairman, that was done at the suggestion of the commissioner, which he tells us was in deference to a request made by the Indians of the Standing Rock Indian Reservation.

Mr. MADDEN. What special reason did he give for granting authority to the Secretary of the Interior, "in his discretion, and in such manner and under such rules and regulations as he may prescribe, to make per capita distributions to the Standing Rock Indians from the funds, principal and interest, accruing under said act," which are enumerated in this section of the bill? It seems to me, Mr. Chairman, that we ought to have specific information as to why the Secretary of the Interior should be authorized to make such distributions as he proposes in this section of the bill, and without such specific information we ought to go slow in acting. I would like very much to hear the chairman of the committee, or some member of the committee who is familiar with the details of this important section, elucidate the necessity and the importance of such sweeping legislation. This is certainly new legislation and ought not to be on the bill. The authority is broad and sweeping and indefinite and ought not to be granted to any executive officer of the Government without full information in possession of the Members of the House who are asked to grant the authority. How do we know what he is going to do? It is proposed here to authorize him to make regulations which in effect will be laws, and we simply grant blanket authority to do something about which we know nothing, merely upon the recommendation of the Secretary of the Interior, who does not condescend to place at our disposal the information upon which he bases his request. I rather incline to the belief that before we are called upon to act in an important matter of this sort the fullest information should be in our possession. There can be no good reason why we should not authorize

specific distribution rather than to permit some individual, though the Secretary of the Interior he may be, to make regulations to satisfy himself under which he can make distributions to these Indians. I do not know how much the particular Indians referred to have to their credit in the Treasury of the United States; neither does anybody else, I assume, unless it be the chairman of the committee and the members of the committee.

The CHAIRMAN. Does the gentleman make the point of order against the paragraph?

Mr. MADDEN. I reserve the point of order for the purpose of trying to elicit information from the members of the Indian Affairs Committee, who have doubtless given this matter careful and elaborate consideration. I reserve the point of order.

Mr. CARTER of Oklahoma. That is the longest question I ever heard, and I would be glad to reply to the gentleman if he is through.

Mr. MADDEN. I was not asking a question, I was offering a criticism.

Mr. CARTER of Oklahoma. If the gentleman will refer to the hearings, on page 252 he will find that the amount of money these Indians have to their credit is $812,646, and the Commissioner of Indian Affairs offers in justification of this the following:

The Indians on this reservation have shown a marked increase in their industrial activities during the past year, and it is believed that this is the most opportune time to assist them in their endeavors along this line. There is no authority of law at this time for making per capita payments to these Indians from their tribal funds. The proposed legislation will permit payments to be made from time to time under proper regulations.

Mr. MADDEN. It does not seem to me that that is any information at all.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MADDEN. Mr. Chairman, I feel constrained to make the point of order against the item.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

OKLAHOMA.

SEC. 16. For support and civilization of the Wichitas and affiliated bands who have been collected on the reservations set apart for their use and occupation in Oklahoma, including pay of employees, $5,000.

Mr. CAMPBELL of Kansas. Mr. Chairman, I wish some gentleman from Oklahoma would tell us just what is done with $5,000, whether or not it is for the support and civilization of the Wichitas and affiliated bands or the benefit of some white employee down there? I am serious about this.

Mr. CARTER of Oklahoma rose.

The CHAIRMAN. Does the gentleman from Kansas yield to the gentleman from Oklahoma?

Mr. CAMPBELL of Kansas. Yes; to any gentleman.

Mr. CARTER of Oklahoma. I do not want to take up any of the gentleman's time. When he gets through with his question I will be glad to answer it.

Mr. CAMPBELL of Kansas. I just want some explanation of this, if anybody can explain it.

The CHAIRMAN. To hasten the consideration of the bill the Chair suggests that some gentleman from Oklahoma give the gentleman the information.

Mr. CARTER of Oklahoma. If the gentleman is asking me for information, I will tell him that it is expended as these moneys are usually expended at the different agencies throughout the country, mostly, I assume, for employees. It will be expended as the money has always been expended in the past, for employees at the agencies.

Mr. CAMPBELL of Kansas. Does the gentleman from Oklahoma contend that that makes it right?

Mr. CARTER of Oklahoma. Let me answer the gentleman's question. It is appropriated for the purpose of being spent for employees, and not to be given to the Indians or distributed among them. It is for the purpose of paying agency employees who are presumed to look after the welfare of Uncle Sam's wards and not for annuities.

Mr. CAMPBELL of Kansas. Let me ask the gentleman from Oklahoma in what way it supports the Wichita and affiliated tribes?

Mr. CARTER of Oklahoma. In the way it does at every other agency.

Mr. CAMPBELL of Kansas. I wish the gentleman would give the House some idea as to the way in which it supports Indians in other agencies.

Mr. CARTER of Oklahoma. The gentleman has been a Member of the House and of the Indian Committee longer than I have and he knows full well how it is done.

Mr. CAMPBELL of Kansas. I wish the gentleman would tell us.

Mr. CARTER of Oklahoma. I would prefer to have the gentleman from Kansas do it.

Mr. FERRIS. Mr. Chairman, of course, the gentleman from Kansas knows that this item has not been changed since I have been in Congress.

Mr. CAMPBELL of Kansas. That is what I am complaining about. It has long whiskers on it.

Mr. FERRIS. Mr. Chairman, let me explain to the gentleman what I know about it, which may or may not satisfy him. There are about 1,100 Indians—and, by the way, there is a delegation here in town now, two Caddo and two Wichita—for whom this appropriation is made. This item provides for an Indian farmer, an Indian doctor, and some Indian matrons to help them with the leasing of their land. They have allotments, but little or no money—that is, the Wichita and Caddo Indians—and they are here now with a claim contending the Government took from them a portion of their land, all but the allotments, and gave it to the Kiowa and Comanches. The gentleman from Kansas knows about that——

Mr. CAMPBELL of Kansas. Yes.

Mr. FERRIS. So there is no claim, I understand, that any of this money is paid to them, but it is given to the clerks who give their service to them. The service seems perfectly necessary for these full-blood Indians. I am not in favor of any supervision for Indians that are practically white.

Mr. CAMPBELL of Kansas. It is put down there in cold type as being appropriated for the "support and civilization" of these Indians.

Mr. FERRIS. Well, I think all that is true, but the gentleman knows we carry that old language clear through the bill, and I really hope some time the gentleman from Kansas and the gentleman from Oklahoma [Mr. CARTER] will write this language so it will tell exactly what occurs.

Mr. CAMPBELL of Kansas. Let me ask this: Does the gentleman from Oklahoma [Mr. FERRIS], in whose district I think these Indians are——

Mr. FERRIS. Yes.

Mr. CAMPBELL of Kansas. And where the agency is located, think these people earn the $5,000 that is given to them?

Mr. FERRIS. Let me tell the gentleman what I know about that. Of course, this agency does not cost anything except the $5,000.

Mr. CAMPBELL of Kansas. Do they earn the $5,000?

Mr. FERRIS. I suppose they earn it as other employees do. This is a large agency. I think the officers there are faithful and honest. I think they work hard and earn their money. Some of them are underpaid.

Mr. CAMPBELL of Kansas. Is it worth the $5,000 to the Indians?

Mr. FERRIS. These are full-blooded Indians, as the gentleman from Kansas knows, and there is scarcely any mixed blood at all among them. Now, it takes $30,000 to run this entire Kiowa Agency, which is not a large sum, because this is one of the largest agencies in the United States from the standpoint of the Indians. There are 4,100 Indians under this agency, and this $5,000 comes out of the Treasury, and the other $25,000 comes from the Kiowas' and Comanches' funds. There is not an agency in the United States where as much administration is carried on, possibly, as here. Now, the gentleman from Kansas and myself are not in disagreement on this general theory of too much administration generally for Indians, but these are mostly full bloods. The gentleman knows my views about it, for I have always thought, as a general proposition, there was too much administration rather than too little. It makes weaklings and dependents out of them.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CAMPBELL of Kansas. Mr. Chairman, I wish to take a few minutes on this matter.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent to speak for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FERRIS. Will the gentleman yield for a question?

Mr. CAMPBELL of Kansas. I will.

Mr. FESS. I notice in the bill wording that would suggest a difference in meaning, and I am anxious to know what the meaning is. It says "for support and civilization." That runs through many paragraphs. Then, in line 24, it says "for support and education." I notice that differentiation all through the bill. Will the gentleman kindly explain?

Mr. CAMPBELL of Kansas. Where there is a school they use the word "education." Where there is no school they use the word "civilization."

Mr. FESS. Well, that would explain it if that is really what it is.

Mr. CAMPBELL of Kansas. I think that is the explanation. Now, as a matter of fact, the difficulty in abolishing these agencies, that are as useless as the fifth wheel to a wagon at this day and age, in ninety-nine cases out of a hundred—and I make that statement on the responsibility of a man who has studied the Indian question, visited these Indian agencies, and knows something about Indian matters—is that the people of Kansas are perfectly willing to have them abolished in Oklahoma and the people in Oklahoma are perfectly willing to have them abolished in Kansas. The trouble about it is when it comes to the abolishing of an agency in Oklahoma, where a friend of some Member of the Oklahoma delegation is the agent, there is a sort of easing over. The same is true when the agency is located in Kansas, in New Mexico, or anywhere else. I will say to my colleagues that the time has arrived to sacrifice our friends in these agencies, eliminate them from the public service in the interest of the Indians, and in the interest of good conscience and the Public Treasury.

Mr. FERRIS. Mr. Chairman, just a word or two and I will not take up over a minute. The gentleman from Kansas [Mr. CAMPBELL] tells the truth in his statement, as he always does, but I am perfectly frank in having the RECORD show the facts; there is not in my district to-day a single man, woman, or child in the Indian Service who owes his appointment to me. There is not a man in my district who has been appointed by Cato Sells on my recommendation—not one. That may be a very anomalous record, but it is the truth. Nevertheless, these people who are holding these offices are the same people who have been holding them ever since I have been in Congress and long before. We transfer them in the spring from Dakota to Oklahoma and in the fall from Oklahoma back to Dakota, and they are civil-service appointees and to my credit or discredit, as the case may be, there has not been any appointment made for me on my recommendation or very few that I was even in agreement with.

So far as any political consideration is concerned, I hope the gentleman from Kansas [Mr. CAMPBELL] will relieve me from that.

Mr. CAMPBELL of Kansas. I did not intend to make any impression on the House that these are political appointees. They are not. And I will say this, that they are absolutely useless to any man in public life as political friends. If others have been favored, they are certainly holding out on me, for I have none.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word.

I want to discuss a matter relating to this bill, although it is not in this paragraph any more than in any other paragraph. I notice there is a lump-sum appropriation carried in this bill of $150,000 to suppress the alcoholic liquor traffic among the Indians. I assume also that a part of the money that is spent in the civilization and education of Indians is for the purpose, as far as possible, of keeping them away from demoralizing influences of that kind. But at any rate we are spending $150,000 flat, paying some Government employees for suppressing the liquor traffic among the Indians.

Now, the fact of the matter is, I believe, that the liquor traffic among the Indians is largely carried on by bootleggers and other persons who are selling liquor illegally; that is, they are selling it in violation of the law of the State or community in which they are operating. That certainly must be true in the State of Oklahoma. And yet the United States itself is collecting a tax or revenue from those very bootleggers and illegal sellers of liquor.

That matter has been presented to the Commissioner of Internal Revenue under various administrations. I have presented it under two different administrations myself. The attitude taken by the Commissioner of Internal Revenue is that the Federal liquor tax is not a license, that the Government just simply collects revenue from a man who admits he is in the business or wants to engage in it, and it does not authorize him to violate any State law. Now, technically that is true, and yet the Federal Government license is looked upon as a protection against prosecution in the Federal court. A Federal court prosecution is the only prosecution that a bootlegger is much in fear of. Now, the Federal Government through its Commissioner of Internal Revenue has agents out locating these bootleggers all the time, and whenever they locate one he simply pays $25 and gets off. He takes his chances until he is caught, and then he pays a tax of $25 and escapes prosecution. Thus the traffic continues among the Indians. In the cities now where soldiers are beginning to congregate, and where they pass through frequently, there are a large number of bootleggers, disreputable hotels, rooming houses, whisky drug stores, and other establishments of that kind where they sell whisky to the man in uniform; or, at least, they make no distinction.

Mr. FERRIS. Will the gentleman yield?

Mr. BORLAND. In just a minute. I want to develop this idea. The police authorities of the cities are supposed to keep the cities safe for the soldiers.

A man who pays $500 to the city of Kansas City and another $500 to the county and State of Missouri, making $1,000 for his liquor license, is not going to put himself in jeopardy by disobeying the police regulations of Kansas City. But here is a multitude of blind tigers and rooming houses and druggists engaged in selling liquor. I have a statement here that shows that the Government has issued 1,225 Government liquor licenses in Kansas City. The authorized number of places to sell liquor in Kansas City is 469, but the Government is collecting revenue from 1,225. Yet we are spending $150,000 a year to try to suppress the illegal traffic among the Indians. We are also maintaining an expensive bureau to keep liquor away from the soldiers. The way to suppress it is to have the Government quit being a partner in that iniquitous business. That is the only way to suppress it and the only way in which it will ever be suppressed. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

The Clerk read as follows:

That the third paragraph of section 4 of the act of June 28, 1906 (34 Stat. L., p. 539), is hereby amended to provide that the moneys therein provided for support for Osage schools may be used for the purposes as provided in said paragraph for a further period ending June 30, 1922: *Provided*, That after June 30, 1918, said moneys may be expended solely for the payment of the superintendent, teachers, and for maintenance of the grounds and buildings; and that the support of each pupil attending said school shall be paid by the Secretary of the Interior out of any annuities, interest, lease rentals, royalties, or any trust funds due said pupil, not exceeding the sum of $300 annually: *Provided further*, That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States, at his discretion, the sum of $20,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma, for the support and education of 75 pupils at the St. Louis Mission Boarding School, near Pawhuska, Okla., and 100 pupils at the Osage Indian School at Pawhuska, Okla., including pay of superintendent, to be immediately available.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. I rise largely to inquire as to the reason for limiting this appropriation as provided in the last paragraph of the proviso to certain schools, as indicated therein. What is the necessity for that authorization?

Mr. CARTER of Oklahoma. I will yield to the gentleman from Oklahoma [Mr. CHANDLER].

Mr. CHANDLER of Oklahoma. I will state for the gentleman's benefit that there has been a contract in regard to the St. Louis Mission Boarding School to take care of 75 pupils, and that was limited to that school on account of said contract. Now, as to the Osage Indian School at Pawhuska, that is a school that has been maintained heretofore by the Osage Tribe of Indians. It was maintained for years before statehood by that tribe of Indians, and in order to thoroughly understand it it will be necessary to go back to the time of the Osage allotment act, in which the Osage Indians agreed to divide up their land and money; and as that was before statehood, the Indians desired their school to continue for a period until after statehood, and they provided that this Osage Indian School should continue for 10 years, or until 1916. In 1916, by act of Congress, you extended it for two years longer, or until January 1, 1918.

Now, for some reason the Interior Department desires it continued for 13 years longer. The Indians do not want it, except a few of the full-blood Indians, or a few of the Indians that desire that the remainder of the tribe take care of their children. And after a conference with a number of the members of the tribe we reached an agreement or understanding with them that if the tribe as a whole would take care of this school and pay the superintendent and teachers and maintain the grounds and buildings—and provision was made that each child should pay for its own support—that they had no objections to its being continued for a short time longer; and, based upon that, we put this paragraph in the bill.

Mr. STAFFORD. As I understand from the gentleman's statement, authority to utilize the Osage Indian trust funds expired on January 1 of this year?

Mr. CHANDLER of Oklahoma. Yes, sir.

Mr. STAFFORD. Does this authorization in language provide for the utilization of this fund for the period between January 1, 1918, and the time that this bill is approved?

Mr. CHANDLER of Oklahoma. Yes, sir.

Mr. STAFFORD. Wherein is there any language that authorizes the utilization of that fund? The language says—and it may be ambiguous—

is hereby amended to provide that the moneys therein provided for the support of Osage schools may be used for the purposes as provided in said paragraph for a further period ending June 30, 1922.

Of course this law will be construed to take effect from the date of its approval. Where is there an authorization to pay for the schooling out of this appropriation——

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. STAFFORD. Where is the authorization to provide for the payment of these pupils out of this trust fund from January 1, 1918, when the prior authorization terminated, until the time this bill will take effect?

Mr. CHANDLER of Oklahoma. I will state for the gentleman's benefit that the last proviso in the paragraph appropriates $20,000, to be immediately available, and that was placed in there for the purpose of taking care of the school from the 1st of January, this year.

Mr. STAFFORD. As I understand it, that merely provides for two schools. This authorization that the gentleman seeks to have extended until June 30, 1922, applies to the utilization of this fund for other schools.

Mr. CHANDLER of Oklahoma. No; it does not. It applies only to the Osage Indian school. That is the only school that the old law provided for.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. HASTINGS. I suggest the insertion of these words: After the word "period," in line 4, page 39, the words "from January 1, 1918, and ending June 30, 1922." That would lead back to January 1 of this year.

Mr. STAFFORD. That is the amendment I was going to offer in case my position was confirmed by the gentleman from Oklahoma.

Mr. CHANDLER of Oklahoma. I have no objection.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order and offer the following amendment: After the word "period," in line 4, page 39, insert the words "beginning January 1, 1918, and."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 39, line 4, after the word "period," insert "beginning January 1, 1918, and."

Mr. STAFFORD. So that it will read——

The Clerk read as follows:

So that it will read: "as provided in said paragraph for a further period beginning January 1, 1918, and ending June 30, 1922."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

That paragraph 4, section 4, of the Osage act approved June 28, 1906 (34 Stat. L., p. 539), and the act of Congress approved April 18, 1912 (37 Stat. L., p. 88), authorizing expenditures from Osage tribal funds of not exceeding $40,000 for agency and emergency purposes, is hereby amended to read as follows:

"Fourth. That such sums as may be annually appropriated by Congress shall be set aside and reserved from the royalties received from oil, gas, or other tribal mineral rights or other tribal funds, however arising, for agency purposes, which money when appropriated shall be paid out from time to time upon the requisition of the Osage tribal council with the approval of the Secretary of the Interior: *Provided*, That the provision in the act entitled 'An act making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes,' approved June 7, 1897 (30 Stat L., p. 90), limiting the amount of money to be expended for salaries of regular employees at any one agency shall not hereafter apply to the Osage Agency."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order. I think this deserves some explanation on the part of the committee, as it changes existing law and may involve a very important provision of the law.

Mr. CHANDLER of Oklahoma. Mr. Chairman, for the benefit of the gentleman I will state——

Mr. STAFFORD. Before the gentleman proceeds, will he inform the committee whether this was recommended by the department?

Mr. CHANDLER of Oklahoma. It was not.

Mr. STAFFORD. Then there is nothing in the hearings relative to it?

Mr. CHANDLER of Oklahoma. No.

Mr. STAFFORD. Then it certainly deserves an explanation.

Mr. CHANDLER of Oklahoma. This is a case where the department has been transferring funds from one fund to another, paying employees and others out of funds belonging to the Osage Tribe of Indians. The Osages are opposed to the procedure and ask that the amounts be separated and that the department be required to furnish statements covering all their expenditures.

Now, heretofore there has been a continuous appropriation of $40,000 to run the agency. They have used that $40,000 and at times used sums from other funds belonging to the Osage Tribe of Indians. We have changed this law so that they can not expend any funds whatever until they are appropriated by Congress. We provide that they shall be appropriated annually and that they can not be expended until they are appropriated. The new law is practically the same as the old law, with the exception of these words that are added to the old law: "That such sums as may be annually appropriated by Congress," and then, on line 11, "when appropriated." These words are not included in the old law.

Now, the old law has, I say, a continuous appropriation of $40,000. We have left that out and kept the law exactly as the old law is with that exception. It simply cuts out the continuous appropriation and provides that the Congress shall supervise all appropriations made heretofore in regard to running the Osage Agency.

Mr. STAFFORD. If the gentleman will permit an inquiry, as I understand it, under existing law, the amount that is limited for use for such purposes is $40,000?

Mr. CHANDLER of Oklahoma. Yes, sir.

Mr. STAFFORD. Now, you seek by this amendment to lift that restricted amount and allow this fund to be utilized to any extent that Congress may appropriate?

Mr. CHANDLER of Oklahoma. Yes.

Mr. STAFFORD. What is the justification for that?

Mr. HASTINGS. You mean to say that it allows any amount that Congress appropriates?

Mr. CHANDLER of Oklahoma. That is what I intended to state.

Mr. HASTINGS. It means the amount annually appropriated by Congress?

Mr. CHANDLER of Oklahoma. Yes.

Mr. HASTINGS. And it brings the amount back to Congress each year—the amount that is appropriated and the amount that is necessary to be appropriated?

Mr. CHANDLER of Oklahoma. Yes.

Mr. STAFFORD. In other words, under existing law any amount can be used in addition to the amount named in the annual appropriation?

Mr. CHANDLER of Oklahoma. Yes.

Mr. HASTINGS. As I understand it, there was used for administrative purpose $48,000, including $8,000 out of the school fund. Is that right?

Mr. CHANDLER of Oklahoma. Yes; $48,000, including $8,000 out of the school fund.

Mr. HASTINGS. The purpose of this amendment is to limit the amount of these funds to the annual appropriation made by Congress?

Mr. CHANDLER of Oklahoma. Yes.

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. STAFFORD. I ask unanimous consent, Mr. Chairman, to proceed for five minutes more.

Mr. WILLIAMS. I object.

The CHAIRMAN. The gentleman from Illinois objects.

Mr. STAFFORD. Therefore, Mr. Chairman, I am compelled on this important item to make the point of order.

The CHAIRMAN. Does the gentleman insist on the point of order?

Mr. STAFFORD. Yes; I insist. There is nothing in the hearings about this matter, and there is nothing recommended by the department. I make the point of order.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read:

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, not to exceed the sum of $60,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma, for the support of the Osage Agency and pay of employees of said agency.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. CARTER of Oklahoma. What was the paragraph against which the last point of order was made?

The CHAIRMAN. Beginning at line 24, on page 39, and ending at line 23, on page 40.

Mr. CARTER of Oklahoma. I ask unanimous consent that we may return to that item and discuss it for five minutes, in order to dispose of the matter and perhaps satisfy the gentleman from Wisconsin.

The CHAIRMAN. Does the gentleman from Oklahoma ask unanimous consent that the point of order be withdrawn?

Mr. STAFFORD. Oh, no; with the point of order still pending.

The CHAIRMAN. The Chair sustained the point of order, as far as that is concerned.

Mr. CARTER of Oklahoma. The gentleman has knocked it out on his point of order. Now, I ask unanimous consent that we may return to the paragraph which has been stricken out, for five minutes' discussion, to see if we can satisfy the gentleman from Wisconsin [Mr. STAFFORD] and get him to withdraw his point of order.

Mr. WALSH. Reserving the right to object——

Mr. CAMPBELL of Kansas. And, coupled with that, that the Chair withdraw his decision and that the point of order be pending.

The CHAIRMAN. That request was not made before. The Chair was going to call attention to that. The gentleman from Oklahoma asks unanimous consent that the proceedings sustaining the point of order made by the gentleman from Wisconsin be vacated and that we return to the paragraph beginning on line 24, page 39, and ending in line 23, page 40, for the purpose of five minutes' discussion. Is there objection?

There was no objection.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph. Here is a paragraph that has not been recommended by the department. There is nothing in the hearings relating to it. I am seeking information as to the need for this amendment—whether it protects the Indians or whether it will not protect them.

Mr. CARTER of Oklahoma. I yield to the gentleman from Oklahoma [Mr. CHANDLER] to reply to the question.

Mr. CHANDLER of Oklahoma. The purpose of this clause is to protect the Indians, so that the Interior Department shall make a report to them each year as to how these funds are spent and what becomes of them. Heretofore it has been unnecessary for the department to make a report of any kind, and they have gone ahead and spent not only these funds but school funds for agency purposes. The members of the Osage Tribe are not incompetent Indians by any means, and they would like to know what becomes of their money. This places a check upon the Interior Department and compels them to furnish a statement of these expenditures each year.

Mr. STAFFORD. How much money has been expended in former years out of this fund in excess of $40,000?

Mr. CHANDLER of Oklahoma. Practically every year there has been an expenditure of anywhere from $5,000 to $15,000 above the $40,000.

Mr. McKENZIE. Will the gentleman yield right there?

Mr. STAFFORD. Yes.

Mr. McKENZIE. Is not one of the purposes of this proposed amendment to prevent the diverting of money from one fund belonging to the Indians to another fund——

Mr. CHANDLER of Oklahoma. Exactly.

Mr. McKENZIE. Without the authorization of Congress permitting that diversion?

Mr. CHANDLER of Oklahoma. Exactly.

Mr. McKENZIE. And in that way it is a protection to the Indians; and the fact that the Interior Department did not recommend it is perhaps due to the fact that it was not called to their attention.

Mr. STAFFORD. I am not casting any reflection on it because the department did not recommend it, but the fact remains that there is nothing in the hearings on this item to justify it or that refers to it, and it devolves upon some one to make an inquiry to see whether it is warranted under existing facts.

Mr. CARTER of Oklahoma. The fact is that here is an amount of money that was to have been used for schools, and part of it has been diverted for agency purposes. The principal purpose which this item will serve will be to make a division of those matters and present information to Congress, so that it can a little more intelligently appropriate the money in the future.

Mr. HASTINGS. Each year.

Mr. STAFFORD. On the explanation made I withdraw the point of order.

The CHAIRMAN. The gentleman withdraws the point of order, and the Clerk will read.

Mr. STAFFORD. I also withdraw the reservation of the point of order on the paragraph at the top of page 41, because, as I understand, that is allied to the matter that has been agreed to.

The CHAIRMAN. The gentleman also withdraws the point of order reserved against the paragraph beginning with line 1 and ending with line 6, on page 41, and the Clerk will read.

The Clerk read as follows:

FIVE CIVILIZED TRIBES.

SEC. 17. For expenses of administration of the affairs of the Five Civilized Tribes, Oklahoma, and the compensation of employees, $185,000: *Provided*, That a report shall be made to Congress by the Superintendent for the Five Civilized Tribes, Oklahoma, showing in detail the expenditure of all moneys appropriated by this provision.

Mr. KNUTSON. Mr. Chairman, I should like to ask the chairman of the committee a question, if I may.

Mr. CARTER of Oklahoma. Certainly.

Mr. KNUTSON. In line 10 it is provided—

That a report shall be made to Congress by the Superintendent for the Five Civilized Tribes, Oklahoma, showing in detail the expenditure of all moneys appropriated by this provision

Why is not that same safeguard thrown around other appropriations made for other States? I want to say to the gentleman that we have been trying for years to get a detailed statement from the Indian Department of moneys expended belonging to the Chippewa Indians, and we have not been able to do it. Now, why has not this provision been inserted in other appropriations?

Mr. CARTER of Oklahoma. Perhaps the gentleman who preceded the gentleman from Minnesota was not as zealous as the gentleman has been. That is the only explanation I can give of that.

Mr. HASTINGS. That provision ought to be inserted.

Mr. CARTER of Oklahoma. I think the gentleman has a provision in the bill now which will get the result he wants.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized to pay to the enrolled members of the Choctaw and Chickasaw Tribes of Indians of Oklahoma entitled under existing law to share in the funds of said tribes, or to their lawful heirs, out of any moneys belonging to said tribes in the United States Treasury, or deposited in any bank or held by any official under the jurisdiction of the Secretary of the Interior, not to exceed $200 per capita, said payment to be made under such rules and regulations as the Secretary of the Interior may prescribe: *Provided*, That in cases where such enrolled members, or their heirs, are Indians who by reason of their degree of Indian blood belong to the restricted class, the Secretary of the Interior may, in his discretion, withhold such payments and use the same for the benefit of such restricted Indians: *Provided further*, That the money paid to the enrolled members or their heirs, as provided herein, shall be exempt from any lien for attorneys' fees or other debt contracted prior to the passage of this act: *Provided further*, That the Secretary of the Interior is hereby authorized to use not to exceed $8,000 out of the Choctaw and Chickasaw tribal funds for the expenses and the compensation of all necessary employees for the distribution of the said per capita payments.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word, for the purpose of obtaining a little information. My memory is pretty good, but I wish to inquire whether this item is the one that in years immediately gone has been provocative of serious attacks from certain Representatives from Mississippi?

Mr. CARTER of Oklahoma. This is the one.

Mr. STAFFORD. Has there been some entente cordiale entered into between the gentlemen from Oklahoma and the gentleman from Mississippi whereby this item will no longer be contested?

Mr. CARTER of Oklahoma. The gentleman's suspicions are entirely unfounded, so far as I am concerned. The gentleman from Mississippi [Mr. HARRISON] last year announced that he knew when he was licked and that his fight was over. He made an attempt yesterday to get an appropriation out of the Federal Treasury of $150,000 in the bill, to which I made a point of order, as the gentleman from Wisconsin knows, and that ought to show pretty clearly my position on the matter. If there had been any such agreement as the gentleman speaks of the point of order would not have been made by me yesterday.

Mr. STAFFORD. I am glad to have the open statement of the gentleman that he will resist the claim for further aid for the Choctaws of Mississippi, either out of the trust funds of the Indians in Oklahoma or the larger trust funds in the Treasury of the United States.

Mr. CARTER of Oklahoma. I think my position on that question is pretty well known.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized to pay to the enrolled members of the Creek Tribe of Indians of Oklahoma entitled under existing law to share in the funds of said tribe, or to their lawful heirs, all moneys except $50,000 belonging to said tribe in the hands of the United States Treasurer, or deposited in any bank, or held by an official under the jurisdiction of the Secretary of the Interior on June 30, 1918, the payment to be made in such a way as to equalize the pro rata share received by each member of said tribe, either in land or money of the tribe, taking into consideration the value of the land heretofore allotted and the money received by

each member: *Provided*, That said payment shall be made under such rules and regulations as the Secretary of the Interior may prescribe: *Provided further*, That in cases where such enrolled members or their heirs are Indians belonging to the restricted class, the Secretary of the Interior may, in his discretion, withhold such payments and use the same for the benefit of such restricted Indians: *Provided further*, That the money paid to the enrolled members or their heirs, as provided herein, shall be exempt from any lien for attorney's fees or other debt contracted prior to the passage of this act: *Provided further*, That the Secretary of the Interior is hereby authorized to use not to exceed $5,000 out of said moneys for the payment of salaries of all necessary employees and other expenses for the disbursement of said moneys, as herein provided.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order. Is this the item where it purposes to distribute all the funds remaining in the Treasury to the credit of the Creek Tribe?

Mr. CARTER of Oklahoma. Yes.

Mr. STAFFORD. Why is the $50,000 reserved?

Mr. CARTER of Oklahoma. To pay the tribal chiefs and the tribal attorney and such officials as are necessary to continue the Creek Tribe of government until the matters are wound up. The gentleman from Oklahoma [Mr. HASTINGS] is familiar with that.

Mr. HASTINGS. Mr. Chairman, the Creek Tribe has a chief and certain officials that are continued, and it also has a national attorney. This amendment was submitted to the Commissioner of Indian Affairs, who approved it, as the hearings will show, and it was submitted to the national attorney of the Creek Tribe, who approved it. So it has been approved by the Creek Tribe and by the Commissioner of Indian Affairs, both as to the amount and the language. I consulted the national attorney for the Creek Tribe, as well as the Commissioner of Indian Affairs, as to the amount necessary to be reserved, and the amount of $50,000 was reserved on the suggestion made by the Creek national attorney.

Mr. STAFFORD. How much is there involved here?

Mr. HASTINGS. About $2,145,000.

Mr. STAFFORD. That is to be divided up among how many?

Mr. HASTINGS. There are 18,774 enrolled Creeks. It is not divided equally; it equalizes their allotment. It is to be divided, for equalizing purposes, according to existing law, and it is owing to how much an allottee heretofore received. Some were allotted more land than others, and it is according to the amount of land that the allottee in the Creek Tribe received. For instance, the maximum amount, or the basis of the allotment, was $1,040. The maximum amount that anyone could receive in land or money would be $1,040. If he received in land $1,040, he would not receive any money at all until the other members of the tribe had received that amount, either in land or money or both. Suppose an allottee received $760 in money or land; he would receive the difference between that and the amount he is entitled to receive. In other words, this money is to be used to equalize the allotments of the Creeks to an amount so that, as far as it can, it will equalize them and treat them all alike. If the Creek funds are insufficient to equalize all to $1,040, they are to be used to equalize them to an equal amount.

Mr. STAFFORD. Some will receive larger payments than others?

Mr. HASTINGS. Yes.

Mr. STAFFORD. But no one in excess of $1,040, the original allotment?

Mr. HASTINGS. No.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. How long does the gentleman estimate will be necessary to wind up the affairs of the Creek Nation under this provision?

Mr. HASTINGS. I am trying to do everything I can to get them wound up as quickly as possible. The land is all sold except a few town lots, and some of them occupied by squatters, and these are in litigation. They ought to be wound up in two years.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order.

The Clerk read as follows:

The sum of $275,000, to be expended in the discretion of the Secretary of the Interior, under rules and regulations to be prescribed by him, to aid of the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations and the Quapaw Agency in Oklahoma, during the fiscal year ending June 30, 1919: *Provided*, That this appropriation shall not be subject to the limitation in section 1 of this act limiting the expenditure of money to educate children of less than one-fourth Indian blood.

Mr. NORTON. Mr. Chairman, I would like to inquire of the gentleman from Oklahoma when it may be expected that the time will be reached when it will not be necessary for the Government to make this appropriation of $275,000 to aid the public schools of Oklahoma.

Mr. CARTER of Oklahoma. Mr. Chairman, that appropriation was put in the Indian appropriation act in 1904, before I came to Congress.

Mr. NORTON. It has been paid, then, for the last 14 years.

Mr. CARTER of Oklahoma. No; it has not. If the gentleman will permit me to proceed, I will give him the information I have. It was placed in the bill in 1904, as I recollect, the amount being $300,000. It was placed in the bill when the east side of our State was a Territory. We had no taxable land and no method by which to operate the schools for white persons. When the statehood act passed, all lands on the east side of the State were nontaxable. There was not one dollar of taxable property outside of some little towns, and they were small because they were Indian lands. So the appropriation was continued for one year after statehood, and then there was passed an act on May 27, 1908, making certain lands taxable. After that it was thought that enough lands would be taxable to furnish a fund to operate the schools, but the Indians brought suit on the constitutionality of the act, and in the case of Choate against Trapp in the Supreme Court of the United States it was decided that none of these lands were taxable so long as the title remained in the original allottee. So that makes practically the entire east side of the State, where my friend has been, embraced by nontaxable land. Land, as the gentleman knows, is the principal asset for taxation in any country. These lands are becoming taxable, and if they do become taxable this appropriation can be dispensed with.

Mr. NORTON. What is the assessed value of the State of Oklahoma?

Mr. CARTER of Oklahoma. I can not give the gentleman the information. In some parts of the country it is very great and in some very small.

Mr. NORTON. With its present population, as I recall it, it has about the same per capita assessed valuation as the average Western State. It occurs to me that the time has about been reached when there is no real justice in making this appropriation. There are vast properties in the eastern part of Oklahoma to-day that are subject to taxation, including enormous oil and gas interests. Some of these lands of which the gentleman from Oklahoma [Mr. CARTER] speaks are now owned by others than the original allottees and are taxable and constitute the most valuable properties in the State.

Mr. CARTER of Oklahoma. None of this money is used in that part of the State where taxation will support public schools. In the counties of Carter, Le Flore, McCurtain, and Bryan, and some counties up in the district of my friend from Oklahoma [Mr. HASTINGS], you will find that some of them have very little taxable property. Where the oil properties exist there is considerable taxable value, not the oil land itself, because in some cases they themselves are nontaxable, the title still being in the original allottee. But in other counties there is very little taxable property. If the gentleman had gone with me, as did the gentleman from California [Mr. ELSTON], and the gentleman from South Dakota [Mr. GANDY], he would have seen the difference in that part of the State, but the gentleman from North Dakota was called to another section, which is the wealthy part of the State.

Mr. NORTON. Yes; I did not observe any great poverty or distress in the sections of the State where I visited last spring. I did not observe any need for any appropriation of this kind. It seemed strange to me that the Representatives from Oklahoma should be so opposed to any legislation providing for the use of Indian funds for the education of Indian children, when they are so willing to accept a gratuity of this large sum of $275,000 from the Federal Government for the same purpose. I observed on page 40 of the bill that, under the item for the school at Pawhuska, in the Osage Nation, where the Indians have vast sums of money to their credit, where their incomes run up to about $4,000 per capita each year, the gentlemen from Oklahoma had incorporated legislation greatly limiting the expenditure of that money for school purposes. Perhaps a part of this $275,000 will be used in educating some of the children of the Osage Nation instead of using the funds of the tribe to educate them.

Mr. CHANDLER of Oklahoma. Mr. Chairman, I will state for the benefit of the gentleman that the entire amount appropriated, on pages 39 and 40, is paid out of the Osage trust funds, and no portion of the $275,000 goes up to that part of the country. In fact, that portion of the country does not want any of it.

Mr. NORTON. I am glad to hear from the gentleman that no part of this is used in that section of the State. It had occurred to me that it would be well to maintain that school up

at Pawhuska, as it has been maintained in the past out of Indian funds. I shall not be greatly surprised if in future years the delegation from Oklahoma are found requesting from Congress appropriations out of the Public Treasury to maintain that school.

Mr. CHANDLER of Oklahoma. I will state for the benefit of the gentleman, that as long as I am in Congress we will not ask for any funds to maintain the Osage Indian school or any other Indian school up in that part of the country, and so far as the Osage Indians are concerned, they would like to see the school discontinued, as they are paying taxes now on 497 acres of land, each man, woman, and child, and in addition to that they are paying taxes on a lot of inherited lands and they have a fine public-school system that they are maintaining by taxation in that county.

Mr. NORTON. In view of the promise the gentleman has made, I sincerely trust he remains in Congress for many, many years. I heard the Osage Indians testify in this matter at Pawhuska last spring, and from that testimony I was impressed by the fact that practically every one of the full-blood Osage Indians desired to have this school continued. There were a few renegade whites and some mixed-blood Osage Indians who desired to have the school discontinued. These were the only class of people at all interested in the school that I found who wanted the school discontinued.

The CHAIRMAN. The time of the gentleman from North Dakota has expired, and the Clerk will read.

The Clerk read as follows:

For the salaries and expenses of not to exceed three oil and gas inspectors and necessary clerks and field assistants, under the direction of the Secretary of the Interior, to supervise oil and gas mining operations on allotted and tribal lands in the State of Oklahoma from which restrictions have not been removed, and to conduct investigations with a view to the prevention of waste, $15,000.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. I have examined the hearings to try to find some testimony as to the reason why the committee reduced the department's estimate of six oil and gas inspectors to three, and I find no examination in the hearings by the members of the committee. The only thing that is included is the formal report of the department justifying the continuance of these six oil inspectors. What was the reason the committee took this drastic action in reducing the force by half without the recommendation of the department?

Mr. CARTER of Oklahoma. Mr. Chairman, the gentleman from Oklahoma [Mr. CHANDLER] furnished the committee some information on which the committee thought it was justified in making this reduction. He furnished the committee the information as to what these gentlemen did, and after taking that into consideration we thought that a less number of men might be able to do with less money. If the gentleman from Oklahoma [Mr. CHANDLER] desires to make a statement, I gladly yield to him.

Mr. SNYDER. Mr. Chairman, if the gentleman from Wisconsin will permit, I will say there was an investigation made about this matter, but we did not have the commissioner before us at the time. We were unable to find that any of these men were doing any actual service and upon further talk in the committee it was determined that we ought to leave them a certain number; that there must be some work for some of them to do, although no committeeman had any real knowledge that any one of these inspectors was doing any actual work.

Mr. STAFFORD. Then, as I understand the gentleman's position, it is that there was sufficient testimony presented by the members upon which you could safely eliminate three?

Mr. SNYDER. My own wish was to strike them all out, because I could not find that any of them was doing anything for the benefit of the service.

Mr. STAFFORD. I want to compliment the committee on eliminating some Indian force that they thought was needless, and I hope next year they will be able to eliminate all of this supplementary force that apparently does nothing in addition to the work of the State officers except to draw their salaries.

Mr. CARTER of Oklahoma. We eliminated a school which the gentleman helped to put back in the bill.

Mr. STAFFORD. The gentleman is mistaken as to my having assisted to restore any such item. I withdraw the pro forma amendment.

Mr. CARTER of Oklahoma. Mr. Chairman, I ask unanimous consent that we may turn now to page 59 of the bill, to the paragraph beginning at line 7, in order that the gentleman from Washington [Mr. JOHNSON] may make a short statement in respect to it, as he is compelled to leave town on account of important business.

The CHAIRMAN (Mr. LEVER). The gentleman from Oklahoma asks unanimous consent to turn to the portion indicated on page 59 of the bill and to read that section. Is there objection?

There was no objection.

The Clerk read as follows:

For the construction of a road across Point Grenville on the Quinault Indian Reservation, Wash., $22,500, to be immediately available and to be reimbursed from any funds now or hereafter placed in the Treasury to the credit of the Quinault Indians, to remain a charge and lien upon the lands and funds of said tribe of Indians until paid.

Mr. JOHNSON of Washington. Mr. Chairman and gentlemen of the committee, I desire to thank the chairman and others for giving me permission to make this statement at this time. This item which would authorize the Indians to commence the construction of a road with money with which they expect to repay the Government in a short time is of most supreme importance. The Government is calling on the people of western Washington for many times as much spruce as can be furnished. Spruce timber has now reached the price in the forest, in the tree, of about $7.50 a thousand feet, board measure. Not all of these spruce trees in this great Indian forest can be utilized for aeroplane stock. About one large tree in every six is available. These trees are to be cut out by hand. The road is then necessary to find some way to get it to tidewater or to transcontinental railroad terminals. This is to provide money for a portion of such road. The War Department has offered to go in at once and commence the construction of a road with this money. Rived spruce, hand hewn, of the right kind is selling right now at $90 a thousand feet, no piece measuring smaller than 6 by 8 inches, with the heart cut out, and in addition to the price of $90 a thousand feet a bonus of $40 a thousand feet is being paid up to the 31st day of January. After that time the bonus is $30 a thousand feet, so there is now the greatest incentive for small cruiser men, including new crews, to go into this great forest and find these large spruce trees and get them out to assist the Government in its great necessity for spruce that will make aeroplane stock. I have many indorsements here of this item not only from the War Department but from the Indian Office and the Interior Department, and I hope the point of order will not be raised.

Mr. STAFFORD. Will the gentleman yield?

Mr. JOHNSON of Washington. With pleasure.

Mr. STAFFORD. Is it purposed to build this railroad from a definite point to another part of the reservation?

Mr. JOHNSON of Washington. The paragraph says "for the construction of a road across Point Grenville," and I should like right there to amend that by striking out, in line 7, after the word "road," the words "across Point Grenville."

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Washington: Page 59, line 7, after the word "road," strike out the words "across Point Grenville."

Mr. STAFFORD. Mr. Chairman, will the gentleman yield in that particular?

Mr. JOHNSON of Washington. I will.

Mr. STAFFORD. It is not the purpose at all to increase the appropriation to be required for building this road. As I understand, it is only to give the department a larger leeway, so that they may build a road to the military road——

Mr. JOHNSON of Washington. Yes; and I have a letter here from the Indian Department suggesting that those words might be too tight a limitation when the engineers have found where was the best place to locate the road.

The question was taken, and the amendment was agreed to.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized and directed to sell at a price to be fixed by him, which shall not be less than the appraised value, to the State of Oklahoma for a game preserve lands of the Choctaw and Chickasaw Tribes of Indians in Oklahoma described as sections 1, 2, 11, 12, 13, 14, 23, 24, 25, and 26, township 3 south, range 25 east, and sections 5, 6, 7, 8, 17, 18, 19, 20, 29, and 30, township 3 south, range 26 east, containing in all 12,800 acres, more or less: *Provided*, That any lands heretofore allotted and conveyed to allottees of the Choctaw and Chickasaw Tribes of Indians, or sold at sales heretofore held to purchasers of tracts of land within said area thus described shall be excepted from such sale.

Mr. STAFFORD. Mr. Chairman, reserving the right to object, is it the intention to establish a game preserve similar to that established more or less on paper in the State of Kansas?

Mr. CARTER of Oklahoma. I do not know anything about the game preserve in Kansas, but this is for the purpose of buying some mountain land there from the Choctaw Nation at not less than its appraised value, the price to be fixed by the

Secretary, the State to purchase it and administer it as a State game preserve.

Mr. STAFFORD. Has any action been taken by the State?

Mr. CARTER of Oklahoma. Yes; the State has appropriated a fund for the purpose.

Mr. STAFFORD. And it is going to be an established institution?

Mr. CARTER of Oklahoma. Yes.

Mr. STAFFORD. To be maintained hereafter without expense to the Federal Government?

Mr. CARTER of Oklahoma. The State has already appropriated the fund for the purchase of this game preserve.

Mr. STAFFORD. And there will be no further charge upon the National Treasury if this preserve is established?

Mr. CARTER of Oklahoma. The only tax we will make on the Federal Government is to ask the gentleman to come down and take a look at a deer occasionally.

Mr. STAFFORD. We have plenty of deer in northern Wisconsin, which I had the pleasure of seeing last October and November; quite an attraction.

The Clerk read as follows:

That all claims against the Cherokee Nation, including claims to unpaid per capita and equalization money, which may now be paid under existing law out of the funds of the Cherokee Nation in the Treasury of the United States or otherwise in the hands of the Government, shall be filed, not later than one year from the date of the approval of this act, with the superintendent for the Five Civilized Tribes or such other person as the Secretary of the Interior may designate, and under such rules and regulations as said Secretary of the Interior may prescribe to govern the filing, determining and settlement of said claims, and the claims so submitted and filed shall be considered and adjudicated under said rules and regulations not later than six months after the expiration of the time above limited for the filing of the claims, and shall, if approved by the Secretary of the Interior, be paid out of the tribal funds of the Cherokee Nation. Upon the expiration of the time limited in this act claims against the Cherokee Nation shall be forever barred, and all of said tribal funds then remaining to the credit of the Cherokee Nation shall be expended under the direction of the Secretary of the Interior for building and furnishing an additional dormitory for the Cherokee Orphan Training School, near Tahlequah, Okla.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph. What is the purpose of placing a limitation upon the presentation of claims upon the funds of the Cherokee Nation as provided in this paragraph?

Mr. HASTINGS. Let me say to the gentleman that the affairs of the Cherokee Tribe of Indians are completely wound up. There were 41,824 on the roll. Certain equalization payments have been made and certain small per capita payments have been made to the enrolled members of the tribe. The last three payments were fifteen, twelve, and three-thirty, respectively. The rolls were made as of date of September 1, 1902, some 15 or 16 years ago. About one-third of the enrolled members of the tribe are dead, so a great many of them did not apply in person for the small equalization balances. The allotments were made upon the basis of $325.60 each. A great many of them, for instance, took $325 in land, which left 60 cents due them.

It left 60 cents due the allottee. Later, it was provided by act of Congress that double the value of the land an allottee was deficient should be paid him in money, so that there might be only a few dollars due an allottee.

Now, as I said a few moments ago, some 10,000 or 15,000 of these allottees are dead. The heirs of a great many of them can not be found. They have removed from the State; others do not apply; so that there are those little driblets of money that are left to the credit of the tribe that are now authorized to be paid under existing law out of these funds. I will say that there is left about $71,000 of this money out of which these claims are to be paid.

Here is a letter from the Secretary of the Interior referring to this amendment, indorsing its language, and recommending that it be incorporated as an amendment to this bill. The idea of it is to have these claims presented and have them passed upon. They are all small; none of them of any consequence. It is just a question of determining who are the heirs. The books will show whether any small amount is due any allottee. There is no proof necessary upon that proposition at all. It is only a question, then, of determining the identity of the allottee or the heirs of that allottee. The last sentence of the proposed amendment is for the purpose of disposing of whatever little amount of money may remain. I will say that there is about $71,000 now, but, of course, a much smaller amount will remain when all claims are presented and paid. Perhaps $15,000 or $18,000 may be left. As I said, there are 41,824 of these Indians. So there would not be perhaps half a dollar to distribute to each member of the tribe—an amount insufficient to pay the cost of distribution.

Mr. STAFFORD. There can not be a question that there will be insufficient funds to meet all the claims?

Mr. HASTINGS. This amount is held for that purpose, and limitation within which all claims must be presented.

Mr. STAFFORD. It is virtually a residuum for prior allotment?

Mr. HASTINGS. Yes; and it completely winds up the affairs of this tribe of Indians, the largest in the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. Will the gentleman answer this question? Will there be any hardship, or can any possible hardship be done to any of these claims by a limitation of one year?

Mr. HASTINGS. None whatever. There is given a year after this bill passes within which to present any claim, and then a certain time is provided for the Secretary of the Interior to determine—I think six months thereafter.

Mr. STAFFORD. I assume there is not a claim, judging from the gentleman's statement, approximating $100?

Mr. HASTINGS. No. They are small claims. I think none will exceed that amount.

Mr. STAFFORD. I withdraw the point of order.

Mr. HASTINGS. Mr. Chairman, I would like permission to extend my remarks in the RECORD by inserting this letter from the Secretary of the Interior. It explains the amendment.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The following is the letter referred to:

DEPARTMENT OF THE INTERIOR,
Washington, January 9, 1918.

Hon. W. W. HASTINGS,
House of Representatives.

DEAR MR. HASTINGS: I am in receipt of your letter of December 27, 1917, with which you submit an amendment which you state you intend to propose to the Committee on Indian Affairs of the House of Representatives to be added to the Indian appropriation bill, said intended amendment being one providing a limitation of time for the filing of claims against the Cherokee Nation, which may now be paid under existing law out of the tribal funds, and providing that the tribal funds remaining to the credit of the Cherokee Nation at the expiration of the time limited should be used for the benefit of the Cherokee Orphan Training School.

I have written Hon. C. D. CARTER, chairman of the Committee on Indian Affairs of the House of Representatives, recommending the enactment of legislation as set forth in your intended amendment. A copy of my letter of even date to Mr. CARTER concerning the matter is inclosed for your information.

Cordially, yours,

FRANKLIN K. LANE,
Secretary.

—

JANUARY 9, 1918.

Hon. C. D. CARTER,
Chairman Committee on Indian Affairs,
House of Representatives.

DEAR MR. CARTER: Reference is herein made to a letter of December 27, 1917, from Hon. W. W. HASTINGS to the Commissioner of Indian Affairs, concerning an amendment that he intends to propose to the Committee on Indian Affairs of the House of Representatives, to be added to the Indian appropriation bill, said intended amendment being one providing a limitation of time for the filing of claims against the Cherokee Nation which may now be paid under existing law out of the tribal funds, and providing that the tribal funds remaining to the credit of the Cherokee Nation at the expiration of the time limited shall be expended for building and furnishing an additional dormitory for the Cherokee Orphan Training School near Tahlequah, Okla. Copies of Mr. HASTINGS's letter and intended amendment are inclosed.

I am advised that the books of the Indian Office show that on October 1, 1917, there were in the Treasury of the United States to the credit of the Cherokee Nation tribal funds aggregating $71,258.73. Said funds have been held for the purpose of settlement of outstanding back per capita, equalization, and other payments heretofore authorized by law, and which remain due and unpaid to members of the Cherokee tribe or their heirs. A large number of said undistributed shares of the tribal fund remain unpaid because of the fact that the enrolled Cherokee citizens who were entitled to the distributive shares of said funds are dead and their heirs have not been or can not be ascertained or found. In connection with this matter, your attention is invited to my letter of May 7, 1917, to you concerning H. R. 351. The amendment intended to be proposed by Mr. HASTINGS to the Indian appropriation bill is along the line of the legislation suggested in my abovementioned letter, but with the additional provision making an appropriation for the benefit of the Cherokee Orphan Training School of such funds as may remain to the credit of the tribe at the expiration of the time limited for the filing and settlement of outstanding claims.

In order that the tribal affairs of the Cherokee Nation may be finally closed, I believe that legislation as set forth in the intended amendment of Mr. HASTINGS should be had. I therefore recommend that such legislation be enacted.

Cordially, yours,

(Signed) FRANKLIN K. LANE, *Secretary.*

—

WASHINGTON, D. C., *December 27, 1917.*

COMMISSIONER OF INDIAN AFFAIRS,
Washington, D. C.

MY DEAR COMMISSIONER: I am inclosing herewith an amendment that it is my purpose to propose to the Committee on Indian Affairs, to be added to the Indian appropriation bill. It provides for a limitation within which all claims shall be presented and paid from funds of the Cherokee Tribe.

It is in almost verbatim language with H. R. 351, upon which a favorable report was made, except that the tribal funds remaining to the credit of the nation, when all claims are adjudicated, shall be expended under the direction of the Secretary of the Interior for building and furnishing an additional dormitory for the Cherokee Orphan Training School, near Tahlequah, Okla.

This provision contemplates the adjudication and payment of all claims within 18 months after the enactment of this bill and the disposition of all moneys which may remain to the credit of the tribe.

I can think of no better purpose for which the money could be expended than the building of another dormitory. It is now badly needed at the school.

Sincerely, yours, (Signed) W. W. HASTINGS.

That all claims against the Cherokee Nation, including claims to unpaid per capita and equalization money, which may now be paid under existing law out of the funds of the Cherokee Nation in the Treasury of the United States, or otherwise in the hands of the Government, shall be filed not later than one year from the date of the approval of this act with the Superintendent for the Five Civilized Tribes, or such other person as the Secretary of the Interior may designate, and under such rules and regulations as said Secretary of the Interior may prescribe to govern the filing, determining, and settlement of said claims, and the claims so submitted and filed shall be considered and adjudicated under said rules and regulations not later than six months after the expiration of the time above limited for the filing of the claims, and shall, if approved by the Secretary of the Interior, be paid out of the tribal funds of the Cherokee Nation. Upon the expiration of the time limited in this act claims against the Cherokee Nation shall be forever barred, and all of said tribal funds then remaining to the credit of the Cherokee Nation shall be expended under the direction of the Secretary of the Interior for building and furnishing an additional dormitory for the Cherokee Orphan Training School, near Tahlequah, Okla.

The Clerk read as follows:

For the purpose of encouraging industry and self-support among the Klamath Tribe of Indians in Oregon, and to aid them in building homes, the culture of fruits, grain, and other crops, $200,000, or so much thereof as may be necessary, which sum may be used for the purchase of such animals, machinery, tools, implements, and other equipment necessary in the discretion of the Secretary of the Interior to enable the Klamath Indians to become self-supporting, to be reimbursed from the funds accruing to the credit of said tribes in the Treasury of the United States from the sale of timber and unallotted lands on the Klamath Reservation, under such rules and regulations as the Secretary of the Interior may prescribe.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order. I believe this is a new item in the bill that has not been heretofore carried.

Mr. CARTER of Oklahoma. If the gentleman will turn back to the industrial item in the bill, on page 14, he will see that that item was reduced from $400,000 to $100,000; and $200,000 of that was transferred to this reservation and made specific.

Mr. STAFFORD. Can the gentleman inform the committee about how much of that appropriation has been utilized in the past for this specific purpose on this Klamath Indian Reservation?

Mr. CARTER of Oklahoma. For the fiscal year ending June 30, 1917, there seems to have been——

Mr. STAFFORD. Can the gentleman from Oregon [Mr. SINNOTT] give me the information?

Mr. CARTER of Oklahoma. The gentleman from Oregon [Mr. SINNOTT] is not familiar with this general item.

Mr. STAFFORD. I meant no discourtesy to the chairman of the committee, but I thought the gentleman from Oregon could give information about the item.

Mr. CARTER of Oklahoma. The gentleman asked me about the general item.

Mr. STAFFORD. My question was as to how much of the $200,000 of the general item had been expended on the Klamath Reservation?

Mr. CARTER of Oklahoma. A small tribal herd has been purchased from the general fund.

Mr. SINNOTT. Mr. Chairman, I am unable to give the gentleman from Wisconsin [Mr. STAFFORD] perhaps the precise information he desires, although I have received information by letter from some of the Klamath Indians and some of the Indians who are here representing the tribe. They inform me that at the present time the Indians have about 4,000 head of stock running on the reservation. Now, I was at the Indian Department last week—I think on Monday or Tuesday—and I endeavored to secure information as to how much money has been heretofore expended on the Klamath Reservation for stock purposes and what becomes of the stock. I dictated my request to the secretary of the Assistant Commissioner, Mr. Meritt. The next day Mr. Meritt called me up on the phone and we talked over the matter, but they have failed for some reason to give me that information. I was very anxious to secure it. I had not the information as to the amount of stock on the reservation at the present time, and what they have done in the past toward advancing money for the Indians for live-stock purposes, and I have been unable to secure it, although I requested this information several days ago. But I hope the gentleman will not insist upon his point of order. The Klamath Reservation is situated in one of the very best stock sections in the State of Oregon.

Mr. STAFFORD. Will the gentleman yield?

Mr. SINNOTT. Yes.

Mr. STAFFORD. Will the gentleman inform the committee as to the extent of the funds belonging to this Indian tribe?

Mr. SINNOTT. Well, their assets in timber are valued at something like $23,000,000. Recently the Indian Department made a sale of timber amounting to something over $1,000,000. The payments are to be made in 13 years, $50,000 next year, $75,000 the year after, and $75,000 the year after that. And there is no question about their ability to reimburse the Government for this advance.

Mr. STAFFORD. Now, as I understand, the representative of these Indians at the time the bill was under consideration in the committee wished an appropriation for this purpose, involving $2,000,000.

Mr. SINNOTT. They wish an appropriation of $1,000,000.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. If this appropriation was granted, or any additional appropriation was granted, it would mean that the funds would be furnished from the Treasury?

Mr. SINNOTT. The funds, in the first place, for a year or so, would come from the Treasury and it would be reimbursed from the sale of this timber. They have timber worth something like $23,000,000 on the reservation. I think much of the timber should have been sold long ago and applied to the purchase of teams and cattle for the Indians.

Mr. STAFFORD. What assurance can we have that if this appropriation is allowed to go through, the appropriation will not be increased for the coming fiscal year? Here this money is going to be drawn from the Treasury. The Indians want $2,000,000 to be appropriated out of the Treasury. True, they have assets in the way of standing timber, but that will not be sold for years to come.

Mr. CARTER of Oklahoma. The best guarantee for that that I can give is the continued presence of the gentleman from Wisconsin in Congress.

Mr. STAFFORD. I thank the gentleman. I think we can get further assurance that the sum will not be increased in the fact that the gentleman from Oklahoma will probably be a member of the conference that will confer with representatives of another body.

Mr. CARTER of Oklahoma. When the Assistant Commissioner of Indian Affairs, Mr. Meritt, was before our committee the following examination took place:

The CHAIRMAN. How much do you estimate is going to be necessary in this entire appropriation before we are through with it?

Mr. MERITT. In the entire appropriation bill?

The CHAIRMAN. No; I mean the entire amount running over a period of years. How long will it run?

Mr. MERITT. This is the only advance we will ask for these Indians.

The CHAIRMAN. For how many years will you ask an appropriation for them?

Mr. MERITT. For the Klamath Indians?

The CHAIRMAN. Yes.

Mr. MERITT. We will not ask for a further reimbursable appropriation. We will for a number of years require an agency appropriation——

The CHAIRMAN (interposing). I mean under this item here. Will this $200,000 end it, or will we be expected to appropriate $200,000 next year?

Mr. MERITT. No, sir; this will end it.

The CHAIRMAN. You will not want any more appropriations after getting this $200,000?

Mr. MERITT. No, sir.

The CHAIRMAN. With that you can make the farms self-sustaining?

Mr. MERITT. Yes, sir; including the proceeds from the sale of their timber.

That was the assurance that we received.

Mr. STAFFORD. Mr. Chairman, with the assurance that has just been read by the chairman of the committee, I will withdraw the point of order.

The CHAIRMAN. The gentleman from Wisconsin withdraws the point of order.

Mr. SINNOTT. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oregon moves to strike out the last word.

Mr. SINNOTT. Mr. Chairman and gentlemen of the committee, in my opinion this sum of $200,000 is a wholly inadequate sum and it is far below the desires of these Indians. I realize that we are in war times now. I realize that there are a great many demands upon the Treasury of the United States. But here is a reservation in the very heart of the richest stock country in the West, containing over 1,000,000 acres, much of it arable land, and all good grazing land.

Not far from this reservation in Harney County there is a cattle ranch, a stock ranch of 150,000 acres. This reservation contains over a million acres of much better grazing land. The cattle ranch is called the "P ranch" from the cattle brand. On this ranch there are running from 18,000 to 30,000 head of cattle. Yet this reservation of over 1,000,000 acres has only 8,000 head of stock, 4,000 head belonging to the Indians and 4,000 head belonging to the white lessees.

This $23,000,000 worth of timber belongs to these Indians. The Government is the trustee or guardian of those Indians. It owes them some duty. There are a number of sawmills in that vicinity. There is a demand and ready market for this timber. Some of it should have been sold years ago. I have been through it. It is ripe timber and should be on the market to-day. The timber is full of spread tops and spike tops, showing that it has reached its perfection and is now on the decline. Think of it—only 4,000 head of stock belonging to the Indians on a million acres; 30,000 head of cattle upon a ranch of only 150,000 acres not many miles from there. That is a serious comment, showing that the management of this reservation is a travesty; not on the part of the present administration alone, because I do not blame the present administration any more than I blame the past administration. This reservation is capable of supporting at least 50,000 head of cattle. That is a very moderate estimate.

Many of these Indians on this reservation to-day are living from hand to mouth. They are digging the very roots in the ground; the bulbs and water lilies they dig in the swamps and grind into a flour and paste to make their bread. Individually and potentially they are worth $25,000 apiece—their assets amount to that sum—and yet many of them are in want. We had a representative of the tribe before the committee, an Indian named Harrison Brown, a prosperous Indian, a good stock raiser, who runs about 400 head of stock, and he told the committee that he had frequently to go down into his own pocket to assist the other members of the tribe, to furnish them with groceries and furnish them with food and clothing, so that they would have something to eat and be comfortable in the winter months.

And yet they have $23,000,000 worth of timber and a million acres in this reservation. Why, Mr. Chairman, it would pay this Government to go over to the P Ranch and hire Tom Allen, the manager, or to go to the Bell A Ranch and hire Bill Hanley or some of those men who have made a success in the stock business.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. SINNOTT. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. SINNOTT. It would pay the Government to go over to those stock ranches and employ these managers and pay them $25,000 a year and give them authority to conduct a reservation like this as their own ranches are conducted. If that were done, in 10 years every one of these Indians would be absolutely independent. They would be rolling in wealth in 20 years. I know what that country is. It is one of the best stock countries in the United States, and any good manager, familiar with the stock business and given some authority, would soon have those Indians on their feet and make them absolutely independent, and not objects of charity, as some of them are to-day. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SOUTH DAKOTA.

SEC. 20. For support and education of 350 Indian pupils at the Indian school at Flandreau, S. Dak., and for pay of superintendent, $72,000; for general repairs and improvements, $8,000; in all, $80,000.

Mr. DILLON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DILLON: Page 52, line 5, after the semicolon, insert "for repairing damages caused by fire in industrial building, $4,500; for replacing and repairing equipment contained in industrial building, $2,000; the last two sums to be immediately available."

Mr. HAYDEN. I reserve a point of order on the amendment.

Mr. DILLON. Mr. Chairman, on November 24, 1917, a fire occurred in the industrial building at Flandreau. The building was destroyed and its contents were very much damaged. The damage to the industrial building is estimated at $4,500. The southwest corner of the building will have to be taken down and rebuilt. The balance of it can be repaired. It is estimated that the equipment that was in this industrial building can be replaced and repaired for $2,000. The industrial building contains 6 rooms—the blacksmith's department, the carpenter's department, the shoe and harness department, the tailoring department, the printing department, and the industrial-training department. The superintendent of this school presented a report to the Commissioner of Indian Affairs upon the day following the destruction of this building, but nothing was done with it by the commissioner at that time, and I recently obtained information that it was not included in this bill. Thereupon I went to the chairman of this committee. He suggested that it ought to be a deficiency item in the deficiency bill. I then went to the assistant commissioner and presented the matter to him. He conceded that it was a necessity; that the school would be put out of business unless it was included. I said to him that it had been suggested to me that it ought to be a deficiency item, and that it ought to come through the Treasury Department; but the commissioner said that was a long road to reach results, and that he was sure the chairman of this committee under the circumstances would make no point of order against this amendment. I secured from him a statement of these losses, which I now read, and in this statement he commends this amendment, as follows:

> The industrial building at the Flandreau Indian School, S. Dak., was destroyed by fire on November 24, 1917. As far as known the fire was caused by the crossing of electric wires in the building.
>
> The walls of the building are not seriously damaged except for about 40 feet on the southwest corner. This damaged place will have to be taken out and rebuilt and the building otherwise repaired.
>
> The industrial departments of the school are badly handicapped and it is impossible to carry on the course of study along industrial lines under present conditions. Considerable personal property and equipment was destroyed, and it is estimated that $4,500 will be required to replace this building and $2,000 for replacing the equipment.
>
> The usual repair and improvement fund will not be sufficient to replace the building and equip it. Therefore, in order to do this, it will be necessary to have a separate item for this particular purpose.

This school has about 365 students and is doing a great work under its efficient and capable superintendent.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAYDEN. Mr. Chairman, I reserved a point of order on the amendment, acting for the chairman of the committee; but after conferring with him and hearing the justification offered by the gentleman from South Dakota, I withdraw the point of order.

Mr. CARTER of Oklahoma. I should like to say that this school has been burned since the estimates were sent to Congress by the department, making it an emergency proposition. I shall be willing to withdraw the point of order, but I want to admonish the gentleman again, as I have told him before, that he would get his building much more quickly by presenting this matter to the Committee on Appropriations and letting them bring it in on a deficiency bill, because the chances are the usual thing will happen and this bill will not pass until July or August, perhaps too late to do the gentleman any good.

Mr. STAFFORD. Will the gentleman yield?

Mr. CARTER of Oklahoma. Yes.

Mr. STAFFORD. This morning we had a similar proposal in connection with the building of a bridge in New Mexico, to increase the authorized amount so they could go ahead with the construction. It was pointed out that the gentleman could get quicker action by having a deficiency appropriation on the deficiency appropriation bill.

Mr. CARTER of Oklahoma. Mr. Chairman, the necessity for a bridge and the necessity for a school building are two entirely different things. Here we have a case where the gentleman wants his school building at once, for the continuation of the school, and my only intention was to help the gentleman. Now, if a bridge proposition came up and I had the bill before me to protect all my rights I would try to put it in the bill then under consideration, just as the gentleman from New Mexico did, although he did not consult me with reference to his action. But if I had such an urgent, necessary proposition as the gentleman from North Dakota [Mr. DILLON] has I think I would prefer to have it in the deficiency bill, although I leave that entirely to the gentleman himself. It is a meritorious case.

Mr. DILLON. I will say to the gentleman that I went to the commissioner upon that very point, and he said to me that this was the best route. What would the gentleman do under those circumstances?

Mr. CARTER of Oklahoma. I would follow my own judgment about it. Administrative officers do not always know the best form of legislative procedure.

The CHAIRMAN. The point of order is withdrawn. The question is on the amendment offered by the gentleman from North Dakota [Mr. DILLON].

The amendment was agreed to.

Mr. DILLON. I ask unanimous consent to extend my remarks by inserting the letter of Mr. Peirce, the superintendent of this school.

The CHAIRMAN. The gentleman asks unanimous consent to insert in the RECORD the letter indicated. Is there objection?

There was no objection.

The letter is as follows:

FLANDREAU, S. DAK., *December 3, 1917.*

Honorable COMMISSIONER OF INDIAN AFFAIRS,
Washington, D. C.

DEAR SIR: Replying to your telegram of November 26, I have the honor to transmit the following report concerning the destruction of the shop building and contents thereof by fire on Saturday the 24 ultimo. I would say, first, that I was on my way home from Bismarck school with a party of pupils who were being transferred from that place, consequently the report is based upon the testimony of employees who were on the grounds at the time.

The building was a one-story brick structure, 170 by 30 feet, with a 36-foot ell at the south end, and was divided into six rooms, used by the blacksmith, carpenter, shoe and harness, tailor, printer, and manual-training departments. The blacksmith shop had nine forges, together with necessary anvils, tools, etc. The carpenter or woodworking shop had a swing cut-off saw, cross-cut saw, planer, band saw, and a combination woodworking machine, together with several workbenches and kits of tools.

The manual-training room was used more particularly for a class-room and bench work, and had no machinery except a small turning lathe. The harness shop was equipped with a sewing machine, nailer, and a 12-foot combination sewing and finishing machine, together with a full assortment of working tools. The tailor shop had eight sewing machines, seven of which were saved. In the printing department all equipment was saved.

In the blacksmithing department none of the forges or other equipment was damaged beyond some slight repair. In the carpenter shop the band-saw frame, planer, and cross-cut saw can be repaired with an expenditure of about $200. Other machinery there is a total loss. In the harness and shoe department the finishing machine and nailer can be repaired for approximately the same amount, as frames and shafts are not injured. As stated, other equipment except stoves in tailor and print shop were saved. There was, however, a large amount of minor equipment such as hand tools in all departments that are a total loss.

It appears that the fire was discovered about quarter past 12, while all employees and pupils were at dinner, and that it had doubtless been burning for some time, at least 15 or 20 minutes, as it was bursting through the roof when the first employees reached the building.

The shops were closed at 11.30, although Mr. Carr, manual-training teacher, was in his department as late as 11.45 and saw no evidence of fire. From the evidence of employees, as well as from the photographs inclosed, it is plainly evident that the fire must have started in the attic above the manual-training room.

In the attic was stored several dozen new chairs and several hundred feet of kiln-dried cedar, pine, basswood, gum, and oak lumber. The chairs were all wrapped with paper and cotton sacking, so that all of the contents of the attic was highly inflammable.

From the testimony of employees, I do not think that the fire started in either of the shops below the ceiling, but am inclined to believe that it originated in the attic over the manual training room, either from crossed electric wires or spontaneous combustion.

Carpenter boys had within a few days previous been storing some lumber there, and I am inclined to believe that some of the wiring became disarranged and crossed and finally started a blaze near some of the paper and cloth wrappings on the furniture. That the damage could have been confined to the south end of the building had there been the sufficient water pressure is the opinion of all who witnessed the fire. Lines of hose were promptly laid, but there was not enough water pressure to throw a stream of water to the eaves of the building.

The Flandreau fire department also responded and connection was made with the city system, but with little better result. Our water system is provided with a mechanical filter, located in the filter house at the base of the water tank. Ordinarily water is run through the filter into the distributing system. There is, however, a valve which when opened allows the full tank pressure to go into the distributing system, cutting out the filter. In case of fire it is the first duty of the engineer to open the pass valve. In this case Mr. Heckendorn, engineer, claims to have opened this valve as soon as the alarm of fire was given. To this statement I can hardly agree. Mr. Heckendorn may think that he opened this valve, but I can not believe that this was done.

On Monday afternoon following the fire I had a line of hose attached to the barn hydrant, the farthest away from the tank, and found no difficulty in throwing water high enough to cover the shop building. I also had the hose attached to a hydrant near the girls building and put water onto the roof of that building, the brick walls of which are about 28 feet from the ground. This was with about 12 feet of water in the tank and with the pass-by valve open.

I also made a similar demonstration a day later in the presence of Mr. W. H. Davis, the chief of the city fire department, who stated that had like pressure been available on the day of the fire when he arrived with his men and apparatus that at least half of the building might have been saved.

Various employees say that only the usual pressure was noticeable in the buildings on that afternoon, which would not have been the case had the filter been cut out of use and direct pressure put on the system.

Taking the statement of Mr. Davis and our own employees into consideration, I can not believe that the by-pass valve at the filter house was open; rather that it was closed, or at least partly so, and that the water from both our own tank and the one in town was going through the filter, giving no fire-pressure service, and on account of this condition all efforts to control the fire were a failure.

As to the loss, I have gone over the walls carefully with Mr. Carr and an expert brick builder and find that three-fourths of the walls can be used with slight repairs. In order to protect these broken places, I am now having them repaired, and will also put on new plates so that that part of the building now standing will not suffer deterioration this winter.

A close estimate of the cost for rebuilding the building as it stood is placed at about $4,500. The cost of repairing or replacing destroyed equipment will reach approximately $2,000, making a total loss of $6,500. The building was heated by stoves, but if it is to be rebuilt I would like to install steam heat. I have a boiler on hand that could be used, have considerable pipe, and as all labor would be performed by our own force, the cost would not exceed $1,200. This matter, however, will be the subject of future correspondence.

Trusting that the foregoing report will be the information desired, I am,

Respectfully, yours, CHARLES F. PEIRCE,
Superintendent.

The Clerk read as follows:

For support and education of 275 Indian pupils at the Indian school, Rapid City, S. Dak., including pay of superintendent, $57,000; for general repairs and improvements, $5,000; for irrigation, drainage, and improving school farm, to remain available until expended, $3,000; in all, $65,000.

Mr. GANDY. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from South Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. GANDY: Page 52, line 16, before the word "in," insert:

"Additional appropriation for new school building, $15,000."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the amendment, for the purpose of allowing the gentleman to give information as to the need of this appropriation.

Mr. GANDY. Mr. Chairman, two years ago there was appropriated for a new school building at the Rapid City Indian School the sum of $30,000. At that time I had very grave doubts as to the ability of the Commissioner of Indian Affairs to have a building suitable for the needs of the school constructed for $30,000, and the records of the hearings before the Committee on Indian Affairs will bear me out in that statement. However, that amount was agreed upon. Plans for a suitable building were drawn, but the commissioner was never able to award the contract because of the fact that no bid was within the appropriation. In a letter under date of yesterday from the commissioner he states that the lowest bid at any time was $33,000, and my information on the subject is to the effect that the lowest acceptable bid was almost $37,000. Since that time materials having increased in value, it will be necessary to provide more money than the amount of the lowest acceptable bid received.

Mr. CAMPBELL of Kansas. I understand the amount that was appropriated on request of the gentleman from South Dakota was not enough under present prices for material and labor to enable a contractor to take a contract for the construction of the building?

Mr. GANDY. That is true; that is the situation exactly.

Mr. CAMPBELL of Kansas. And it will take some $10,000 or $15,000 more than is appropriated to construct the building?

Mr. GANDY. I want to say further that because of the crowded condition of the school building at this school it has been necessary to take out the seventh and eighth grades, because they were not able to handle them with the room they have there.

Mr. GANDY. Further, I want to call attention to the fact that there are 4,784 Indian children in school in South Dakota, while 5,668 are eligible for school, and the Government schools and mission schools combined have only a total capacity of 3,920, so that it is very necessary and very essential that the school facilities be increased.

Mr. STAFFORD. Will the gentleman yield?

Mr. GANDY. I will.

Mr. STAFFORD. I understand the purpose is to enlarge the original school building and to enlarge the plans of the original school building so as to provide for accommodations of the higher grades—seventh and eighth—now not accommodated in the building.

Mr. GANDY. The gentleman's idea is all right in one particular and erroneous in another. The present school building is a small four-room building. It is proposed to erect an eight-room building. The present kitchen and dining room at this school is in the boys' dormitory. The removal of that kitchen and dining room has been recommended by Indian Office inspectors and by health authorities for a long time. An appropriation was made a year ago for that work and for the remodeling of the present schoolhouse into a kitchen and dining room. But neither the remodeling of the boys' dormitory or the remodeling of the present inadequate school building can go ahead until the new school building is erected, and they have been tied up on that because the appropriation was insufficient.

Mr. STAFFORD. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota [Mr. GANDY].

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 21. That the Secretary of the Interior is hereby authorized, in his discretion, to withdraw from the Treasury of the United States the sum of $53,740, or so much thereof as may be necessary, of the tribal funds on deposit in the Treasury to the credit of the Confederated Bands of Ute Indians and to expend the same for the support and civilization of said Indians.

Mr. WELLING. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. WELLING: Page 54, strike out lines 11 to 17, inclusive, and insert the following:

"SEC. 21. For support and civilization of Confederated Bands of Utes: For pay of two carpenters, two millers, two farmers, and two blacksmiths (art. 15, treaty of Mar. 2, 1868), $6,720; for pay of two teachers (same article and treaty), $1,800; for purchase of iron and steel and the necessary tools for blacksmith shop (art. 9, same treaty), $220; for annual amount for the purchase of beef, mutton, wheat, flour, beans, and potatoes, or other necessary articles of food and clothing, and farming equipment (art. 12, same treaty), $30,000; for pay of employees at the several Ute agencies, $15,000; in all, $53,740."

Mr. WELLING. Mr. Chairman, I very sincerely trust that the committee will accept the amendment I have offered. It restores to the bill the exact reading of the Indian appropriation bill of last year and contains the items that were furnished to the committee by the Commissioner of Indian Affairs. The hearings on this item will be found on page 334, and it will be shown there why the paragraph was changed by the committee. The amount of the item is in no way changed. I want to call the attention of the House to the fact that this paragraph—the entire amount—is now covered by a treaty with the confederated bands of the Indians. As a matter of fact, the Indian Committee itself in their report to the House, on page 5, refers to it as a treaty item. Since the committee recognize it as a treaty item, I can see no reason why this fund should be considered differently from every other treaty provision in the appropriation bill.

There is not a treaty provision in the bill, from the beginning to the end, considered as a treaty item heretofore, that has been changed from existing law until this item is reached in the bill. I think the gentlemen of the committee have made the change under a misapprehension, and I sincerely trust that they will be willing to accept the old reading of the law.

Mr. CARTER of Oklahoma. Mr. Chairman, the reason the committee made the change is that it is one of the treaty items that the committee thought could be dispensed with. Later on in the treaty you will find a provision that any time after 10 years from the making of the treaty the United States shall have the privilege of withholding the appropriation for the farmer, blacksmith, carpenter, millers, and so forth. On finding that we had that right to withdraw the farmers, and so forth, by this treaty at any time after 10 years, the Government thought it was better to place these Indians on their own responsibility with reference to their agency and let them pay their own way, as they do in several States of the Union.

Mr. WELLING. Mr. Chairman, in reply to what has been said by the gentleman, I want the House to refer specifically to the hearings on page 334. The gentleman from Oklahoma has read just exactly what he wanted to read from the treaty and omitted to read everything else. What the gentleman has read from the treaty in the first place only refers to one-seventh of the item of $53,000. In other words, the amount sought to be appropriated for blacksmiths, farmers, millers, and other help only amounts to about $8,500. In connection with the contention of the chairman of the committee, I am going to read the item:

At any time after 10 years from the making of this treaty the United States shall have the privilege of withdrawing the farmers, blacksmiths, carpenters, and millers herein.

This provision now costs the Government about $8,500. The treaty goes on to say:

But in case of such withdrawal an additional sum thereafter of $10,000 per annum shall be devoted to the education of said Indians.

Now, if the gentleman from Oklahoma is anxious to withdraw the item of $8,500 and leave it out of the bill, I am perfectly willing for him to do so, but I insist if that change is made that he conforms to this latter provision of the treaty and provide $10,000 for their education, as outlined in the treaty itself.

Mr. Chairman, much has been said during the progress of this debate about the present state of civilization in different Indian tribes, with special reference to the aid now being extended by the Government for the education of its wards. The Confederated Bands of Ute Indians are being greatly benefited by the work the Government is doing on this reservation. One of the largest irrigation projects in my State is rapidly nearing completion among these Indians, but the total cost of that project is being paid for by the Ute Indians themselves from funds now placed to their credit in the Treasury of the United States. The Government has not contributed a cent to this project, and it will never be asked to assist it in the future. There is hardly an Indian tribe in the Nation to-day that is drawing so little support from the Government as this Confederated Band of Ute Indians. It is a pleasure also in this connection to speak in the very highest terms of the intelligent work being now performed by the present Indian agent, Mr. Albert Kneal, in charge of this project, for the Government. As stated before, I think the committee was misled in this matter by reason of an erroneous interpretation of the plain terms of the treaty itself. I have no disposition to press the matter further if the committee will accept my amendment, and I ask my distinguished friend from Oklahoma to reconsider the action which the committee has taken.

Mr. CARTER of Oklahoma. Mr. Chairman, there may be some doubt as to the right of Congress to change the entire appropriation. I had hoped that placing this item in the bill as reported might bring us sufficient information to finally determine the matter, but that is evidently impossible. If I felt sure the committee would sustain our report, I might insist on the payment from tribal funds, but after our experience on similar items yesterday I hardly believe it good judgment to invite another encounter with the steam roller. So, with the permission of the gentleman from Arizona, I will withdraw the point of order, with the understanding that we look carefully into the item next session and, if we find it justified, make the items payable from tribal funds, report it to the House, and try to get its membership to stand by us.

Mr. HAYDEN. Mr. Chairman, I am in large measure responsible for this change in the bill. We took this action in the committee for the reason that it appears from the hearings that there is on deposit in the Treasury of the United States to the credit of the confederated bands of Ute Indians at the present time $3,617,763, being the balance of an appropriation made in satisfaction of a judgment against the Government obtained in the United States Court of Claims by these Indians. That money being in the Treasury to their credit, there appeared to be no good reason why they should not pay their own way out of their own funds, rather than to continue to receive assistance from the Treasury of the United States. The paragraph which the gentleman from Utah now seeks to reinsert in the bill refers to certain treaty obligations made long before the judgment to which I have referred was rendered by the Court of Claims. I have looked up that judgment, and I find that in calculating the amount due the Indians were charged with all gratuities of every kind made to them prior to 1908, but that all payments made to them under these treaties, the same items that the gentleman is now seeking to restore, were not counted against the Utes in the settlement at all. The court held:

We do not think, therefore, that the plaintiffs are properly chargeable with any payments made to them under and by reason of the treaties of 1863 and 1868.

So there may be some merit in the contention of the gentleman from Utah, enough at least to raise a reasonable doubt in my mind, and for that reason I am now going to support his amendment. Between now and next winter, when this same appropriation will again be requested, I am going to ascertain whether Congress has general authority to abrogate a treaty of this kind after due and proper notice. If it can be lawfully done, I propose to see that an end is made of these old treaties. There is no reason why Congress should continue to make appropriations, under treaty or otherwise, for the benefit of Indians who have large sums of money to their credit in the Treasury.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Utah.

The amendment was agreed to.

The Clerk read as follows:

For continuing construction and enlargement of the Wapato irrigation and drainage system, to make possible the utilization of the water supply provided by the act of August 1, 1914 (38th Stat. L., p. 604), for 40 acres of each Indian allotment under the Wapato irrigation project on the Yakima Indian Reservation, Washington, and such other water supply as may be available or obtainable for the irrigation of a total of 120,000 acres of allotted Indian lands on said reservation, $500,000 to be immediately available, and to remain available until expended: *Provided*, That the entire cost of said irrigation and drainage system shall be reimbursed to the United States under the conditions and terms of the act of May 18, 1916: *Provided further*, That out of the sum herein appropriated the Secretary of the Interior is hereby authorized to pay to Violetta Stone and W. D. Stone, husband and wife, the sum of $629.48 for lands purchased of them for use in connection with the construction of the diversion dam across the Yakima River, as provided for in the act of May 18, 1916 (39 Stat. L., p. 154), and the sum herein appropriated shall be available for the purchase of such other lands as may be required in connection with the construction of the aforesaid irrigation project.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order. I notice that last year there was $200,000 appropriated for this project, and at the time of the hearings the major portion of that was still unexpended, and yet the committee has increased the appropriation to $500,000.

Mr. HAYDEN. Mr. Chairman, there was some mistake in the data furnished to the committee at the time of the hearings. We later ascertained that as a matter of fact there was practically no unexpended balance. The chief irrigation engineer from the Indian Office appeared before us after the hearings were closed and explained the situation. In my opinion better use is being made of the money expended for irrigation under this project than any other Indian project in the Northwest. The Yakima Valley is very fertile, is being rapidly settled, and the lands are producing immense crops. There was a demand made upon the committee for a larger appropriation than we allowed, but we thought, to be conservative, and that it would be entirely proper at this time to increase the appropriation to $500,000, which sum will bring immediate results. The diversion dam has been completed, the main canals are partly done, and by continuing that work much land can be placed in crops this coming summer.

Mr. STAFFORD. How much land is now under cultivation on this project and how many additional acres will be made available as the result of this appropriation?

Mr. HAYDEN. Approximately 54,000 acres are now under cultivation, and there is an insistent demand by lessees for every acre that can possibly be put under irrigation. The demand is so great that within recent months a local committee of business men endeavored to procure an appropriation of $2,000,000 for the purpose of bringing the whole project under ditch at the earliest practicable moment. This tract probably offers the greatest possibilities by way of meeting the requirements of the present emergency for increased food production of any in the United States, when the factor of time is considered. The entire area of the project is 120,000 acres, with 54,000 acres under the ditch and in cultivation, which shows that the area of irrigable land is keeping close progress with the construction of the laterals to bring the water to the land.

Mr. STAFFORD. Another inquiry I desire to make is in respect to the payment of $629 to persons named Stone. What is the occasion for that claim being included in this appropriation bill?

Mr. HAYDEN. The justification for that is as follows:

> The proviso covering the purchase of land of Violetta Stone and husband has been inserted in order to enable the office to pay these persons for land which it was necessary to procure in connection with the construction of the Wapato diversion dam, but for which no funds under our control were available to make payment.

The Reclamation Service used the land belonging to these people. It was necessary to take it. The diversion dam was constructed over their property, and we thought this small appropriation might be included in the bill to settle the account.

Mr. STAFFORD. Is there any danger that the inclusion of this item will be used as a warrant by another body for loading this bill with claims. If there is, I shall try to come to the relief of the committee now by making the point of order against the inclusion of this claim item.

Mr. HAYDEN. The rule of this committee is that we will not allow any claim to appear on the Indian bill either here or elsewhere unless it is for a less amount than $1,000 and in payment of a liability of the Government within a year or a year and a half. In other words, we do not consider the Indian appropriation bill a proper vehicle to secure the payment of old, stale claims.

Mr. STAFFORD. This is recommended in the estimates by the department?

Mr. HAYDEN. Yes.

Mr. STAFFORD. I notice here, in the last two lines of the paragraph, an authorization to purchase other land. Is it necessary to have specific authorization in an irrigation project to allow the department officials to purchase lands?

Mr. HAYDEN. That change in the law was requested by the Indian Office. The assistant commissioner stated that the reason why they could not pay Violetta Stone was because there was no authority of law to make the payment, the auditor having held up payment on that account. If the lands are needed for a project, they should be purchased and paid for as current expenses.

Mr. STAFFORD. In these other projects there has been no such authorization. I assume as to these other projects there is no necessity for acquiring additional land, and therefore they did not need the authorization?

Mr. HAYDEN. Under the reclamation law the Reclamation Service has authority to purchase or condemn land, but no such general authority has been given in connection with Indian irrigation projects. It is therefore necessary to grant such authority in this particular case.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order on the statement made.

The Clerk read as follows:

> The Secretary of the Interior is hereby authorized to sell the lands and buildings comprising the former Wittenberg Indian School, Wittenberg, Wis., at not less than their appraised value, the money received from said sale to be deposited in the Treasury as miscellaneous receipts.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order. I wish to inquire as to the reason for this authorization to permit the sale of certain lands and buildings formerly used by the Wittenberg Indian School.

Mr. HAYDEN. Undoubtedly the gentleman has read in the hearings the justification for this item. The assistant commissioner said:

> On account of the improved condition of the Indians in Wisconsin, from among whom the Wittenberg School draws its enrollment, and the increasing number of public schools, it was decided that the Wittenberg School was no longer required. Moreover, the plant has run down, and extensive repairs and improvements would be needed if it were continued. These were not considered justified in view of the conditions, and the school has been closed. Any pupils who are in need of Government aid in order to obtain an education will be cared for in one of the other Government schools in the State.
>
> This item contemplates the sale of the school property which is no longer required for Government purposes. Reports on file made by the former superintendent place a value of $53,365 on the school lands and buildings, including water and sewer systems.

Mr. STAFFORD. Is there any other instance in this bill or in the administration of Indian affairs where an Indian school, no longer needed for the education of Indians, has been recommended for discontinuance?

Mr. HAYDEN. This is the only Indian school recommended for discontinuance by the Indian Service this year.

Mr. STAFFORD. I assume there are many other schools that could likewise be recommended which are no more needed than this school?

Mr. HAYDEN. The Assistant Commissioner of Indian Affairs stated there were two or three other Indian boarding schools in the United States which are now closed, and that in all probability next year the Indian Bureau would ask that the property be sold.

Mr. STAFFORD. I certainly hope that wish will be carried out. Mr. Chairman, I do not intend to raise the point of order on this item, even though it applies to a school in my own State.

The Clerk read as follows:

> SEC. 25. That the Secretary of the Interior be, and he is hereby, authorized in his discretion to expend for the benefit of Indians, from their tribal funds held in trust or otherwise, not exceeding $2,500,000 during the fiscal year ending June 30, 1919, as provided by section 27 of the act of May 18, 1916 (39 Stat. L., p. 158), in addition to such sums as may be required for equalization of allotments, education of Indian children, per capita and other payments to Indians and expenditures for the Five Civilized Tribes in accordance with existing law: *Provided*, That expenditures shall not be made from any one fund for purposes other than those above specified in excess of the estimates submitted by the Secretary of the Interior and appearing in House of Representatives Document No. 499, Sixty-fifth Congress, second session: *And provided further*, That no expenditures shall be made from tribal or treaty funds which are not authorized by existing laws governing their disposition and use.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order. This, I believe, is a new item providing for the payment of two and a half million dollars out of the funds belonging to the Five Civilized Tribes to equalize allotments in the education of Indian children and the like. What is the warrant?

Mr. CARTER of Oklahoma. The gentleman refers to the two and a half million dollar appropriation?

Mr. STAFFORD. Yes.

Mr. CARTER of Oklahoma. The practice in the past with reference to the use of tribal funds has been to permit the department the use of them without very much supervision by Congress. As I stated a few days ago, a treaty would be made here and an agreement there and an act of Congress yonder, which authorized certain expenditures from tribal funds continuing year after year under the direction of the Secretary of the Interior without the necessity of appropriations by Congress, and without necessity in a great many instances of even reporting to Congress on the expenditures after they were made. This was the condition I found the funds of the Five Civilized Tribes in when I came to Congress, but in 1911 we proposed and had adopted an amendment to the Indian appropriation bill which prevented the expenditure of tribal funds without specific appropriation by Congress. That plan has worked so well in the conservation of these funds that the Indian Committee in 1916 incorporated a somewhat similar paragraph with reference to all other tribal funds. This provision permitted continuation of the practice then in vogue until the end of the present fiscal year, after which time the departments were prohibited from expending any tribal funds without specific appropriation by Congress, which would require bringing in of estimates just the same as with Treasury funds. This is the first bill reported under these requirements and the Commissioner of Indian Affairs instead of bringing an itemized statement simply asked

for a lump-sum appropriation of $2,500,000. This the Indian Committee refused to report, and finally the commissioner presented as his estimate of expenditures House Document No. 499, which sets out specifically the amounts that have been expended in the last fiscal year. You will note that this paragraph requires the expenditure of these funds in conformity with the estimates made in that document. The only purpose of this item is to require the same accounting, the same careful scrutinizing by Congress of tribal funds as is now required of the funds of the Federal Government.

Mr. STAFFORD. Then, as I understand the position of the committee, the expenditures as listed in the House document that were made last year meet with the full approval of the committee that they should be continued another year?

Mr. CARTER of Oklahoma. The committee decided that next year we would require the Indian Bureau to bring before the Indian Committee a detailed estimate for every dollar asked to be expended from tribal funds, just as they do now with Federal funds.

Mr. STAFFORD. How explicit are the expenditures as referred to in that House document?

Mr. CARTER of Oklahoma. The House document is included in the hearings beginning on page 394, and the gentleman will see it covers several pages and is quite in detail.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. The committee, I assume, has examined those respective items of expenditures and have used those as a basis for making this authorization of $2,500,000?

Mr. CARTER of Oklahoma. Yes.

Mr. NORTON. Will the gentleman let me call his attention to this: The gentleman and the other Members of Congress desire to know what is expended by the Indian Bureau, and I stated at the beginning of the debate on the bill that I find it very difficult to ascertain that information myself.

Now, the gentleman has for a number of years, I know, watched very carefully the appropriations in this bill—the expenditures made by the Indian Bureau for the civilization and support of the Indians. I ask the gentleman to turn to the item under North Carolina, on page 34, and tell me what amount he has in mind under that item that has been expended for the Indians in North Carolina? Answering the question for the gentleman, he would naturally expect it was the items included in the bill. In addition to those items there was expended for support and civilization of the Indians in North Carolina $54,006.56, which is not contained in the Indian appropriation law for 1917, or it would not be contained under the items in the bill under North Carolina this year, but the $54,000 is included in this item of $2,500,000. And in years gone by no specific appropriation has been made, and there has been no specific account of it except in some obscure reports that the department has made.

Now, under North Dakota, take the appropriation made in the last Indian appropriation bill for the support of the Turtle Mountain Band of Chippewa Indians in North Dakota, and the appropriation provided in this bill is $13,000, and I think in the last Indian appropriation bill it was $10,000. I will tell the gentleman the exact amount.

Mr. STAFFORD. Eleven thousand dollars.

Mr. NORTON. Eleven thousand dollars. Now, there was expended for the fiscal year ending June 30, 1917, for the Turtle Mountain Band of Chippewa Indians, in addition to that appropriation, $18,406.52 for salaries of employees, including the irregular labor, and for their support $22,235.52. Those amounts having been secured by the Bureau of Indian Affairs from trust funds that they have under their charge.

Mr. STAFFORD. I recognize the value and the need of having these itemized and for detailed information, and I wish to commend the gentlemen of the committee for insisting upon the department giving detailed information to the committee of the expenditures of these large amounts, which no committee could scrutinize or ascertain without a formal presentation in the Book of Estimates.

Mr. SNYDER. I desire to inform the gentleman that in going over this particular $2,500,000 and the details of the same, the Assistant Commissioner agreed, upon our urgent request, that he would analyze and itemize every one of these items in this expenditure of $2,500,000 for us next year.

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. STAFFORD. I withdraw the reservation.

The CHAIRMAN. The gentleman from Wisconsin withdraws the reservation, and the Clerk will read.

The Clerk read as follows:

SEC. 26. That the members of the Committee on Indian Affairs of the House of Representatives of the Sixty-fifth Congress, not less than five in number, are authorized to conduct hearings and investigate the conduct of the Indian Service at Washington, D. C., and elsewhere, and the sum of $15,000, or so much thereof as may be necessary, to be immediately available and remain available until expended, is hereby appropriated for expenses incident thereto. The said committee is hereby authorized and empowered to examine into the conduct and management of the Bureau of Indian Affairs and all its branches and agencies, their organization and administration, to examine all books, documents, and papers in the said Bureau of Indian Affairs, its branches or agencies, relating to the administration of the business of said bureau, and shall have, and is hereby granted, authority to subpœna witnesses, compel their attendance, administer oaths, and to demand any and all books, documents, and papers of whatever nature relating to the affairs of Indians as conducted by said bureau, its branches and agencies. Said committee is hereby authorized to employ such clerical and other assistance, including stenographers, as said committee may deem necessary in the proper prosecution of its work: *Provided*, That stenographers so employed shall not receive for their services exceeding $1 per printed page.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order.

I wish to inquire as to the need of that language which makes this appropriation immediately available and permits it to remain available until expended.

I assume the committee does not contemplate making any tour of inspection while Congress is in session, and I can not see any necessity for having this fund immediately available before the beginning of the next fiscal year.

Mr. CARTER of Oklahoma. The best investigation of Indian affairs that has been made for the past 10 years was during a session of Congress in 1913. After the House had finished its business and the business was largely in the hands of the Senate, about a two months' trip was made by a joint investigating committee, which in all probability saved this Government several millions of dollars.

Mr. STAFFORD. That was a peculiar condition that will not occur during the remainder of this fiscal year.

Mr. CARTER of Oklahoma. The gentleman asked a question, but will not let me finish.

Mr. STAFFORD. I will permit the gentleman not only to finish, but more than finish.

Mr. CARTER of Oklahoma. That was saved on one proposition alone. The committee investigated some 10 or 15 different reservations, as I recall. In two different places they had very unworthy officials of the Indian Bureau removed who would probably have cost the Government many thousands additional had they remained on the job. We have heard much during the discussion of this bill of other incompetent Indian officials. The gentleman from Kansas [Mr. CAMPBELL] has been giving us, day after day, statements of necessity for abolishing all Indian agencies, Indian schools, and many other activities of the Indian Bureau.

Now, I agree with the gentleman that all useless agencies should be abolished, but the only way that we can dispense with these things intelligently would be after obtaining information through a thorough investigation, and this would necessitate visits to the different reservations, which can not be done without enacting this item. If we have the time during the session of Congress, I can see no reason why the committee should not be permitted to make the investigation then as well as at any other time.

Mr. STAFFORD. The gentleman realizes the necessity of every Member being here and remaining here until adjournment?

Mr. CARTER of Oklahoma. I admit that.

Mr. STAFFORD. And there is no chance of our getting away before nearly the end, at least, of the present fiscal year?

Mr. CARTER of Oklahoma. There was a time last year when nearly all the Members of Congress left the city.

Mr. STAFFORD. There is no doubt but that we shall be in session during the remainder of the present fiscal year.

Mr. CARTER of Oklahoma. If it takes as long to pass the other appropriation bills as it has taken to pass this one, we shall probably be here long after the dog days.

Mr. STAFFORD. I think we have made as good progress with respect to this bill as is usually made.

Mr. CARTER of Oklahoma. No. In the case of prior bills we usually passed them in two days.

Mr. SNYDER. Mr. Chairman, I want to say as a member of the committee that I have spent a good deal of time in the subcommittee, and I do not think there is an item in this bill that can be expended to better effect and with better results to the Congress and to the Indians that this pending item, to have this money spent by the committee in investigating this question.

Mr. STAFFORD. I remember that when this matter was brought up heretofore, in prior bills, no point of order was made against it. I fully agree in the advisability of having a fund available for the committee to go around and inspect Indian affairs in the field, but I am only questioning the need of

having this money made available and remaining available until expended.

Mr. SNYDER. I will say to the gentleman that if the committee can not go on this tour the money can not be expended. Very little of the money was expended last year.

Mr. STAFFORD. I am not in favor of authorizing a lump-sum appropriation that will hang in the air all the time and permit Members of Congress to go away during the sessions of Congress. I am perfectly willing that they shall go away during the recess.

Mr. ROBBINS. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. Certainly.

Mr. ROBBINS. I would like to know whether this $15,000 is the maximum amount that will be expended under this authorization, or whether it is just a starter, allowing this committee to start and employ stenographers and journey around through the States?

Mr. CARTER of Oklahoma. The best evidence that I can give to the gentleman is the evidence afforded by the history of the past. Last year we appropriated $15,000 and expended a total of about $2,758.

Mr. ROBBINS. Was there much of an investigation made?

Mr. CARTER of Oklahoma. Not much of an investigation was made. As I recall, we were gone about two weeks on the trip.

Mr. STAFFORD. As I said, I am in favor of giving the committee a fund to go about when Congress is not in session, but I am not in favor of having the fund always available. I hope the gentleman will agree to strike out the words "to be immediately available and remain available until expended."

Mr. COX. Mr. Chairman, I make a point of order against the whole paragraph.

The CHAIRMAN. The point of order is sustained.

Mr. WELLING. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Utah asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HAYDEN. Mr. Chairman, the other day we passed over the paragraph on page 17, line 9, running over to and including line 3 on page 18. A point of order was reserved upon it.

The CHAIRMAN. What does the gentleman from Arizona say with reference to the point of order?

Mr. HAYDEN. I wish to say that I have conferred with the gentleman from Wisconsin [Mr. STAFFORD], who reserved the point of order, and we have agreed upon an amendment that I would like to offer as a substitute.

The CHAIRMAN. The Clerk will report the substitute.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN as a substitute: Insert in lieu of the paragraph beginning on line 9, page 17:

"For continuing the construction of the pumping plant for irrigation purposes on the Colorado River Indian Reservation, Ariz., by the installation of additional pumping machinery, and for continuing the construction of necessary canals and laterals for the utilization of water in connection therewith, as provided in the act of April 4, 1910 (36 Stat. L., p. 273), and for maintaining and operating the pumping plant, canals, and structures, $20,000, reimbursable, as provided in said act; and for continuing the purpose of securing an appropriation of water for the irrigation of approximately 150,000 acres of land on said reservation by the conduct of surveys and the preparation of plans and estimates for a complete irrigation system to supply water to said land, $50,000, reimbursable from funds in the Treasury of the United States to the credit of the Indians of said reservation arising from the proceeds from the sale of town lots authorized by act of April 13, 1908 (35 Stat. L., p. 77); in all, $70,000."

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order to the item as it was included in the bill.

Moving to strike out the last word, I wish to inquire of the gentleman from Arizona [Mr. HAYDEN], from his knowledge of this project, how long it will take before the plans and surveys can be made?

Mr. HAYDEN. I doubt very much the possibility of making a satisfactory report under a year. Considerable work must be done to carry out this investigation in the proper way, and the Indian Service should not come back to Congress for more money without submitting carefully prepared plans and estimates. I do not think it possible to do anything further for a year in connection with this project.

Mr. STAFFORD. And the language as submitted in the amendment provides for the money to be taken out of trust funds of these Indians?

Mr. HAYDEN. Yes.

Mr. MADDEN. No; it does not. It provides for reimbursement out of the sale of town lots.

Mr. HAYDEN. The amendment provides for reimbursing the Government out of funds in the Treasury derived from the sale of town lots. The sum of $55,013.92 arising from the sale of town lots in the town of Parker, on this Indian reservation, is now on deposit in the Treasury. Lots in that town site were offered for sale in 1911, and many people purchased them with the understanding that the Colorado River Reservation was to be opened to settlement and development. As high as $1,000, $1,200, and $1,500 was paid for the more desirable lots. The town at one time had a population of about 1,000 people, but nothing has been done looking to the opening of the reservation, the town site has been almost abandoned, and the people who invested their money have lost it. If some private real estate company had advertised and sold lots in this manner, its officers would have been convicted of obtaining money under false pretenses in violation of the "blue-sky" law of Arizona.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. HAYDEN].

The amendment was agreed to.

Mr. BROWNE. Mr. Chairman, I ask unanimous consent to extend by remarks in the RECORD.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CARTER of Oklahoma. Mr. Chairman, I want to offer a substitute for the paragraph beginning with line 10 and ending with line 19, on page 18.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report. Does the gentleman from Wisconsin withdraw his point of order?

Mr. STAFFORD. Let us hear the proposed amendment read.

Mr. HAYDEN. There was no point of order.

Mr. HASTINGS. No; the gentleman simply agreed to itemize the paragraph.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Strike out lines 10 to 19, inclusive, on page 18, and insert in lieu thereof the following:

"To enable the Secretary of the Interior to carry into effect the provisions of the sixth article of the treaty of June 1, 1868, between the United States and the Navajo Nation or Tribe of Indians, proclaimed August 12, 1868, whereby the United States agrees to provide school facilities for the children of the Navajo Tribe of Indians, $100,000; in enlarging the capacity of the San Juan boarding school and constructing a new day school at Tesnospos, in New Mexico; in converting the Lukachukai day school into a boarding school and increasing the capacity of the Tohatchi boarding school, in Arizona, or for any of the projects mentioned, in whole or in part, in case the sum appropriated should not be sufficient to complete them all."

Mr. MADDEN. I make a point of order against that amendment.

Mr. CARTER of Oklahoma. The item is not subject to a point of order.

The CHAIRMAN. The Chair has not seen the amendment. What is the point of order?

Mr. MADDEN. The point of order is that the gentleman is proposing to change the law.

The CHAIRMAN. That it is new legislation?

Mr. MADDEN. Yes; that it is legislation on an appropriation bill.

Mr. HAYDEN. If the gentleman will yield to me, I can explain the situation. The gentleman from Kansas [Mr. CAMPBELL] asked that specific mention be made of the schools in the Navajo country where the money contained in this item was to be expended during the next fiscal year. With a view of obtaining that information and placing it in the bill, I sent to the Indian Office and had the language prepared which specifically mentions four schools, although it still leaves a lump sum of $100,000 to be divided among them. The total amount appropriated is not changed and it still carries out the treaty with the Navajo Indians.

Mr. NORTON. The gentleman does not specify how much is to be used for each school.

Mr. HAYDEN. No; I received this explanation in regard to that from Mr. Meritt:

JANUARY 21, 1918.

Memorandum for Mr. HAYDEN:

Complying with our telephone conversation, there is being sent you herewith an item providing for education facilities for the Navajo Indian children. We have made this item as specific as possible with the information available. Because of the present unprecedented conditions it is impossible for us to give specific information in regard to the cost of construction, and if we should make the amount specific we could not expend it at any other place in the Navajo country, although owing to local conditions, it might be found that it could be spent to better advantage and more economically at some other point.

E. B. M.

Now, we gain this much by the amendment that I have offered: We have four schools specifically named, and next year we will know what was expended at each school, instead of receiving

a general report. With that information we can then appropriate understandingly.

The CHAIRMAN. The point of order is sustained. Although the Chair has not been able to fully investigate it very closely, he is advised by the Parliamentary Clerk who has examined it. It leaves the bill exactly as it is now.

Mr. HAYDEN. If that is the case I have no objection. I was simply trying to improve the bill.

Mr. CARTER of Oklahoma. Mr. Chairman, I move that the committee do now rise.

Mr. MADDEN. But, Mr. Chairman, we have not passed upon the paragraph. I make a point of order against the paragraph.

The CHAIRMAN. The point of order is overruled.

Mr. MADDEN. Mr. Chairman, I submit that the paragraph has not been acted upon even though the point of order is overruled.

The CHAIRMAN. The gentleman from Illinois was not here when the paragraph was read and passed without prejudice.

Mr. NORTON. Mr. Chairman, may I be heard on the paragraph? I move to strike out the last word. This paragraph provides an appropriation under certain treaty items. It further provides that the Secretary may expend said fund in his discretion in establishing or enlarging day or industrial schools. I wanted to call that to the attention of the chairman. It seems to me that it is clearly subject to a point of order, with all due deference to the ruling of the Chair. I think the Chair had not observed that provision.

The CHAIRMAN. The Chair will say that when this matter was passed over he had the Parliamentary Clerk investigate the question whether it was subject to a point of order. Without careful investigation on the part of the Chair he has followed the advice of the Parliamentary Clerk that it is not subject to a point of order and he so holds. The Chair makes that statement in view of the remarks of the gentleman from North Dakota. The question is on the motion of the gentleman from Oklahoma that the committee do now rise.

The motion was agreed to; accordingly, the committee rose, and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 8696, the Indian appropriation bill, and had directed him to report the same back with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment; if not, the Chair will put them in gross.

There was no demand for a separate vote.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. CARTER of Oklahoma, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. CARTER of Oklahoma. Mr. Speaker, I ask unanimous consent that all those who have addressed the House on this bill may have the right to extend their remarks in the RECORD.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that all who have spoken on the bill may have leave to extend their remarks in the RECORD. Is there objection?

Mr. WALSH. Reserving the right to object, did not the gentleman get that at the beginning of the general debate on this bill?

Mr. CARTER of Oklahoma. I believe the gentleman from Massachusetts is correct.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 6176. An act extending the time for the construction of a bridge across the Monongahela River at or near the city of Fairmont, W. Va.; and

H. R. 7697. An act to authorize the calling into the service of the United States the militia and other locally created armed forces in the Philippine Islands, and for other purposes.

HARRY GRAHAM.

Mr. FIELDS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 1418) to authorize the President of the United States to appoint Harry Graham captain of Infantry.

The SPEAKER. The gentleman from Kentucky asks unanimous consent for the present consideration of the bill S. 1418, which the Clerk will report.

The Clerk read the bill at length.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, I ask the gentleman from Kentucky to withdraw his request, as I wish to make some observations on the bill when it is presented.

Mr. FIELDS. Very well, Mr. Speaker; I withdraw the request.

LEAVE TO ADDRESS THE HOUSE.

Mr. FESS. Mr. Speaker, I ask unanimous consent that to-morrow, after the reading of the Journal and the disposition of business on the Speaker's table, I be permitted to address the House for 10 minutes on the dual monarchy, with special reference to the possibility of revolution.

The SPEAKER. To-morrow is Calendar Wednesday.

Mr. FESS. If that would shut out a request for unanimous consent, I make it for Thursday.

The SPEAKER. The gentleman from Ohio asks unanimous consent that on Thursday, after the reading of the Journal and the disposition of the business on the Speaker's table, he be allowed to address the House for 10 minutes. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 5 minutes p. m.) the House adjourned until to-morrow, Wednesday, January 23, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Navy, transmitting a draft of proposed bill to define more clearly the authority of the Navy Department in the matter of ordering into active service retired officers of the Navy (H. Doc. No. 850); to the Committee on Naval Affairs and ordered to be printed.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Port Gamble Harbor, Wash. (H. Doc. No. 851); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

3. A letter from the Governor of the Federal Reserve Board, transmitting fourth annual report of the Federal Reserve Board, covering operations for the year 1917 (H. Doc. No. 852); to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 3081) to extend the time for the completion of the municipal bridge approaches, and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri, reported the same without amendment, accompanied by a report (No. 251), which said bill and report were referred to the House Calendar.

Mr. WEBB, from the Committee on the Judiciary, to which was referred the bill (H. R. 8753) to amend section 3, title 1, of the act entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, reported the same with amendment, accompanied by a report (No. 250), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SULZER: A bill (H. R. 9092) for the regulation and protection of the fisheries of the Territory of Alaska, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. ASHBROOK: A bill (H. R. 9093) to amend the act approved September 8, 1916, chapter 470, Statutes at Large, Sixty-fourth Congress, relating to pensions; to the Committee on Invalid Pensions.

By Mr. WEBB: A bill (H. R. 9094) to amend section 1 of Title VIII of the act entitled "An act to punish acts of inter-

ference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917; to the Committee on the Judiciary.

By Mr. HAYES: A bill (H. R. 9095) to provide for the retirement of employees in the classified civil service, and for other benefits and purposes in connection therewith; to the Committee on Reform in the Civil Service.

By Mr. DENT (by request): A bill (H. R. 9096) to authorize the extension of a spur track or siding from the existing lines of railroad in the District of Columbia across First Street NE., between L and M Streets, to the buildings occupied by the field medical supply depot of the Army; to the Committee on the District of Columbia.

Also, a bill (H. R. 9097) to prescribe the personnel of the Army Nurse Corps, the qualifications for appointment and the method of appointment therein, the pay, allowances, and leave of absence of members of said corps, and the conditions under which they may be retired; to the Committee on Military Affairs.

Also, a bill (H. R. 9098) to suspend for the period of the present emergency sections 45, 46, and 56 of "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, and for other purposes; to the Committee on Military Affairs.

Also, a bill (H. R. 9099) to amend an act entitled "An act to provide for the settlement of the claims of officers and enlisted men of the Army for loss of private property destroyed in the military service of the United States," approved March 3, 1885; to the Committee on Military Affairs.

Also, a bill (H. R. 9100) to authorize the Secretary of War to grant furloughs without pay and allowances to enlisted men of the Army of the United States, and for other purposes; to the Committee on Military Affairs.

Also, a bill (H. R. 9101) to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct; to the Committee on Military Affairs.

By Mr. TINKHAM: Resolution (H. Res. 230) providing for the making of the port of Boston a port of embarkation; to the Committee on Military Affairs.

By Mr. MASON: Resolution (H. Res. 231) providing for an investigation by the Committee on Agriculture of certain cereals, mineral oils, etc.; to the Committee on Rules.

By Mr. ROGERS: Resolution (H. Res. 232) calling upon the Postmaster General for certain information concerning the postal service between the United States and the American Expeditionary Force; to the Committee on the Post Office and Post Roads.

By Mr. VAN DYKE: Joint resolution (H. J. Res. 221) creating a national war slogan; to the Committee on the Judiciary.

By Mr. DENT (by request): Joint resolution (H. J. Res. 222) providing for the calling into immediate military service of certain classes of persons registered and liable for military service under the terms of the act of Congress approved May 18, 1917, entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States"; to the Committee on Military Affairs.

By Mr. ROGERS: Joint resolution (H. J. Res. 223) providing for the calling into immediate military service of certain classes of persons registered and liable for military service under the terms of the act of Congress approved May 18, 1917, entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States"; to the Committee on Military Affairs.

By Mr. DENT (by request): Joint resolution (H. J. Res. 224) providing for the registration for military service of all male persons citizens of the United States or residing in the United States who have, since the 5th day of June, 1917, and on or before the day set for the registration by proclamation by the President, attained the age of 21 years, in accordance with such rules and regulations as the President may prescribe under the terms of the act approved May 18, 1917, entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States"; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 9102) granting an increase of pension to Charles Fish; to the Committee on Pensions.

By Mr. BARNHART: A bill (H. R. 9103) granting an increase of pension to Daniel W. Nye; to the Committee on Invalid Pensions.

By Mr. BUTLER: A bill (H. R. 9104) granting an increase of pension to Charles M. Cheyney; to the Committee on Invalid Pensions.

By Mr. CAMPBELL of Kansas: A bill (H. R. 9105) granting an increase of pension to Francis E. Robb; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9106) granting a pension to Lottie Baughman; to the Committee on Invalid Pensions.

By Mr. CANNON: A bill (H. R. 9107) granting an increase of pension to Mary Turner Clements; to the Committee on Pensions.

By Mr. CARY: A bill (H. R. 9108) for the relief of Michael Philbin; to the Committee on Naval Affairs.

By Mr. CLARK of Missouri: A bill (H. R. 9109) granting an increase of pension to John W. Hunter; to the Committee on Invalid Pensions.

By Mr. COADY: A bill (H. R. 9110) for the relief of the Patterson Park Permanent Loan and Building Association, of Baltimore, Md.; to the Committee on Claims.

By Mr. COOPER of Ohio: A bill (H. R. 9111) to correct the military record of the late Irvin M. Kyle; to the Committee on Military Affairs.

By Mr. DICKINSON: A bill (H. R. 9112) for the relief of W. J. Laffoon; to the Committee on Claims.

By Mr. DOWELL: A bill (H. R. 9113) granting an increase of pension to Milton T. Monroe; to the Committee on Invalid Pensions.

By Mr. GEORGE W. FAIRCHILD: A bill (H. R. 9114) granting a pension to William F. Clapham; to the Committee on Pensions.

By Mr. FAIRFIELD: A bill (H. R. 9115) granting an increase of pension to Horace E. Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9116) granting an increase of pension to Peter V. Gruesbeck; to the Committee on Invalid Pensions.

By Mr. FERRIS: A bill (H. R. 9117) granting an increase of pension to James Longmire; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9118) granting a pension to Henry Minnett; to the Committee on Pensions.

By Mr. FIELDS: A bill (H. R. 9119) granting an increase of pension to Elijah W. Morgan; to the Committee on Pensions.

Also, a bill (H. R. 9120) for the relief of Lizzie Wilson; to the Committee on Claims.

By Mr. GREENE of Vermont: A bill (H. R. 9121) granting a pension to Harriet M. Green; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 9122) for the relief of Nathan L. Seamon; to the Committee on Public Lands.

By Mr. JACOWAY: A bill (H. R. 9123) for the relief of J. C. Hendricks, administrator of the estate of Samuel Houston, deceased; to the Committee on War Claims.

By Mr. JUUL: A bill (H. R. 9124) for the relief of Samuel Sandles; to the Committee on Claims.

By Mr. KEARNS: A bill (H. R. 9125) granting an increase of pension to William A. Aultman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9126) granting a pension to Elmer F. Malone; to the Committee on Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 9127) granting a pension to James Manning; to the Committee on Pensions.

By Mr. KEY of Ohio: A bill (H. R. 9128) granting an increase of pension to Henry Price; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9129) granting a pension to Luella Harrah; to the Committee on Invalid Pensions.

By Mr. McKINLEY: A bill (H. R. 9130) granting a pension to Mary C. Landress; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9131) granting an increase of pension to William W. Carson; to the Committee on Invalid Pensions.

By Mr. MOORES of Indiana: A bill (H. R. 9132) granting a pension to Ezra M. Sellers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9133) granting a pension to Benjamin H. Sellers; to the Committee on Invalid Pensions.

By Mr. PRATT: A bill (H. R. 9134) granting an increase of pension to Elias B. Green; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9135) granting an increase of pension to Albert B. Cornell; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 9136) granting a pension to Marie Schneider; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9137) granting an increase of pension to James C. Lewis; to the Committee on Invalid Pensions.

By Mr. SANFORD: A bill (H. R. 9138) granting an increase of pension to Daniel Lawlor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9139) granting an increase of pension to Charles H. Trimble; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9140) granting an increase of pension to Richard Blackburn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9141) granting a pension to Rosella MaGee; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9142) granting a pension to William E. Martin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9143) granting a pension to Henrietta De Groat; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9144) granting a pension to Elizabeth Hogan; to the Committee on Pensions.

Also, a bill (H. R. 9145) for the relief of John J. Dooley; to the Committee on Military Affairs.

Also, a bill (H. R. 9146) for the relief of Tennis W. Wade; to the Committee on Military Affairs.

Also, a bill (H. R. 9147) for the relief of Henry C. Romaine; to the Committee on Military Affairs.

Also, a bill (H. R. 9148) for the relief of Martin W. Joralemon, alias Martin Whitbeck; to the Committee on Military Affairs.

Also, a bill (H. R. 9149) for the relief of Michael H. Feeley; to the Committee on Claims.

Also, a bill (H. R. 9150) for the relief of John McNeil; to the Committee on Military Affairs.

By Mr. SCHALL: A bill (H. R. 9151) to remove the charge of desertion against George W. Posey; to the Committee on Military Affairs.

Also, a bill (H. R. 9152) for the relief of Sim Milttlie; to the Committee on Claims.

By Mr. SHACKLEFORD: A bill (H. R. 9153) granting a pension to Johanna McGee; to the Committee on Invalid Pensions.

By Mr. WHITE of Maine: A bill (H. R. 9154) granting an increase of pension to William P. Damon; to the Committee on Invalid Pensions.

By Mr. WILLIAMS: A bill (H. R. 9155) granting a pension to John T. Burris; to the Committee on Pensions.

By Mr. WOODS of Iowa: A bill (H. R. 9156) for the relief of J. P. Littell; to the Committee on Claims.

Also, a bill (H. R. 9157) for the relief of John M. Stewart; to the Committee on Military Affairs.

By Mr. MAPES: A bill (H. R. 9158) granting a pension to Hortense Andrews; to the Committee on Inval'd Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALE of New York: Petition of Ben Michell, Washington, D. C., favoring increased salaries for lighthouse workers; to the Committee on Appropriations.

Also, memorial of New York Typographical Union, No. 6, protesting against the order of the Fuel Administrator; to the Committee on Agriculture.

Also, petition of A. K. Shattuck, New York City, favoring the daylight-saving law; to the Committee on Interstate and Foreign Commerce.

Also, petition of Food Trade Publishing Co., New York City, protesting against zonal arrangement for postal rates for periodicals; to the Committee on Ways and Means.

Also, resolution of the National Council of the Sons and Daughters of Liberty, favoring House bill 5667; to the Committee on Military Affairs.

Also, resolution of the National Council of the Sons and Daughters of Liberty, favoring House bill 4892; to the Committee on Immigration and Naturalization.

Also, petition of C. E. Knoeppel, of New York City, urging legislation placing manufacturing activities of the country for war under one organization; to the Committee on Military Affairs.

By Mr. DICKINSON: Petition of 16 citizens of Calhoun, Henry County, Mo., in support of H. R. 5410 and S. 2692, bills to render possible the return of the bodies of our soldier dead to their home burial grounds in a sanitary and recognizable condition; to the Committee on Military Affairs.

By Mr. HAYES: Resolution from Starr King Post No. 52, Grand Army of the Republic, Santa Barbara, Cal., favoring an increase of pensions to Civil War veterans; to the Committee on Invalid Pensions.

By Mr. RAKER: Resolution adopted at a conference attended by representatives of various communities around San Francisco Bay, in re Pacific coast defense; to the Committee on Military Affairs.

Also, memorial of Charles L. Mitchell, president chamber of commerce, Topeka, Kans, in re periodical postage amendment; to the Committee on Ways and Means.

Also, petition of I. N. Hylen, secretary Alaska Fishermen's Union, San Francisco, Cal., in re Government hospital in the Bristol Bay region; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of Consolidated Chamber of Commerce of Sacramento, Cal., in re attempt to take life of Gov. Stevens of California and the treatment of alien enemies; to the Committee on the Judiciary.

Also, petition of O. J. Rice, president Panama Metal Producers' Council, in re wages and living conditions affecting Americans employed in the Canal Zone; to the Committee on Interstate and Foreign Commerce.

Also, resolution by American Society of Equity, Wausau, Wis., in re Government ownership of railroads; also a resolution of Atlantic Deep Waterways Association, favoring various deep-waterway projects; to the Committee on Interstate and Foreign Commerce.

By Mr. SCHALL: Resolution from Mrs. Bradley Phillips, as president of the Elective Study Club, protesting against increased postal rates on periodicals; to the Committee on Ways and Means.

By Mr. TAGUE: Memorial of Chamber of Commerce, Dover, N. J.; the Enoch Pratt Free Library, Baltimore, Md.; the Haverhill Chamber of Commerce, Haverhill, Mass.; and National Society of the Sons and Daughters of the Pilgrims, all protesting against increasing postal rates on periodicals; to the Committee on Ways and Means.

Also, resolution of a mass meeting of the Lithuanian people of Massachusetts, asking that the United States demand the restoration of the political independence of Lithuania and support the rights of all nations, large and small, as presented by the representatives of those nations; to the Committee on Foreign Affairs.

Also, resolution of the Brotherhood of Railroad Trainmen, Boston & Maine system, urging that all aliens except enemy aliens be made subject to the selective-draft law; also, a resolution of the Massachusetts State Board of Trade, urging that Boston be made a shipping port for munitions and soldiers; also, a resolution of the National Council of the Sons and Daughters of Liberty, urging the passage of House bill 5667; to the Committee on Military Affairs.

Also, resolution of the National Council of the Sons and Daughters of Liberty, urging the passage of House bill 4892; to the Committee on Immigration and Naturalization.

By Mr. TINKHAM: Resolution of a mass meeting of the Lithuanian people, asking that the United States demand the restoration of the political independence of Lithuania; to the Committee on Foreign Affairs.

By Mr. VARE: Memorial of Manufacturers' Association of Pennsylvania, protesting against the order of the Fuel Administrator; to the Committee on Agriculture.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *January 23, 1918.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Infinite Spirit, Father Soul, for the faith that calms all fears, the hope that cheers the heart, the truth that illumjnes the way and brings us to Thee in the sacred attitude of prayer(which solves the mystery of life and brings peace to the weary soul.

Who fathoms the Eternal Thought?
Who talks of scheme and plan?
The Lord is God! He needeth not
The poor device of man.

I walk with bare, hushed feet the ground
Men tread with boldness shod;
I dare not fix with mete and bound
The love and power of God.

May we receive these messengers sent by love from the throne of grace, and rest our souls in Thee, through Him, who taught us the way and the truth and the life. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, at the request of Mr. BYRNS of Tennessee, leave of absence was granted to Mr. EVANS for one week, on account of illness.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma. Mr. Speaker, I ask unanimous consent to have some corrections made in the totals of the Indian appropriation bill which was passed yesterday, which I have just found to be necessary.

Mr. CAMPBELL of Kansas. Does the gentleman mean in the total of the amounts appropriated?

Mr. CARTER of Oklahoma. The gentleman will recall that in the case of the Pierre school, in South Dakota, and the school at Rapid City additional amounts were appropriated and they were not carried in the total at the end of the column. The total on page 52, line 10, of $80,000 should be changed to $86,500.

Mr. CAMPBELL of Kansas. Mr. Speaker, I suggest that the gentleman ask unanimous consent that the Clerk be authorized to ascertain the totals in each instance and to correct them.

Mr. FOSTER. I do not know that can be done. The bill has already been engrossed. I suggest that the gentleman from Oklahoma ask unanimous consent to vacate the proceedings by which the bill was passed on yesterday and take it back to the stage of amendment.

Mr. CARTER of Oklahoma. Mr. Speaker, I ask unanimous consent to vacate the proceedings by which the Indian appropriation bill (H. R. 8696) was passed yesterday back to the amendment stage.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to vacate the proceedings by which the Indian appropriation bill was passed on yesterday. Is there objection?

There was no objection.

Mr. CARTER of Oklahoma. Mr. Speaker, I now ask unanimous consent that the Clerk be authorized to correct the totals.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that the Clerk be authorized to correct the totals. Is there objection?

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CARTER of Oklahoma, a motion to reconsider the vote by which the bill was passed was laid on the table.

CALL OF THE HOUSE.

Mr. LONDON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. Evidently there is not.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

Anthony	Edmonds	Kahn	Rowland
Barkley	Esch	Kreider	Sanders, Ind.
Campbell, Pa.	Estopinal	LaGuardia	Sanders, La.
Cannon	Evans	McCulloch	Saunders, Va.
Capstick	Fairchild, G. W.	McFadden	Schall
Carlin	Fields	McKenzie	Scott, Pa.
Chandler, N. Y.	Flynn	Maher	Scully
Clark, Fla.	Focht	Mann	Sherley
Condy	Fuller, Mass.	Miller, Wash.	Sims
Costello	Godwin, N. C.	Mondell	Smith, Mich.
Crosser	Gould	Montague	Stephens, Nebr.
Currie, Mich.	Graham, Pa.	Morin	Stiness
Curry, Cal.	Gray, N. J.	Mott	Sullivan
Dale, N. Y.	Griest	Mudd	Sweet
Dale, Vt.	Hamill	Nicholls, S. C.	Swift
Davidson	Hamilton, N. Y.	O'Shaunessy	Templeton
Decker	Haskell	Paige	Tinkham
Dempsey	Heintz	Parker, N. J.	Van Dyke
Dent	Hood	Porter	Vare
Dewalt	Howard	Price	Ward
Dooling	Hull, Iowa	Rayburn	Wilson, La.
Doremus	Johnson, S. Dak.	Riordan	Winslow
Drukker	Juul	Rodenberg	Wood, Ind.

The SPEAKER. On this roll call 335 Members, a quorum, answered to their names.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will unlock the doors.

LEAVE OF ABSENCE.

The SPEAKER. The Chair lays before the House the following personal request.

The Clerk read as follows:

Mr. MOORES of Indiana requests unanimous consent for leave of absence for his colleague, Mr. BLAND, to be absent until February 1, that he may make public speeches in Indiana under the direction of the Council of National Defense.

The SPEAKER. Without objection, the request will be granted.

There was no objection.

CALENDAR WEDNESDAY.

The SPEAKER. This is Calendar Wednesday and the Clerk will call the committees.

When the Committee on Patents was called,

Mr. SMITH of New York. Mr. Speaker, the Committee on Patents reported the bill to give additional force to the United States Patent Office. It is H. R. 5287. This bill has been included in other legislation, and I ask unanimous consent that it lie on the table.

The SPEAKER. Without objection, the bill will lie on the table.

There was no objection.

The SPEAKER. Has the Committee on Patents any more business?

Mr. SMITH of New York. No more business.

When the Committee on Irrigation of Arid Lands was called,

Mr. TAYLOR of Colorado. Mr. Speaker, on behalf of the Irrigation Committee I call up the bill H. R. 4954, No. 22 on the House Calendar.

Mr. STAFFORD. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. STAFFORD. Mr. Speaker, I wish to make a point of order as to this bill. Mr. Speaker, this bill is on the House Calendar. As I construe the provisions of the bill it waives the lien that the Government now has to the extent of $100,000,000 on irrigated land, and waives that lien in favor of irrigation districts provided under State enactment.

The SPEAKER. What is the gentleman's point of order?

Mr. STAFFORD. The point of order is that the bill should be on the Union Calendar instead of on the House Calendar.

Mr. KINKAID. Mr. Speaker, will the gentleman withhold the point of order until an explanation can be made? I would yield to the gentleman from Colorado [Mr. TAYLOR] to make an explanation.

The SPEAKER. The gentleman makes a point of order that this bill ought to be on the Union Calendar instead of the House Calendar. Now, if there is any gentleman who wants to be heard——

Mr. TAYLOR of Colorado. Mr. Speaker, I was unable to hear the gentleman's statement as to why it should be on the Union Calendar rather than on the House Calendar. I did not exactly catch the point of order.

The SPEAKER. What reason does the gentleman give for his point of order?

Mr. STAFFORD. Mr. Speaker, under the act of 1910, whereby authorization was granted to the Reclamation Service to use $20,000,000 of Government money for the continuation of reclamation projects, it was provided that 50 per cent of all the funds arising from returns on reclamation projects should be paid into the United States Treasury to reimburse the amount of the advancement of $20,000,000. Subsequently that act was amended by the sundry civil appropriation act of June 30, 1917, which required that there should be paid annually $1,000,000 from the reclamation fund to the general fund of the Treasury.

Mr. KINKAID. Mr. Speaker, I rise to the point of order that the discussion is not directed to the point of order raised by the gentleman from Wisconsin.

The SPEAKER. Well, the Chair always allows a good deal of latitude on points of order.

Mr. STAFFORD. If the gentleman from Nebraska will possess himself in patience, I will show the argument I am making has direct reference to the point of order. I am not seeking to discuss the merits except as it is necessary to show that this bill seeks to lift the lien the National Government to-day has of $100,000,000 on all the lands of the reclamation projects and transfer that absolutely and allow State organizations to go ahead without any obligation under this law to repay that money, except a mere promise.

The SPEAKER. Now, why is it on the wrong calendar?

Mr. STAFFORD. I am now directing attention, and would have reached it by this time, had it not been for the hurried interruption of the gentleman from Nebraska. Section 2 of the bill, Mr. Speaker, provides—

That patent and water-right certificates which shall hereafter be issued under the terms of the act entitled "An act providing for patents on reclamation entries, and for other purposes," by which the irriga-

tion district agrees to make the payment of all charges for the building of irrigation works and for operation and maintenance, shall not reserve to the United States—

I am now reading lines 8 and 9, page 3—

a lien for the payment of such charges.

To-day, under existing law, as it has been since the first reclamation act that was passed in 1902, the Government has a lien on these lands for the payment of these charges for construction work and water-right privileges. Going on further:

And where such a lien shall have been reserved in any patent or water-right certificate issued under the said act of Congress——

The SPEAKER. Now, where is the gentleman reading?

Mr. STAFFORD. I am now continuing, following line 9, page 3. I first read lines 8 and 9, on page 3, and then continuing:

And where such a lien shall have been reserved in any patent or water-right certificate issued under the said act of Congress, the Secretary of the Interior is hereby empowered to release such lien in such manner and form as may be deemed effective.

Under that provision the Secretary of the Interior is authorized to waive the lien of the Government of the United States on the lands that have been improved by the funds of the Government for reclamation projects, and that lien necessarily creates a liability that the Government has a right to to-day, an asset, rather, that the Government has a right to to-day in seeking a reimbursement to the extent of nearly a hundred millions of dollars that have been invested for the improvement of these lands.

Now, further reading, on line 14:

And the Secretary of the Interior is further empowered to release liens in favor of the United States contained in water-right applications and to assent to the release of liens to secure reimbursement of moneys due to the United States pursuant to water-right applications running in favor of the water users' association and contained in stock subscription contracts to such association, when the land covered by such lien shall be subject to assessment and levy for the collection of all moneys due and to become due to the United States.

Now, Mr. Speaker, permit me to refresh the memory of the Speaker on the rule which requires such bills as this to be on the Union Calendar. I read paragraph 3 of Rule XXIII, as follows:

All motions or propositions involving a tax or charge upon the people; all proceedings touching appropriations of money, or bills making appropriations of money or property, or requiring such appropriation to be made, or authorizing payments out of appropriations already made, or releasing any liability to the United States for money or property, or referring any claim to the Court of Claims, shall be first considered in a Committee of the Whole, and a point of order under this rule shall be good at any time before the consideration of a bill has commenced.

Mr. Speaker, the very purpose of this bill is to release the lien of the Government on all the lands in the reclamation projects, which is first and supreme to-day, and subordinate its rights to the claims of other persons. The report shows that this bill is for the purpose of allowing these entrymen and users of water rights on these reclamation projects to obtain a loan from the Farm Loan Board, so that their lien will be prior to that of the lien of the Government.

But more than that, the report on its face shows the very purpose is to lift the lien and to surrender it absolutely, so that the Government will not have the right to reimbursement to the extent, as under the provision of the sundry civil act, of $1,000,000, to be paid into the Treasury every year.

I wish to refresh the memory of the Speaker further to that condition which confronted the Reclamation Service back in 1909 and 1910, when that service was under the direction of Director Newell. He will remember distinctly that they were without funds, that the funds that had accrued as the result of the sale of public lands, and that could be utilized in reclamation projects, had been exhausted, and it was necessary for President Taft to urge upon Congress the loan of $20,000,000 for the continued construction of these reclamation projects. The condition of that loan was that one-half of all the funds resulting from the operation of reclamation projects should be turned into the Treasury. That provision was amended by the sundry civil act for the year 1918, which absolutely requires $1,000,000 to be returned annually until that $20,000,000 has been returned to the Treasury.

The SPEAKER. Now, the Chair would like to ask the gentleman a question. Does this bill prevent the Government getting its money back or not?

Mr. STAFFORD. It does.

The SPEAKER. How?

Mr. STAFFORD. Why, Mr. Speaker, this bill provides that the Government shall waive its lien to this land.

The SPEAKER. I know; but does that necessarily mean the Government is going to lose the money?

Mr. STAFFORD. Why, under the actual operation of affairs, yes; absolutely yes. And why? In the first place, it enables any private party to loan money to the individual entryman or to the homesteader who is enjoying water rights on these reclamation projects. That immediately releases a liability under the provisions of this rule to which I have called attention. That mortgagee, whether it be the Federal Farm Loan Board or whether it be a private individual, would take prior rights and would necessarily bar the right of the National Government to its lien.

Furthermore, Mr. Speaker——

Mr. GARNER. Will the gentleman yield?

Mr. STAFFORD. In just one minute.

Furthermore, under existing law the lien of the Government is prior to the right of the State to collect its taxes. Pass this bill in its present form and you waive that right; you waive absolutely the lien of the Government in favor of the State for its taxes, in favor of the private person who may loan money. It lifts the lien entirely. The express language says that. I directed the Speaker's attention to the authorization——

The SPEAKER. What the Chair asked the gentleman was, Does that language take away from the Government its right to recover this money?

Mr. STAFFORD. It does, indeed.

Mr. GARNER. Will the gentleman yield for a question?

Mr. STAFFORD. I will.

Mr. GARNER. Is not the main purpose of this bill to find a different method by which the Government can collect this money than the present method? Whether that is a wise method or not I will not undertake to say, but is not that the crux of this bill?

Mr. STAFFORD. Under existing law, Mr. Speaker, the Government has a fixed security on this land. It releases that security; it waives it. It releases it absolutely. It gives the right to the State to have priority in the way of taxation, in the first place, which it has not to-day. The lien of the Government to-day is supreme, so far as every dollar of money that has been advanced in this construction work on these reclamation projects is concerned. This bill subordinates that lien; it changes the security it now has from the land to a promise of a person to perform.

Mr. KINKAID. Mr. Speaker, we have not reached the merits of the measure——

The SPEAKER. The gentleman will wait a minute. Is the gentleman from Wisconsin [Mr. STAFFORD] through?

Mr. STAFFORD. I have made my argument.

The SPEAKER. Then the gentleman from Nebraska is recognized.

Mr. KINKAID. We have not reached the measure upon its merits. We are discussing the technical question raised by the point of order, which involves the rules of this body.

I differ with the learned parliamentarian from Wisconsin [Mr. STAFFORD]. I think he is incorrect. If he had correctly answered the question propounded by the Speaker, which goes to the essence of the parliamentary question, he would thereby have admitted that he has no case. If he had answered correctly the question propounded by the gentleman from Texas [Mr. GARNER], he would have thereby admitted that there is nothing in the point of order which he has raised. The bill does provide for a change of the mode whereby the Government is paid back the money it has invested. It changes it to a different form whereby the money is to be raised. Instead of the lien being continued on each individual entry or unit, it is changed so that it is en masse on the whole district which State laws authorize to be formed, and the State authorities under the general assessment laws of the State collect the taxes whereby the Government is to be paid back the money invested in the construction of projects. It facilitates the business of the Government. Nearly all the irrigation States have district laws.

Mr. RAKER. Mr. Speaker, speaking on the point of order, it seems to me the whole thing devolves on the construction of the following language of subdivision 3 of Rule XXIII, Rules of the House:

Or releasing any liability to the United States for money or property. * * *

Now, I want to call the Speaker's attention to the provision of this bill and what its purpose, as referred to by the gentleman [Mr. STAFFORD] on the other side. With all due respect to what the gentleman says, he evidently does not fully understand the provisions of this bill. This does not release the liability. It does not release one cent. It holds a lien upon the same land. In addition to that it covers all the land in the district wherein the land is located, so that, it being on a particular tract, the district enters into a contract and levies an assessment, and all the land in the district is covered by those assessments.

The SPEAKER. Does this bill in any way release the Government lien?

Mr. RAKER. Absolutely not. It gives it an additional security to collect its money.

Mr. LENROOT. Mr. Speaker, will the gentleman yield?

Mr. RAKER. Certainly.

Mr. LENROOT. If this passes the Government can not foreclose the lien upon this particular tract because its lien is gone.

Mr. GARNER. Mr. Speaker, will the gentleman permit an interruption?

Mr. LENROOT. Yes.

Mr. GARNER. Has the gentleman read subdivision 3 of Rule XXIII as to liability? It does not release the liability. It releases the lien, but it does not release the liability.

Mr. LENROOT. It releases the liability to this particular land and substitutes a greater one.

Mr. GARNER. Will the gentleman yield further?

Mr. LENROOT. Certainly.

Mr. GARNER. Is the releasing of the lien the releasing of a liability? To illustrate, if I may, in a legal phrase, if the gentleman from Wisconsin owed a debt and had given a mortgage on the piece of land to secure the debt a release of that land would not release the liability. That is the language of this rule. It does not say it releases the security, but releases the liability.

Mr. BORLAND. The liability is not on the individual. It is on the land, and the lien is the liability when released on that particular land. It does not make any difference whether other assets are exchanged for it Under the law the liability is gone. The gentleman from Wisconsin is right.

Mr. FOSTER. Mr. Speaker, will the gentleman yield?

Mr. RAKER. Certainly.

Mr. FOSTER. Suppose these parties that are on this land fail to pay the taxes to the State. What becomes of it? Does not the Government lose its lien?

Mr. RAKER. No.

Mr. FOSTER. I do not see why.

Mr. RAKER. If gentlemen will allow me to proceed, the change of the form of the lien, the adding of additional security upon which the liability depends, is not a releasing of the liability referred to in the rule. And I want to say to the Speaker about this bill that it does not release the liability. It does not affect the liability of the Government, but instead of that it adds additional security to the Government in the method of collecting the money due.

The SPEAKER. Well, now, where is there anything in the bill that shows that?

Mr. RAKER. I will read it—the very first section:

That in carrying out the purposes of the act of June 17, 1902 (32 Stats., p. 388), and acts amendatory thereof and supplementary thereto, and known as and called the reclamation law, the Secretary of the Interior may enter into contract with any legally organized irrigation district whereby such irrigation district shall agree to pay the moneys required to be paid to the United States, and in such event water-right applications on the part of landowners and entrymen, in the discretion of the Secretary of the Interior, may be dispensed with. In the event of such contract being made with an irrigation district, the Secretary of the Interior, in his discretion, may contract that the payments, both for the construction of irrigation works and for operation and maintenance, on the part of the district shall be made upon such dates as will best conform to the district and taxation laws of the respective States under which such irrigation districts shall be formed.

In the first instance, Mr. Speaker, by a voluntary act on the part of the irrigation district formed under the laws of the State it becomes a municipality and levies its tax for the purpose of paying its obligations, and through that authority, by virtue of the board of directors, they contract with the Secretary of the Interior that they will pay all of the obligations due the United States; and upon that not only the land in the particular instance is bound, but all the land in the district, privately owned and otherwise, becomes subject to the tax under the State law and under that district. In addition to one tract of land, it includes all the other land that is owned by the United States that is under the reclamation law; and, in addition to that, it includes all of the privately owned land that never has taken up and assumed the responsibilities under the irrigation law, so as to make all responsible to pay the taxes due the Government.

Mr. LITTLE. Mr. Speaker, will the gentleman yield?

Mr. RAKER. Yes.

Mr. LITTLE. Is this the bill that is intended to cover the work of the Farm Loan Board?

Mr. RAKER. Yes.

Mr. LITTLE. I reserved the right to differ with the gentleman regarding its effect. I want to ask this question. I understand you have made a statement to the Speaker to this effect, that the liability for this particular land, for this particular debt, is gone?

Mr. RAKER. I did not hear the gentleman.

Mr. LITTLE. As I understand it, the gentleman states that the liability of this particular land is released, which makes it susceptible to the rule. Now, the gentleman says there is substituted the liability of the irrigation district. Is it not a fact that that irrigation district has other liabilities, such as taxes, which would take precedence of this claim?

Mr. RAKER. No.

Mr. LITTLE. Could they not sell all this irrigation district for the taxes before the Government gets paid for this land?

Mr. RAKER. No.

Mr. STAFFORD. Why not?

Mr. RAKER. Because in all these districts involved in this legislation there is not 10 per cent of the land which has a Government lien upon it. Ninety per cent of the lands are privately owned, and this provision that the gentleman refers to was placed in it only three years ago for the purpose of covering the particular cases where the parties wanted to obtain patents. In addition to that, I again call the attention of the Speaker to the wording of this rule. It says the releasing of a liability——

The SPEAKER. The Chair wants to ask the gentleman this question: Does this bill weaken the Government's lien?

Mr. RAKER. If the Speaker will permit me to answer that, it trebles and quadruples the Government's interest in the land, compared to what it has to-day.

The SPEAKER. How does it do it?

Mr. RAKER. By giving a lien upon all the property in the district.

Mr. BORLAND. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BORLAND. That question answers itself. The Government now has a lien on all land embraced in the irrigation district. That is to be exchanged for a lien upon the irrigation district as a corporate body; but that irrigation district will be subject to other claims. The Government can not possibly increase the extent of its security, because the security is there anyhow.

The SPEAKER. The gentleman from Missouri can not take the gentleman from California off the floor——

Mr. BORLAND. I want to suggest that this irrigation district can have jurisdiction over no more land than the Government now has——

The SPEAKER. The gentleman from California [Mr. RAKER] has the floor. To whom does the gentleman yield?

Mr. RAKER. I yield to the gentleman from Texas [Mr. GARNER].

Mr. GARNER. I want to propound a parliamentary inquiry to the Speaker. If the Speaker should hold that this bill ought to be on the Union Calendar, can he order it placed on the Union Calendar as of to-day, and can the bill be called up immediately?

The SPEAKER. That is exactly what the Chair will do.

Mr. GARNER. Then it does not make any difference. It is just a question of tweedledum or tweedledee.

Mr LITTLE. Will the gentleman yield again to a member of the committee?

Mr. RAKER. I yield again; but, under the Speaker's statement, what is the use of taking up time? I am convinced that I am right, and I want to call the attention of the gentleman from Missouri [Mr. BORLAND] to the fact that he does not appear to understand the provisions of this bill, because, he says, all of the lands are under the reclamation project. Now, one of the curses of these irrigation projects is that not all of the land is under the lien——

The SPEAKER. The Chair is ready to rule. This is a very close question, and in the end it does not make a particle of difference which one of these methods you pursue, or whether the bill is on the House Calendar or on the other calendar; and to be absolutely on the safe side, and to guard the rights of the Government in the premises, the Chair decides that this particular bill ought to be on the Union Calendar; and he further decides that the House automatically resolves itself into the Committee of the Whole House on the state of the Union to consider the bill, with the gentleman from Indiana [Mr. Cox] in the chair. [Applause.]

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 4954) to provide for the application of the reclamation law to irrigation districts, with Mr. Cox in the chair.

Mr. RAKER. I ask unanimous consent that the first reading of the bill be dispensed with.

Mr. STAFFORD. Very few Members are acquainted with the provisions of the bill. It is a short bill, and a most important one, and I object.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in carrying out the purposes of the act of June 17, 1902 (32 Stats., 388), and acts amendatory thereof and supplementary thereto, and known as and called the reclamation law, the Secretary of the Interior may enter into contract with any irrigation district whereby such irrigation district shall agree to pay the moneys required to be paid to the United States, and in such event water-right applications on the part of landowners and entrymen in the discretion of the Secretary of the Interior, may be dispensed with. In the event of such contract being made with an irrigation district, the Secretary of the Interior, in his discretion, may contract that the payments, both for the construction of irrigation works and for operation and maintenance, on the part of the district shall be made upon such dates as will best conform to the district and taxation laws of the respective States under which such irrigation districts shall be formed, and if he deem it advisable, he may contract for such penalties or interest charges in case of delinquency in payments and for such discounts for prompt payment as he may deem proper and consistent with such State laws, notwithstanding the provisions of sections 1, 2, 3, 5, and 6 of the reclamation-extension act approved August 18, 1914 (38 Stats., 686). The agents of the United States may accept a partial payment of the amount due from any district to the United States, providing such acceptance shall not constitute a waiver of the balance remaining due, nor the interest or penalties, if any, accruing upon said balance.

SEC. 2. That patents and water-right certificates which shall hereafter be issued under the terms of the act entitled "An act providing for patents on reclamation entries, and for other purposes," approved August 9, 1912 (37 Stat. L., 265), for lands lying within any irrigation district with which the United States shall have contracted, by which the irrigation district agrees to make the payment of all charges for the building of irrigation works and for operation and maintenance, shall not reserve to the United States a lien for the payment of such charges; and where such a lien shall have been reserved in any patent or water-right certificate issued under the said act of Congress, the Secretary of the Interior is hereby empowered to release such lien in such manner and form as may be deemed effective; and the Secretary of the Interior is further empowered to release liens in favor of the United States contained in water-right applications and to assent to the release of liens to secure reimbursement of moneys due to the United States pursuant to water-right application running in favor of the water-users' association and contained in stock subscription contracts to such associations, when the lands covered by such liens shall be subject to assessment and levy for the collection of all moneys due and to become due to the United States by irrigation districts formed pursuant to State law and with which the United States shall have entered into contract therefor.

SEC. 3. That upon the execution of any contract between the United States and any irrigation district pursuant to this act the public lands included within such irrigation district, when subject to entry, and entered lands within such irrigation district, for which no final certificates shall have been issued, and which may be designated by the Secretary of the Interior in said contract, shall be subject to all the provisions of the act entitled "An act to promote the reclamation of arid lands," approved August 11, 1916: *Provided*, That no map or plan as required by section 3 of the act of August 11, 1916, need be filed by the irrigation district for approval by the Secretary of the Interior.

With the following committee amendments:

Page 1, line 8, after the word "any" insert the words "legally organized."

Page 2, line 12, after the word "payments" strike out the words "and for such discounts for prompt payment."

Page 2, line 16, after the word "August" strike out the word "eighteenth" and insert the word "thirteenth."

Page 2, line 18, after the word "the" strike out the words "agents of the United States" and insert the words "Secretary of the Interior."

Page 3, line 18, after the word "water right" strike out the word "application" and insert the word "applications."

Page 4, line 6, after the word "issued" strike out the comma and insert the word "and."

Page 4, line 11, after the word "the" insert the word "said."

Page 4, line 11, after the word "act" strike out the words "of August 11, 1916."

The CHAIRMAN. The gentleman from California [Mr. RAKER] is recognized for one hour.

Mr. LITTLE. What is the arrangement as to the division of time?

The CHAIRMAN. An hour on a side.

Mr. LITTLE. Who is to control the time?

Mr. TAYLOR of Colorado. The gentleman from Nebraska [Mr. KINKAID] would naturally have control of the time on that side.

Mr. STAFFORD. He would have control of the time if he is against the bill. This is a bill involving a $100,000,000 lien. It is of enough importance so that the person in control of the time in opposition should be opposed to the bill.

Mr. LITTLE. Those of us on the committee who are opposed to the bill desire to have the time in the hands of some one who is opposed to it.

Mr. TAYLOR of Colorado. If the gentleman from Kansas is opposed to the bill, I think he would be the proper one to control the time in opposition.

Mr. KINKAID. That is satisfactory to me.

Mr. LITTLE. Very well, then, it is understood that I will control the time in opposition.

The CHAIRMAN. Is the gentleman from Kansas opposed to the bill?

Mr. LITTLE. I am.

The CHAIRMAN. The gentleman from Colorado [Mr. TAYLOR] is recognized for an hour.

Mr. TAYLOR of Colorado. I yield to the gentleman from California [Mr. RAKER] 20 minutes.

Mr. RAKER. Mr. Chairman, there seems to have arisen some misunderstanding as to the objects and purposes of this bill. I think a few statements covering the matter might be well put by myself at this time. I call the committee's attention to the fact that the first section gives the express sanction of Congress to cooperation between the United States and the irrigation districts, adapting the reclamation law as to the necessities of irrigation districts as quasi-municipal corporations under the laws of the respective reclamation States. I stop there to call the attention of the committee to the fact that, in the first place, the bill is optional; it is for the district to determine whether or not under the State law it will form an irrigation district. I want to call attention to the fact that in all the States where there are reclamation projects, except one, laws creating irrigation districts have already been enacted.

Mr. MORGAN. Mr. Speaker, will the gentleman yield?

Mr. RAKER. Yes.

Mr. MORGAN. In lines 7 and 8, on page 1, the bill provides that the Secretary of the Interior may enter into contracts with any legally organized irrigation district. It seems to me that is a very indefinite expression.

Mr. RAKER. We have an amendment that we are going to offer to that.

Mr. MORGAN. In what way?

Mr. RAKER. Just simply those legally organized and constituted.

Mr. MORGAN. And districts that have the power of taxation?

Mr. RAKER. Oh, if the gentleman will appreciate the situation, there can not be an irrigation district without its having the power to tax.

Mr. MORGAN. What is the definition of an irrigation district?

Mr. RAKER. I could not stop to take the time to give a definition now.

Mr. LITTLE. But this House is entitled to know.

Mr. RAKER. I call attention to the fact that in all those States that have a reclamation district law——

Mr. LITTLE. But most of the Members of the House are not from irrigation States.

Mr. RAKER. I can not yield. That is the same as a county, in effect. It has its State officers, it is under the law, there must be certain land, and a certain percentage of the landowners must have voted to organize, and that organization must go before the proper county supervisors or commissioners and must be viséed and gone into and then determine whether or not it will organize.

Mr. LITTLE. Just a moment.

Mr. RAKER. I do not yield. Then it comes up to the people of the irrigation district that own the land to vote, and if two-thirds of the landowners in the district vote to organize, then it is organized under the law, and the vote is canvassed by the county commissioners or the board of supervisors, and then it is declared an irrigation district under the law, with all the powers of taxation, the right to sue and be sued, the right to obtain land and dispose of land, and do all other things that an up-to-date municipal corporation is entitled to do.

Mr. FERRIS. Mr. Chairman, will the gentleman yield?

Mr. RAKER. Yes.

Mr. FERRIS. Mr. Chairman, I have just been reading Secretary Lane's letter. Is it true that this bill enables the reclamation claimants to go into the farm-loan associations and borrow money and execute mortgages which will be a lien ahead of the Government's lien?

Mr. RAKER. No.

Mr. FERRIS. This letter says it is, and I think the gentleman ought to be careful about that. The letter of Secretary Lane of July 2, 1917, says it will do that thing, and if it does that it is not fair to the Government, it is not fair to the other States or to anybody, and the legislation ought not to be passed, and the gentleman will not be able to pass it without a quorum, if it does that. I will not stand for it myself, because my State has been wheedled out of six and a half million dollars——

Mr. RAKER. I can not yield for an argument.

Mr. FERRIS. I shall take time in my own right and argue this thing. We are not going to be beaten out of $70,000,000 here without knowing it, if I am right about this.

Mr. RAKER. But the gentleman is not right, I am glad to say.

Mr. FERRIS. I am afraid I am.

Mr. RAKER. The gentleman is not, and I shall explain to him in just a moment. In a general way that is the substance, with all of the power of the reclamation districts. It is optional whether or not that reclamation district will enter into a contract with the Secretary of the Interior to come under the provisions of this law. Now, coming back to the question raised by the gentleman from Oklahoma, I think it is but fair to the Members of the House to state that the act that the gentleman referred to—passed on August 9, 1912—contains a provision in section 2 which it took me two weeks in the Committee on Irrigation of Arid Lands to have incorporated. I am the one who drew it, just for the purpose of avoiding any possibility, after the Government having issued a patent, if there was anything due for construction of the project or maintenance or upkeep, of preventing the Government from losing a dollar. We went over it in the committee and before the department, and I finally drew the draft that the committee adopted and which is now in the law, for the sole purpose, if there was anything due, of having it provided for. That act, in full, is as follows:

An act providing for patents on reclamation entries, and for other purposes.

Be it enacted, etc., That any homestead entryman under the act of June 17, 1902, known as the reclamation act, including entrymen on ceded Indian lands, may, at any time after having complied with the provisions of law applicable to such lands as to residence, reclamation, and cultivation submit proof of such residence, reclamation, and cultivation, which proof, if found regular and satisfactory, shall entitle the entryman to a patent, and all purchasers of water-right certificates on reclamation projects shall be entitled to a final water-right certificate upon proof of the cultivation and reclamation of the land to which the certificate applies, to the extent required by the reclamation act for homestead entrymen: *Provided*, That no such patent or certificate shall issue until all sums due the United States on account of such land or water right at the time of issuance of patent or certificate have been paid.

SEC. 2. That every patent and water-right certificate issued under this act shall expressly reserve to the United States a prior lien on the land patented or for which water right is certified, together with all water rights appurtenant or belonging thereto, superior to all other liens, claims, or demands whatsoever for the payment of all sums due or to become due to the United States or its successors in control of the irrigation project in connection with such lands and water rights.

Upon default of payment of any amount so due title to the land shall pass to the United States free of all encumbrance, subject to the right of the defaulting debtor or any mortgagee, lien holder, judgment debtor, or subsequent purchaser to redeem the land within one year after the notice of such default shall have been given by payment of all moneys due, with 8 per cent interest and cost. And the United States, at its option, acting through the Secretary of the Interior, may cause land to be sold at any time after such failure to redeem, and from the proceeds of the sale there shall be paid into the reclamation fund all moneys due, with interest as herein provided, and costs. The balance of the proceeds, if any, shall be the property of the defaulting debtor or his assignee: *Provided*, That in case of sale after failure to redeem under this section the United States shall be authorized to bid in such land at not more than the amount in default, including interest and costs.

There is not 5 per cent of the land in any reclamation district wherein a patent has been issued and the lien is provided for. Ninety per cent of all the district was privately owned land when the district was organized. I may not have the exact percentage, but it is somewhere near correct. In the other 5 per cent—and I may have my percentage rather high, but I think not—the men had a patent for it before the law was passed, and this was to cover only the remaining tracts or new lands coming under the provisions of the act subsequent, so that those who say that we are now trying to break down the reclamation law and not get back the money that the Government had advanced in these reclamation projects are mistaken. The provisions of this bill make it optional. It permits these districts to organize and enter into a contract with the Secretary of the Interior for the purpose of carrying out the real object and purposes of the reclamation law to the end that every dollar the Government advanced might be returned, and no man can say on the floor of this House that there has been any effort on the part of any from the public-land States, or any States in which these reclamation projects are situated, to cause the Government to lose a dollar.

Every law, every act, every effort has been made and will be continued to be made to strengthen the law, to make it clear, to make it definite that all this money the Government has advanced in the construction of these projects, maintenance, and upkeep, might be returned to the Government, dollar for dollar, and these people——

Mr. LITTLE. Will the gentleman yield?

Mr. RAKER. For a question only.

Mr. LITTLE. Is not the principal purpose of this bill to make it possible for the Farm Loan Board to loan money upon these irrigated lands? Is not that the real and principal purpose of the bill?

Mr. RAKER. I will answer that in just a moment.

Mr. GORDON. Will the gentleman yield?

Mr. RAKER. I yield to the gentleman from Ohio for a question only.

Mr. GORDON. The gentleman says the Government will get back the $70,000,000 in the irrigated arid lands; it will not get it back unless——

Mr. RAKER. It will get it back, every dollar, and if the gentleman would go upon those projects and be certain of his remarks I am certain he would not make that statement. These people do not take this money not to repay it. They simply want the money advanced to the end that they may improve this country and turn this desert waste into gardens and help produce the products in order to win this war, and if the gentleman says this money will not be returned he evidently has not made an investigation of the subject.

Mr. GORDON. Oh, yes, I have; if the gentleman will yield to me just——

Mr. RAKER. For a question. A gentleman just said that $4,000,000 has been paid back.

Mr. GORDON. Then, why are they always asking every year to get an extension of the time?

Mr. RAKER. No.

Mr. GORDON. They never will get a cent back unless the land is worth something.

Mr. RAKER. That, I say, demonstrates the fact that our able and constitutional lawyer from Ohio has not investigated the provisions of the reclamation act nor the conditions under which these people have worked in trying to build up this country. Men talk about the reclamation act not being a success. These people have spent their time and their money to build up this country and all they ask is for a reasonable amount of money to be expended for the purpose of getting on their feet and then, in turn, they will return every dollar to the Government. Now, in answer to the question of the gentleman from Kansas, I wish to call his attention to this fact: This is one of the provisions of the bill for this reason——

Mr. LITTLE. What is the major provision?

Mr. RAKER. If the gentleman asking the question will give me an opportunity, I will answer it. There are irrigation districts now not under Government control that have been formed under the various State laws that are borrowing money from the Farm Loan Board—that is, their members have—and it is a legitimate transaction and an ample security. The Farm Loan Board have held that it is not a prohibitory provision, and they can loan to members of these irrigation districts upon the land that is in the district the same that they can loan to the man who owns a piece of land on which there is a county, municipal, or school tax laid. Now, in those districts part of the individuals not having contracted with the Government, in addition to this prior loan I spoke of on about 5 per cent of the land, and I want particularly to call this to the attention of the gentleman from Kansas, there is a large amount due under the reclamation project by each individual in the construction charges, upon which, so far as I know, a written contract or recordation of it is concerned is only with the various departments. The same with regard to maintenance and upkeep. Now, for the purpose absolutely of securing the Government, they form the irrigation district, and it is then accepted by the Secretary of the Interior, gives them a claim for the amount due on all the land in the district, backed by the 100,000 acres that may be in it instead of the 1,000 acres of the individual, and it then permits the Federal Farm Loan Board to take up the individual owner of the land and loan him money upon it as they do with other people, to which there is no objection, and he can use that money to pay off the assessment and to pay back assessments upon the construction charges, maintenance, and upkeep, and he gets machinery and builds a home and improves his place and he is in a position to produce crops of which this country is so sore in need.

Mr. LITTLE. The money to be collected by taxation assessed upon the district?

Mr. RAKER. Yes; just like the State collects its taxes, just like the county collects its taxes, just like the municipality collects its taxes. Now, can there be any objection to the district collecting its taxes and paying its debts, as it has occurred in every other municipality subdivision in every State in the Union?

Mr. MORGAN. Will the gentleman yield?

Mr. RAKER. For a question only.

Mr. MORGAN. I am inclined to be in favor of this bill, and I should hate very much to oppose it. I am trying to understand it. Now, what would be the principal difference between the Government allowing these districts the taxing power to pay off Reclamation Service contracts, mortgages, or whatever it is, the amount the Government owes, and in allowing those districts to be taxed for the purpose of paying off the loan made by the Federal Farm Loan Board? Why do not you just as well allow these districts to be authorized to pay off the loan to the Federal Farm Loan Board as for this, in effect, to

be taken out of the Reclamation Service and advanced by the Government as a loan to these people?

Mr. RAKER. Not individually, though.

Mr. MORGAN. Individual leases.

Mr. RAKER. Not individual.

Mr. MORGAN. Well, you take these lands individually for security for them.

Mr. RAKER. That is not the fact. That is the trouble. The only provision in the law is the one I had written in, and only includes 5 per cent or thereabouts of all the land in the districts. And, now, why is it at this late date, when we are trying to secure the Government, that there should be any objection to protecting the Government?

Mr. MORGAN. You say only 5 per cent of the land under reclamation has been taken by private individuals?

Mr. RAKER. No, sir. I said only 5 per cent of the land under the reclamation projects that come under the provision of the law, so that they have a prior lien after they have submitted proof and patent has issued under the act of August 9, 1912.

One of the great troubles with these reclamation districts has been that there have been large tracts of land in the confines of the district that the owner would not subdivide into 160-acre tracts. They have been selling them out to the poor farmer at exorbitant prices, and, in addition to paying that first exorbitant price, he had to pay his proportion of the construction charge and maintenance and upkeep. But under the district reclamation law that has been approved by the department, and the bills were drawn and, assisted by them, enacted by all these State legislatures. And I want to call my friend's attention to the fact that under those laws and when the district is constituted it takes any of the land in private ownership, whether it exceeds 160 acres or not, and he must pay his proportion of the taxes.

Now, I want to call his attention to another fact. Under the bill that this committee got through last year we did another thing, and it comes under this act. We put under that bill the publicly owned land in the district, so that when anybody comes and files upon the publicly owned land in that district he must pay the back charges and his proportion of the cost of construction of the project. That is but as it should be and right. Can anyone say that the committee is trying to defeat the Government when, as a matter of fact, we take all the privately owned land, we take all the land that the man has a patent to, free of the lien; we take the land on which the lease has been created, which is about 5 per cent of all the lands of the district, and then we take all the Government land in the district and make it subject to this bill, so that the Government may be amply and fully protected at all times?

Mr. DENISON. Will the gentleman yield?

Mr. RAKER I will.

Mr. DENISON. What I wanted to ask the gentleman is this: Is the lien of the Government, on which it will collect back the money that it has put into these irrigation projects, confined to the 5 per cent of the land of which you have been speaking?

Mr. RAKER. To answer that clearly I will say that I may have the estimate a little large as to privately owned land when the project was organized. Then, there are in some of the districts now 25 or 30 per cent of public lands.

Mr. MONDELL. Will my friend yield? There are some projects where all the lands are public lands.

Mr. RAKER. There is not any of them where it is all public land.

Mr. MONDELL. I happen to be very well informed on the subject and I know there are projects where all the land is public land.

Mr. RAKER. There may be one; but I think my statement is still correct that there were still some privately owned lands in the boundaries of the districts.

Mr. MONDELL. I do not think that weakens the gentleman's argument, but I thought the gentleman wanted to be clear in his statement.

Mr. RAKER. So the record may show what action has been taken I call the committee's attention to part of the report of the committee on the bill so as to show clearly its objects and purposes.

Hon. Franklin K. Lane, Secretary of the Interior, made report on House bill 4954 to the Committee on Irrigation of Arid Lands, which report reads as follows:

"DEPARTMENT OF THE INTERIOR,
"*Washington, July 2, 1917.*

"Hon. EDWARD T. TAYLOR,
"*House of Representatives.*

"MY DEAR MR. TAYLOR: I have your letter of June 12 requesting the consideration and report of the Interior Department upon H. R. 4954, 'A bill to provide for the application of the reclamation law to irrigation districts.'

"While this bill does not mention farm loans, it will provide a plan whereby the farm-loan act will become applicable to the Federal projects.

"The first section gives the express sanction of Congress to cooperation between the United States and irrigation districts adapting the reclamation law to the necessities of irrigation districts as quasi-municipal corporations under the laws of the respective reclamation States. Statutes amendatory of previous irrigation district laws so as to provide expressly for cooperation with the United States have been passed this year in the reclamation States.

"This department has already contracted with numerous irrigation districts, and I find that cooperation with these public corporations enhances the security of the United States, gives facility in the collection of moneys due to the United States, and at the same time is popular with the water users themselves, since they have the powers and privileges of a public corporation.

"Moreover, organization as irrigation districts binds to the project, irrespective of individual consent, once the statutory majority has been obtained for the formation of and making of contract, all of the lands of the project, and thereby promotes early cultivation of the land and eliminates speculation.

"In section 2 of the bill provision is made for the releasing of the liens of the Government which have been reserved, as required by the present law, in patents to homestead entries taken up subject to the reclamation law, and for the discharge of liens contained in stock subscription contracts to water-users' associations and in water-right applications direct to the United States, in cases where proper contract shall be made by irrigation districts with the United States.

"This section would, therefore, if enacted remove two classes of impediment to the application of the farm-loan act to Federal projects. The first is the existence of the prior reserved lien on all homestead lands, and the second is the existence of a contractual lien by virtue of stock subscription and water-right applications. Thus both the public and private lands taken by the settlers under these projects would become free from prior liens, so that there would be no legal impediment to the loaning of money by way of rural credits.

"The irrigation district liens attach only upon the making of annual assessment and levy, and are no more a bar to the obtaining of a 'first mortgage' under the farm-loan act than are the taxes of any other public corporations, such as counties and school districts, for the discharge of their debts.

"Some of our projects have reorganized as irrigation districts and others are in process of reorganization in order to obtain the benefits to accrue under the district plan, the securing of farm loans being but one. It will, therefore, work no hardship if projects reorganize as irrigation districts to obtain the benefit of farm loans.

"House bill 4954 paves the way for farm loans on the projects without subordinating the security for the reimbursement of the reclamation fund or interfering with the Government's present security contained in the guaranty contract with individual water-users' associations.

"I regard this measure as an emergency bill for the reason that the successful application of farm loans to reclamation projects is of urgent public necessity, since it will result in a great increase in the productivity of lands on these projects in 1918 and subsequent years. I am, therefore, in favor of the bill.

"Cordially, yours,

"FRANKLIN K. LANE, *Secretary.*"

The bill having been referred to the Federal Farm Loan Bureau, report was made thereon by the Hon. George Norris, Farm Loan Commissioner, of date June 23, 1917, which report is as follows:

"TREASURY DEPARTMENT,
"FEDERAL FARM LOAN BUREAU,
"*Washington, June 23, 1917.*

"MY DEAR MR. CONGRESSMAN: A trip to St. Louis from which I have just returned delayed a reply to your favor of the 12th instant, inclosing copy of House bill 4954, providing for the application of the reclamation law to irrigation districts. This is a matter with which my associates, Judge Lobdell and Mr. Quick, are more familiar than I am. They have gone over the bill carefully, and are of opinion that it would be likely to prove of benefit in many districts. I am,

"Very truly, yours,

"GEO. W. NORRIS,
"*Farm Loan Commissioner.*

"Hon. EDWARD T. TAYLOR,
"*House of Representatives.*"

The bill being referred to the Council of National Defense, report thereon was made to Hon. E. T. Taylor, chairman Committee on Irrigation of Arid Lands, on July 7, 1917, which report is as follows:

"COUNCIL OF NATIONAL DEFENSE,
"OFFICE OF DIRECTOR,
"*Washington, July 7, 1917.*

"Hon. E. T. TAYLOR,
"*House of Representatives, Washington, D. C.*

"MY DEAR MR. TAYLOR: Replying to your letter of July 3, inclosing a copy of H. R. 4954: As this bill covers matters of a general character with which the Council of National Defense is not primarily concerned, the council does not feel that it falls within its scope to comment thereon.

"Very truly, yours, "W. S. GIFFORD, *Director.*"

The primary object of bill H. R. 4954 is to pave the way for farm loans on irrigation projects without subordinating security for the reimbursement of the reclamation fund or interfering with the Government's present security contained in the guaranty contract with individual water-users' associations.

Secretary Lane, in his report to the committee, states that this bill fully and completely carries out the objects and purposes above referred to. The committee in considering this bill and reporting it to the House does so with the idea in view that it is an emergency bill under the present war conditions and one that will give much relief and greatly increase the productivity of lands on reclamation projects, and in this connection we refer specifically to Secretary Lane's report, wherein he uses the following language:

"I regard this measure as an emergency bill for the reason that the successful application of farm loans to reclamation projects is of urgent necessity, since it will result in a great increase in the productivity of lands on these projects in 1918 and subsequent years."

The Secretary of the Interior has entered into contract with about 20 irrigation districts under the reclamation act in various lines of cooperation, including the sale of stored water from Federal reservoirs not needed by the projects of the United States. Besides, several project extensions have been constructed by the United States under contract with irrigation districts in lieu of water-users' associations.

As to the experience with irrigation districts, Secretary of the Interior Lane, in his report recommending this bill, says:

"This department has already contracted with numerous irrigation districts, and I find that cooperation with these public corporations enhances the security of the United States, gives facility in the collection of moneys due to the United States, and at the same time is popular with the water users themselves, since they have the powers and privileges of a public corporation.

"Moreover, organization as irrigation districts binds to the project, irrespective of individual consent, once the statutory majority has been obtained for the formation of and making of contract, all of the lands of the project, and thereby promotes early cultivation of the land and eliminates speculation."

The formation of irrigation districts is entirely voluntary with the water users. These corporations are uniformly held to be public corporations and are susceptible of being formed under the State laws only upon a vote of such majority of landowners as may be prescribed by the statute. There is nothing in the bill which enjoins upon the water users reorganization as districts, but the bill is in effect an enabling act whereby cooperation can be carried on by the United States in a more perfect manner than heretofore.

The formation of an irrigation district, while it is a step of great importance being from a private corporation to a municipality, yet in several respects is not so radical a change as might be supposed. There is nothing in the formation of the irrigation district which necessitates the transfer from the Government of the operation and management of the project. There is no implied repeal of the provisions of the present reclamation law—

"That when the payments required by this act are made for the major portion of the lands irrigated from the waters of any of the works herein provided for, then the management and operation of such irrigation works shall pass to the owners of the lands irrigated thereby * * *." (Reclamation act, sec. 6, 38 Stat., 388.)

nor of the amendatory provision—

"That whenever any legally organized water users' association or irrigation district shall so request, the Secretary of the Interior is hereby authorized, in his discretion, to transfer to such water users' association or irrigation district the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as he may prescribe." (Reclamation extension act, Aug. 13, 1914, sec. 4, 38 Stat., 686.)

The passage of this act followed by organization as an irrigation district does not involve the turning over to the water users of management and control unless the Secretary of the Interior approves such step and the water users vote favorably upon the plan, at least prior to the payment for the major part of the land irrigated under the project as provided by the original reclamation act. It would, however, facilitate the transfer if both the water users and the Government deemed the change advisable, since municipal powers would greatly aid in the solution of the problems of management and control.

The formation of the irrigation district would not involve the issuance of bonds in favor of the United States nor the payment of interest. The projects would still have the advantages of the reimbursement plan prescribed by sections 1 and 2 of the reclamation extension act above quoted in mutual cooperation with the United States.

This cooperation can best be conducted so as to make as little change as possible in the ordinary machinery of these corporations under the State statutes. The funds of the district are secured by levy and assessment in common with the methods of other municipal corporations formed for the purpose of public improvement. Hence it is highly desirable that the Federal law be in such shape that the machinery for the collection of assessments to carry out the contracts with the United States shall be identical with that employed to secure other funds or irrigation districts.

Express authority of Congress, therefore, is conferred by section 1 of the bill to contract with irrigation districts for the payment of moneys required to reimburse the reclamation fund, with provision that in such case water-right applications need not be filed and that the dates of annual payment of penalties and interest charges named in the contract shall be discretionary with the Secretary of the Interior.

This will enable several projects which either have reorganized as irrigation districts, or are now in process of such reorganization, to contract in harmony at once with the State and the Federal statutes. The Minidoka project of Idaho, the Sunnyside and Tieton of Washington, the Sun River of Montana, the Williston of North Dakota, the Strawberry Valley of Utah, the Truckee-Carson of Nevada, the El Paso Valley of Texas, and the Elephant Butte of New Mexico are among those where irrigation districts are already made or are now forming.

In case irrigation district contract is made with the United States, the security furnished for the reimbursement of the reclamation fund is preferable, both in value and in workability, to the security through the water users' association, and where such contract is made water-right application liens are no longer necessary to the United States, and section 1 expressly provides for their release. The water users' association, of course, is replaced by the irrigation district, and accordingly may properly be dissolved through the Secretary's consent and the stock-subscription liens released of record.

This step will pave the way for affording the farm loans to reclamation projects which elect thus to reorganize as districts, since there will be no first mortgage on project lands for the reimbursement to the United States. The moneys due from irrigation districts are not first mortgages any more than the assessments to be made for road or school purposes by similar public corporations. They become liens only annually as assessment and levy is made. Under the farm-loan act the money payable to the district for the United States must, of course, be considered and have its bearing upon the amount which may properly be loaned, but the legal barrier as regards the existence of first mortgages will be removed by the formation of an irrigation district, the execution of contract with the United States by such district, and the release of the liens on private lands now existing to secure the Government.

The act of August 9, 1912, requires that patents to lands entered subject to the reclamation law shall reserve a lien in favor of the United States for any sums remaining unpaid. Similar liens are reserved where final water-right certificate is issued. Where irrigation districts are formed this type of security is no longer necessary, since the irrigation district as a whole can be required to pay, and all lands therein are subject to sale for nonpayment of charges.

The Farm Loan Board has already rendered an opinion, and Judge Lobdell, of the board, appeared before this committee in recognition of the distinction between the lien reserved under the act of 1912, the lien created by water-right application and by stock subscription, on the one hand, as constituting first mortgages and the assessments of districts annually becoming a lien, on the other hand, as not constituting first mortgages, but rather to be classed with the taxes and improvement assessments of public corporations. In the first class the farm loans are held barred, while in the other they are permissible.

The result of the act, therefore, would be to encourage the formation of irrigation districts and provide cooperation therewith, to release the liens now constituting present or prospective encumbrances on both private land and the entered lands within all projects reorganized as irrigation districts when the district itself made contract for the repayment of the charges, thus facilitating farm loans.

The irrigation district is by no means an experiment, but the principles applicable have been thoroughly thrashed out in the State courts of the West and in the Supreme Court of the United States.

The irrigation district statutes apply to the public work of reclaiming arid lands the principles applicable to public corporations. These laws have been upheld by the courts of last resort in practically all reclamation States. The Supreme Court of the United States has upheld the constitutionality of the California law, which is entirely typical, in the case of Fallbrook Irrigation District v. Bradley (164 U. S., 112). The courts have upheld the power of these districts to assess and levy for construction purposes with entire uniformity. After an irrigation district is once organized as a de facto corporation it has been held that no one but the State can question its organization. (Tulare Irrigation District v. Shepard, 185 U. S., 1.)

The various irrigation district laws contain confirmation provisions whereby an obligation before being incurred by the issuance of bonds or by contract to reimburse the reclamation fund of the United States can be judicially passed upon and approved. Upon the successful determination of such proceedings the decree is binding upon the world under the decisions of all State courts. It has been held in California that even the State is bound by the confirmation decree. (People v. Linda Vista Irrigation District, 128 Cal., 477, 61 Pac. 86.)

A fuller discussion of the legal status and of the practical phases of irrigation districts as applied to Federal projects will be found in several articles which are presented below.

The advantages of the irrigation district type of organization have been set forth in an article by Hon. Will R. King, chief counsel of the Reclamation Service, published in the Reclamation Record of September, 1916, which follows:

"The subject of irrigation districts, under State laws enacted for that purpose, is becoming one of more than usual interest to the water users on the various projects. This is illustrated by the many inquiries concerning what the advantages may be of the irrigation district system over that commonly in use in the service. It is accordingly important that a brief statement of the practical features of the irrigation district system and management thereunder be presented to the readers of the Reclamation Record.

"The irrigation district system with reference to United States reclamation projects is in use on reclamation projects in Washington, Idaho, and Nebraska. Its advantages over what is known as the water users' association system are by experience clearly demonstrated not only from the standpoint of efficiency but of economy as well.

"The advisability of adopting the irrigation district plan in place of the water users' system has been materially increased by passage of House bill No. 12365 (39 Stat., 506), approved by the President on August 11, 1916, and published in full on page 402. This bill brings the Reclamation Service of the Government in full harmony with the irrigation district plan. It subjects the land, the title to which may still remain in the United States, to liens for irrigation district purposes, requiring thereby that all lands, whether entered or unentered, public lands, bear their share of the burdens of the construction, operation, and maintenance charges of the project included within the district, extending the taxing power of the district not only to the entered lands for which no title has been procured but to the unentered lands as well. The lien created by the organization of a district for construction and operation purposes will follow the lands, and when entry is made, or when patent is secured for the entered lands, the entryman will thus be required to share the burdens with all others in the project included within the district.

"Furthermore, all private land holdings within the district, whether subscribed to the payment of water-right charges or not, will, with all other lands, entered or unentered, become subject to taxation for the payment of their share of construction and other expenses.

"It will thus be seen that the irrigation district system will necessarily reduce the pro rata cost of construction and operation and maintenance charges to all who have subscribed to water rights under the project included in the district.

"It requires but a casual observation of the situation to realize that on practically all Government projects there are various, and in many instances large, areas of private lands which do not share any of the burdens of the project and which remain out of the project with a view of not only escaping such financial burdens but eventually of receiving a larger price for their lands without contributing anything toward such rise, enhancing thereby the values and profits of their lands at the expense of the pioneer water users who may have subscribed for water rights.

"All of the readers of this article who may be interested in the subject are recommended to write to their Congressman or Senators for a copy of the hearings before the House Committee on Irrigation of Arid Lands, held February 26, 1916, on the bill then known as 'H. R. 262,' in which the advantages to accrue by this act were discussed by various persons familiar with the subject. The details of how an irrigation district is organized are therein fully presented by prominent persons in whose States the irrigation district plan is fully developed by legislation and experience.

"To give all of the discussions would, by reason of their length, preclude the publishing of this article. The object of the present discussion is to give, in a general way only, the purpose and general effect of such organization, together with the advantages to accrue by adoption of the irrigation district plan.

"In brief, an irrigation district has the same advantages over individual organizations, such as the ordinary corporations (including water users' associations), as a city or town, when organized into a municipal corporation, may have over a school district not duly organized. The advantages of a municipal corporation, under which

cities and towns are organized, over the system existing prior to such organization are so manifest that further discussion on that point is unnecessary.

"In many respects the irrigation district system is similar in its purpose and effect to school districts, county organizations, and city municipalities, differing only in details, the character of the details depending on the purpose for which organized. Irrigation districts have their officers the same as county and school districts, and they are possessed with the same taxing power, manner of collecting the taxes, etc., with which taxes thus assessed the construction, operation, and maintenance charges of Government projects are paid.

"Under the water users' association contracts are made with each individual water user; under the irrigation district plan the contracts are made by the United States with the irrigation district as a quasi municipality. Some courts have held such a district a public corporation and not strictly a municipality. The effect of this holding, however, so far as it may bear upon the general purposes and practical workings of the plan, is what may be termed a 'distinction without a difference,' for it has practically the same purposes in view. A public corporation as thus defined carries with it practically the same powers as a municipality. At the same time it escapes burdens which might otherwise go with a municipality as such.

"Under the individual contract system each water user has placed upon his land a mortgage lien, which, being of record, frequently proves an embarrassment to such individual whenever he desires to procure a loan (upon lands subject to the water-right lien) under the Federal banking act, money-loaning companies, or under the recent rural-credit act. But under the irrigation district plan these obstacles are removed.

"When a district is fully organized under the law, individual liens upon the land are released and the district, as a whole, is held for the contracted indebtedness, in the same manner in which a school district, county, city, or other municipality may be held upon an issue of bonds for school, county, city, or other municipal purposes, leaving the liens to accrue only in case of a default in payment of taxes levied for the payment of such indebtedness, or what may be termed a 'tax lien' for default in payment of such tax, not a lien of record for the entire indebtedness. In other words, in an abstract of title for the purpose of procuring a loan, no lien will be disclosed, unless it be for one or more unpaid installments of taxes levied.

"It will thus be observed that, if those on reclamation projects are to receive the benefits of the Federal banking act, rural-credit loans, or even loans by the State, or loans by large loaning companies, the 'projects' will have to substitute the irrigation district plan for the present system.

"Two or three States have adopted the irrigation district plan (in lieu of the water-users' plan), under existing laws. As a result the laws pertaining thereto were amended at the last sessions of the various legislatures in such manner as to permit the bringing of the reclamation projects thereunder. It is still important that these laws be further amended in some particulars.

"All districts should therefore be organized prior to the convening of the next legislature, for by so doing any defect now undiscovered may speedily be met by procuring from the legislatures soon to convene the required amendment or amendments, without waiting two years more for these benefits.

"In the past some prejudice has existed against irrigation districts, principally due to 'wildcat' organizations by incompetents and speculators who had in view the sale of bonds on certain projects where neither a sufficient water supply nor proper surroundings were found available, which in some instances was due to lack of investigation along these lines prior to the organization of the district.

"These defects would not exist should any of the reclamation projects now in operation substitute for the water users' association the irrigation district plan.

"The district plan of organization, of course, will not provide a water supply where none exists or make good land out of bad, nor will it convert into a success a reservoir which by reason of natural formations of its surroundings may be fatally defective.

"In arid sections where irrigation is relied upon there is impliedly included in the irrigation district plan the right to make all necessary contracts looking toward the drainage of such parts of the district as might be found necessary. This position has been upheld by the Supreme Court of Idaho, where the plan has been fully tried out and properly presented to the courts for determination. The irrigation district plan can therefore be used to solve the drainage problem.

"In the case of drainage, the lands within the district like lands for irrigation are only taxed in proportion to their share of the cost. If there are lands in the district which can not be irrigated or lands for which drainage is of no benefit, then these lands can be excluded from taxation for either purpose, but all lands in the district, whether in cultivation or otherwise, must pay the taxes for either purpose. As before indicated, under the new law the same liability follows the lands, whether private lands where drainage, and drainage only, is necessary, such as part of a State (western Oregon, for example) where ditches and canals are necessary to keep water off the land and not with a view of running water onto it. Drainage districts will not solve the irrigation problem, but irrigation districts include and solve the drainage problem. Hence, when irrigation is necessary, irrigation and not drainage districts should be organized. This is the settled policy of the reclamation commission.

"For the perfection of an organization under the irrigation district system and the placing thereof in proper condition for dealing with the United States the time required under the different statutes varies from three to six months. As above stated, therefore, it is important that steps should be taken in this direction without delay with a view to receiving legislative aid, if required, prior to the coming session of your legislature.

"The reclamation commission has unanimously decided in favor of recommending the irrigation district plan, and the law section has placed in the general field service one of the district counsel (E. W. Burr, of North Yakima, Wash.) for the purpose of assisting district counsel on the projects in the organization of irrigation districts. In addition thereto, any special or general information desired will be furnished direct from the legal division of either the Denver or Washington offices.

"A more extensive and detailed discussion of the benefits of irrigation district plans will be found in the Reclamation Records, dated October, 1914, page 361; November, 1914, page 408; and January, 1916, page 26, consisting of discussions of the subject by District Counsel B. E. Stoutemyer, of Boise, Idaho, and District Counsel E. W. Burr, of North Yakima, Wash. In each of the States represented by these district council irrigation districts have long since been substituted for water users' associations with excellent results, none of which localities would, for a moment, consider the returning to the commonly known water users' association plan in force in most jurisdictions."

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent that I may revise and extend my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FERRIS. Mr. Chairman, I am not sure that I am right about this, but I think I am; and if I am right about this bill, it ought not to have a single vote in this House. The Federal Government has under the act of 1902 authorized about $70,000,000 out of the Treasury of the United States to be expended for irrigation. It is a little more than that——

Mr. FRENCH. That is not correct. It did not come out of the Treasury of the United States.

Mr. FERRIS. Yes; it comes out of the Treasury.

Mr. FRENCH. It never was in the Treasury.

Mr. FERRIS. It is the same thing. It is the proceeds from the sale of public land. I am a friend of irrigation, too, and have supported it many times in this House, but I think the only way to support a law is to support it on the square, and I do not believe this bill is on the square. They have $70,000,000 expended on irrigation in the West, and we have withheld the issuance of the title to these lands until——

Mr. MOORE of Pennsylvania. Mr. Chairman, this is an important statement, and I wish that we could have order while the gentleman is speaking.

Mr. TAYLOR of Colorado. Mr. Chairman, the gentleman is talking against the bill, and I suggest the opposition will probably charge up his time to us. I will give him five minutes out of my time, anyhow.

Mr. LITTLE. I will give the gentleman 5 minutes out of mine, making 10 minutes altogether.

Mr. FERRIS. Who controls the time?

The CHAIRMAN. The gentleman from Colorado [Mr. TAYLOR] has an hour for and the gentleman from Kansas [Mr. LITTLE] an hour in opposition.

Mr. FERRIS. That is probably more than I will need.

The CHAIRMAN. Let the Chair understand it. The gentleman from Colorado has yielded the gentleman from Oklahome 5 minutes and the gentleman from Kansas is likewise yielding him 5 minutes, so that the gentleman from Oklahoma is recognized for 10 minutes.

Mr. FERRIS. I think the five minutes of the gentleman from Kansas will probably be all that I will need.

Mr. LITTLE. Possibly I can give you some more, but several gentlemen have asked me for time.

Mr. FERRIS. I wanted to know what the arrangement was. The reclamation act, which passed in 1902, authorizes that the proceeds from the sale of the public lands shall go into a fund for irrigating the West. I thought that was a good law. I think it is a good law now. I think it has done lots of good, and I think that it will do lots more of good. Under the terms of that law the title to the land irrigated has been withheld until these moneys have been repaid to the Government, as they should be. Now, here comes a bill, if I understand it aright, which changes that process, and Secretary Lane's letter tells the truth about it, surely. Here comes a bill that allows these people, who in the first place got the land for nothing and who in the second place got the money for nothing, and now ask to go in and mortgage the property to the Farm Loan Board, or to anyone else on first mortgages, and thereby the Government will lose its first lien. This ought not to be done. It ought not to have been proposed.

We now hold a first lien on these lands for a little more than $70,000,000. This bill authorizes those people to go in and mortgage this land to the farm-loan companies, taking as security therefor a first lien ahead of the Government's lien. If a man wants to defeat the Government to the extent of $70,000,000, it is only necessary for him under this bill—if we can imagine for the purpose of illustration that all of this irrigated land could be taken up by one man—first, to get possession of the land for nothing, and, second, to borrow the money to pay for it for nothing, and then give a first mortgage to it to a farm-loan company, and the Government will have lost its money.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Oklahoma yield to the gentleman from Massachusetts?

Mr. FERRIS. I do.

Mr. WALSH. Assuming a case of this sort, that where the Government now has a lien upon an individual project there is a claim there on behalf of the State or an individual, and

that suit has been brought, and that this act passes, and the lien is waived or released, and the lien of the district is then put into effect, does not the attachment which has been put on in behalf of the State or the individual then become the preferred claim and comes in ahead of the Government lien?

Mr. FERRIS. Undoubtedly. I am told by the chairman of the committee, the gentleman from Colorado [Mr. TAYLOR], that by reason of the fact that the Government holds the whole association for it, that makes the Government safe. Not at all. I can follow no such logic. Suppose every man within the association mortgages his property for all it can stand, and the mortgage loan company comes along and takes the property. I would like to know what becomes of the Government lien of $70,000,000. There can be but one answer: They will simply lose it.

Mr. SMITH of Idaho. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. SMITH of Idaho. How do they get the title when the title is in the Government?

Mr. FERRIS. That is what I would like to know. I have not seen this bill before and have not looked into it carefully; but let me read from Secretary Lane's letter, the second paragraph:

> While this bill does not mention farm loans, it will provide a plan whereby the farm-loan act will become applicable to the Federal projects.

Is it possible that the Federal Farm Loan Board is going to make second mortgages? Of course not. The Federal Farm Loan Board will make nothing but first mortgages, and these people in the reclamation projects will execute loans for the full value of their property, and the farm-loan people will come along and take the land, and then the settlers will march away, and the Government will be bilked out of its $70,000,000. If not, I ask, why not?

Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. PLATT. It seems to me this is a matter that concerns somewhat the Farm Loan Board.

Mr. FERRIS. I hardly think it does. I think this bill gives the Federal Farm Loan Board the right to take first mortgages, which would leave the Government and the reclamation fund entirely holding the sack.

Mr. PLATT. It seems the indorsement of the Farm Loan Board appears to be rather qualified and not very strong here.

Mr. FERRIS. Well, I am not a member of this committee, and, of course, I have not given this matter the attention that the gentleman from Colorado [Mr. TAYLOR] or the gentleman from California [Mr. RAKER] or the gentleman from Nebraska [Mr. KINKAID] or the gentleman from Idaho [Mr. SMITH] have given to it. Maybe these gentlemen are right about it. Maybe I am wrong about it. But it seems to me it is as plain as primer print that the Federal Government ought not to do this thing.

Then, there are other people who enter into this besides the Federal Government.

Mr. PLATT. I do not want to vote for this bill without a more direct indorsement than it has got from the Federal Farm Loan Board.

Mr. FERRIS. I presume they are all right. They are not going to go into the second-mortgage business.

Mr. LITTLE. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. LITTLE. The gentleman is talking about lands the title to which is still in the Government. Is it possible that the title would still be in the Government under this bill?

Mr. FERRIS. I read from this bill, on page 3, beginning with line 14, this language. I do not know what it means, but I urge you to read it for yourselves:

> And the Secretary of the Interior is further empowered to release liens in favor of the United States contained in water-right applications and to assent to the release of liens to secure reimbursement of moneys due to the United States—

And so forth. This authorizes the Secretary of the Interior to release any lien that the Government has. What for? So that they can put first mortgages on the land to some farm-loan company. The anomalous condition here is to first give the settler the land; second, it is to give him the money to irrigate it; and third, it is to waive these two rights and make a first mortgage to a third party. Even as a friend to irrigation I can not stand for anything like that.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. GOOD. Will the sponsors of this bill consent to an amendment of the provision that the gentleman has just read whereby that feature would be eliminated?

Mr. FERRIS. No. That would absolutely overturn the purpose of this bill, as I understand.

Mr. GOOD. Then they must admit that the contention that you are now making is not doubtful, but sound.

Mr. RAKER. Not at all. The gentleman is mistaken.

Mr. FERRIS. I confess frankly that if I am wrong I have done these gentlemen in charge of it an injustice, but I think I am right. Plain language tells the truth. It is easy to understand.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. MADDEN. The farm-loan law requires that nothing but first mortgages shall be taken as security. The Government will have the first lien in cases of this sort, and if this bill were enacted we would jeopardize thereby the investment made by individuals and by the Government?

Mr. FERRIS. Of course. I want to call attention to one other reason why these western Members ought not to force this. The sum of $70,000,000 irrigates but a comparatively small area of land, compared to the 700,000,000 acres of public land lying in the West. Therefore these favored few who have had the use of this money for 20 years ought not to clinch it in their fists and keep it forever. They ought to pay it back so it can be used here to irrigate additional lands. It ought to be paid back so that other dry lands in the West can be brought under irrigation. It was intended to be a revolving fund so that the fund can be used to irrigate the West, not a small part of it.

Mr. SMITH of Idaho. This bill is proposed for the purpose of insuring payment of the moneys, some of which are not being paid.

Mr. RAKER. Does the gentleman know what percentage of all the acreage is involved in the prior lien referred to in the bill here?

Mr. FERRIS. I know that we have let the irrigation people have more than $70,000,000. I know we have not gotten any of it back. I know there is not a cent of it now available.

Mr. SMITH of Idaho. Over $4,000,000 has been paid back, and the records show it.

Mr. FERRIS. The irrigation service have none of it on hand now, and anybody who goes to get any of it to further irrigation is told that they have already made contracts for more than they can ever meet. I am not an enemy of irrigation. I have defended it here more than once. I have helped to provide for it more than once; I will do it again; but we ought to be fair about the irrigation fund and not keep it all for the few people who have already availed themselves of it.

Mr. MORGAN. I know what the gentleman says about being a friend of irrigation is true; but I should like to have him tell how much of this fund came from Oklahoma and how much has been expended in Oklahoma.

Mr. FERRIS. Something over $6,500,000 has been given to the fund, and not as much as a garden spot has ever been irrigated.

Mr. SMITH of Idaho. They have no water down there to irrigate and no place to build dams.

Mr. FERRIS. That is not true and the gentleman knows it. They have a number of approved projects, and not a cent to build them with, and the gentleman knows that.

Mr. RAKER. Section 2 of the act of August 9, 1912, creates this lien for the construction charges and the maintenance and upkeep until they are paid.

Mr. FERRIS. Yes.

Mr. RAKER. Does the gentleman know about what percentage of all the land in all the projects is thus involved?

Mr. FERRIS. I suppose a very small part. But I am not criticizing as to that. It is a comparatively new undertaking, and naturally there would be some mistakes of that kind.

Mr. RAKER. I want to put this question: Does the gentleman think that a man who had spent all the time that I have spent to secure these provisions would do anything to injure reclamation projects?

Mr. FERRIS. No.

Mr. RAKER. Or fail to protect the Government?

Mr. FERRIS. I do not know so much about that. These settlers who want to get this land patented and then have the right to mortgage it are not worrying very much about the Government, I rather suspect.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. TAYLOR of Colorado. I yield five minutes to the gentleman from South Dakota [Mr. GANDY].

Mr. GANDY. Mr. Chairman, in the first place, those who assume that the security that will be taken by the Secretary of the Interior from a reclamation district in lieu of security now held by the Government will not be as safe as the security

now is, can not do so except upon the assumption that the Secretary of the Interior of this Government will violate his oath of office, that he will take something of less value than this Government now has, for this bill puts it entirely within his discretion; and that is unbelievable, so far as I am concerned. Gentlemen from more favored sections of this country where there are drainage districts are familiar with the provisions for taking the water off of the land, but they are not familiar with reclamation districts for putting water onto the land. You are familiar with the fact that the charges of a drainage district become a tax upon the land—a first lien—just the same as any other tax that is levied by a municipality; but this irrigation proposition is something new to you, and you are not familiar with the fact that the putting of water onto the land occupies exactly the same position in law as the taking of water off from the land.

For some years the Reclamation Service, a part of the Department of the Interior, has been interested in securing uniform reclamation district laws in the reclamation States of the West. Those laws have had the approval of the Department of the Interior before being passed by the States. If the reclamation district law of a State does not safeguard every interest of this Government, do you think for a moment that the Secretary of the Interior is going to approve a transfer from an individual liability to a district liability in that State? Not a bit of it. To think that, you must assume, as I said, that the Secretary of the Interior would violate his oath of office.

I hold in my hand one of these uniform reclamation district laws, that of the State of South Dakota, one of whose districts I have the honor to represent in this House. Let me read you what the provision as to the lien is:

All assessments on real property and to the extent provided by the said act of Congress of August 11, 1916, on entered and unentered public lands are a lien against the property assessed, from and after the day the real estate taxes become a lien, and shall draw interest at the same rate and from the same date as unpaid real estate taxes, and such lien is not removed until the assessments are paid or the property sold for the payment thereof.

Now let us see how they collect the lien for construction and operation and maintenance charges:

And it shall be the duty of the county treasurer to collect such assessment in the same manner as other taxes against real estate are collected, and the revenue laws of the State for the collection of taxes and sale of land for such taxes are hereby made applicable in the collection of assessments under this act.

Now let us go a step further and see as to priorities:

The lien for the bonds of any series shall be a preferred lien to that of any subsequent series and the lien for the payments due to the United States under any contract between the district and the United States, accompanying which bonds have not been deposited with the United States shall be a preferred lien to that of any issue of bonds or any series of any issue subsequent to the date of such contract.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TAYLOR of Colorado. How much time have I left?

The CHAIRMAN. The gentleman has 30 minutes remaining.

Mr. TAYLOR of Colorado. I will give the gentleman five minutes more.

Mr. GANDY. Let us see as to the government of these districts:

Any irrigation district organized under the laws of South Dakota is hereby authorized to accept of the provisions of any act of Congress of the United States applicable to such district and to obligate itself to comply with such laws, rules, and regulations as may be promulgated by any department of the United States in pursuance of such acts, and irrigation districts contracting with the United States under the provisions of this act shall be governed in all matters by the laws of the State relating to irrigation or drainage districts, as the case may be, except in such things as may be otherwise provided for such districts. This section shall not limit the rights which any irrigation district has under existing laws to purchase a water supply or otherwise contract and shall be cumulative thereto.

Mr. GRAHAM of Illinois. The gentleman is reading from the statute of South Dakota?

Mr. GANDY. I am, sir.

Mr. GRAHAM of Illinois. Under that statute are these districts private corporations or municipal corporations?

Mr. GANDY. Municipal.

Mr. GRAHAM of Illinois. So stated in the act?

Mr. GANDY. Yes.

Mr. MORGAN. How could the Government enforce payment against these irrigation districts in case they refused to assess the taxes?

Mr. GANDY. I am not a lawyer, but my opinion is that it could be enforced by writ of mandamus against the proper public official to compel him to do his duty.

Mr. KINKAID. That is correct.

Mr. MORGAN. It seems to me important that there should be some way by which the Government can enforce that, and that it should be in the law.

Mr. GANDY. It is in the law. There is no question about that.

Mr. SINNOTT. These acts which the Reclamation Service have had passed in the various States provide that in case of default the Government may take over these projects and run them. That is in section 22 of the reclamation act.

Mr. GANDY. It is my understanding that is correct.

Mr. REED. Will the gentleman yield?

Mr. GANDY. Yes.

Mr. REED. Does the gentleman interpret that to mean that the Government would lose its priority over the claim taken by the Federal Farm Loan Board?

Mr. GANDY. The Government claim for construction charges would be on the same basis as the claim for any other tax for any other purpose by any other municipality in the State. That is the provision of the law.

Mr. REED. The farm-loan claim would be a second mortgage?

Mr. GANDY. A mortgage taken by any person or individual is second and subsequent to any taxes that may be levied by any municipality.

Mr. LITTLE. Does the gentleman from South Dakota understand that the lien is waived under this bill?

Mr. GANDY. It is not waived; it authorizes the Secretary of the Interior to substitute one lien for another.

Mr. LITTLE. You can not substitute one lien without waiving the other.

Mr. GANDY. We are all familiar with the building of waterworks system, and the fact that the obligation is general does not mean that it does not attach to the individual. The fact that it is spread over the town does not mean that the individual does not have to pay his just proportion of that debt, for he does, and you know that he does. This is to put the water on the land while you are familiar with taking water off the land.

In addition, as was said by the gentleman from California, this law will permit, through reclamation districts, the bringing in of private lands not now covered by water-right applications. There is now no way to compel them to come in. Under the reclamation district laws all the land in the district will be brought in the same as all the land benefited is brought into a drainage district or a paving proposition.

Mr. MORGAN. Will the gentleman yield?

Mr. GANDY. Yes.

Mr. MORGAN. Will the gentleman consent to an amendment which would require the State to guarantee the payment due the Government? Let the State in which the irrigation project is located guarantee the payment of the amount.

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

Mr. LITTLE. Mr. Chairman, I yield five minutes to the gentleman from Minnesota [Mr. VOLSTEAD].

Mr. VOLSTEAD. Mr. Chairman, if I understand this bill correctly, it seems to me there is a good deal of confusion about what it really does provide for. It seems to me that this is the situation: When the Government makes its arrangement with a reclamation district the bill clearly contemplates that the title to lands in the district shall pass at once to those who are now holding them. That appears from what the Secretary of the Interior says in arguing that this bill will enable these parties to secure a first mortgage on the lands. The statement of the gentleman from California [Mr. RAKER] to the effect that irrigation charges are to be levied generally over lands inside the irrigation districts and not on any specific tracts shows also that the intention is to release the liens now on these lands. In other words, the Government is to give up entirely its lien.

Now, in what position will the Government be left? Simply in this position: The Government's claim instead of being against a particular tract of land will be against a municipal corporation, the irrigation districts. It will be the same as a claim against a city or a town where you obtain a bond against that city or town. How do you enforce that? You enforce it, as has been suggested, by levying a tax against the district. Who levies that tax? Why, the officers of that district. The United States Government has no control over them at all, except so far as they may compel a levy by a writ of mandamus. That is the only way in which this money can then be collected. It seems to me that the Government will lose a very substantial advantage. It has the power now to cancel the contracts under which entrymen now hold the lands and for failure to make payments. When this arrangement is made the Government loses that power and surrenders all claim upon the individual tracts of land that is benefited by the money advanced and has only an unsecured claim against the district under a simple contract. It is relegated to exactly the same position as any ordinary creditor and has to sue the irrigation district for the purpose of collecting.

Mr. SMITH of Idaho. Will the gentleman yield?

Mr. VOLSTEAD. No; I do not have the time. It is urged that there are State laws that will aid collection. It is true that you have State laws that may aid in the collection of this money if the Government does surrender its lien and agree to take the promise of the irrigation districts for its payment, but what guarantee is there that the States will not pass laws that may hamper the Government in this collection? [Applause.] There is none under the sun. We have had some experience that may be instructive and that justifies us in being cautious.

Mr. RAKER. Will the gentleman yield?

Mr. VOLSTEAD. No; I do not have the time to yield. There is nothing to guarantee that the laws are going to remain the same. On the other hand, if a State sees fit to assist people in defeating the Government's claim it may take years and years to collect any of this money. The government of several States have in the past assisted people in defeating claims where they thought the claims were without merit, and this may be an opening wedge for repudiation. Put these lands in this condition and you will invite an agitation in favor of repudiation. If not repudiation, at least repeated applications for postponement of payment until the accumulations of interest and taxes will make it necessary to compromise the Government's claim. Gentlemen will remember that many States at one time received loans of money from the Treasury of the United States that never has been repaid. You are aware that persons have appeared from time to time urging that the Government should forego a part if not all of its claims for money expended on these irrigation projects, and if as is now proposed parties who have not profited by the irrigation works are to pay a part of this money the demand for relief will naturally become much more insistant. Whether these parties who have not benefited can be made to pay a part of the Government's claim is more than doubtful; if they can not, then the contract offered the Government may be void and the Government may lose its entire claim.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOOD. Mr. Chairman, those who have spoken in favor of this measure have predicated their statements upon the claim that the Federal farm-loan act would permit the taking of second mortgages. I have sent for a copy of the act and find in section 12 the following provision:

> First. Said loans shall be secured by duly recorded first mortgages on farm lands in the land-bank district in which the bank is situated.

If we wish to find any reason for voting against this bill it seems to me it is found in the letter of Secretary Lane of July 2, 1917, in which he states:

> While this bill does not mention farm loans, it will provide a plan whereby the farm-loan act will become applicable to the Federal projects.

Further, in the same letter, he says:

> In section 2 of the bill provision is made for the releasing of the liens of the Government which have been reserved, as required by the present law, in patents to homestead entries taken up subject to the reclamation law, and for the discharge of liens contained in stock subscription contracts to water users' associations and in water-right applications direct to the United States, in cases where proper contract shall be made by irrigation districts with the United States.
>
> This section would, therefore, if enacted remove two classes of impediment to the application of the farm-loan act to Federal projects. The first is the existence of the prior reserved lien on all homestead lands, and the second is the existence of a contractual lien by virtue of stock subscription and water-right applications. Thus both the public and private lands taken by the settlers under these projects would become free from prior liens, so that there would be no legal impediment to the loaning of money by way of rural credits.

It is unquestionably true that many of these irrigation projects are working out splendidly. Many of them have proven the wisdom of the legislation. It has been a splendid investment. It is also true that some of them have not worked out so well, and the public money has been thrown away in some of these projects. While that is true, and while the scheme on the whole has been a success, this bill if enacted into law gives the public two chances to be soaked. One is in the public money that originally goes into a poor project may be lost, and the second is to release the first lien of the Government long enough to permit the Federal Farm Loan Board or some financial institution to make a first mortgage and then after the first mortgage is recorded for the district to turn around and make its assessment to secure the balance to the Government of the United States.

It seems to me that in the crisis that confronts us to-day we ought not to think of passing a law of this kind. We need all of the credit of the Government to carry on this war and we should not think of releasing these liens, which are first liens to the Government, and then have the Government take a second mortgage to secure its investment. No private bank, no person having a first mortgage, would think of such a thing. It is so unreasonable that no one would think of making a request for such a thing. Then, why should the Government do it?

Mr. LITTLE. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. BORLAND].

Mr. BORLAND. Mr. Chairman, to understand the real iniquity of this bill it is necessary to understand the scheme of the reclamation law. The reclamation law which was passed 14 years ago segregated the receipts from public lands in public-land States into a revolving fund. That fund was to be used to build reclamation projects, and a lien was to be reserved upon the land to which water was furnished until the construction and operation and maintenance charges were repaid. The fund which was thus replenished by repayment of these charges was then to be used in the construction of further projects in other States or in other portions of the same State. Whatever tends to delay or hinder that program is, of course, undermining and destroying the whole plan of the reclamation law. The reclamation law provided that the Government should retain a lien on the Government land within the irrigation project sufficient to cover the cost of construction and that private landowners within the district should come in or could come in by agreement and submit to a contractual lien on their land as a condition for the construction of the project and the use of the water. This bill proposes, and its whole object is, to release both of those liens. The lien is against the individual tract of land in every case. Some tracts of land are of value and some are not. The Government undoubtedly will lose some of its liens, but this proposes to release all of the liens on the individual tracts and substitute for them a liability by a legally organized irrigation district to be created under the laws of the State. It may be argued that the laws of the State will give or have given to these quasi-municipal corporations the right to levy assessments upon the land, but there is no possible guarantee that that condition will continue and that the protection to the Federal lien will be preserved under the continuing laws of the State.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. No; I can not. The very purpose is to release the lien on the individual tract of land. We must recollect that these liens on the individual tracts of land run from $60 an acre to $110 an acre. That is the lien which the Government now has to collect back for construction charges.

Mr. MONDELL. Mr. Chairman, is not the gentleman getting a little high?

Mr. BORLAND. No; I think not. There may be some projects where the charges run as low as $40, but I doubt whether there are any lower.

Mr. MONDELL. There is none that runs to $110, except one or two small ones.

Mr. BORLAND. Oh, yes; there are some of them. There is a good deal of that land that is not worth $60 to $110 an acre. In order to be worth a lien of that amount the land ought to be worth double the value of the lien. Very little of it is worth that. In fact, the Government practically advanced to these people the money to make their land of any value at all. It would not be worth $1.25 an acre if it were not for the money that the Government had expended. The very purpose of this law is to release the Government's lien and put it into the form of assessments by quasi-municipal corporations. The proponents say in all their arguments that the purpose is to permit the individual landowner to pledge the land for further advancement. That was said in the letter of the Secretary of the Interior read by the gentleman from Iowa [Mr. GOOD], and here is another statement by the district counsel of the Reclamation Service:

> The fifth advantage of the district to which I have referred is that the irrigation district plan keeps the title of the individual landowner free from incumbrances of record, and therefore makes it easier for him to secure credit and borrow money at reasonable rates. Most of the insurance companies and mortgage-loan companies have provisions in their by-laws or the regulations or laws under which they operate, which prohibits them from loaning on second mortgages and require them to loan only on first mortgages.

Therefore the purpose of this law is to so fix it that the individual landowner can give a first-mortgage lien to the mortgage company he chooses to borrow the money from. Not only are we to have this mortgage lien of some mortgage company injected ahead of Uncle Sam's lien but in the case of private land the tax is levied by the State and the county.

Mr. SMITH of Idaho. Will the gentleman yield?

Mr. BORLAND. For a brief question, not a statement.

Mr. SMITH of Idaho. The title is still in the Government. Does the gentleman assume that any loan company will loan money on a second mortgage, or that even the Federal Loan Board will loan money on a second mortgage?

Mr. BORLAND. The statement is very plain to a business man, and the gentleman from Idaho is a business man, and it says that the very purpose of the district plan is to release the individual tract from a first lien in order to borrow money from a mortgage company. Why, not only that, but the statement is here made that the law passed to control the Farm Loan Board prevents them from taking anything but a first mortgage and that the passage of this law will permit that board to take loans from these owners of land. Now, they are to take a first lien, and after that we are to have a lien of $40 to $110 to care for construction charges. The investment of Uncle Sam in the reclamation project made the land of value as security to anybody.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. BORLAND. I can not yield right now. I have one more thought which I desire to present. Now, what becomes of the revolving feature of this fund? What becomes of the right of other localities that are waiting to have an irrigation project built in their vicinity? Why, there are scores of applications now before the Secretary of the Interor from meritorious projects in the West where they would like to have irrigation projects taken under the provisions of the reclamation law, but can not do so until the fund is built up to a point where there is money available for that purpose. Uncle Sam advanced $20,000,000 more than the public land sales produced and that $20,000,000 has been used and has not been repaid. Now, there is not any way to accommodate all these people who want reclamation projects in their neighborhood and who are entitled to have them, if we absorb the money as provided in this law. Why, it absolutely stops all of the beneficial operations of the reclamation law. It just simply says to those gentlemen who were fortunate enough to get in on one of these existing projects, that they only are to have advantage of all the proceeds of the sale of public lands. That is exactly what it means. It not only means that, but, as the gentleman from Iowa [Mr. GOOD] pointed out, they are also to come to the Treasury and ask to have a further bonus out of the rural credit land bank proposition; and then, when Uncle Sam has got both liens in there and gets the land, it is a question whether he will ever get either one of them out.

Mr. GLASS. Will the gentleman yield for a question?

Mr. BORLAND. For a very brief one.

Mr. GLASS. As I understand the proposition, it is to release all Government claims to this land before the Federal Loan Board makes loans on it?

Mr. BORLAND. That is it, precisely.

Mr. GRAHAM of Illinois. Now, will the gentleman yield?

Mr. BORLAND. In lieu of that, I will say to the gentleman from Virginia, it is proposed to allow these irrigation districts to collect, by some means of assessment under State law, enough money to pay the original lien to Uncle Sam. That is what it is expected to do, but when we consider the size of Uncle Sam's present lien we find——

Mr. RAKER. Will the gentleman yield?

Mr. BORLAND. I will yield for a question.

Mr. RAKER. The gentleman does not pretend to say that if a contract were entered into by the Secretary of the Interior and a reclamation district you waive the Government's right to collect that money and have a lien upon the land in the district, do you?

Mr. BORLAND. I did not understand the gentleman's question.

Mr. RAKER. The gentleman answered the gentleman from Virginia that the Government waived all claim.

Mr. BORLAND. Yes.

Mr. RAKER. This bill triples its security and puts it two or three times greater than it is to-day?

Mr. BORLAND. I heard the gentleman make that statement before, but I think he was in error.

Mr. GLASS. As a matter of fact, the Farm Loan Board could not make a loan on any land unless all claims were cleared.

Mr. BORLAND. Yes; so it is perfectly plain, and the law itself says that when we have entered into this contract the United States shall not reserve a lien for the payment of such charges. It expressly says that, and this bill ought to be defeated.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LITTLE. Mr. Chairman, in view of the courtesy the gentleman from Colorado [Mr. TAYLOR] extended to the gentleman from Oklahoma, I am going to give five minutes to the gentleman from North Dakota [Mr. NORTON], who is on his side; and I will say in doing this that I do it with more pleasure because this is the first time since this Congress has been in session that I have known the gentleman from North Dakota to be wrong. [Laughter and applause.]

The CHAIRMAN. How much time does the gentleman yield?

Mr. LITTLE. Five minutes.

Mr. NORTON. Will the gentleman from Colorado yield me five minutes?

Mr. TAYLOR of Colorado. How much time have I left?

The CHAIRMAN. The gentleman has 25 minutes yet remaining.

Mr. TAYLOR of Colorado. Yes.

The CHAIRMAN. The gentleman is recognized for 10 minutes.

Mr. LITTLE. And I understand that I have used 23 minutes.

Mr. NORTON. Mr. Chairman, the purpose of this bill is to authorize releasing the liens that the Government now has upon the individual lands on the different irrigation projects of the country and for the Government to accept in place of these liens the obligations of municipal organizations known as irrigation districts. The advances made by the Federal Government for constructing and maintaining irrigation projects which take advantage of this proposed law will be repaid to the Government by the municipal organizations or irrigation districts instead of by the individual landowners under the project. There has already been passed by most, if not all, of the Western States legislation providing for the organization of irrigation districts, with practically the same powers as given to civil townships to contract obligations, to levy and collect taxes, and to enforce payments of taxes and assessments. Under this plan of organization it is proposed—and it is provided in the State laws—that bonds may be issued by the irrigation districts, to be given to the Government in payment of the expenses that the Government has been to in constructing the irrigation projects and maintaining them. It is provided that these bonds may run for such a period of years as it may be agreed upon to repay the Government for the cost of constructing, operating, and maintaining the project. These bonds are to be paid——

Mr. DENISON. Will the gentleman yield?

Mr. NORTON (continuing). By those who belong to the irrigation district, through assessments regularly levied every year on the lands in the district. These assessments for the payment of the obligations of the irrigation district are levied and collected the same as county, city, or State taxes are levied and collected. In most, if not all, of the Western States these assessments of the irrigation districts would be collected by the county treasurers.

Mr. ANDERSON. Are these bonds a lien on the land?

Mr. NORTON. These bonds are an obligation against every foot of land and against all property in the irrigation district, just as the bonds issued by any municipal organization, such as a civil township or city or village are an obligation against all the property of the civil township, city, or village.

Mr. DENISON. I was going to ask this: Now, then, if the irrigation district has an outstanding issue of these bonds, which, as you say, is a lien upon all the land in that district, can the Federal Farm Loan Board loan any money on any of the land in that district when there is a bond issue?

Mr. NORTON. I will say that any Federal farm-land bank in loaning on these lands would necessarily in the course of its business have to recognize and take into consideration the outstanding obligations that the irrigation district might have; because, forsooth, if the farm-land bank should loan, let us say, $2,000 on a quarter section of land, and in any following year during the life of the mortgage the irrigation district should levy an assessment on all the land in that district of 85 an acre—or, to make a stronger hypothetical case, say, $10 an acre—on 160 acres, that would be an assessment of $1,600; then, if the owner of that 160 acres of land neglected to pay that assessment or levy, the land would be sold for that assessment or levy, just the same as it would be sold for county taxes or township taxes or State taxes, and if it were not redeemed in time by the mortgagee a tax title would issue that would wipe out the mortgage for $2,000 of the farm-land bank.

In taking a mortgage upon these lands, the land bank, or any other mortgagor, would necessarily be obliged, as a matter of business, to take into consideration the outstanding bonds or the outstanding indebtedness of the irrigation district.

Mr. DENISON. Then, as a matter of law, is it not true that a farm-land bank can not under the law make a loan on any of those lands if there is an outstanding bond issue?

Mr. NORTON. No, sir; it is not. I will point out to the gentleman why. At the present time in a civil township a farm-land bank has a right to make, as any mortgagee has, a first mortgage on land that has no prior lien on it. However, the

township may have at the time outstanding obligations in excess of the total value of all the property in the township. If so, any mortgage lien placed on land in such a township may be worthless as far as security is concerned. Such conditions have happened in the West before either you or I were born. Boomers and exploiters went out into Nebraska and Kansas and the Dakotas in the early days, and organized civil townships and issued large amounts of bonds, and sold them in the East. These bonds exceeded in amount the entire value of the property of the civil township.

Mr. DENISON. Now, one more question. The statute of South Dakota, read a while ago by the gentleman from South Dakota [Mr. GANDY], stated that any contract made by the irrigation district with the Government was subject to prior bond issues made by the irrigation district. That is true, too, is it not?

Mr. NORTON. Yes; that would probably be true, unless it were provided otherwise by law.

Mr. DENISON. Any contract made by the irrigation district with the Federal Government in regard to repayment of amounts due the Government is subject to prior bond issues made by the irrigation district?

Mr. NORTON. Prior bond issues?

Mr. DENISON. Any contract is subordinated to them.

Mr. NORTON. Certainly, if the irrigation district made two issues of bonds, the first issue of bonds would be a prior obligation. I take it that when the Government accepts these bonds the bonds accepted will be the first obligation of indebtedness of the district.

Mr. DENISON. Then, if the Government under this bill releases its lease on the individual tracts of land and accepts a contract from the irrigation district, that contract is subordinated to all prior bond issues made by the irrigation district?

Mr. NORTON. Naturally, that would be true.

Mr. DENISON. Then the Government is releasing the first lien for what may be a second or third lien?

Mr. NORTON. The Government would not be obliged to do that and should not be obliged to do it under any law. I believe this law should be passed, because it would be to the best interest of the Government, as well as to the landowner under the irrigation project. If the Government took the blanket obligation of the irrigation district on all the property in the district, it would be in better position to collect the money that has been expended on the irrigation project than it is now through its first lien on the separate tracts of land.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. NORTON. Certainly.

Mr. GRAHAM of Illinois. In verification of the statement you made a moment ago about loans by the Federal farm-land banks, in Illinois we have an organization of drainage districts for the lowlands along the Mississippi River. These are municipal corporations. Recently I ascertained in one particular case where there was a lien placed by the drainage association upon the lands to the extent of about $40 an acre, and the Federal land bank is making loans upon that land.

Mr. NORTON. There you have exactly the same case as you would have under an irrigation district.

Mr. GRAHAM of Illinois. The lien of the drainage district was on the land, but it did not prevent the loan by the Federal farm-land bank.

Mr. GLASS. It would.

Mr. NORTON. They are making the loan just the same.

Mr. GLASS. I think the gentleman must be mistaken, because the mandate of the law is as clear as the noonday sun that the farm-loan bank must have a first mortgage on the land upon which it makes a loan.

Mr. GRAHAM of Illinois. I have some knowledge of the loan. In this case 2,000 acres of land were involved, upon which there was a lien of $40 an acre, and the loan is being placed at $35,000 on that tract, under the auspices of the Federal Farm Loan Board.

Mr. GLASS. It is a violation of the law as plain as can be.

Mr. NORTON. Take the case of a civil township. If any civil township to-day in the country has outstanding bonds, say to the amount of a million dollars, covering the value of land at $20 an acre, has not the Farm Loan Board the right to make loans on that land in the civil township?

Mr. GLASS. It has not the right to make farm loans on anything but first mortgages.

Mr. NORTON. The gentleman is not answering the question directly. Let us take the case of a congressional township, and say there is an outstanding bond issue of $20,000,000 against that township, or $100,000,000. Has not a farm-land bank the right to go in there under existing law and make a loan on separate tracts of farm land in that township?

Mr. GLASS. Not unless it has a first lien on that land. If it has not a first lien upon the land, the Farm Loan Board has no right to make a loan upon it.

Mr. NORTON. Nevertheless, a farm-land bank has such right, and the gentleman will so find it to be true if he gives further examination to the Federal farm-loan act, which he took such a splendid part in framing and having placed upon the statutes.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. TAYLOR of Colorado. Mr. Chairman, I yield 10 minutes to the gentleman from Wyoming.

The CHAIRMAN. The gentleman from Wyoming is recognized for 10 minutes.

Mr. MONDELL. Mr. Chairman, the time I have is brief, and I would like to have the attention of the committee for that brief period. As matters now stand, the individual landowner under a reclamation project is obligated to the Federal Government for the return of the cost of the irrigation of his land, as fixed by the Secretary of the Interior, and for the annual cost of maintenance. The charges against the land are first liens. If the land be taken under the homestead law, that lien can be enforced by shutting off the water and the cancellation of the homestead entry. If the land be privately owned land—that is, land that was privately owned at the time it was taken under the project—the lien is enforceable by shutting off the water and in some cases—in most cases, perhaps—by action upon the contract entered into with the owner of the land. However, it has been claimed that some of those contracts are of doubtful validity.

The Government is absolutely secure, so far as the land of the homestead entryman is concerned. Assuming that the property be worth the cost of its irrigation, the Government is likewise protected and secured, in the great majority of cases at least, for the cost of irrigation of privately owned land by the power to shut off the water supply and authority to cancel the contract, providing that the land is worth the cost of its reclamation.

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I regret I can not. I have only 10 minutes, all told. Practically all the lands are worth that cost and more.

It is now proposed to relieve the individual landowner or entryman from the direct obligation relative to the building charge, and to lay that obligation upon a municipal corporation. It is urged by some that it is unwise to do so; that it is dangerous to do so; that by so doing we would jeopardize the Government's investment.

My opinion is that in some cases, at least, this change of the form of the obligation would strengthen the Government's security, and that particularly in cases where a large proportion of the land is in private ownership; possibly not to the same extent where most of the lands were homesteaded. It is urged and argued, and with a good deal of force, by the gentleman from Minnesota [Mr. VOLSTEAD] that while the municipal corporation would have the power to enforce the lien and collect the sums due the Government, there might come a time when public sentiment was favorable to repudiation and to an extent that would greatly hamper and possibly defeat the Federal Government in the collection of the sums due. I doubt if such a condition is likely to arise anywhere. It is difficult to conceive such a situation as that. The cases in which it would arise would, in my opinion, be very rare.

Now, as to the application of this law to the two national irrigation projects in my State of Wyoming. In one of those projects almost every acre of the land was public land and was entered by homesteaders. In the other project something like 50 per cent was public land. The settlers under those projects have made their payments as they have become due, practically all of them. There is no considerable obligation due the Federal Government on those projects now unpaid. The people have kept the faith. On one of those projects a very considerable portion of the construction charge has been paid. The projects are doing well. The people are honest and intend to meet their obligations, and will meet them; and upon those projects this law would certainly work well, and the Public Treasury would be protected. [Applause.] One of the objects sought to be attained through the passage of the act is that of allowing the people to secure Federal farm loans. I am not altogether certain that this result would necessarily follow. In some cases, at least, it would be doubtful. However this may be, the enactment of the legislation would afford such relief. I believe, in the case of patented lands, where any considerable portion of the building charges had been paid, I therefore give my support to the bill. [Applause.]

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. TAYLOR of Colorado. Mr. Chairman, how much time have we on this side?

The CHAIRMAN. The gentleman from Colorado [Mr. TAYLOR] has 10 minutes, and the gentleman from Kansas [Mr. LITTLE] has 32.

Mr. TAYLOR of Colorado. I suggest to the gentleman from Kansas that he use some of his time.

Mr. LITTLE. The gentleman from Oregon [Mr. SINNOTT] wishes to speak on your side now. I yield him five minutes.

The CHAIRMAN. The gentleman from Oregon is recognized for five minutes.

Mr. SINNOTT. Mr. Chairman, my object in speaking at this time is to allay the misapprehensions expressed by some members of the committee lest the Government might lose some of the rights and securities which it has at the present time. One thing is sure, and one thing to my mind is uncertain which formerly was certain. After listening to the discussion I am uncertain as to whether or not many of these reclamation projects will indeed secure the benefits of the farm-loan act that they thought they were going to secure by virtue of the bill before the House. That is uncertain in my mind. But this is surely made certain, that the Government will have better security under this act than it has under the present reclamation law. Under the present law a farmer owning a unit of 100 acres may owe the Government $1,000. The sole security that the Government has under the present law is the land owned by this one farmer, but under this contemplated change if there are 50,000 acres in the irrigation district, the Government has as security for the debt of this one farmer the entire 50,000 acres in the irrigation district.

Mr. DENISON. That is, provided there is no prior lien on that 50,000 acres.

Mr. SINNOTT. Provided there is no prior lien.

Mr. DENISON. There may be a prior lien.

Mr. SINNOTT. But if this act is passed and the Secretary of the Interior does his duty, as we have a right to assume he will, there will be no prior lien. He will make no contract with any irrigation district organized under the new law unless the Government has a first lien or charge upon all the land in that irrigation district.

Mr. DENISON. That is, assuming that he will not use bad judgment.

Mr. SINNOTT. That is, assuming that he will be honest with the Government.

Mr. DENISON. He might be honest and yet use bad judgment; and does not the gentleman think it ought to be provided in the law that the Secretary of the Interior shall not make a contract unless the Government has a first lien?

Mr. SINNOTT. I certainly would have no objection to that. In fact, the laws of the State of Oregon, which I propose to read, contemplate that. How much time have I remaining, Mr. Chairman?

The CHAIRMAN. One minute.

Mr. SINNOTT. It is impossible to go through these laws in that time, but I will say that the laws of Oregon contemplate the organization of an irrigation district which will guarantee the indebtedness of these reclamation works to the Federal Government. Further than that they provide that—

Any water, the right to use of which is acquired by the district under any contract with the United States, shall be distributed and apportioned by the district in accordance with the acts of Congress and rules and regulations of the Secretary of the Interior and the provisions of said contract in relation thereto.

As a condition precedent to entering into a contract with these new irrigation districts formed under this law the Secretary of the Interior may exact from them any agreement he sees fit, requiring the district to comply with the rules and regulations of the Secretary of the Interior.

Mr. DENISON rose.

Mr. SINNOTT. I beg the gentleman's pardon. I have so little time that I can not yield.

Mr. LITTLE. I will give the gentleman two minutes more.

Mr. SINNOTT. The board of any irrigation district—

may enter into any obligation or contract with the United States for the construction, operation, and maintenance of the necessary works for the delivery and distribution of water therefrom under the provisions of the Federal reclamation act and under the acts amendatory thereof.

Section 22 of the Oregon Irrigation Code, which is really a copy of these other acts that have been passed in the various States, provides that—

The holder of the bonds, or the United States, in case contract has been executed by the United States, may, in case of default in the payment of interest or principal on the bonds, or the amount due on the contract, upon the order of the circuit court, take possession of the irrigation and other works of the district and operate the same until the amount in default shall have been fully paid.

Any assessment upon land shall be a lien against the property assessed, and such lien for all payments due or to become due under any contract with the United States or for the payment of principal or interest of bonds deposited with the United States shall be a preferred lien to any assessments for bonds issued subsequent to the date of such contract or the issuance of said bonds deposited with the United States, and no district assessment lien shall be removed until the assessments are paid with interest and penalties or the property sold for the payment thereof.

Section 23 provides that—

The Treasurer shall keep a "Bond Fund" account, or a "United States Contract Fund" account, or a "Bond and United States Contract Fund" account, as the case may be, into which shall be covered all moneys arising from the sale of refunded bonds and assessment and levy until there is sufficient money in such fund to meet the next installment of principal and interest upon bonds of the district and to meet all payments for construction and all other purposes to the United States.

Section 24 provides that—

Where contract has been made with the United States in addition to the amount hereinbefore determined and apportioned, the board of directors shall also fix the amount payable by each tract within such district, and the amount so fixed shall be in accordance with the Federal reclamation laws and the public notices, orders, and regulations issued thereunder, and shall be in compliance with any contract made by the United States with the owners of said lands and in compliance further with the contracts between the district and the United States.

Mr. TAYLOR of Colorado. I yield to the gentleman two minutes more.

Mr. SINNOTT. Section 35 provides that—

No change in the boundaries of the district can be made unless the Secretary of the Interior shall assent to the change.

Every section of the Code of Oregon has some provision for the protection of the interest of the United States. Then, there is a provision against the dissolution of the district without the consent of the Secretary of the Interior.

Some one has asked this question: Suppose the directors of the district refuse to act, what will be the result? We have a statute anticipating and protecting that, so that in case of neglect or refusal of the board of directors to cause such assessment and levy to be made, then the assessment and levy shall be made by the county court of the county in which the office of the board of directors is situated in the same manner that the court levies county taxes. And all those expenses are to be borne by the district.

Most every contingency or hazard one can think of has been anticipated in the various irrigation codes passed in the States of the West. I have no misgiving that the Government is going to lose anything by the passage of this act. The only misgiving I have is that we may not secure what we think we are going to secure, the benefit of the farm-loan act.

Mr. LITTLE. Mr. Chairman, I yield two minutes to the gentleman from Illinois [Mr. DENISON].

Mr. DENISON. Mr. Chairman, I do not think this bill would be a bad law if the first section had a proviso that would prohibit the Secretary of the Interior from making a contract with any irrigation district upon which there were prior bond issues outstanding. If that proviso is inserted in the first section of the bill, then any contract made by the Secretary of the Interior would give the Government of the United States a first lien, or prior lien, on all the lands in the district. Then the arguments presented by gentlemen in favor of the bill would have some force. It ought to be there for another reason, and that is if the proviso were in the bill there would be no legal objection to the Federal Farm Loan Board making loans on the lands in the district.

Mr. BORLAND. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. BORLAND. I think the gentleman from North Dakota perhaps misled the gentleman from Illinois. This does not contemplate any bond issue.

Mr. DENISON. But there are outstanding bond issues.

Mr. NORTON. If the gentleman will pardon me, it does contemplate a bond issue.

Mr. BORLAND. The law read by the gentleman from Oregon [Mr. SINNOTT] provides for the levy of taxes.

Mr. GANDY. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. GANDY. Does not the gentleman know that this will affect only Government projects, and that there are no outstanding bond issues against any Government project, and that any bond issue subsequent to the transfer would be a subsequent lien?

Mr. DENISON. Is it not true that there are irrigation districts organized under State law, and they may issue bonds?

Mr. GANDY. It has nothing to do with them; this is for the transfer of the Government projects.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. LITTLE. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, this bill seeks to lift the lien absolutely of the National Government for work of construction and maintenance charges which it has to-day on various reclamation projects erected in Western States. It seeks to substitute for its first lien not only a second mortgage lien but a second mortgage lien of very doubtful character.

The advocates of this bill say that this water-rights association will make assessments to pay the obligation owing to the Government of the United States, and that thereby the individual owner, homestead or otheriwse, on these reclamation projects will be enabled to obtain a loan.

I wish to put this question to those advocates: How could a loan be obtained any more advantageously by the individual which would be subject under the laws of the State to the lien of the water-rights association to pay the assessment owing to the National Government?

We have gone ahead and expended seventy millions and more dollars in construction work to make tillable these arid lands of the West. I agree with the proposition stated by the gentleman from Wyoming that in some instances where the money has been wisely invested there would not be much risk undertaken in subordinating and subrogating the rights of the water-rights association for the rights of the Government to-day.

But the gentleman from Colorado knows, and the gentleman from Wyoming ought to know, that there are projects in some of the States where we have spent millions of dollars and not one cent of the construction charges has been paid by the individual users of the water on these lands. That money has been ill spent, and now you are going to provide the means, under the guise of water-rights association, whereby these persons on these doubtful projects who to-day have not paid one cent of the construction charges may form water-rights associations, allow the water-rights association to default in payment of taxes, permit the association to be put into the hands of a receiver, the rights of the water-users' association sold at a receiver's sale, and the obligation of the Government wiped out entirely. By such proceedings they get full title to all the millions that have been invested by the National Government in making these lands valuable.

Mr. GANDY. Will the gentleman yield?

Mr. STAFFORD. I will yield to the gentleman later on, after I conclude my argument. We have been most generous toward the owners who dwell on the reclamation projects. Under an act passed August 13, 1914, we authorized every entryman and every user of water rights to have the amount owing for construction and maintenance charges deferred in payment in 20 annual installments. The first installment of 5 per cent was not to be paid for five years after the water had become usable.

It provided further that in these reclamation projects where they had gone out and made their entries and exercised their rights that even there they could have their payments deferred in 20 annual installments. What more could the National Government have done toward the consideration of these entrymen and water users on the reclamation projects than in deferring payment of these charges—and, mind you, without any cost in interest charges—for 20 years. In case of these projects that are to be developed in the future the first 5 per cent installment is to be only 2 per cent of the amount. And yet they come in after the Government has gone into debt $20,000,000, advanced to them under the law of 1910, when the reclamation project was virtually bankrupt as far as additional work was concerned, in addition to the $70,000,000 the Government had expended prior to that time, and want the Government to wipe out all of that payment and hand it over to them as a gift.

More than that, this is unfair to the people of the States in which these reclamation projects are located, because when once the reclamation project gets on a paying basis, and the money begins to come into the Treasury of the United States, that revolving fund must some day be paid back into the State treasuries for utilization in the way of school funds and the building of roads; and under this proposal, which is a raid on the National Treasury for the benefit of some bankrupt, poor projects, that money will never revert to the treasuries of the individual States, because it will be gone once and for all.

Again, under this law I have cited, this general relief act of 1914, providing for deferred payments for 20 years, there is a special provision made, and it takes the argument away from the proponents of this measure when they say that the water rights associations are necessary as an advantage to the users of water on these reclamation projects. The Secretary of the Interior, in section 7, is authorized to appoint these water right users' associations as agents for the collection of these charges.

Mr. GANDY. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Under existing law the water rights associations have the power to-day to be authorized to collect these charges. I yield to the gentleman.

Mr. GANDY. Does the gentleman understand that there is a difference between the voluntary water users' associations referred to in that act and the municipality of an irrigation district that is contemplated in this act? One is voluntary and the other is a municipality.

Mr. STAFFORD. If the people of the reclamation project wish to unify their forces so that this water-users' association shall act as the fiscal agent for the collection of the charges, there is the authority. After obtaining all these concessions from the National Government, after having all of these payments deferred, not only as to future projects but the payments deferred in installments for 20 years as to projects already in existence, as to the amounts still owing, and without interest, you are asking us to waive the claim entirely and to allow the State to come in by taxes, foreclosure proceeding, and receiver's proceeding, and wipe out entirely the obligation of the Government—just simply say, "Here, we have expended all of this money for you, and here it is as a free gift." It is not fair to the rest of the country, which has been so generous in allowing these Western States to utilize the funds arising from the sale of public lands for the development of reclamation projects in these respective States, and it is not fair to the rest of the country where we have given them preferential consideration. Public lands have been sold in Wisconsin and Minnesota of late years——

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. LITTLE. Mr. Chairman, I yield the gentleman two minutes more.

Mr. STAFFORD. And in many other parts of the country, and yet those public-land funds have been turned into the Treasury of the United States for the benefit of the taxpayers, and yet after we have advanced these millions and millions of dollars for the benefit of the West on the deferred-payment plan, they come in now at this time, when the Treasury needs it most, and ask us to make a pure gift of that amount to them. That, in substance, is what it amounts to.

Mr. GANDY. Does the gentleman understand that the charges of the reclamation district are made a matter of taxes the same as any other taxes?

Mr. STAFFORD. I fully appreciate that, but the gentleman also realizes that to-day taxes on these lands in these reclamation projects under State laws are subordinate to the claim of the Government of the United States for the payment of its charges, and while you may say in your State laws that would not be the case, still, as has been pointed out by the gentleman from Minnesota [Mr. VOLSTEAD], there is nothing to prevent the State legislatures from changing those laws subordinating the right of the National Government still further.

Mr. NORTON. Does the gentleman think, as a matter of fact and as a practical proposition, it would be as easy for the Government on an irrigation project to recover through foreclosure or enforcement of its obligation from an individual tract of land as it would be from an irrigation district?

The CHAIRMAN. The time of the gentleman has again expired.

Mr. LITTLE. Mr. Chairman, I yield the gentleman one minute more.

Mr. STAFFORD. I will say that, as far as one of the projects in the gentleman's own district is concerned, the Williston project, where the users have not paid any percentage of the construction charges, it would be directly to the benefit of the people up there to have this right so that they could have the rights of the Government lost, the lien of the Government waived, and allow those people to get full advantage of the amount of money the National Government has sunk in that project.

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. TAYLOR of Colorado. Mr. Chairman, I ask unanimous consent that the gentleman from Idaho [Mr. SMITH] be allowed to address the committee for five minutes, not to be taken out of the time either of the gentleman from Kansas or myself.

Mr. LITTLE. Mr. Chairman, I join in that request.

The CHAIRMAN. The gentleman asks unanimous consent that the gentleman from Idaho [Mr. SMITH] be allowed to proceed for five minutes, not to be charged up to the time for general debate. Is there objection?

There was no objection.

Mr. SMITH of Idaho. Mr. Chairman, there are two things that we undertake to accomplish by this bill. One of them is to save a great deal of expense and trouble in collecting the charges from the settlers. Under existing law the Government has a contract with each individual settler, while under this proposed law, if it is accepted by the settlers and the districts formed, the Government would deal entirely with the secretary or other officers of the district association.

Another object sought to be accomplished is to force into cultivation a large proportion of the lands on certain projects which are in private title, by assessing them for their pro rata share of the expense incident to constructing and maintaining the reclamation works. In many projects much of the land was held by owners when the project was undertaken. Those owning this private land may or may not enter into a contract to take the water to irrigate their land. If they do not enter into such contract, they do not have to contribute to construction or maintenance charges. They can allow their lands to lie idle while those on the public land, or those owning private land who do enter into a contract for water, improve their holdings by putting in crops and making the land more valuable, and in this way increase the value of the land of those who have not entered into contracts to use water for the reclamation of their land and who thus reap the benefit of their enhanced value.

The bill before the House, if enacted and put into use upon the reclamation projects, means an earlier reimbursement of the reclamation fund than will otherwise be possible.

The water users are at present organized as "water-users' associations," which are private corporations. They do not have the taxing power, nor do they have the power to compel private lands whose owners have not made stock-subscription contracts to pay the charges which should be payable to the United States. The United States has no power to compel contributions by persons who have not subscribed their lands to the association, and who, pursuant to stock subscription, have not made water-right application direct to the Government.

The irrigation district differs from the water-users' association in that it is a public corporation in every sense that school districts are public corporations, and it is vested by the State legislatures with the power to tax all lands within the boundaries of the project for both construction and operation and maintenance charges.

The reclamation projects include some 3,000,000 acres of land eventually to be irrigated. Of this area 1,760,000 acres were irrigable in 1917, and of the irrigable area there were actually producing crops an aggregate of 1,160,000 acres.

The difference of approximately 600,000 acres is to a large extent land for which a water right has been secured by the owners, and which will be put into cultivation as rapidly as the necessary leveling can be done by the owner, payments meanwhile being made for the entire tract.

Another large portion of the 600,000 acres irrigable but not yet cultivated is in the ownership of private landowners who have not as yet made water-right application to the United States, but are simply holding their lands from cultivation for one reason or another, and in many cases, at least, they are hoping that the cultivation of neighboring tracts will so enhance their values that it will be possible for them to sell at a profit.

The operation costs for these lands are being borne by the people who have actually made application for water and are farming their homesteads or private lands, so that the actual users of water are interested to compel those who are not cultivating to "sign up" for a water right. The collection of operation cost is required to be borne by the project, irrespective of the land actually under cultivation, by section 5 of the reclamation extension act.

As to the construction charges, however, for the lands held by people who have not made subscription, the Government is simply waiting, and under the present relations between the United States and the water users the attitude must continue to be one of waiting.

By the formation of an irrigation district, however, the relations between the water users and the people would be vastly improved, for then necessity for individual consent is absolutely abrogated. The district, if organized as a result of a two-thirds vote of the resident landowners (or whatever majority is required by the local State statute), secures jurisdiction and the power to levy and collect taxes from every grade of irrigable land within its confines.

During the 1917 session of the State legislatures the work of harmonizing the irrigation district lands of these various States, so far as the State legislatures can do so, was completed, except in the State of Wyoming.

These enactments provide that in addition to the other grounds for organization, irrigation districts may be formed for the purpose of "cooperation with the Federal Government and for the assumption, as principal or guarantor, of indebtedness to the United States on account of district lands."

The districts have also been authorized, through their boards, to make contract with the United States for the construction, operation, and maintenance of projects, and for the assumption by the district of the project debt, pursuant to the reclamation act and its amendments.

The contracts can not be entered into, however, until an election is had, at which the question is voted upon: "Contract with the United States, yes; contract with the United States, no."

The statutes all expressly provide for confirmation in the courts of the proceedings for formation of the district and for the proceedings leading up to the execution of contract with the United States. The supreme courts of all the Western States which have passed upon the question—and that constitutes the majority—have held that the decree secured after service by publication in these irrigation-district confirmation proceedings is binding upon the entire world (including the sovereign State in which the district is located). The constitutionality of the irrigation district law has been passed upon by the Western States and by the Supreme Court of the United States in the case of Fallbrook Irrigation District against Bradley (164 U. S., 112).

The taxing machinery in some of the States is carried on by an irrigation district receiver and collector and a district treasurer, but in the majority of the States by the regular county officials of such county or counties as the district lands may be located in; and these officials are subject to mandamus and are under bond. The law provides for increasing the bonds at the discretion of the Secretary, where the district cooperates with the United States.

As to the machinery for collection, the public officials are required in common with ordinary taxes to make the assessments, the levies, and the foreclosures on statutory days, in the case of irrigation-district reclamation charges.

The result is threefold:

(a) The people have impressed upon them the obvious fact that both operation and construction charges must be met. Their whole attitude toward the payment program is that their payments are in the familiar class, as regards certainty of "death and taxes." Every landowner expects to meet his taxes, and if this bill is placed in operation will definitely anticipate making his payments for these amounts.

(b) The cost of operation by the United States in the maintenance of fiscal collection agencies on each project would be accordingly reduced, the landowners, through their district organization or the counties, as the case may be, handling the collections.

(c) The personal relationship between the United States and the individual by contract would no longer be an important relationship, and for all new units of the project and for all projects individual contracts would be omitted entirely.

The reclamation-extension act of August 13, 1914, by extending the repayment period to 20 years and graduating the repayments, laid down a plan whereby unquestionably all men of average ability and with average capital can make good upon reclamation projects. With the abrogation of the personal relation between the individual water users and the Government, and the formation of public corporations for carrying on the fiscal responsibilities, the drafts upon the department for leniency will be minimized along lines essential to business administration of reclamation projects, for the reason that the irrigation district will form a statutory intermediary between the United States and the soil.

The adaptation of legislation from the Federal side toward cooperation between the United States and irrigation districts was greatly advanced by the passage of the so-called Smith Act, of August 11, 1916. This provided for the taxation of entered public lands of the United States by irrigation districts, whether cooperating with the United States under the reclamation act or not. It also provided for the notation by the register and receiver of the land offices of assessments against unentered public lands, these steps to be lawful only as regards irrigation districts approved by the Department of the Interior.

The present bill permits the department to contract in harmony with State laws, and particularly with regard to the taxing features, so that the provisions of State law with regard to assessment and levy need not be thrown into confusion by the necessity to conform to the Federal dates of payment and the like.

The bill also provides for the clearing of the titles of entrymen and of the private landowners from the private mortgages in favor of the United States contained in the water-right applications and in favor of the water-users' association and the stock subscriptions to these associations in cases only where a

tax lien is substituted. These tax liens are preferable for several reasons:

(a) They take precedence of all private mortgages.

(b) They are more readily enforceable.

(c) They are enforceable by public corporation, without placing the United States in the position of a hard creditor or subjecting the United States to frantic appeal, the change of status being in recognition of the fact that the reclamation work must be conducted on a businesslike basis, just as public improvement would be conducted by a municipality or a State government.

The irrigation district security is preferable to anything heretofore secured for another important reason. The irrigation district stands sponsor and assumes liability for the entire debt of the project, whereas under the water-right application plan the individual was responsible for his own land only. The irrigation district law makes each tract of land primarily responsible, but each tract is secondarily responsible for any delinquencies throughout the project. Moreover, in unincorporated villages vested water-right lands paying operation charges only and railway rights of way included within irrigation districts are ultimately liable and furnish added security for the payment of project debts.

Repayments are going forward successfully upon our Federal projects. The construction repayments to the reclamation fund to June, 1916, are $4,146,630. New units are being placed upon a repayment basis, and as regards other units, the percentage of annual repayment will soon increase from 2 per cent to 4 per cent, so that it is estimated that over $1,000,000 annually will be returned to the reclamation fund for several years, and thereafter still more.

Some comment has been made by those opposed to this bill that it was an unwise thing to take Government money and expend it in improving these lands. In my State we have a district project, known as the Minnetoka project, where this year crops have been harvested to the amount of over $5,000,000, which was the original cost of building the dams, and the laterals and completing the project. From a business standpoint it has certainly been to the advantage, not only of the settlers upon the project but to the country at large, in increasing the food supply.

A few months ago there was sent to this House by the Secretary of the Interior and introduced by the chairman of the Committee on the Irrigation of Arid Lands and favorably reported, but failed of consideration, a bill appropriating $5,000,000 to be expended in the reclamation of uncultivated lands within these various irrigation projects. We contend, Mr. Chairman, that the enactment of this bill will result practically in accomplishing that very thing, because these private lands, when they are taxed for their pro rata share of construction, maintenance, and operation, will be forced into cultivation, because the owners can not afford to have them lie idle while these taxes are accumulating.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LITTLE. Mr. Chairman, I wish to say a few words myself as a member of the committee, but I was waiting for the gentleman from Colorado [Mr. TAYLOR] to speak. This bill comes out of this Irrigation Committee under somewhat interesting circumstances. We had ascertained that a good many men who have settled on Government land under the irrigation law found it difficult to maintain themselves without borrowing money upon the land. Under the present law the Government, as the bill indicates—and you may have read it—has the first lien upon this land for this investment. They could not borrow any money while that was maintained. I suggested a bill to give the Farm Loan Board authority to loan on these lands and to assign the loans for collection, if necessary, to the Irrigation Bureau, which could foreclose and prorate the amounts received. This would make the liens one lien and make it possible to assist these people.

The Farm Loan Board thought if that United States lien could be waived they could have the first lien and could loan money upon this land, and other people could; but we found that the Farm Loan Board, as suggested by the gentleman from Virginia [Mr. GLASS], could not make a second loan. The irrigation department dealing with that matter could not take a second lien. Now, either one or the other of them will have a first lien. If the irrigation department has the first lien, then the Farm Loan Board can not loan any money on these lands, because it would be against the law, and nobody with any business judgment would loan any money on the land because of the Government first lien. So if the irrigation department retains the first lien, as is claimed, then no borrower will have any advantage by this bill, because nobody will loan any money on this land. Now, this is an attempt to give both of them a first lien, an effort of somebody to pull himself up by his boot straps. Let us look at it for a moment. When these lands were allowed by the Government to be taken possession of by the settler, the Government spent money to build ditches and irrigate the land, and the Government still owns that land. While the Government owns that land the State can not tax that land. Bear that point in mind. Then, the people upon that territory, living entirely upon nontaxable land, organized an irrigation district for taxing purposes. Well, they have nothing to tax, except personal property and improvements.

Mr. GANDY. Will the gentleman yield?

Mr. LITTLE. I can not now; I will when I finish my statement. They have a few improvements, any of which they can carry off any time they want to, which, of course, would not amount to much, or they would not be wanting to borrow money to make improvements. Then the district levies this tax not upon a single acre of land. Some fellow avoids payment. He lives there two or three years and gets the advantage of the irrigating canals, and so forth, and he gathers his crops and his personal improvements, and he goes off the land and says to the district, "You pay for it." The Government has a contract with the district, if this bill becomes a law, which says the district will pay for it—a municipal organization, like a county. The district organization begins to levy taxes to pay it, and where does it go for the taxes?

Mr. GANDY. Will the gentleman yield?

Mr. LITTLE. I will not yield now. When I finish my statement I will.

The district can not tax a foot of this land to pay the Government, and this man goes off after he has paid the Government nothing on the investment they have assisted him in, nothing for several years, perhaps, of water, and he carries off whatever crops he has grown. That is a boot-strap effort to help somebody.

Mr. SMITH of Idaho. The Government still owns the land.

Mr. LITTLE. That is the reason it will lose what it has invested to help that man irrigate the land. It will lose all the investment it has made for him and he goes on some other, maybe. The Government will not lose the land when it comes to that, but loses the money due for water, and so forth.

It is suggested that some of these people will own their own land and get it paid out. They will go into this district. Suppose it is a district composed half of fellows who have paid out and own their land and half who have not—have just started. Then the district agrees to pay the taxes to pay the mortgage, or lien, the Government holds on this man's land who goes off and leaves it. Let us suppose the gentleman from California takes a Government claim and pays nothing on it. Let us suppose the gentleman from Colorado takes a Government claim and pays as he goes along, but has not paid out. Let us suppose I have paid out. There are three of us in that district. The proposition is that they shall tax me, who has paid for my land, and the gentleman from Colorado who is paying for his, to pay the debt the gentleman from California made, who goes off and deserts his land and pays the Government nothing. Meantime the Californian gets the same benefit that we do, we who pay for the water and land. He gets irrigation for a term of years, as long as he can soldier on them and put them off, and makes money by growing crops. I have paid for my land, the gentleman from Colorado is working to pay for his, and then the taxgatherer comes around and says to him and to me, "Cough up here; put up the cash for the man from California who has taken the crop and all the improvements, and has lit out." What would anybody with sense do? He would hire a lawyer and would bring a mandamus directing the tax collector to desist or enjoin him. And there is not a lawyer in this House, I undertake to say, that can show to this House that any court on earth would allow such a tax to be collected. How can my county agree to pay off a mortgage on my land and then tax you to pay it.

Let us suppose that it is a private and not a public matter. Let us suppose of these three gentlemen here one has paid for his land, one is paying, and one did not pay and goes away. Suppose there are mortgages on their land held by some loan company. Suppose the township agrees with the loan company that it will pay the mortgage of this man if he does not pay it. Why, does not every lawyer here that ever read a constitution know that no municipal organization could make such a contract, and if it did it would not amount to the paper it was written on?

Mr. RAKER. Will the gentleman yield?

Mr. LITTLE. Yes.

Mr. RAKER. Suppose that these various reclamation projects, that understand the law and the constitution of their State, form a reclamation district under the law and become a munici-

pality, and agree to carry that out and pay the Government of the United States, would every Tom, Dick, and Harry object to their doing their duty and paying the Government back?

Mr. LITTLE. It is no part of my duty to sell my land to pay your debt, and there is not a constitution in the United States that will allow any court to sell one thing you have got to pay another man's debt, and a man must be out of his head to think that there is. Now, that is the fatal defect in this business.

Mr. GANDY. Will the gentleman yield?

Mr. LITTLE. Yes.

Mr. GANDY. Will the gentleman explain the difference, as he understands it, in the enforcing of collection on Government land under this bill as against the present procedure?

Mr. LITTLE. The gentleman ought to be familiar with that. I understand there is a suit in his district, or somewhere in Dakota, to enjoin the Government from collecting these claims.

Mr. GANDY. I would like to advise the gentleman that he is mistaken.

Mr. LITTLE. It is one of the districts in the Dakotas, so one of the gentlemen here from the irrigation country told me.

Mr. RAKER. Will the gentleman yield for a question?

Mr. LITTLE. Yes.

Mr. RAKER. Was the gentleman here in the House, or a Member of the first session of the Sixty-fifth Congress?

Mr. LITTLE. Why, yes.

Mr. RAKER. Then, I will ask the gentleman this question: The distinguished gentleman from Missouri [Mr. BORLAND] is on the Committee on Appropriations, and the gentleman is a Member of the House and knows that for four years the Committee on Irrigation prevented an injustice to this Government from Kansas, and how does it come that the Committee on Appropriations for the first time repudiated the contract in this case, but gave those people in Kansas relief on that project of about $400,000? It does not come from the West.

Mr. LITTLE. The State line runs between the district of the gentleman from Missouri and our district, and I plead an alibi. They have committed so many crimes over in Missouri that I have just lost track of that, and decline to be responsible for the Missourian's doings. But do you dispute my statement of what the law is?

Mr. RAKER. In regard to California and all these Western States, yes. The gentleman has never looked into the irrigation laws, and the gentleman's statement does not generally apply, because when a majority of the landowners vote to form a district and it is formed, under the laws of the State a man's property is sold if the taxes are not paid.

Mr. LITTLE. Anybody's property is sold when his taxes are not paid, but nobody can be made to sell his property to pay another man's taxes or debts, either to the Government or to anybody else, and no municipality can contract to pay your debt and make me pay taxes for that purpose. Therefore, under this bill, the Government would have no security at all. [Applause.]

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. TAYLOR of Colorado rose.

The CHAIRMAN. The gentleman from Colorado has eight minutes.

Mr. TAYLOR of Colorado. Mr. Chairman, when the Federal farm-loan law was passed we Members from the West were in hopes that it would apply or that it might be made to apply in some way to the lands under the Government reclamation projects. There are some 32 of them throughout the Western States, covering, as you know, several million acres of land. If the settlers on those irrigation projects could obtain money at a reasonable rate of interest with which to improve their lands and stock them, it would do more than anything else in the world toward developing that country and vastly increasing the food supply of this country, and also enabling those people to very much sooner repay the Government for its outlay on each of those projects. I went before the Federal Farm Loan Board and presented the situation to them very fully. They decided that under the provision in the act which says that loans must be confined to a first-mortgage lien, they could not loan any money on any of the lands under any of the Government reclamation projects, and the Reclamation Service coincided with that decision, and I think they are technically correct as the law now stands in so far as it applies to the projects that have not organized themselves into irrigation districts. But the project is organized into a regular irrigation district under the State law and with the approval of the Reclamation Service, which is similar to a drainage district or a sewage district, or other similar district organized under State laws, notwithstanding they have indebtedness and are obligated to pay in a regular way certain assessments, yet if and when a district is organized in that way the Federal Farm Loan Board held it would have authority to make loans on the lands under such a project. In other words, the individual loans would still be considered as a first mortgage on the individual lands obtaining the loan, because the entire district would have assumed the obligations of paying off all the money advanced by the Federal Government. Frankly that is what we wanted to do—fully protect the Government's claim and lien, and at the same time enable the settler to get some farm-loan money. We felt that if a district was organized by a vote of all the people, and if the Interior Department and the Reclamation Service economically constructed these projects and limited, as they should, the amount of money they put into each project to what it could readily pay, it would be a safe investment, and the Federal Farm Loan Board could naturally look into the amount of indebtedness on each before making any loans on any lands in each project. A settler can not get a clear title until he has fully paid up all of the Government's lien. But suppose the Government's claim is $75 an acre and suppose the settler has paid off half of it, he certainly would have an equity in his land upon which the Federal Farm Loan Board could safely loan him something, and that loan would be a first mortgage in all cases where the land was in a regularly organized irrigation district, as I understand the construction of the law by the Federal Farm Loan Board.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR of Colorado. Yes; for a question only.

Mr. BORLAND. I just want to state this proposition.

Mr. TAYLOR of Colorado. I do not yield for a speech.

Mr. BORLAND. A drainage district or a district organized to impose special taxes upon the land is engaged to do a particular work—as, for example, to build a drainage ditch or a sewer, or something of that kind—which is presumably of benefit to each tract of land in the district, and therefore it obtains the power to levy an assessment against this tract of land. But here is a proposition by which you are going to pay off a prior lien, which is unequal on the different tracts. Do you think a district can be organized to pay off my loan, for example, which may be subject to the lien, and assess the cost against the land of another which was not subject to the lien?

Mr. TAYLOR of Colorado. Is that your question?

Mr. BORLAND. Yes.

Mr. TAYLOR of Colorado. I will endeavor to answer it. This bill arose out of the fact of the Agricultural Department and the Interior Department and all of the Government officials very greatly desiring to increase the acreage and increase the development of the food products of this country. Now, when the Government charge upon the people who settle upon these reclamation projects is, say, $60 or $75 an acre, and they have no title to the land, they can not borrow any money. And even if they could borrow it, the rate of interest in the West is very high. Often it is 10 or 12 per cent. If there is a farmer in the United States that does need money at a low rate of interest, it certainly is the man who is trying to reclaim Government land in the West. We are very earnestly and honestly trying to aid in the development of these reclamation projects by helping the poor settlers to get on their feet, to improve their claims, and build up the country. The report of the Interior Department on this bill is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, July 2, 1917.

Hon. EDWARD T. TAYLOR,
House of Representatives.

MY DEAR MR. TAYLOR: I have your letter of June 12 requesting the consideration and report of the Interior Department upon H. R. 4954, "A bill to provide for the application of the reclamation law to irrigation districts."

While this bill does not mention farm loans, it will provide a plan whereby the farm-loan act will become applicable to the Federal projects.

The first section gives the express sanction of Congress to cooperation between the United States and irrigation districts adapting the reclamation law to the necessities of irrigation districts as quasi-municipal corporations under the laws of the respective reclamation States. Statutes amendatory of previous irrigation district laws so as to provide expressly for cooperation with the United States have been passed this year in the reclamation States.

This department has already contracted with numerous irrigation districts, and I find that cooperation with these public corporations enhances the security of the United States, gives facility in the collection of moneys due to the United States, and at the same time is popular with the water users themselves, since they have the powers and privileges of a public corporation.

Moreover, organization as irrigation districts binds to the project, irrespective of individual consent, once the statutory majority has been obtained for the formation of and making of contract, all of the lands of the project, and thereby promotes early cultivation of the land and eliminates speculation.

In section 2 of the bill provision is made for the releasing of the liens of the Government which have been reserved, as required by the present law, in patents to homestead entries taken up subject to the

reclamation law, and for the discharge of liens contained in stock-subscription contracts to water users' associations and in water-right applications direct to the United States, in cases where proper contract shall be made by irrigation districts with the United States.

This section would, therefore, if enacted remove two classes of impediment to the application of the farm-loan act to Federal projects. The first is the existence of the prior reserved lien on all homestead lands, and the second is the existence of a contractual lien by virtue of stock subscription and water-right applications. Thus both the public and private lands taken by the settlers under these projects would become free from prior liens, so that there would be no legal impediment to the loaning of money by way of rural credits.

The irrigation district liens attach only upon the making of annual assessment and levy, and are no more a bar to the obtaining of a "first mortgage" under the farm-loan act than are the taxes of any other public corporations, such as counties and school districts, for the discharge of their debts.

Some of our projects have reorganized as irrigation districts and others are in process of reorganization in order to obtain the benefits to accrue under the district plan, the securing of farm loans being but one. It will, therefore, work no hardship if projects reorganize as irrigation districts to obtain the benefit of farm loans.

House bill 4954 paves the way for farm loans on the projects without subordinating the security for the reimbursement of the reclamation fund or interfering with the Government's present security contained in the guaranty contract with individual water users' associations.

I regard this measure as an emergency bill for the reason that the successful application of farm loans to reclamation projects is of urgent public necessity, since it will result in a great increase in the productivity of lands on these projects in 1918 and subsequent years. I am, therefore, in favor of the bill.

Cordially, yours,

FRANKLIN K. LANE, *Secretary.*

Of course, there is no obligation upon any project to organize itself into an irrigation district. This bill is merely permissive. If they do not desire to put themselves in position to borrow money from the Federal farm loan or anyone else, there is no compulsion about it.

Mr. BLANTON. Mr. Chairman, will the gentleman yield to me for just one moment?

Mr. TAYLOR of Colorado. I regret I can not yield just now, because my time is so short.

The CHAIRMAN. The gentleman declines to yield.

Mr. TAYLOR of Colorado. The reclamation officials came before the Irrigation Committee and told us that in every project where there is now an organized district—and there are several of them organized already—the Federal Farm Loan Board is willing to loan money in reasonable amounts on good farms. The objects and purposes of this bill are perfectly good, and it would be of immense benefit to thousands of poor and deserving settlers upon the reclamation projects without impairing the Government security a particle. But I regret exceedingly that we seemingly can not prevail upon the House to understand it the way the Members representing the projects look upon it. The report on this bill is very full and complete, and I wish we had time to read it to the House.

Mr. LITTLE. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR of Colorado. Yes; for a brief question only.

Mr. LITTLE. I just want to ask the gentleman if he does not know that a Federal court has been trying for 40 years to compel St. Clair County, Mo., to collect taxes to pay a judgment, and it can not do it?

Mr. TAYLOR of Colorado. Oh, yes; I have often heard of that. But that was, as I recollect it, a fraud such as never could occur in the organization of an irrigation district.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR of Colorado. Yes.

Mr. BUTLER. I do not care what other gentlemen have done. I am concerned about doing the right thing myself. Will this postpone the Government lien against this land?

Mr. TAYLOR of Colorado. No.

Mr. BUTLER. The Government will have the same right of collection and have the same security that it has had heretofore?

Mr. TAYLOR of Colorado. Yes.

Mr. LITTLE. How can a man loan money on it, then?

Mr. TAYLOR of Colorado. The Secretary of the Interior himself says that the security is better where they organize a district than it is now, and the Farm Loan Board say, "If you do regularly organize an irrigation district, we can then safely loan some money to these farmers."

Mr. LITTLE. But he does not say that the second lien is better than the first.

Mr. BUTLER. The Government has a first lien on this land.

Mr. TAYLOR of Colorado. Yes, sir; until every dollar is repaid.

Mr. BUTLER. If this bill passes and becomes a law, will the Government have a first lien on this land?

Mr. TAYLOR of Colorado. It will not only have a lien on the land but upon all the district. The entire district will assume the payment to the Government of the entire cost of the project.

Mr. BUTLER. That increases the security of the Government?

Mr. TAYLOR of Colorado. It absolutely does. That is what Secretary Lane says in his report.

Mr. LITTLE. Why will not the Farm Loan Board loan money on the land?

Mr. STAFFORD. The Government will have no better security, for it has a first lien already.

The CHAIRMAN. The time for general debate has expired.

Mr. BUTLER. Mr. Chairman, I ask that the gentleman from Colorado may have another minute. I want to know the right thing to do. Is the gentleman absolutely sure that this in no way disturbs the Government's first lien on the land?

Mr. TAYLOR of Colorado. I am as confident as I can be of that. The Government of the United States reserves the right to shut off the water from anybody who does not pay his taxes, and that is the highest security and greatest penalty that can be imposed. The land is not worth anything without water, and the Government of the United States reserves the right always to cut off the water when a man does not pay.

Mr. LITTLE. That does not help the Government to get its money from the man who moves away.

Mr. TAYLOR of Colorado. The man who moves away can not take the land or any water right with him.

Mr. LITTLE. He takes all his personal property.

Mr. BUTLER. I guess I had better take to the woods. I do not seem to be able to get the information I desire.

The CHAIRMAN. The time for general debate has expired. The Clerk will read the bill for amendment.

The Clerk read the first section of the bill.

The CHAIRMAN. The Clerk will report the first committee amendment.

Mr. STAFFORD. The gentleman from Kansas [Mr. LITTLE] has a preferential motion.

The CHAIRMAN. The gentleman will state his motion.

Mr. LITTLE. I move to amend by striking out the enacting clause.

The question being taken, on a division (demanded by Mr. RAKER) there were—ayes 56, noes 17.

Accordingly, the motion was agreed to.

On motion of Mr. TAYLOR of Colorado, the committee rose; and the Speaker having resumed the chair, Mr. COX, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 4954) to provide for the application of the reclamation law to irrigation districts, and had directed him to report the same back to the House with an amendment providing that the enacting clause be stricken out and with the recommendation that the amendment be agreed to.

The SPEAKER. The question is on agreeing to the amendment striking out the enacting clause.

The question being taken, the Speaker announced that the ayes appeared to have it.

Mr. RAKER. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The gentleman from California makes the point that there is no quorum present. Evidently there is no quorum. The Doorkeeper will lock the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

Mr. GARNER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARNER. In voting upon this proposition, to vote "yea" means a vote to defeat the bill and to vote "nay" means to vote in favor of the bill?

The SPEAKER. A "yea" vote means to strike out the enacting clause, which disposes of the bill.

The question was taken, and there were—yeas 276, nays 52, answered "present" 1, not voting 98, as follows:

So the motion to strike out the enacting clause was agreed to.

The following pairs were announced:

Until further notice:

Mr. GALLAGHER with Mr. JOHNSON of Washington.

Mr. AYRES with Mr. DALE of Vermont.

Mr. KEATING with Mr. GEORGE W. FAIRCHILD.

Mr. DEWALT with Mr. SCOTT of Pennsylvania.

Mr. LITTLEPAGE with Mr. KELLEY of Michigan.

Mr. HAMILL with Mr. EDMONDS.

Mr. OVERMYER with Mr. POWERS.

Mr. CLARK of Florida with Mr. GOODALL.

Mr. FLYNN with Mr. BRITTEN.

Mr. ROBINSON with Mr. SANDERS of New York.

Mr. DALE of New York with Mr. DAVIDSON.

Mr. RIORDAN with Mr. SWIFT.

Mr. ESTOPINAL with Mr. CHANDLER of Oklahoma.

Mr. RAGSDALE with Mr. FULLER of Massachusetts.

Mr. BRODBECK with Mr. HAMILTON of New York.

Mr. HOWARD with Mr. FAIRFIELD.

Mr. COADY with Mr. PURNELL.

Mr. LOBECK with Mr. HAYES.

Mr. DECKER with Mr. GOULD.

Mr. HOOD with Mr. TEMPLETON.

Mr. RAYBURN with Mr. LUNDEEN.

Mr. BRUMBAUGH with Mr. COSTELLO.

Mr. MAHER with Mr. MCCORMICK.

Mr. CONNALLY of Texas with Mr GRAHAM of Pennsylvania.

Mr. O'SHAUNESSY with Mr. DEMPSEY.

Mr. SIMS with Mr. WATSON of Pennsylvania.

Mr. DRANE with Mr. GRAY of New Jersey.

Mr. MONTAGUE with Mr. BENJAMIN L. FAIRCHILD.

Mr. EVANS with Mr. KAHN.

Mr. DOOLING with Mr. WILSON of Illinois.

Mr. RUCKER with Mr. MCKINLEY.

Mr. SCULLY with Mr. DRUKKER.

Mr. NICHOLLS of South Carolina with Mr. MILLER of Minnesota.

Mr. DOREMUS with Mr. GRIEST.

Mr. SMALL with Mr. MUDD.

Mr. STEVENSON with Mr. PAIGE.

Mr. SULLIVAN with Mr. SANDERS of Indiana.

Mr. TALBOTT with Mr. ROWLAND.

Mr. VAN DYKE with Mr. SIEGEL.

Mr. SNOOK with Mr. PORTER.

Mr. WILSON of Louisiana with Mr. STEENERSON.

Mr. CHARLES B. SMITH with Mr. WOOD of Indiana.

The result of the vote was then announced as above recorded.

A quorum being present, the doors were opened.

LEAVE OF ABSENCE.

The following leaves of absence were granted by unanimous consent:

To Mr. ESTOPINAL, indefinitely, on account of illness; and

To Mr. HOWARD, for two days, on account of illness.

WITHDRAWAL OF PAPERS.

Mr. WOODYARD, by unanimous consent, was given leave to withdraw from the files of the House, without leaving copies, papers in the case of Oma Harshbarger (H. R. 4134, 62d Cong.), no adverse report having been made thereon.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 7 minutes p. m.) the House adjourned until to-morrow, Thursday, January 24, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting communication from the Secretary of War submitting a supplemental estimate of appropriation required by the Engineer Department of the Army for supplying uniforms for park, monument, and bridge watchmen for the fiscal year 1918 (H. Doc. No. 853); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting supplemental estimates of appropriations required by the War Department for seacoast batteries, Canal Zone, Panama Canal, fiscal year 1919 (H. Doc. No. 854); to the Committee on Appropriations and ordered to be printed.

3. A letter from the chairman of the Eight-Hour Commission, transmitting the report of the Eight-Hour Commission to observe the operation and effects of the institution of the eight-hour standard workday for railroad employees (H. Doc. No. 690); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

4. A letter from the Acting Secretary of the Treasury, transmitting copy of communication from the Secretary of War submitting supplemental estimate of appropriation required by the National Home for Disabled Volunteer Soldiers for subsistence, fuel, etc., at the several branches for the fiscal year, 1918, and prior years (H. Doc. No. 855); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FLOOD, from the Committee on Foreign Affairs, to which was referred the joint resolution (H. J. Res. 181) providing that Bohemians, Moravians, Slovaks, Roumanians, Poles, Ruthenians, Serbs, Croatians, Slovens, and Italians be, and are, specifically excluded from the classification of alien enemies as subjects of Austria-Hungary, reported in lieu thereof the bill H. R. 9159, accompanied by a report (No. 252), which said bill and report were referred to the House Calendar.

Mr. ASHBROOK, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 9093) to amend the act approved September 8, 1916 (chap. 470, Stat. L., 64th Cong.), relating to pensions, reported the same without amendment, accompanied by a report (No. 254), which said bill and report were referred to the House Calendar.

Mr. SAUNDERS of Virginia, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 9160) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported the same without amendment, accompanied by a report (No. 253), which said bill and report were referred to the Private Calendar.

Mr. CARTER of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (H. R. 329) referring certain claims against the Choctaw and Chickasaw Nations of Indians to the Court of Claims, reported the same with amendment, accompanied by a report (No. 255), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. RUSSELL, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 3547) to extend the provisions of the pension act of May 11, 1912, to the officers and enlisted men of all State militia and other State organizations that rendered service to the Union cause during the Civil War for a period of 90 days or more, and providing pensions for their widows, minor children, and dependent parents, and for other purposes, reported the same without amendment, accompanied by a report (No. 257), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. HARRISON of Virginia, from the Committee on Military Affairs, to which was referred the bill (H. R. 7715) for the relief of Mary Neaf, reported the same without amendment, accompanied by a report (No. 256), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

The bill (H. R. 8431) granting a pension to Frances Brady; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

The bill (H. R. 8111) granting an increase of pension to James N. Beasley; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. FLOOD: A bill (H. R. 9159) to authorize the President of the United States to exclude certain subjects of Austria-Hungary and Germany from the classification of alien enemies and to naturalize certain members of the Army, Navy, and Marine Corps; referred to the House Calendar and ordered to be printed.

By Mr. TREADWAY: A bill (H. R. 9161) to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and an act in amendment thereto, approved October 6, 1917; to the Committee on Interstate and Foreign Commerce.

By Mr. KAHN: A bill (H. R. 9162) to amend section 3221 of the Revised Statutes of the United States, as amended by section 6 of the act of March 1, 1879; to the Committee on Ways and Means.

By Mr. DENT: A bill (H. R. 9163) to provide for reimbursement of actual expenses or flat per diem for enlisted men traveling on duty under competent orders; to the Committee on Military Affairs.

Also, a bill (H. R. 9164) to amend section 1199 of the Revised Statutes, and for other purposes; to the Committee on Military Affairs.

Also, a bill (H. R. 9165) to amend an act to establish a uniform system of bankruptcy throughout the United States; to the Committee on the Judiciary.

Also, a bill (H. R. 9166) authorizing either party to a civil suit in the courts of the United States to take the testimony of the adverse party by filing interrogatories, prescribing the method of procedure and its effect, and for other purposes; to the Committee on the Judiciary.

Also, a bill (H. R. 9167) to extend to certain publications the privileges of second-class mail matter; to the Committee on Post Office and Post Roads.

Also, a bill (H. R. 9168) to amend an act to establish a uniform system of bankruptcy; to the Committee on the Judiciary.

Also, a bill (H. R. 9169) to require the production of books, documents, and writings in court before the trial of all civil causes in the courts of the United States upon motion of either party to produce the same, and for other purposes; to the Committee on the Judiciary.

By Mr. THOMAS F. SMITH: A bill (H. R. 9170) to provide an ice-breaking vessel for use in New York Harbor; to the Committee on Rivers and Harbors.

By Mr. DENT: A bill (H. R. 9171) to provide for the erection of a public building in the city of Greenville, Ala.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9172) to provide for the acquisition of a new site and the erection of a public building thereon in the city of Montgomery, Ala.; to the Committee on Public Buildings and Grounds.

By Mr. FULLER of Illinois: A bill (H. R. 9190) to increase pensions of Army nurses; to the Committee on Pensions.

By Mr. HASTINGS: Resolution (H. Res. 233) authorizing the Committee on Expenditures in the Interior Department to send for persons and papers; to the Committee on Rules.

By Mr. SNELL: Resolution (H. Res. 234) to direct the Committee on Agriculture to investigate into the advisability of recommending legislation permitting importation of Chinese farmers into the United States during the continuance of the war; to the Committee on Rules.

By Mr. KEATING: Joint Resolution (H. J. Res. 225) providing for printing the report of the Chief of the Children's Bureau, Department of Labor; to the Committee on Printing.

By Mr. LONDON: Joint resolution (H. J. Res. 226) authorizing and directing the Secretary of Labor to make an investigation and report regarding insurance against unemployment, invalidity, and old age; to the Committee on Labor.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. SAUNDERS of Virginia: A bill (H. R. 9160) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; to the Committee of the Whole House.

By Mr. BOWERS: A bill (H. R. 9173) to reimburse Benson Jacobs, postmaster of Little Falls, Monongalia County, W. Va., for certain postage stamps stolen; to the Committee on Claims.

By Mr. CAPSTICK: A bill (H. R. 9174) granting an increase of pension to Thomas H. Primrose; to the Committee on Invalid Pensions.

By Mr. CARTER of Oklahoma: A bill (H. R. 9175) granting an increase of pension to Anderson Bandy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9176) granting an increase of pension to Josephus H. Spann; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9177) granting a pension to Annie Brannigan; to the Committee on Invalid Pensions.

By Mr. DENT: A bill (H. R. 9178) for the relief of Eugene K. Stoudenmire; to the Committee on Claims.

Also, a bill (H. R. 9179) for the relief of Bertram T. Clayton, jr.; to the Committee on Military Affairs.

Also, a bill (H. R. 9180) for the relief of the personal representatives of Charles W. Hammond, deceased; to the Committee on Claims.

Also, a bill (H. R. 9181) for the relief of J. H. Cravey; to the Committee on Claims.

Also, a bill (H. R. 9182) for the relief of the heirs of William Davis; to the Committee on Claims.

Also, a bill (H. R. 9183) for the relief of Susan A. Johnson; to the Committee on Pensions.

Also, a bill (H. R. 9184) granting an increase of pension to Morgan C. Story; to the Committee on Pensions.

Also, a bill (H. R. 9185) granting an increase of pension to Mary E. Johnson; to the Committee on Pensions.

Also, a bill (H. B. 9186) granting a pension to Alada Thurston Paddock Mills; to the Committee on Pensions.

By Mr. DOOLITTLE: A bill (H. R. 9187) granting an increase of pension to Robert S. McCreary; to the Committee on Invalid Pensions.

By Mr. DOREMUS: A bill (H. R. 9188) granting a pension to John Zanger; to the Committee on Pensions.

By Mr. GEORGE W. FAIRCHILD: A bill (H. R. 9189) granting an increase of pension to John Bush; to the Committee on Pensions.

By Mr. FULLER of Massachusetts: A bill (H. R. 9191) granting an increase of pension to Henry D. Moulton; to the Committee on Invalid Pensions.

By Mr. KEATING: A bill (H. R. 9192) granting an increase of pension to Martin Brenaman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9193) granting a pension to Charles McFry; to the Committee on Pensions.

By Mr. KETTNER: A bill (H. R. 9194) granting an increase of pension to Joseph Monk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9195) granting an increase of pension to James Garnett; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 9196) granting a pension to Polly Fields; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9197) granting an increase of pension to John W. Walker; to the Committee on Invalid Pensions.

By Mr. LARSEN: A bill (H. R. 9198) granting a pension to Elizabeth C. Thompson; to the Committee on Pensions.

By Mr. LESHER: A bill (H. R. 9199) granting an increase of pension to Jacob R. Shotwell; to the Committee on Invalid Pensions.

By Mr. LONERGAN: A bill (H. R. 9200) granting a pension to Melissa C. Lewis; to the Committee on Invalid Pensions.

By Mr. LUNN: A bill (H. R. 9201) granting an increase of pension to Alfred Ashton; to the Committee on Pensions.

By Mr. McARTHUR: A bill (H. R. 9202) granting a pension to George Bales; to the Committee on Pensions.

By Mr. McFADDEN: A bill (H. R. 9203) granting an increase of pension to Eli Ingraham; to the Committee on Invalid Pensions.

By Mr. MOORE of Pennsylvania: A bill (H. R. 9204) for the relief of the American Fire Insurance Co. of Philadelphia, Pa., and others; to the Committee on Claims.

By Mr. OSBORNE: A bill (H. R. 9205) granting a pension to Mary A. Brannan; to the Committee on Pensions.

Also, a bill (H. R. 9206) granting a pension to Mary E. Sewright; to the Committee on Pensions.

By Mr. OVERMYER: A bill (H. R. 9207) granting an increase of pension to Joshua W. Reed; to the Committee on Pensions.

Also, a bill (H. R. 9208) granting a pension to Nettie Wise; to the Committee on Invalid Pensions.

By Mr. ROSE: A bill (H. R. 9209) granting an increase of pension to Martin S. Bortz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9210) granting a pension to Leah A. Beltz, daughter of Adam Beltz; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 9211) granting a pension to Mary E. Hartsell; to the Committee on Invalid Pensions.

By Mr. TALBOTT: A bill (H. R. 9212) granting a pension to Charles B. McConn; to the Committee on Pensions.

By Mr. WALSH: A bill (H. R. 9213) granting an increase of pension to Peter Black; to the Committee on Pensions.

By Mr. ZIHLMAN: A bill (H. R. 9214) granting an increase of pension to John Fesler; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CARY: Memorial of the faculty of the University of Wisconsin, relative to support for the program of the President in securing world peace; to the Committee on Military Affairs.

Also, petition of Farmers' Educational and Cooperative Union of America, against universal military training; to the Committee on Military Affairs.

Also, petitions of Massachusetts Dairymen's Association; National Society, Sons and Daughters of the Pilgrims; Haverhill Chamber of Commerce, Haverhill, Mass.; and Enoch Pratt Free Library of Baltimore, Md., against increase of rates on second-class mail; to the Committee on Ways and Means.

Also, petition of railway postal clerks of Sacramento, Cal., favoring increase of salary; to the Committee on the Post Office and Post Roads.

By Mr. DARROW: Petition of Manufacturers' Association of West Philadelphia, Pa., protesting against Fuel Administrator's order; to the Committee on Agriculture.

By Mr. FULLER of Illinois: Petition of the Tuthill Spring Co., of Chicago, opposing repeal of the second-class postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. GALLIVAN: Memorial of council of the Massachusetts State Board of Trade, urging Government to make port of Boston a port of embarkation of troops, etc.; to the Committee on Military Affairs.

Also, memorial of Lithuanians of the State of Massachusetts, favoring independence for Lithuania; to the Committee on Foreign Affairs.

By Mr. LUFKIN: Petition of members of Post 114, Grand Army of the Republic, of Merrimac, Mass., asking increase of pension for veterans of the Civil War; to the Committee on Invalid Pensions.

By Mr. MOORE of Pennsylvania: Petitions of Pennsylvania Manufacturers' Association and Knit Goods War Service Committee of the National Association of Hosiery and Underwear Manufacturers, protesting against action of Fuel Administrator in closing industrial plants; to the Committee on Agriculture.

By Mr. NOLAN: Petition of Mutual Aid Association, San Francisco Fire Department, favoring Madden bill, H. R. 1654; to the Committee on the Post Office and Post Roads.

Also, petition of John A. O'Connell, secretary San Francisco Labor Council, favoring Madden bill, H. R. 1654; to the Committee on the Post Office and Post Roads.

By Mr. OSBORNE: Petition of California Loyal Legion, Veterans of the Civil War, protesting against newspapers being published in the language of alien enemies, etc.; to the Committee on Military Affairs.

Also, petitions of sundry business people of the State of California, protesting against recent order of the Fuel Administrator relative to suspending industrial concerns; to the Committee on Agriculture.

Also, memorial of Half Century Association, of Los Angeles, Cal., favoring creation of a Federal interest commission; to the Committee on Banking and Currency.

By Mr. TIMBERLAKE: Petition of Francis Bailey, president Entrenour Club, against increase in postage on certain periodicals; to the Committee on Ways and Means.

By Mr. TREADWAY: Memorial of executive council of the Massachusetts State Board of Trade relative to use of the Port of Boston by the Government; to the Committee on Military Affairs.

SENATE.

THURSDAY, *January 24, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, in these trying days that test the fiber of our national life we are thinking most of all of our national spirit. We thank Thee for the boundless wealth of all that means force and power, but we pray that these may be transmuted into instruments of divine efficiency through the spirit of a great Nation. As the ark of the national life moves forward may no one lay unclean hands upon it, but give to us such a national spirit as that its working out to victory may be the accomplishment of the divine plan in us and through us for the establishment once more of freedom and order in the world and the creation of a great democracy of nations. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of the proceedings of Monday last, when, on request of Mr. KING and by unanimous consent, the further reading was dispensed with and the Journal was approved.

WARNING TO OCCUPANTS OF THE GALLERIES.

The VICE PRESIDENT. The Chair desires to call the attention of the occupants of the galleries to the rule of the Senate that there must be no manifestations of approval or disapproval upon the part of the galleries. This is a rule which the Presiding Officer is compelled to enforce. It has frequently been broken lately. The only way to enforce it is to clear the gal-

leries if there is a violation. Before the proceedings of this day start the Chair wants to warn you that if you do not observe the rule, being the guests of the Senate, you will be excluded from the galleries.

SENATOR FROM NEVADA.

Mr. KING. Mr. President, Hon. CHARLES B. HENDERSON, appointed a Senator from the State of Nevada, is in the Chamber and ready to take the oath of office. I present to the Senate his credentials and ask that they may be read.

The VICE PRESIDENT. The Secretary will read the credentials.

The Secretary read as follows:

STATE OF NEVADA,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Nevada, I, Emmet D. Boyle, the governor of said State, do hereby appoint CHARLES B. HENDERSON a Senator from said State to represent said State in the Senate of the United States until the vacancy therein caused by the death of FRANCIS G. NEWLANDS is filled by election, as provided by law.

Witness: His excellency our governor, Emmet D. Boyle, and our seal hereto affixed at Carson City this 12th day of January, in the year of our Lord 1918.

EMMET D. BOYLE, *Governor.*

By the governor:

GEORGE BRODIGAN,
Secretary of State.
By J. W. LEGATE, *Deputy.*

The VICE PRESIDENT. The credentials will be placed on file. If there be no objection, the Senator appointed will present himself at the desk.

Mr. HENDERSON was escorted to the Vice President's desk by Mr. KING; and the oath prescribed by law having been administered to him, he took his seat in the Senate.

COMMITTEE SERVICE.

Mr. MARTIN. Mr. President, I send to the desk an order filling committee vacancies and ask for its present consideration.

The order was read and agreed to, as follows:

Ordered, That Senator HENDERSON be appointed to the following committees: Industrial Expositions (chairman), Banking and Currency, Claims, Conservation of National Resources, Irrigation and Reclamation of Arid Lands, and Library.

That Senator TRAMMELL be appointed a member of the Committee on Public Buildings and Grounds.

PERSONAL EXPLANATION—WAR CABINET.

Mr. CHAMBERLAIN. Mr. President, I rise to a question of personal privilege.

Mr. President, for 24 years of my life I have served the people of my State in one capacity or another to the best of an ability with which Providence saw fit to endow me, and in all that time I have never had my veracity called in question nor my integrity impeached, and I am frank to say that I have passed through some campaigns as bitter as have fallen to the lot of any man. It is therefore with some feeling of humiliation, and I may say of sadness, that I rise before this distinguished body to a question of personal privilege when my veracity has for the first time been called in question—not by an ordinary citizen in the ordinary walks of life—not by one of my colleagues, who stands upon the same level as myself socially and politically, but by a very distinguished gentleman who has the love and admiration of the people of this country, and who through their suffrage now occupies the highest place in the gift of our people, and I may say the highest place of any man on the face of the earth.

It is, therefore, with a peculiar feeling that I rise to address myself to the attack which has been made upon me, Mr. President, and I do it not with any feeling of unkindness, because the personal differences between the distinguished President and myself amount to nothing to the American people, but there are great policies at issue between us and between other people of this country, a proper settlement of which may, Mr. President, involve the very life of the Republic, and possibly the civilization of the world.

Some days ago a distinguished body of citizens invited me to deliver an address before the National Security League in New York. I accepted that invitation. On the dais with me were some of the best known men and women in America. The presiding officer of that meeting was a gentleman whom our distinguished President has seen fit to honor, and who has been highly honored by other Executives in the days gone by. I refer to Hon. Elihu Root.

On my right sat Judge Alton B. Parker, who was once a candidate of our party for the Presidency. On the left of the presiding officer was a very distinguished Republican friend of mine and a friend of his country, though born in a country that is now at war with America, Hon. JULIUS KAHN, of California. To his left was a distinguished ex-President of the United States in the person of Col. Roosevelt. The widow of ex-President Cleveland was there, and, Mr. President, I say without fear of contradicition that the 2,000 people there represented every walk of life and a spirit of patriotism that can not be excelled in a like number of people anywhere in the United States.

In the multitude of work that has fallen to my lot it was impossible for me to prepare an address, and I did not even have time to correct the proof or revise it after it was delivered. It was reported in the New York Times in what appeared to be a verbatim report, and I assume the responsibility of the speech as printed in that paper. If there are any inaccuracies of diction or grammar I trust that under the circumstances the Senate will overlook them. Inasmuch as it forms the text of the charge against me of having distorted the truth I am going to ask that the Secretary may be permitted to read it. It is not very long. I dislike to burden the Senate with it, but I want the Senate to have the context of what I said in connection with what the distinguished President of the United States complains of in his public statement.

The VICE PRESIDENT. Is there objection? The Chair hears none and the Secretary will read.

The Secretary read as follows:

"I assure you it is a very great pleasure and privilege to be permitted to be with you to-day, because I feel that we are all engaged in the same great work—the work of the preservation not only of our country, but the preservation and perpetuation of civilization itself. Let me disclaim, my friends, any credit for what has been accomplished and for what we hope to accomplish in the great task that confronts us in this emergency. Let me say to you that I have had the cooperation and effort of the great mass of the Members of Congress without regard to party; and in addition to that, and above and over everything else, we have had the support of such distinguished men as the ex-President and ex-Commander in Chief of the Armies and Navies of the United States, and such men as my friend, Mr. Elihu Root, all of whom are here with us to-day.

"In season and out of season these distinguished gentlemen have gone out among the people and have tried to impress upon them, and they have begun to realize, that America, for the first time in its history, is involved in a war which may, my friends, mean its life and its dissolution unless America and her allies happen to be successful in it.

"Because of the limitation upon my time, and I know you are all glad of it [cries of 'No! No!'] it is absolutely impossible to go into this subject as I would love to go into it with you, and to discuss the military policy of the United States, or its lack of a military policy, since the earliest Revolutionary time. It has not been the fact that we have had a faulty military policy during all of those years; it has been, my friends, that we have had no military policy that has led us into these troublous times and conditions. We are wont to talk of the magnificent courage of our forefathers, but it has often seemed to me that the most unfortunate thing that ever happened in this country was the fact that an unorganized militia at Bunker Hill was able to defeat an organized army of Great Britain, because there was then established what was later to be called the traditional policy of the United States against the organization of a standing army, or, rather, of a trained army to be called into service whenever the emergency required.

"BANE OF 'TRADITIONAL POLICY.'

"From that day to this the histories of our country have talked about the traditional policies of the United States, and have commended the valor of the Revolutionary troops. I have no disposition to criticize that statement or to question the valor—the individual valor—of the splendid men who fought the battles of the Revolutionary days, but the lack of organization which was decried by the commanding officers then and which has been decried by them since, and has been criticized, are the troubles which confront us to-day; and if their recommendations had been followed we not only would have had a splendid Army now, but that Army would have been organized and raised under a system of universal military training that would have made us absolutely unconquerable.

"Washington called attention to it, and I have sometimes wondered how that distinguished commander of the American forces, with his splendid aid, Alexander Hamilton, ever had time to organize an Army because they devoted much of their time to appeals to a Continental Congress and to the States to assist them in organizing an Army that might be successful in accomplishment of victory. I wish I could go into these matters and discuss the various battles that were fought; but, incidentally, let me tell you that America did not owe the accomplishment of victory in 1783 to her untrained Army, but she owed it to France and the splendid efforts that France made.

"With all the pacifists that are abroad in the land denouncing America for sending a few hundred thousand men or a million men to France in this day of rapid transit, it is well to remember

that when America, on account of Washington's efforts, appealed to France for assistance, she sent to us under Rochambeau five or six thousand troops across the water, and instead of taking them five or ten days or two weeks to reach America, they were seventy-seven days from the time they left a French port until they landed at Newport, R. I., afflicted with disease, and chased every foot of the way by a British fleet. My friends, if America had nothing else to fight for in this war than to preserve the magnificent French Republic, every drop of blood shed and every dollar of treasure spent would be well spent for this splendid people.

"I am going to skip through it all, because my time is almost up now. We have got to get out of here at 3 o'clock, mind you.

"Traditional policy? It seems to me that a war policy called for by Washington and advocated by him would sustain a policy now of training young men to do battle for their country. We have departed from traditional policy, thank God, and in the last two years we have enacted a law that, as your chairman has said, compels Americans to know that the benefits of citizenship carry with them the responsibility for service whenever that service happens to be needed.

"VICIOUS VOLUNTEER SYSTEM.

"The selective-draft law which has been mentioned here put into service every man between 21 and 30; and it may be said to the credit of these young men who have been drafted that they are rendering just as effective and just as patriotic service as those who have volunteered. I sometimes regret that volunteering has ever been permitted, for the reason that in the loss that we sustain in the battles where there is a volunteer system, as there was in Great Britain, we have a horizontal loss, taking the young, red-blooded people that volunteer for service and leaving those who ought to have shared the fate of their colleagues at the first sound of war. On the other hand, under this system we take from the walks of industrial and commercial and everyday life young men of all classes, so that there is not this horizontal loss that I speak of, but rather a perpendicular loss, where the high and the low, the rich and the poor, the professional man and the artisan, stand shoulder to shoulder, and when losses come, the loss falls on all, every social stratum of life.

"Let me tell you that we are going to extend that. We are going to commence to train the young men from 18 to 21, so that when they become 21 we will have an army of young men to draw from from every walk of life.

"But, say the pacifists, it is unnecessary in the United States to train the young men or to have an army. My friends, there were those in Great Britain who said it was unnecessary; and yet, but for the fact that republican France trained her young men, what would have become of France when the German forces went down and attacked her on her western front? Nothing saved her but the universal military training which that splendid Republic had in vogue. Ah, my friends, let us get away from our prejudices. When those who now advocate universal military training began to advocate it nobody was with them; now the country, thank God, is with them, and the country will see to it that Congress gets with them, too.

"Now, in conclusion, and I have only touched a few of the high spots, let me say that the Military Establishment of America has fallen down. There is no use to be optimistic about a thing that does not exist.

"EVERY DEPARTMENT INEFFICIENT.

"It has almost stopped functioning, my friends. Why? Because of inefficiency in every bureau and in every department of the Government of the United States. [Applause.] We are trying to work it out. I speak not as a Democrat, but as an American citizen.

"A VOICE. You are telling the truth, Senator.

"We are trying [Senator CHAMBERLAIN continued], and I have burned the midnight oil in an effort to do it—we are trying to centralize the power of supplying the Army in one man who can say 'No' and has the nerve to say 'No' when the time comes to say it. We have reported a bill, following the experience of Great Britain and France, creating a director of munitions for this purpose. We have gone one step further, and we have provided a bill for the creation of a cabinet of war, whose duty it shall be to lay out what we never have had, and have not now—a program to carry on this war to a successful conclusion. My friends, this is not an Administration measure; it is an American measure, and comes from Republicans and Democrats alike.

"I want this splendid audience, I want the citizenry of New York, I want you, Mr. Chairman, and all of you, to get behind these proposed laws and see to it that they grace the statute books of America, so that America may play her part in the war. Let us, my friends, rally to the flag of our country without regard to party. Let us see to it that the Stars and Stripes are planted upon the plains of France and be there, as it is here, the emblem of freedom, liberty, and the rights of man.

"Your flag and my flag, and how it flies to-day.
In your land and my land, and half the world away,
Rose-red and blood-red, the stripes forever gleam,
Snow-white and soul-white, the good forefathers' dream,
Sky-blue and true-blue with stars that gleam aright
A glorious guidon of the day, a shelter through the night.

"And so, my friends, whether our flag be planted here or in France, or wherever it may be, let us see that it is the emblem of a better civilization and a better form of government. I thank you."

Mr. CHAMBERLAIN. Mr. President, that address was delivered on the 19th of this month. I returned to Washington the next day, and in the evening of that day I received from the President of the United States a letter, which I send to the desk and ask the Secretary to read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

THE WHITE HOUSE,
Washington, 20 January, 1918.

MY DEAR SIR: You are reported in the New York World of this morning as having said at a luncheon in New York yesterday:

"The Military Establishment of America has fallen down; there is no use to be optimistic about a thing that does not exist; it has almost stopped functioning. Why? Because of inefficiency in every bureau and in every department of the Government of the United States. I speak not as a Democrat, but as an American citizen."

I would be very much obliged if you would tell me whether you were correctly quoted. I do not like to comment upon the statements made before learning from you yourself whether you actually made them.

Very truly, yours,

WOODROW WILSON.

HON. GEORGE E. CHAMBERLAIN,
United States Senator.

Mr. CHAMBERLAIN. Mr. President, I received that letter too late to attempt to answer it last Sunday evening, but the first thing the next morning, and as soon as my office force came down, I dictated a letter to the President, and I ask to have that letter read into the RECORD.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

JANUARY 21, 1918.

MY DEAR MR. PRESIDENT: I received last evening your favor of the 20th instant, in which you advise me that I was quoted in the New York World of same date with your letter as follows:

"The Military Establishment of American has fallen down; there is no use to be optimistic about a thing that does not exist; it has almost stopped functioning. Why? Because of inefficiency in every bureau and in every department of the Government of the United States. I speak not as a Democrat, but as an American citizen."

You desire to know if I am correctly quoted, inasmuch as you do not like to comment upon the statements made before learning from me whether I actually made them.

In reply permit me to say that the words quoted are substantially those used by me. My address on the occasion referred to was extemporaneous and without notes, but the New York Times of yesterday morning purports to give a verbatim report of all the addresses made, and I believe the report made is substantially correct. In that I am quoted as saying, in part:

"Now, in conclusion, and I have only touched a few of the high spots, let me say that the Military Establishment of America has fallen down. There is no use to be optimistic about a thing that does not exist. It has almost stopped functioning, my friends. Why? Because of inefficiency in every department of the Government of the United States. We are trying to work it out. I speak not as a Democrat, but as an American citizen."

You will note that there is very little difference between the two reports, and, in view of the fuller report in the Times, I am inclined to believe it correctly quotes me.

But, Mr President, may I beg that you will do me the honor to read the whole of what I said in order that the part quoted may have its proper setting? I only had 20 minutes allotted me, and in that brief time undertook to show that since the Battle of Bunker Hill we had never had a proper military organization or policy and that our troubles now are largely due to that fact. I was only discussing the military policy, or lack of such policy, from the earliest days of the Republic, and immediately following the language last quoted I said:

"We are trying, my friends, and I have burned the midnight oil in an effort to do it—we have tried to centralize the power of supplying the Army in one man who can say 'no,' and has the nerve to say 'no' when the time comes to say it. We have reported a bill, following the experience of Great Britain and France, creating a director of munitions for thi purpose. We have gone one step further, and we have provided a bill for the creation of a cabinet of war, whose duty it shall be to lay out what we never have had—and have not now—a program to carry on this war to a successful conclusion. My friends, this is not an administration measure; it is an American measure and comes from Republicans and Democrats both."

All present understood the criticism, and you will note that ex-President Roosevelt in his speech shortly following mine made substantially the same criticism of conditions during the Spanish-American War, although, as he said, "It was waged by an administration of which I was a part and in which I afterwards became even more closely connected."

I have been connected with the Committee on Military Affairs of the Senate ever since I have been a Member of the Senate, and have

taken a very deep interest in military legislation, and I believe I know something about the deficiencies in the Military Establishment. Since Congress convened the committee have been diligently at work endeavoring to find out actual conditions and to find some remedy for recognized or proven deficiencies in our military system. The testimony of witnesses in and out of the establishment clearly establishes the fact, Mr. President, that there are inefficiencies in the system that ought to be remedied for a proper prosecution of the war, and, further, that there are and have been inefficients connected with the administration of a disjointed and uncoordinated establishment. So feeling and so believing, I have felt it my duty to speak out, in the hope that defects in the military code may be cured and inefficients later weeded out. I will be glad to join with other members of the committee and go over the situation with you at any time, if you desire it, and review the testimony which, taken in connection with an inherited deficient system, led me to the conclusion expressed in my short extemporaneous address to which you call my attention.

I have the honor to remain, yours, very sincerely,

GEO. E. CHAMBERLAIN.

President WOODROW WILSON,
The White House.

Mr. CHAMBERLAIN. Mr. President, to that letter I received no reply; I do not know that any reply was necessary; but on the afternoon of that day—last Monday—there was printed in the evening papers, and generally printed throughout the United States, a statement by our distinguished President, and I assume that that is the answer to the letter. The press was kind enough, small as I am compared with our distinguished President, to print with his statement a very brief statement which I made to them upon reading the President's statement. I ask that both be read, Mr. President.

The VICE PRESIDENT. Without objection, it is so ordered.

The Secretary read as follows:

DOCUMENTS IN CLASH ON POLICY.

[Washington Herald, Jan. 22.]

By WOODROW WILSON.

Senator CHAMBERLAIN'S statement as to the present inaction and ineffectiveness of the Government is an astonishing and absolutely unjustifiable distortion of the truth.

As a matter of fact, the War Department has performed a task of unparalleled magnitude and difficulty with extraordinary promptness and efficiency.

There have been delays and disappointments and partial miscarriages of plans, all of which have been drawn into the foreground and exaggerated by the investigations which have been in progress since the Congress assembled—investigations which drew indispensable officials of the department constantly away from their work and officers from their commands and contributed a great deal to such delay and confusion as has inevitably arisen. But by comparison with what has been accomplished, these things, much as they are to be regretted, were insignificant, and no mistake has been made which has been repeated.

Nothing helpful or likely to speed or facilitate the war tasks of the Government has come out of such criticism and investigation—I have not been consulted about them and have learned of them only at second hand—but their proposal came after effective measures of reorganization had been thoughtfully and maturely perfected, and inasmuch as these measures have been the result of experience, they are much more likely than any others to be effective, if the Congress will but remove a few statutory obstacles of rigid departmental organization which stand in their way.

The legislative proposals I have heard of would involve long additional delays and turn our experience into mere lost motion.

My association and constant conference with the Secretary of War have taught me to regard him as one of the ablest public officials I have ever known. The country will soon learn whether he or his critics understand the business in hand.

To add, as Senator CHAMBERLAIN did, that there is inefficiency in every department and bureau of the Government is to show such ignorance of actual conditions as to make it impossible to attach any importance to his statement.

I am bound to infer that that statement sprang out of opposition to the administration's whole policy rather than out of any serious intention to reform its practice.

By GEORGE E. CHAMBERLAIN.

My argument was directed to the Military Establishment and not to the General Government. Those who heard me know that.

I had no prepared speech and did not speak from notes. I delivered an extemporaneous address to the people there, explaining that since Bunker Hill we had had practically no military organization or policy. I discussed the subject from that viewpoint for 20 minutes.

I said the Senate Military Committee had tried to correct the evils by the introduction of the two new bills. One, written by me, is the director-of-munitions bill. The other, written by a subcommittee, is the war-cabinet bill.

I still stand for both.

Mr. Baker's efforts to better his organization within the Military Establishment itself have been commendable. He has tried to do something. Some improvements have been made in the system in vogue.

But in his plan the inherent weakness, in the last analysis, is that there is no one between the President and the Army able to act. The new system of Mr. Baker comprises the clearance board of the War Industries Board and the various purchasing departments. There is the inherent weakness. They can not act.

The war cabinet and the director of munitions have distinct and positive power. One maps the progress for the future, the other furnishes supplies for the Army. They constitute a strong link in a chain, which is never stronger than its weakest link.

We substitute for voluntary bodies a strong organization.

I regret that the administration is against the plan. But I will proceed with the bills. I feel it my duty as a Senator. The people of the country are entitled to be let into the confidence of the Senate Military Committee and the committee considers that the bills are necessary in order that the war preparations may be coordinated.

Mr. CHAMBERLAIN. Mr. President, the statement of the President challenges me, of course, to the proof of my statement as printed in the New York Times, to which I adhere, and which I now repeat. Whether my colleagues or the country will take the evidence by its four corners and reach the same conclusion that I have reached is an entirely different proposition. They may not see it from the same angle that I see it. Two men may read the same article and draw different conclusions from it. Two men may hear one witness testify and draw different inferences from what he said. Those are the inherent differences in human nature. But occupying the position that I do, Mr. President, as chairman of this great committee, associated as I have been with Democrats and Republicans whose single aim and effort has been to develop conditions as they exist without fear or favor or the hope of reward, I felt as an American citizen, and I feel as a Member of this distinguished body, that it was my duty to say the thing that was in me. If I succeeded, Mr. President, in making a rift in the clouds and letting the sunlight into the dark places where the American people are entitled to go and see, I feel that my efforts and the efforts of my colleagues, for whom I entertain the highest regard and respect, have not been in vain in an endeavor to save our country in the pending crisis.

The evidence has not yet been printed. That has not been due to any fault on the part of the committee, but, because of its importance, the testimony of each witness has been sent to him in order that he might revise it, and that the country might get the evidence as it came from the lips of the witnesses. I hope it will be finished to-day, so that the Senate may have it. But now, Mr. President, in view of the fact that my truthfulness has been called in question, I feel it my duty, not to go into detail—because it would take me days to do that—but to say some things here in all kindness, and to tell the country some things that possibly I might not have told under ordinary circumstances until the investigation now in progress had been completed. I shall do it as a man who loves his country first of all, a man who would sacrifice not only his own life but the life of every member of his family to save it. I shall do it fearlessly, and as an American citizen who wants to help and not hinder the President in this emergency.

I rather think, Mr. President, that it is not that I have distorted the truth, for I have sometimes feared that in the multitude of cares and responsibilities that have devolved upon the President of the United States he has not been able to ascertain the truth. If he has relied upon some of those who have come before our committee, Mr. President and my fellow Senators, he does not know the truth, and from the lips of some of those who have testified and who are closest to him he can not find the truth; not because there has been a disposition to deceive or mislead our distinguished Executive possibly, but simply because they, too, are so situated, in the multitudinous affairs of this great crisis, that they can not ascertain the truth; and even if they could ascertain the truth through the labyrinth of things that pass over their desks and through their offices each day, it would be impossible for them to remember it for any purpose. So this investigation was started, Mr. President, with a purpose to be critical where criticism was necessary and with the purpose to be constructive as well; and this committee would not have discharged its duty to the Senate and to the country if it had gone about the work with any other purpose in view than to criticize where criticism was just, and to offer suggestions of a constructive nature where that was proper.

Mr. President, the Secretary of War, in his general statement to the country—which was carefully written and prepared—tells us that $3,200,000,000 have been appropriated for the Ordnance Department and contracts have been let for $1,677,000,000; all of which is true. But the Secretary fails to tell us, Mr. President, in his statement to the country, and it only comes out in the course of a cross-examination, that America stands to-day unprepared so far as ordnance is concerned. I challenge anybody to read the testimony and come to any other conclusion. Poor, bleeding France, my friends—bled white, not only for her own life and for the liberty of her own citizens but for America as well—is to-day furnishing our troops as they arrive in France the necessary heavy ordnance and machine guns for aircraft and for ground service. Why, Mr. President, if we relied upon the Ordnance Department in this emergency to furnish our troops with the heavy ordnance—and this is largely a war of artillery to-day—the war would be over before we ever got to the front.

Why, there is testimony, if I correctly remember it, before the Military Affairs Committee that along some of these fronts the cannon—and heavy cannon, if you please—are located 5 yards apart for a distance of 6 miles; and yet America, this great and magnificent country, is dependent upon poor France to deliver

the ordnance! Did France agree to deliver it in order to win over reluctant America? Did she agree to furnish it in order to encourage and hearten America? What would happen to France with the debacle in Italy, Senators, where her own troops are and where the troops of her allies are if she is to furnish ordnance to America? What is France to do for them in case of an emergency and a desperate battle for the life of one of her allies?

I will not go into details. I do not think it would be proper to go into details, but I call to the attention of the Senate the confidential evidence of Gen. Crozier himself as to the amount of contracts which the Secretary speaks of as having been let, and as to the progress of the work. If the administration wanted to be fair with the American people—and they are entitled to fair treatment, and to know these things—why did not the distinguished Secretary, whom I hold in the very highest regard as an able and intellectual gentleman, tell the American people how long it would take to make deliveries under these contracts and let them assist in getting ready for this terrible cataclysm that not only confronts America but confronts the world?

What has the Ordnance Department been doing since 1914? Was there even a half-witted American citizen who at the very outset did not know and realize that there was a chance that America might become involved? There were omens in the sky, my colleagues, that indicated that America would become involved, notwithstanding her desire to keep out. She could not keep out. What was the Ordnance Department doing? Nothing. Here we were from August, 1914, until the declaration of war in April, 1917, with the Ordnance Department lying supinely upon its back, making no plans, constructing no gauges, manufacturing no dies, doing absolutely nothing to ascertain what were the possibilities in raw material and the possibilities of manufacture. It would not have taken any time, it would not have cost much, if anything, to have done that. Congress appropriated quite a large sum in two or three appropriation bills for the purpose of manufacturing dies, jigs, and gauges to be used in the construction of all of these implements of artillery warfare. That money has not been expended; and yet every business man and every sensible man in this country knows that for quantity production it is absolutely necessary to have the gauges and the jigs and the dies, so that when you are ready to manufacture all you have to do is to send them out, so that guns may be manufactured along those lines. What was the Ordnance Department doing? Nothing.

I am not blaming anybody in particular, Mr. President, but I am calling attention to facts and blaming an inefficient system. I have a very high regard for Gen. Crozier. He has made his reputation in the Army, and his life has been spent in the service of his country. We have not been able to do what Great Britain has done and what France has done and what Italy has done and what every one of our allies has been able to do, and that is to retire these gentlemen who have not proved themselves up to the mark when it comes to getting ready for war. We ought not to dismiss them in disgrace, but certainly they ought not to be continued in places where they have failed, or be promoted to higher rank. France has not hesitated to retire them to the shades of private life, or to the shades of inactive military life, if you please, into positions of innocuous desuetude. Great Britain has not hesitated to do it at any time. Why should America hesitate?

Senators, it is not a question of the individual or of individuals. This is not a question between the distinguished President of the United States and myself. It is a question of America; and every man in America ought to forget party, forget individuals, and forget everything, so that his whole thought and his whole life and his whole purpose may be devoted not only to the protection of the Republic but also to the perpetuation of our own institutions and the institutions of the civilized world, all of which are involved.

Oh, my colleagues and friends, I want you to read this testimony, and I want you to read it prayerfully and carefully and tearfully, if need be.

Take the question of machine guns. I am not going into the merits of any particular gun. That has been an old controversy here for years. There are things that can be said on both sides of it. Here was the Lewis gun, that was being manufactured in America for Great Britain. She had 70,000 of them on the battle front, and the testimony of every British soldier that I have seen is as to the excellent character of the gun. There are several kinds of machine guns. America was manufacturing in large numbers and on large contract the Lewis gun for export to the allies and was prepared to turn them out in large quantities. And yet, while we stood along the edge of a seething volcano, we were trifling along through the Ordnance Department, trying to find a machine gun. With this war on, and America in it, we did not even adopt a machine gun until along in May sometime, and it was not finally adopted, I believe, until sometime in June. Then they adopted another gun—not the Lewis gun, that was being used on the battle front in Europe, but a gun that was still a gun on paper, and it is a gun on paper to-day—I do not care what anybody says about it—because it has never been given a field test. It has been developed, Mr. President, that all of these guns have to be experimented with and developed and changed and modified in one form or another before they can finally become an implement of warfare in the proper sense of the word.

It may be that the Browning gun, the one adopted, is the best gun. It is an automatic rifle. There are two classes of the Lewis gun, one light and one heavy. We are manufacturing the Lewis gun, and manufacturing it for aircraft. If they are good for that, why could we not have adopted the plans then in vogue, and have manufactured the Lewis gun, even if it was not the best gun, until final tests had discovered the best? They are the modern implements of war with heavy artillery, Mr. President, and without them America could not get anywhere. We are going to use them on the aircraft. The reply to the criticism of the tardiness in adopting a machine gun is: "Well, we have thirty or forty thousand of them for aircraft, the lighter kind." But, Mr. President, what I complain of is that they were not manufactured in large quantities in factories that were then manufacturing them for the British Government and for other countries.

I think the Secretary testified in regard to the contracts for the Browning gun. Contracts are out, and the guns are to be delivered some time at varying dates in the future. I ask you to read Gen. Crozier's testimony. I do not want to go into that. I do not think it would be proper to go into it; but we are advised that we have got some manufactured. The Secretary testified some time during the middle of January that we had nine guns at that time—nine Browning guns—nine guns to go up against the thousands of the machine guns of Germany. It may be that having nine shows that there is now an opportunity for quantity production, because the gauges may be ready; but we have been in the war 10 months, and nothing has been accomplished in the way of securing these guns.

I noticed in reading the proceedings of the British Parliament not long ago—and I think he was right—a member said, "You need not be afraid about giving Germany any information." Germany knows more about America to-day than many men connected with the department; and so far as I am concerned, my colleagues, I feel that America would be better off if her representatives would come out in the spot light and let the plain people of this land know what is being done, and then you could rely upon them to rally to the support of the President for the successful prosecution of this war. There is not any question about that.

Let us now consider the question of rifles.

We were furnishing Lee-Enfield rifles to the British Government in large numbers. The factories were prepared for them. It is true that Great Britain was trying to make an improvement upon the rifles used by her when she became involved in the war, but when the war came on Great Britain said we will not waste any time improving our rifles, but will get them out just as fast as we can, and they have been manufacturing them ever since. What did America do? With 700,000 rifles in America and in our colonial possessions, a motley group of different kinds of guns, America was seeking, through the Ordnance Department, to improve the rifle that Great Britain was manufacturing here and which we could have put out without any trouble in the factories. We went to work through the Ordnance Department to improve the Enfield rifle. I am frank to say it is a great improvement. I believe it is a better gun than the English gun, but here while the house was burning America was determining through its Ordnance Department what instrumentalities ought to be adopted to put out the fire. It took weeks and months before they finally got the Lee-Enfield rifle into condition where the Ordnance Department thought it was all right. And after this was agreed upon there were further delays caused by indecision. Here were the engineers of these great arms companies, who got together and finally agreed upon a program for the manufacture of these guns, and concluded that they would manufacture them with seven interchangeable parts, and they started to manufacture the gauges, the jigs, and dies, and everything necessary for the manufacture of guns with seven interchangeable parts. After the Ordnance Department had practically accepted the suggestion it went to work through a distinguished ordnance officer and changed the plan from 7 to 40 interchangeable parts, and finally raised it to over 50 interchangeable parts, with the result that everything had to be stopped for awhile that additional gauges

might be made. This may have resulted in improvement, but why the delay in the midst of the smoke of battle?

Mr. President, these things were only brought out by this investigation. You do not find them elsewhere. Why should not the American people be informed of them? Senators, there are a lot of people out in the wild and wooly West where I come from who, lying back in their cabins and in their homes, perfectly content that America has everything she wants, and they are not worrying themselves, and they are fathers of boys at the front. If they only knew, these mothers and these fathers, patriotic citizens of the West, the actual conditions, every one of them—every woman and man—would be up and doing and ready to give their lives and their all for the purpose of protecting America.

The casual reader of the Secretary's statement would conclude that we had everything in the way of ordnance and yet, take the testimony of men on the ground like Gen. Greble—we only called two or three, we did not want to take them away from their duties—and we find the conclusion would not be justified. Take Gen. Greble, commanding general at Camp Bowie. He testified that they have not a single trench mortar. They have not machine guns to any appreciable number, not enough to train machine-gun men. The testimony of all is that the machine-gun man is not worth anything unless he has had some practice with a machine gun. They have not any howitzers; they have not any of the larger caliber guns. Senators, that is true of Camp Bowie, and it is true of nearly every cantonment and regular division in the United States. I am not saying it by way of complaining, Mr. President, but I am trying to show, and I want the American people to realize, that as to military program and policy America has none and that her military establishment as recently constituted has fallen down. If it had not been for the civilian people of this country, if it had not been for the men who have come here and given their time and their services, we would not have been anywhere.

I have in what I have said only briefly touched upon the Ordnance Department. Now I come to the Quartermaster's Department. You would conclude from the statements that are printed in the press of the country, that "everything is lovely and the goose hangs high," so far as clothing was concerned, but get on the ground and talk with men who are in command of these boys and you will find the conclusion is wrong; that is all there is about it. On a per capita basis it may be. My friend from Utah [Mr. SMOOT] and I on a per capita basis may be worth $100,000. He may have the $100,000, but per capita I am worth just as much as he is, and yet I do not have anything. On the same test of a per capita basis America may have uniforms, but when you come to the proper distribution of uniforms they have not had them and they have not got them yet.

I realize the great difficulties that have confronted the Quartermaster General. I am not complaining of him as an individual. He has done the best he could under a faulty system, and the President is not responsible for the system. He inherited the system. He has done the best he could. But we are without the clothing just the same.

Now, I am going to show by Mr. Baker's testimony that he did not know it, and that is the reason why I am saying that the President, the premier of all the great statesmen of the world, if you please, recognized as the leader of thought in this great international cataclysm, and I say amen to it, did not know the truth, and I did. I had it from the lips of living witnesses. He must have gotten his facts from his distinguished Secretary of War and he in turn got them from somebody else, and if those who furnished the evidence knew the facts, they did not tell the whole truth. If the Secretary represented conditions to the President on their statement he could not have given the President the whole truth, for he did not know it.

My statement is challenged, my integrity is in question. I am going to pass around to the Senate some of the pictures taken in one of these cantonments, of young men drilling in the cold, in the snow, and working in the trenches and using wooden guns and other ordnance that they manufactured in the camps. That is all right; I am not complaining of it, but I am showing the facts. If I had a boy going to France to join a machine-gun company or an artillery company, I would want him to have had some practice with something else than a wooden cannon or a telephone pole used for a cannon before he went over. I want Senators to see these pictures. I do this, Mr. President, because I feel it a duty that I owe first to my country and second to my conscience, and no man and no set of men on God's green footstool can keep me from telling the truth and carrying out the dictates of my own conscience. I have no fear of God, man, or devil. My only fear, my colleagues, was that in this discussion in some way or other it might have a psychologically bad effect upon my country and its cause, and yet I do not see how it can do otherwise than help. If these conditions exist, they ought to be corrected and corrected quickly. Great Britain found the same conditions and she corrected them pretty quickly as a result of fearless criticism. France found the same conditions and corrected them. America can not get her Army to manufacture these things. I do not care what they say, the graduates of military institutions stand at the top of their classes it may be, but when it comes to a young man trained along a particular line of duty undertaking to handle great commercial and manufacturing enterprises it is not in him to do it. You must go to the men who have done these things in order to secure results. Great Britain did that and France did it, and why should we not take this matter up and if Congress feels that there are inefficiencies it ought to correct them, though the heavens fall. Congress ought to do it without any fear of anybody, giving due weight and consideration always to the distinguished Commander in Chief of the Army and Navy.

Now, what has been the result? I want you to read the Secretary's statement printed in the hearings about having substantially all these things in the way of equipment. While he was on the stand a few days ago, reiterating again the statement that our soldier boys were equipped, I said to him, in substance, as I took my seat at the head of the table with my distinguished colleagues, "Why, Mr. Secretary, I have just talked within the last five minutes with a commanding officer at one of these cantonments, and he tells me that he is short 7,000 coats." In his usual placid way he said, substantially, "That is not true." I said, "He just came from there and is it not true?" He turned around to the Assistant Secretary of War, and said to him, "Telegraph to the Quartermaster General and get his report." On the next day, the 14th of January, I got this letter from the Secretary:

WAR DEPARTMENT,
Washington, January 14, 1918.

MY DEAR SENATOR CHAMBERLAIN: On Saturday morning one of the members of the committee said that he had just talked with the commanding officer of Camp Sherman, and that there were, as I recall it, 3,000 men there without uniforms. You will recall that I asked the Assistant Secretary to direct at once that a telegram be sent to the camp to find out the facts.

I inclose a telegram which came on Saturday, the same day upon which the statement was made, and which states that the 31,024 men now at Camp Sherman were at that time all in uniform, and that a previous shortage of approximately 7,000 coats was at that time provided for.

I send this information because, as you will recall, I ventured at the time the statement was made quite definitely to express a disbelief in its accuracy.

I will say this for the Secretary, when he did not know he was very positive.

This telegram I think should be called to the attention of the members of the committee, as it is of the highest importance to have them know both that this provision has been made and that the information upon which I have been relying in my testimony to the committee is not inaccurate.

Cordially, yours,
NEWTON D. BAKER,
Secretary of War.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate.

The telegram is as follows. It came from the quartermaster addressed to Gen. Goethals.

CAMP SHERMAN, OHIO, *January 12, 1918.*

GOETHALS,
Quartermaster General of the Army, Washington, D. C.

Re tel. date, 31,024 men now at this camp all in uniform. Previous shortage of approximately 7,000 coats provided for.

CASE,
Camp Quartermaster.

That convinced me that the Secretary of War knew what he was talking about, and I was glad to have it confirmed, because there were some things I thought he was misinformed about. On the very next day, January 15, he sent me this letter:

WAR DEPARTMENT,
Washington, January 15, 1918.

MY DEAR SENATOR CHAMBERLAIN: I send you a telegram which has just been received from Camp Sherman. The information in it differs from that contained in the earlier telegram, which I sent you yesterday and which arrived on Saturday. Apparently the information given to you by Gen. Glenn as to the blouses was accurate. This telegram, however, shows that an adequate supply is in shipment, though not received by the time the telegram was sent.

Cordially, yours,
NEWTON D. BAKER,
Secretary of War.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate.

That is the way it has been ever since the war commenced. It is on the way, but does not get there. Now, what does the telegram say?

CAMP SHERMAN, OHIO, *January 15, 1918.*

GOETHALS, PER HARDEMAN,
Office Quartermaster General, Washington, D. C.:

Thirty-one thousand one hundred and four men now in camp. All have overcoats and woolen breeches. Twenty-four thousand two hundred and four have complete uniforms. Sixty-nine hundred not yet supplied with coats, supply of which is now in shipment.

CASE,
Camp Quartermaster.

So the distinguished Gen. Glenn, commanding at Camp Sherman, a man whom I have always found willing to tell the truth, was nearly right. He comes from North Carolina, as whispered to me by the Senator from that State [Mr. OVERMAN], God bless him; I wish we had more like him. Speaking from memory only, he missed it by 100, and I think I shall show by Mr. Baker's own testimony that when he made the statement that all these places were equipped he was mistaken. But that is not all I am going to show you. With all these statements, time and again iterated and reiterated, that our boys are substantially provided for, this committee asked The Adjutant General of the Army—this was a little after the 1st of January—to wire the cantonments and other commanding officers to furnish us with information as to the actual conditions in the cantonments and the conditions as to equipment C. Equipment C is the clothing outfit of a private soldier. In due course that information came to us. In the face of this statement that had been repeatedly made, that that equipment was all furnished or was substantially furnished, made upon the part of the Secretary of War and probably by the Quartermaster General, too, on the 12th of January the Secretary sends up to the committee the following:

WAR DEPARTMENT,
Washington, January 12, 1918.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs,
United States Senate.

MY DEAR SENATOR: Pursuant to telephonic request of your committee to The Adjutant General of the Army that a report be obtained showing in percentages the shortages of articles of equipment C quartermaster supplies at the different divisional camps as of January 1, or as near that date as possible, a telegram was sent all division commanders, and I now have the honor to submit to your committee, attached herewith, a tabulated sheet showing the state of equipment as disclosed by these replies.

Figures represent shortages in percentages. Where blank spaces exist, no shortages were reported.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

That information comes to us through the Secretary of War himself, contradicting over his own signature and in his own letter his previous statement that the equipment was all there.

I am not going to take time to read the statement of shortages, but I am going to ask that it may go into the RECORD because I want people to see. I want them to see whether or not I am distorting the truth when I say that the Military Establishment of America has fallen down. I propose to relieve myself of responsibility if the worst ever comes, so that I may go home to my family and to my friends and to my constituents and say, "I tried to invite the attention of the country to it, but they listened rather to those higher in authority, and my voice was as of one calling in the wilderness."

This statement contains the list of articles that go to make up the equipment and it shows the shortages. I ask that it may be printed in the RECORD.

The VICE PRESIDENT. Without objection it is so ordered.

The matter referred to is as follows:

	Bags, barracks.	Clothing.	Belts, waist.	Breeches, cotton, O. D.	Breeches, woolen, O. D.	Coats, denim.	Coats, cotton, O. D.	Coats, woolen, O. D.	Cords, hat.	Drawers, cotton.	Drawers, woolen. Mr. CHAMBERLAIN. Let me take one item for instance. I will take one of the important items—woolen coats—olive-drab woolen coats. In the Third Regular Division it is 10 per cent short; in the Fourth Regular Division, 54 per cent short; in the Sixth Regular Division, 90 per cent short—woolen coats—while we are in the midst of winter, and this is about the 1st of January. Take Camp Wadsworth, S. C., 18 per cent short. Take the Thirtieth at Camp Sevier, S. C., and there is a shortage of 60 per cent of woolen coats.

Mr. SMITH of Michigan. Where was it that there was a shortage of 90 per cent?

Mr. CHAMBERLAIN. That was at a Regular Army division; I am not sure about where it is situated.

Take Camp Wheeler, Ga., and I am going to call attention to some of the things in connection with these shortages, Mr. President, unpleasant though it may be, in an effort to show the Senate and the country as to the hundreds and thousands of young men who are dying in all of these encampments, that it is due to the inefficiency of the War Department itself; at least that is my conclusion from the testimony. I am not an expert; I do not know; but I charge that I conclude from the testimony that that inefficiency is responsible for it. I am not going to make that statement on my own authority; I am going to read into the RECORD the reports of the Surgeon General. I am not making these statements, Mr. President, without having sat with the committee constantly, never missing a

single minute, except a part of one afternoon when I was called to a department. I know what every witness stated. If I had time to go into details, I could open the eyes even of the Senate.

Take Camp Doniphan, in Oklahoma, where there was a 53 per cent shortage of woolen coats.

Mr. GALLINGER. What was the shortage at Camp Wheeler, I will ask the Senator?

Mr. CHAMBERLAIN. At Camp Wheeler the shortage was 39 per cent of woolen coats.

Camp MacArthur had a shortage of 21 per cent; Camp Logan, Tex., had a shortage of 50 per cent; Camp Cody, N. Mex., 50 per cent; Camp Doniphan, Okla., 53 per cent; Camp Bowie, Tex., 40 per cent; Camp Sheridan, Ala., 59 per cent; and so on down the list. I think the highest shortage in woolen coats was 78 per cent.

Mr. SMITH of Michigan. Did the Senator state the shortage of such coats at Camp Custer?

Mr. CHAMBERLAIN. They are all here. The shortage at Camp Custer was 75 per cent.

Mr. President, I will not read the whole list of these shortages, but Senators may take each item, and it will be found that these camps are short all the way, as I say, from 1 per cent to 100 per cent. This information comes right from the men on the ground. They know what they are talking about; they do not have to make their estimates on a per capita basis. They make their estimates on the ground, just as Gen. Glenn did when I asked him what the conditions were.

Mr. President, right in this connection I feel it my duty to the country to let them know, and I am going to call attention to the reports of Gen. Gorgas himself, that nearly all of the deaths and the epidemics at the cantonments could have been avoided if the War Department had been efficient and effective.

In addition to the testimony of Gen. Gorgas, we have the testimony of men on the ground. We had Gen. Greble come up here. He is a splendid soldier. Whenever you get a soldier who has not any other ambition than an ambition to serve his country, you will invariably get the truth. It is not always so with one of these swivel-chair artists who wants to go higher, and from whom you can not ascertain what the truth is.

Gen. Greble came up here at our request; he is one of the men we took away from his post. Gen. Greble is stationed at Camp Bowie. I want you to read his testimony, because he shows the shortage in everything. In September last Gen. Greble began to see what was coming to his body of fine young fellows, and he began to reach out to try to get the things that were necessary to protect them from disease and to try to have those things done that would save them if disease came. He did not appeal to one man only; he did not appeal through the regular channels only; but he appealed through all channels. They had this body of splendid young men in tents, 12 in a tent, packed together like sardines, when they ought not to have had at any time more than five or six, or, at the outside, not over eight. Gen. Greble telegraphed to the Quartermaster General and stated in substance, "If you do not give us more space for these soldiers we shall have measles and pneumonia and other diseases in camp." He also appealed to Gen. Gorgas, and kept on appealing. Then he was sent to Europe on a mission. When he came back he found the same conditions practically existing. Not until some time in December did he get that for which he asked. Then the epidemic had broken out. As many as 8,000 young men went through the base hospitals and hospitals down there at Camp Bowie. Think of that!

Mr. TOWNSEND. How many?

Mr. CHAMBERLAIN. Eight thousand.

Mr. LA FOLLETTE. And how many deaths were there?

Mr. CHAMBERLAIN. I will give that to the Senator in a minute; I shall be glad to do so.

So, here was an old officer, who was accustomed to handle soldiers and who knew what was going to happen, as any sensible man knew what would happen. The Surgeon General has always advised the War Department that there ought to be 50 square feet of floor space to every man, and in those little tents they had placed 12 men. He did not get his request complied with until the worst had happened, until 8,000 men had passed through the hospitals and many of them had died; and absolutely had died without proper nursing because of the inefficiencies of the same system!

I challenge the Senators to read this testimony; do not take my word for it. You may single out a few witnesses who testify in opposition to what I am now stating, but when you get down to the men who know from actual contact and experience you get the truth as it appears on the ground.

If there is one man in America who knows what he is talking about when he talks about disease and epidemics, and knows how to handle them, it is Gen. Gorgas. He has not only achieved a national reputation, but he has achieved a world-wide reputation for his splendid work at Panama, and he has made that formerly pestilential region a garden spot in which to live because of the efforts of himself and of his subordinates.

I am going to ask that all these reports of Gen. Gorgas be printed in the RECORD. All of these cantonments are radiating centers from which there goes out to the American people everything that is taking place there; and I hope that every young man will write to his mother and his father and tell of the conditions, not in order to stay the patriotism of America but to stimulate those in authority to do their duty to protect their lives, if they are to fight the battles of the country.

Secretary Baker says in his printed statement that—

> The deaths in our forces in the United States from September to the end of December average 7.5 per thousand a year, slightly less than would have been the death rate of men of the same age at home.

Well, maybe that is true, but Gen. Gorgas says that amongst all the troops there has been a death rate of 8.2 per cent covering a little longer time. It is probable that Secretary Baker's statement is correct for the time he gives, and that Gen. Gorgas's data are correct for the time he covers; but what does a little thing like 2 per thousand of a million and a half men amount to? It does not mean anything, of course; let them die; it is only 2 per thousand; they have saved the balance of them. However, if proper precautions upon the part of the Government, if an efficient system had saved one young man who was risking his life for America, the American people would have been glad to have seen the money expended to save that one life. Particularly is that true in the light of the reports of the Surgeon General of the Army, which show that this condition was due to the fact that in most cases the troops were overcrowded and in some improperly clothed.

But that is not all. With that distinguished man at the head of the medical service of the Army and an able corps of assistants here, he was not even advised with as to the selection of the cantonment sites. Mind you, the men who go to these camps are selected men.

Mr. LA FOLLETTE. How many contonments are there?

Mr. CHAMBERLAIN. There are 30. Now, think of that! The man at the head of the medical department here in Washington, with a reputation in his line second to none amongst the professional men in the world, not even consulted with reference to the selection of these sites.

It may be said that, with the officer of the line who selected these camp sites, there went a young doctor. Whether he was from the Medical Corps, or whether he was some post or contract surgeon, does not make any difference to me; what I am getting at is that Surg. Gen. Gorgas was not consulted, and all this time he has insisted morning, noon, and night, in season and out of season, that in order to safeguard the health of these young men there must be at least 50 square feet of floor space to the man; and yet I venture to state, Mr. President, that there is not a single cantonment in the United States that has been built with that idea in view for protecting the young men.

But it may be said that these young men had to be called out quickly. What was the use of calling them out until the cantonments were ready or at least had hospital facilities? They might have been drafted into the service, and might have been assigned for duty at home or allowed to remain somewhere where they would not have been compelled to give up their lives because of a lack of care.

I will take these camps at random, and, inasmuch as I have referred to Camp Bowie, I will call attention to that. I will say to my southern friends and colleagues that the same conditions prevail down there, as you will know if you will take the trouble to go on the ground. First, I will take Camp Sevier, S. C., as a random case. Here is Gen. Gorgas's report:

> Sanitary conditions here are serious. Sixty men have died of pneumonia in the past month. The camp has been exposed to a general epidemic of measles, about 2,000 cases having occurred within the last month. During this same period, they have had 175 cases of pneumonia and 15 cases of meningitis. The new conscripts of this command are men who are nonimmune to measles. They come from the neighboring Southern States where population is scarce, and, therefore, have not had measles in childhood. Always, with measles, a certain number of cases of pneumonia occur. The mortality of pneumonia from any cause is always high.

Now, note:

> 2. The basic unsanitary condition, however, in my opinion, is overcrowding. In the past, in this camp, the division commander has had to put 11 and 12 men in a tent, due to the shortage of tentage. This would give about 20 square feet of space to each man. At present, he has to put nine men in a tent, which gives about 28 square feet to the man. I urge that the division commander be directed to furnish at least 50 square feet of floor space to the man, which would give about five men to the tent.

Now, note another item. I am not going to read the whole report, but I will say these statements are given in the face

of the inference to be drawn from the statement of the distinguished Secretary of War that everything is all right in these camps.

5. There has been a good deal of discomfort and exposure on account of the men having nothing but their summer clothing.

Mark you, this report was made on the 29th of November—

This has been in great part corrected in the last 10 days by the arrival of woolen clothing and overcoats. The O. D. (olive drab) wool has not yet been issued, but the authorities are informed that it is on the way. The whole command is still in khaki.

That statement is along the line of many other statements where it is shown that the men not only do not have olive drab woolen clothing but that they are still in their summer clothing, the Secretary of War to the contrary notwithstanding, because we have this testimony, or some of it, from men on the ground and from such distinguished men as Surg. Gen. Gorgas.

I will now take as another illustration Camp Bowie——

Mr. TOWNSEND. Where is Camp Bowie?

Mr. CHAMBERLAIN. At Fort Worth, Tex. Now, note, I quote again from Gen. Gorgas:

We have had in this camp during the past month 41 deaths from pneumonia, with 409 cases admitted. About 2,900 cases of measles in the same length of time. The causes of this condition are much the same as in the other camps reported upon. The great number of cases of measles is due to this fact.

The general then states about the same reason as given in the reports from which I have already quoted, as to men coming from sparsely settled States, who have not had measles in childhood. I will not read that, but the general goes on to say in his report:

1. I recommend that the division commander be directed to furnish sufficient accommodations so that each man will be allowed 50 feet of floor space. This would give not more than five men to a tent.

2. Measles and other epidemic diseases are introduced into these camps by cases being brought by the incoming troops. To provide against this an observation camp should be established, where all newcomers could be kept under observation for at least 14 days, and no new men should be placed in general camp until it is free from infection. I recommend that the division commander be directed to establish such observation camp, and that no fresh men be sent in until he is ready to receive them under the above instructions.

3. The command, until recently, has had nothing but their summer clothing.

That report was made on the third day of December last.

Mr. SMITH of Michigan. Have no observation camps been established?

Mr. CHAMBERLAIN. None at all that I know of; the men go right into the camps; that is the system. Let me say that all these things could not be done at once; it has been a herculean task for the War Department to do these things, but they could have kept these men back—there is not any question about that—until the hospitals were built as well as the cantonments; they could have established observation camps; that would have been a very easy matter. Now note:

The command, until recently, has had nothing but their summer clothing. This has caused a great deal of discomfort and probably increased the tendency to pneumonia. Most of the command has recently been issued woolen underclothing, and I am informed that the thick clothing for the whole command is now in camp, with the exception of overcoats—

With the exception of overcoats—

and are in process of being issued.

They have been "in process," Mr. President, since this war began.

I urge expediting the forwarding of overcoats as rapidly as possible. The base hospital is in an unfinished condition; no water in the hospital, no plumbing, or sewer connection. With the large number of patients in this institution this lack of water, plumbing, and sewer connection causes serious inconvenience to the sick, and increases greatly the burden of caring for them.

Mr. TILLMAN. Mr. President, I will ask the Senator what is the date of that report?

Mr. CHAMBERLAIN. That report is dated December 3. They come down even later, however, and there is practically no difference in these reports.

I am going to ask that these reports be inserted in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Chair hears no objection.

The matter referred to is as follows:

NOVEMBER 26, 1917.

From: The Surgeon General, United States Army.
To: The Chief of Staff (through The Adjutant General of the Army).
Subject: Report of inspection of Camp Wheeler, Macon, Ga.

1. In my recent inspection of Camp Wheeler, at Macon, Ga., I found conditions as had been indicated by reports. There had been a sharp epidemic of measles, some 3,000 cases, and as always occurs with measles, a certain number of cases of pneumonia. At the time of my visit, there were some 300 cases of pneumonia in the hospital. While the hospital was crowded, the right of way was given the pneumonia cases and they were being well cared for.

2. In the past month there have been about 60 deaths from pneumonia. The height of the measles epidemic was passed some ten days ago and at the time of my visit the epidemic was markedly on the decline, but the pneumonia was still on the increase. Generally pneumonia does not develop in a patient until a week or ten days after the incidence of the measles.

3. We can, therefore, expect a considerable number of deaths from pneumonia.

4. The camp is well situated and was in generally good condition. I think the reason for the measles affecting so severely this particular camp is the fact that men came from the surrounding Southern States which are sparsely settled and therefore the inhabitants do not, as a rule, have measles in childhood.

5. A large proportion of the cases of pneumonia were evidently contact cases and I am anxious on this score, fearing that we may be beginning here an epidemic of septic pneumonia. We have had a few cases of meningitis, a few cases of scarlet fever and some cases of mumps.

6. Whatever the original cause of the epidemic and the present conditions, all these evils are accentuated by the crowded condition of the camp. The tendency to pneumonia has no doubt been increased by the fact that the men have generally been exposed to the cold weather of the past month with no other protection than their summer clothing. Clothing is now rapidly coming into camp and about two-thirds of the men are supplied with woolen garments.

7. I recommend that it be insisted upon that all men in the camp have 50 feet of floor space each, and to accomplish this such additional shelter be supplied as may be necessary; that no fresh men be brought into the camp until the epidemic has subsided; that an observation camp be established and that all new men be kept under observation until the main camp is free from infection.

W. C. GORGAS,
Surgeon General, United States Army.

—

CAMP SEVIER, GREENVILLE, S. C.,
November 29, 1917.

From: Surgeon General, United States Army.
To: Chief of Staff, United States Army.
Subject: Camp sanitation.

1. Sanitary conditions here are serious. Sixty men have died of pneumonia in the past month. The camp has been exposed to a general epidemic of measles, about 2,000 cases having occurred within the last month. During this same period they have had 175 cases of pneumonia and 15 cases of meningitis. The new conscripts of this command are men who are nonimmune to measles. They come from the neighboring southern States, where population is scarce, and therefore have not had measles in childhood. Always with measles a certain number of cases of pneumonia occur. The mortality of pneumonia from any cause is always high.

2. The basic insanitary condition, however, in my opinion, is overcrowding. In the past in this camp the division commander has had to put 11 and 12 men in a tent, due to the shortage of tentage. This would give about 20 square feet of space to each man. At present he has to put 9 men in a tent, which gives about 28 square feet to the man. I urge that the division commander be directed to furnish at least 50 square feet of floor space to the man, which would give about 5 men to the tent.

3. I also recommend that an observation camp be established where fresh men can be isolated and kept under observation for at least two weeks, or until the camp itself shows evidence of being free from infection.

4. The division commander tells me that he expects a large increase in the force at an early date. I urge that no fresh men be sent to this camp until the division commander says that he is able to care for them along the lines of this recommendation.

5. There has been a good deal of discomfort and exposure on account of the men having nothing but their summer clothing. This has been in great part corrected in the last 10 days by the arrival of woolen clothing and overcoats. The O. D. wool has not yet been issued, but the authorities are informed that it is on the way. The whole command is still in khaki.

6. Heat and plumbing are badly needed in the hospital. Both were authorized two weeks ago. I recommend that the matter be pressed and the hospital be equipped in this respect at just as early a date as is possible. The hospital needs badly more transportation. I recommend that they be furnished one motor car, one 3-ton truck, one 1½-ton truck, and one ¾-ton truck. The hospital at present has 750 patients.

W. C. GORGAS.

—

CAMP BEAUREGARD, LA., *December 1, 1917.*

From: The Surgeon General, United States Army.
To: Chief of Staff, War Department, Washington.
Subject: Sanitary conditions, Camp Beauregard, Iowa.

1. During the past month this camp has had 38 deaths from pneumonia and 6 from spinal meningitis. During the same length of time they have had 2,300 cases of measles, 177 cases of pneumonia, and 11 cases of spinal meningitis. The immediate cause of the pneumonia from which the mortality comes is the epidemic of measles. Both the measles and pneumonia are on the decline. The sanitary conditions, however, I consider very serious, and steps should be taken at once, as far as possible, to remedy them.

The command is at present quartered at the rate of nine men to a tent. This gives about 28 feet of floor space to the man, and, in my estimation, is excessive overcrowding.

I recommend that the division commander be directed to put up sufficient tentage to give each man at least 50 feet of floor space, which would furnish about 5 men to a tent.

2. The camp has become infected with measles and meningitis by the transfer of infected troops from other camps. To avoid continued infection in this way an observation camp should be erected where new arrivals could be kept under observation for at least two weeks, and for such longer period of time as necessary while the main camp shows evidence of infection. This same precaution should be taken with regard to men being transferred to other camps.

3. The base hospital is located 4 miles from town. I recommend that the hospital be furnished at once with one 2-ton truck, one 1½-ton truck, and one ¾-ton truck, and one motor car, urgently needed for its transportation.

4. The base hospital is located about 2 miles from camp and connected with camp by a very poor road. The road is in such poor condition that the transfer of sick from camp to hospital is hard on the patients. I recommend that the road between the hospital and camp be at once macadamized.

5. The men in general came to this camp in their summer clothing, and have suffered a good deal of discomfort on account of cold. The tendency to pneumonia has been increased by their exposure to the

cold in this badly clothed condition. Within the last two weeks the whole command has been furnished with winter underclothing. About half the men of the command have overcoats, but so far no olive-drab uniforms. The completion of the equipping of the command with winter clothing should be expedited as much as possible.

6. The division commander informs me that the placing of nine men to a tent was due to orders from Washington.

W. C. GORGAS.

—

DECEMBER 1.

Colonel, Medical Corps.

CHIEF OF STAFF,
War Department, Washington, D. C.

During the past month this camp has had 38 deaths from pneumonia and six deaths from spinal meningitis. During the same period 177 cases of pneumonia have been admitted to the hospital and 11 cases of spinal meningitis. An epidemic of measles exists, of which disease 2,300 cases have come on sick report during the past month. I consider sanitary conditions serious, though measles and pneumonia are now on the decline. The camp is much overcrowded, with nine men to the tent. I recommend that the division commander be directed to furnish not less than 50 square feet of floor space for each man, and that an observation section be established for the camp. I recommend that no more men be sent to this camp until the division commander is prepared to care for them along the lines of the above recommendations. Letter follows.

GORGAS.

—

MAJOR GENERAL,

CAMP BOWIE, FORT WORTH, TEX., *December 3, 1917.*

CHIEF OF STAFF, *War Department, Washington:*

Sanitary conditions here more serious than at other camps visited. In the last month 41 deaths from pneumonia with 409 admissions. Cause same as at other camps recently reported, primary causes overcrowding. Recommend that the division commander be directed to allow only five men to a tent and that no more men be sent to this camp until division commander says he is ready to receive them. Most urgent need in hospital of water, plumbing, and sewers. Urge this be ordered at once. Letter follows.

GORGAS.

—

CAMP BOWIE, FORT WORTH, TEX., *December 3, 1917.*

From: The Surgeon General of the Army.
To: The Chief of Staff, War Department, Washington.
Subject: Condition Thirty-sixth Division, Camp Bowie, Tex.

1. We have had in this camp during the past month 41 deaths from pneumonia, with 409 cases admitted. About 2,900 cases of measles in the same length of time. The causes of this condition are much the same as in the other camps reported upon. The great number of cases of measles is due to the fact that the men come from the sparsely settled States of Texas and Oklahoma and have not had measles in childhood, but the basic cause is due to the overcrowding of the camp. We have at present nine men to a tent. I recommend that the division commander be directed to furnish sufficient accommodations so that each man will be allowed fifty fleet of floor space. This would give not more than five men to a tent.

2. Measles and other epidemic diseases are introduced into these camps by cases being brought by the incoming troops. To provide against this an observation camp should be established, where all newcomers could be kept under observation for at least fourteen days, and no new men should be placed in general camp until it is free from infection. I recommend that the division commander be directed to establish such observation camp, and that no fresh men be sent in until he is ready to receive them under the above instructions.

3. The command, until recently, has had nothing but their summer clothing. This has caused a great deal of discomfort, and probably increased the tendency to pneumonia. Most of the command has recently been issued woolen underclothing, and I am informed that the thick clothing for the whole command is now in camp, with the exception of overcoats, and are in process of being issued. I urge expediting the forwarding of overcoats as rapidly as possible.

4. The base hospital is in an unfinished condition; no water in the hospital, no plumbing or sewer connection. With the large number of patients in this institution this lack of water, plumbing and sewer connection causes serious inconvenience to the sick and increases greatly the burden of caring for them. I recommend that telegraphic instructions be sent to the division commander at once to put in plumbing, water and sewer connections. I also recommend that telegraphic instructions be sent to put in electric cookers in the diet kitchens in all of the wards.

5. I met by appointment last night the governor of Texas and the health officer of the State. They made several criticisms of conditions, which I thought were justified, but they were satisfied, I think, when I pointed out the impossibility of meeting in all respects the conditions that have been suddenly forced upon us, and that we were trying in every way to correct these conditions. A copy of the recommendations of Gov. Hobby, addressed to the division commander, was furnished me at our interview, which is inclosed herewith.

6. There is a great deal of uneasiness and criticism among the people with regard to conditions here, which are worse from a sanitary point of view than in any of the camps I have visited.

7. I think the recommendations I have made will tend to correct the existing sanitary errors, but I can not urge too strongly that they be put into effect at once. The camp site and surroundings are all that can be desired. The troops and general conditions are good, with the exception of such conditions as relate to the epidemic diseases at present prevailing.

MAJOR GENERAL, U. S. ARMY.

—

THE BASE HOSPITAL,
Camp Pike, Ark., December 5, 1917.

From: The Surgeon General.
To: The Chief of Staff.
Subject: Report on conditions at Camp Pike, Ark.

1. During the last month we have had at this post 57 deaths from pneumonia, with 241 admissions; 4 deaths from spinal meningitis, with 16 admissions; 2,100 cases of measles admitted; 128 cases of scarlet fever, with 11 deaths—the immediate cause of death in these cases being pneumonia, they are included under that heading; 124 cases of mumps. These figures indicate a serious condition of affairs at this camp. The principal cause of measles, as has been pointed out in other camps, is that a large number of the troops came from the sparsely settled States and had not had measles before. The 16 cases of meningitis occurring within the month, 10 came from Fort Riley. This is an illustration of the way one camp can infect another by means of cases brought by incoming troops. All these infections have evidently been introduced into the camp by troops coming from other infected camps or by men who had been infected at their homes. An important means of preventing this for the future will be the building of observation camps, where the men can be kept under observation for at least two weeks before they are admitted to the general camp. As this camp shows such evidence of severe infection, I think the same observation camp could be established for those going out.

2. Crowding in this camp, I do not think exists to any appreciable extent. When the division shall have been filled, we will have about 40 square feet per man. As this camp shows such marked evidence of infection, I recommend that this be increased by means of additional buildings to 50 square feet per man.

3. The number of cases of measles admitted has been declining rapidly for the past 10 days, and I believe the present epidemic is over. The number of cases of pneumonia from measles, as would be expected, is on the increase and we should naturally expect a greater number of deaths from this disease during the next week or 10 days. Within the last 15 days 8,000 new men have been introduced into the camp. It is possible that when these 8,000 men begin to show infection, we will go through an epidemic similar to that through which we have just passed. However, as most of these men come from the thickly populated State of Iowa, I do not think it probable that they will have measles as severely as the men who have just been through the epidemic, but certainly until this matter is determined and the camp is free from infection, no additional men should be sent here. I recommend that the division commander be directed not to receive more men until he is able to comply with the recommendations above made concerning space and observation camps, and until this camp shows evidence of being free from infection.

4. One great difficulty here is lack of segregation. In Camp Bowie, for instance, if we get a case of meningitis in a tent of nine men it is a very easy matter to segregate these nine men and determine whether or no they have been infected. Here, with a squad room containing 120 men, this is much more difficult. I urge, therefore, that in extending this camp, as above recommended, that the quarters to be erected for this purpose and for the purpose of isolation contain not more than eight men.

5. The command has been in its summer clothing until recently. During the last month the winter clothing has begun to come in and the men are now pretty well supplied with thick clothing, though there are several commands in the camp that have not yet been fully supplied. This lack of clothing with the exposure to the cold has no doubt been an element causing large pneumonia rate.

6. The camp is well located and the camp site good. Cleanliness and order and general sanitary conditions, with the exception of the epidemics, seem to be excellent.

7. The hospital is nearly completed and is as well supplied as could be expected under the circumstances. At present they have in the hospital 1,251 patients. This somewhat crowds the hospital, as it was built for a thousand patients. The overflow is at present being cared for, and I think well cared for, by the use of the galleries. Additional nurses' quarters are needed, additional officers' quarters at the hospital, and additional barrack buildings for hospital attendants are needed. A small kitchen in the rear of the wards for contagious diseases and some addition to the administration building are needed. The hospital is very short of transportation. I recommend that one touring car and one ¾-ton truck and one 1½-ton truck be permanently assigned to this hospital.

SURGEON GENERAL.

—

CAMP FUNSTON, KANS., *December 7, 1917.*

Colonel, Medical Corps.

CHIEF OF STAFF, *Washington, D. C.*

Strongly recommend that sites for detention, quarantine, observation camps, as selected on this reservation by the commanding general, Camp Funston, be approved. Action now being delayed by post commander on technical grounds of local command. Urgent that action be taken at once.

GORGAS.

—

CAMP FUNSTON, KANS., *December 8, 1917.*

From: The Surgeon General.
To: The Chief of Staff.
Subject: Sanitary report, Camp Funston.

1. During the past month, this command has had 84 deaths. Of these 84 deaths, 54 were from pneumonia, with 189 cases; 34 deaths from meningitis, with 70 cases; 131 cases mumps. This indicates a most serious condition of the cantonment, as far as infection from the two serious diseases, meningitis and pneumonia, are concerned. As emphasized in the draft situation, I call attention to the fact that they had 84 deaths from all causes, when the normal death rate of such a command should be about 12.

2. The reason for this condition, as we look back, is very evident. When the drafted troops were brought in, they came in large numbers, all at once. The cantonment was excessively crowded. Between October 4 and October 26, 36,000 drafted men were injected into the cantonment. Among these there were many meningitis carriers.

3. This part of the country is well known to all health officers as having been, for the last few years, the principal endemic center in its civil population for meningitis. Granting the conditions above mentioned, no further explanation is needed to explain the present conditions as to meningitis. I would attribute the form of pneumonia existing here principally to the past crowding of the cantonment. It is the same form that occasionally becomes epidemic when large numbers of men are brought together in a crowded space. The excessive dust, which blows about in blinding storms, has no doubt accentuated the condition, and as it occurred at the other cantonments, the lack of woolen clothing has also been a contributory cause. The cold weather in October, to which the men were exposed in summer clothing and without any heat in their barracks, tended in the same direction.

4. In discussing this matter, I will first treat it as if the conditions were new and nothing had been done, and will point out what should be done under such circumstances. As a matter of fact, the

epidemic has been excellently handled, and all measures I have to recommend have been put into effect as far as possible for the division commander to do so.

5. Meningitis and other infectious diseases were originally introduced from the outside. To meet this condition, observation camps should be established, where all men coming into the camp could be observed for at least two weeks, or such longer period as may be considered necessary. In this way, the men who had been infected could be picked out as they developed those diseases, and the incoming troops finally gotten out in an uninfected condition. The same process should be observed with troops leaving the camp as long as the camp showed evidence of infection. Orders should at once be given that no more troops be sent to this cantonment until the division commander states that he is ready to receive them.

6. The internal arrangement, as regards the isolation and caring for infectious diseases, should conform with those measures that are generally recognized as applying to these conditions, and that are at present being carried out most satisfactorily and successfully in the camp. As a matter of fact, all the above recommendations are being carried out at present, as far as lies in the power of the division commander. To cover the question of overcrowding, I recommend that at least fifty (50) square feet of floor space be allowed to every man.

7. I think, however, it would be wise for orders to be issued to Washington, directing that in the future the measures above recommended be carried out. My desire to have this done is with the object of giving the divisional commander the opportunity of asking for such material as he needs for putting up the observation camps he is at present constructing, and also with the idea that it may be an order that will govern all future commanders of this cantonment. I wish to particularly call attention to the telegram sent out regarding this matter, relative to ground for a detention camp in the post of Fort Riley. This is very much to be desired.

8. The camp has been located in the river bottom and is excessively dusty. In my experience, the use of oil on the roads and grounds has been very successful in lessening the dust. The division surgeon tells me that their experience here has shown that the use of oil for this purpose is very effective. I recommend that they be supplied with such amount of oil as they find necessary to meet this very unsanitary condition.

9. In their observation camp, as at present being erected here, they are using a tent, floored and framed with side walls, that holds five men each. I think this is an ideal condition. It gives complete segregation and no overcrowding. I recommend that as these tents wear out they be converted into permanent buildings by putting on a roof. I recommend that all future construction conform to the plan so wisely adopted in the observation camps, of allowing only five men to the building, which gives 50 square feet of floor space to the man, and segregates in bodies of five.

10. It is a very important element to get patients from various parts of the camp to the hospital promptly. For this purpose here the three motorized ambulance companies are used. Great difficulty is found in getting the motor ambulances started during the cold weather on account of the freezing of the water in the radiators. I recommend to obviate this the ambulance sheds be inclosed and heated.

MAJOR GENERAL, U. S. ARMY.

DECEMBER 27, 1917.

From: The Surgeon General.
To: The Chief of Staff.
Subject: Sanitary conditions at Camp Doniphan, Okla.

1. During the past month Camp Doniphan has had 74 admissions from pneumonia with 11 deaths, 316 cases of measles with 1 death, 104 admissions from diphtheria with 1 death, and 6 cases of meningitis with 4 deaths. While the number of cases and the number of deaths from the above-mentioned diseases are somewhat less than in other camps visited, the conditions in respect of those diseases is considered serious. The basic cause I consider to be overcrowding of the camp. At present there are nine men quartered in each tent, which gives a totally inadequate floor space for each man. I recommend that the division commander be directed to furnish sufficient tentage or other accommodations so that each man will be allowed 50 feet of floor space. This would give no more than five men to a tent.

2. Measles and meningitis were introduced into these camps by cases being brought by incoming troops. To provide against this in the future, it is recommended that an observation camp be established for all newcomers where they may be kept under observation for at least 14 days, or as much longer as may be considered necessary by the division surgeon, and no new men from observation camps should be placed in the general camp until it is free from infection. I recommend that the division commander be directed to establish such observation camp and that no fresh men be sent in until he is ready to receive them under the above instructions.

3. To properly control the spread of measles, meningitis, and pneumonia now confronting Camp Doniphan, it is necessary that tent contacts be immediately removed from the general camp upon the appearance of the first case of communicable diseases and placed in a separate detention camp for daily observation and treatment during the incubation period of the disease. It is recommended that such a detention camp be established for such contacts in addition to the observation camp previously recommended for incoming men.

4. The command until recently has had nothing but summer clothing. A great deal of discomfort has resulted and undoubtedly the tendency to pneumonia has been increased. I am informed that shipments are now coming in rapidly and that as fast as received are being issued to the men. From personal observation, however, I find that many men are still wearing their cotton khaki clothing.

5. The base hospital is in an unfinished condition. Many wards which are required for patients are not yet finished, and this has caused great embarrassment to the hospital authorities. The installation of a sewerage system and necessary plumbing in all buildings was authorized several weeks ago, and while work has been begun, it is now at a standstill, and the difficulties in caring for patients is greatly increased thereby. It is urgently recommended that the work of installation of sewers and plumbing be expedited.

W. C. GORGAS,
Surgeon General, United States Army.

Mr. CHAMBERLAIN. In order to get this thing before the Senate in a concrete form, I asked Gen. Gorgas to make me a detailed statement of the annual death rate per thousand from all causes. It is very short, and I will read it.

DEATH RATES ALL CAUSES.

Troops in United States September 21, 1917, to January 18, 1918. Annual rate per 1,000.

All troops.	Regulars.	National Guard.	National Army.
8.2	4.71	10.01	8.53

The history of this country will show that wherever there has been a record of it kept, the men in the Regular Army suffer less from disease than any other body of soldiers, because they have learned to take care of themselves. They have been in the service long enough to know how. These young fellows that come from civil life have not learned that, and that is one of the reasons why it is necessary to take them into these camps for training.

Number of deaths among Regular troops in United States, Sept. 21, 1917, to Jan. 18, 1918	350
Average strength of Regulars for same period	214,428
Number of deaths among National Army troops in United States, Sept. 21, 1917, to Jan. 18, 1918	1,263
Average strength of National Army for same period	427,088
Number of deaths among National Guard troops in United States, Sept. 21, 1917, to Jan. 18, 1918	1,305
Average strength of National Guard for same period	375,354
Number of deaths all troops in United States, Sept. 21, 1917, to Jan. 18, 1918	2,918
Average total strength for this period	1,016,870

That gives in concrete form the number of deaths that have occurred.

Mr. President, what I contend is that if the authorities had complied with the recommendation that Gen. Gorgas has made all the time, of giving each of these men 50 square feet of floor space, and if in addition to that they had put in these observation camps within the cantonments, the percentage of deaths would have been very much diminished, and I doubt if there would have been one-half of the deaths that there have been.

Mr. GALLINGER. Mr. President, will it disturb the Senator if I ask him a question?

Mr. CHAMBERLAIN. I will yield to the Senator this time, but I do hope I may be permitted to proceed without being further interrupted.

Mr. GALLINGER. I thank the Senator. Mr. President, I am particularly interested in this phase of the discussion relating to the health of our soldiers; and I will ask the Senator if he has inquired as to whether or not the recommendation of Gen. Gorgas that the floor space per soldier should be increased has been attended to, or whether any attempt has been made to remedy the evil?

Mr. CHAMBERLAIN. They are attempting it in some places, but it has not been carried out. Right in this connection I want to suggest that there is no law requiring it to be done; I do not know whether any is necessary or not; but the Medical Department, which has been making an effort right along to save the lives of these young men, can not get the things that they want.

Mr. OWEN. Of course not. They have no standing.

Mr. CHAMBERLAIN. They have not the standing with the line that they ought to have. Why, here we had four training schools for the commissioned and enlisted personnel of the Medical Corps and for doctors of the Medical Corps, where they could go and be trained. Two of them were cut out, and two left, and the Surgeon General is trying now to get the two enlarged so that they can train these men.

Mr. President, I am going to illustrate by two or three cases that the neglect of these young men is shameful. I am not going into it fully. I get many letters, but I am going to take the liberty of reading one or two, because I want the country to know that I know what I am talking about. I do not want to shock the conscience of America. I want America to know some of the facts, and, if need be, have them know all of the facts, in order that the mothers and fathers of these lads may write to those in authority, to the President and to the Senators as well as to the Representatives, and appeal to them, in the name of humanity and in the name of America, to see to it that these boys who are offering up their lives on the altar of their country may be protected wherever it is humanly possible to do it.

ST. LOUIS, MO., *December 31, 1917.*

Mr. GEO. CHAMBERLAIN,
Chairman Investigating Committee, Washington, D. C.

DEAR SIR: In behalf of a heart-broken family (a father, mother, two sisters and myself) I wish to register a complaint for the manner in which the case of my brother ——— ———, was handled at the base hospital, ———.

From the meager information my folks received, it appears that brother was stricken with a slight illness on Monday, December 10, and on Wednesday, the 12th, he was taken to base hospital at ——— with cerebro spinal meningitis, and on Tuesday, December 18, 10.20 a. m., he passed away.

First information my folks received was Friday, December 14. A neighbor lady received a letter from her son, a comrade of my brother,

advising he had seen brother fall out of ranks at drill and was carried on a stretcher to hospital.

My sister wired an officer (a friend of our family) in Company ———, Infantry, at noon Friday, December 14, to spare no expense and to wire, collect, details. Saturday morning, December 15, received a reply from the officer to the effect brother sent to base hospital with spinal meningitis, but condition favorable for recovery.

Upon receipt of latter telegram, sister wired a doctor in Company ——— Infantry, to wire details collect and to spare no expense. Sister also on December 15 Saturday, wrote three special-delivery letters to the officer, doctor, and a comrade, respectively, for particulars, but received no more information until Tuesday evening, 6 o'clock, a wire from the company officer that brother passed away 10.20 a. m., December 18. This wire was sent from Fort ——— at 3.15 p. m., December 18.

It doesn't seem that the Company ——— officers should have been required to furnish information in this case and that they only did so as a matter of respect for a lifetime friend and an appreciative family. Can it be possible that the Government hospital of this proud Nation of ours is not equipped to advise a father or mother of their son's misfortune in an authentic way, as not any of the information received came from the hospital direct? I notice daily in the papers that cablegrams are received clear across the ocean, advising condition of troops serving under our flag in France, but right at our doorstep our gallant soldiers might die and be buried without the knowledge of the father and mother, who supplied them, if it were not for the affection and thoughtfulness of their comrades.

My God, my colleagues and friends, if they are suffering here in America, with the blessings and comforts of home, surrounded by neighbors and friends, what must be the fate of these poor boys if they are sent abroad to meet the dangers and the treacherous and inhuman warfare and conditions that exist abroad?

For very palpable reasons I am not going to give the names of these people, but I want to show you that the letters breathe the spirit of patriotism. Having given up their sons to their country, they make no complaint, except in the hope that the example in their own family may set a precedent for better conditions and better service.

Now, note the spirit of patriotism that breathes through every line of this letter.

Brother's body was shipped with our instructions to his home, ———, Kans., for burial. I had the casket opened for identification purposes and was mortified beyond expression to find that, although brother died for his country, he was not placed in a uniform. He was not even clothed, being wrapped only in cotton and tied up in a sheet.

Also, discovered that a post-mortem had been held, which I understand is permissible only with consent of parents or relatives. The traces of embalming were very scarce and the features were gone entirely, making it impossible for a local undertaker to put the body in shape for my father and mother and sisters to view.

My brother is dead and in his grave and I can not expect to heal the wound in my broken heart by filing this complaint, but I am doing it all in a true American spirit and trust it will result in some good to those who may be so unfortunate as to lose their dear ones under similar circumstances. Would you be satisfied if this case applied to your brother?

Address all correspondence to me, as I do not care for my heart-broken father and mother to know all of the facts.

Mr. President, if I were to print in the CONGRESSIONAL RECORD all the letters that I get along this line, it would shock not only Congress itself, but the American conscience as well. I put this in the RECORD, in order that the country may know that there is inefficiency; and, God help me, if I can assist in creating efficiency I am going to do it, if it costs me my political and my own life. Somebody, somewhere in this great Republic of ours, must look after these splendid young men who are doing their duty by and for their country. If I can be instrumental in saving one life, or in arousing my country to the necessity of trying to save thousands of lives, I shall feel that my life has not been illy spent. I, for one, believe in letting the sunlight in. Let but the American mothers and fathers realize that their sons might be better treated than they are, and while, like the parents of this young boy here, they will not ask for their discharge from the service, they will insist that the public servant whose duty it is to see to it will either do his duty or retire in disgrace from public life and public service.

I am tempted to read one more letter into the RECORD, Mr. President. I have tried to keep on an even keel in the discussion of this subject. I have great respect for the President, notwithstanding what he has done to injure me and my reputation in this country; and in order that I may try to convince him and others that the charge of inefficiency is well founded I am going to put in the RECORD one more of the numerous letters that have come to Senators on the Military Affairs Committee. I just want you to see that what I said awhile ago about the Medical Department is absolutely true. They do not give them competent assistants; they do not assign to them men to be trained, with the result that a blacksmith, or a carpenter, or a lawyer, or anybody else goes into these base hospitals to take care of and nurse these young men.

It does not make any difference that my own party is in power. If any other party were in power, and I occupied this position, I would show the truth just the same. If these conditions can be corrected and these agencies of the Government made more efficient, the men of the Senate and the men of the House who neglect to do it are responsible to a higher tribunal, if you please, for the deaths of young men whose lives might have been saved if the proper authorities had but given this subject the attention that it is receiving at the hands of most of the members of the Military Affairs Committee at this time.

Why, my colleagues, this is not a new thing. Great Britain went through it. Pick up the paper this morning, and you will find the Secretary of the Admiralty, Dr. McNamara, being interrogated by a Member of Parliament to ascertain the truth with reference to the destruction of ships. They are keeping it away now from the British public as far as they can, but they are compelling them either to remain silent or tell the truth with reference to the destruction of human life by submarines. Let us turn the sunlight in on this thing, and we need never fear but that the American people will rally to the standard and follow President Wilson into the thick of the fray wherever their services may be needed.

I am going to read one more letter. I hope you do not think I am doing this for sensational purposes. I am doing it to illustrate a condition that exists, and a condition that can be remedied if they will only try to do it. There is not any reason why these things can not be remedied or have not been done.

One of the members of the committee hands me this letter. I might have gone over to my private files and gotten more of them; but this was handed to me, and I thought I would just call your attention to it.

DEAR SIR AND FRIEND: As you know, I have recently lost a son——

Mr. STONE. Who was that?

Mr. CHAMBERLAIN. One of the members of the Military Affairs Committee. I can show the Senator a great many more, addressed to me, if he wants them.

Mr. STONE. The Senator did not name the member.

Mr. CHAMBERLAIN. Oh, I have no objection to naming him. He is one of the most active and best-informed men on the committee, and he is a Republican, too. I refer to the Senator from New York [Mr. WADSWORTH]. It does not make any difference to me in this fight what a man's politics are.

Having told the Senator's name, I do not know whether I ought to read the letter.

Mr. WADSWORTH. I have no objection.

Mr. CHAMBERLAIN. The Senator has no objection? All right. I believe I said that I would not mention the name in connection with the letter, but it was delivered to me, at my request, because it accompanied other letters of the same character that were being read to show the horrors of this situation.

———, ———.

The HON. ——— ———,
——— ———.

DEAR SIR AND FRIEND: As you know I have recently lost a son with spinal meningitis at ———. I am writing to you as one that I know to be greatly interested in the welfare of our soldier boys, and ready to do anything in your power for their well being, and because you know me and will know whether to give credit to what I say.

Please know in the very beginning that I do not write to criticise the Government in any sense, nor to lay complaint against any one in authority. I realize that in the stupenduous task before us as a Government, and with the great diversity of interests involved, that it is impossible that there should not occur some things that should be corrected. It is with the hope that I may help somewhat with the task before us that I lay bare the facts as I found them in connection with my son's sickness at ———

Through friends entirely independent of the Army officers, and the medical staff, I learned of my son's sickness after he had been in the hospital for six days. With my wife I went immediately to the camp, arriving there the morning of ———. I found my son in the meningitis ward of the base hospital. It was the eighth day of his sickness, as I was informed by the attending physician. His mother and I and ———, ———, were permitted to see him through a window at the head of his bed. The small room in which he was lying contained one other bed on which was a patient; a stove in which there appeared to be no fire. The room was not simply unsanitary, it was filthy, beggaring description. The bed on which my son was lying was even more filthy than the room. I can not describe to you the condition of my son's body. Except to say that neither his hands nor face had been washed in eight days. (The attendant admitted this to me.) The reason given for his being in this condition was that he, the attendant, had but one helper in the ward and there was 18 cases there at that time. I asked if I might put a nurse in there to take care of him and the physician said that could not be allowed. I offered to put in a trained nurse and pay all expenses.

I then asked if I myself might be allowed to go in and clean him up and take care of him. The physician, very kindly in manner all of the time, said that it could not be. I then asked if I would bring clean clothes for him if they would clean him up and put them on him so that his mother might see him again and not have to remember him in the plight she had just seen him. They said they would gladly do so. I went to ——— and got clean clothes, and when I returned they had made some effort to wash his face and hands, although they were still grimy and black. His clothes were changed, his bed straightened out, and his mother was called to see him again. There was no change made in the condition of the room. Before leaving I again made a plea to be permitted to care for him, gladly taking all risk, but the rules were inflexible, I could not be admitted in any way. The attending physician was kind to us and I do not wish to imply that he was in any way to blame. He told us, however, as we were about to leave that we should not return for three or four days. To this order I had no intention of

giving heed, neither did I. His mother did not see him again. The next morning early his father-in-law ———, of ———, went to the ward, while the mercury was done about zero there was no fire in the room, the bedding was on the floor, the boy lay on the bed naked with the exception of a thin night shirt that was up around his neck.

About 3 o'clock that afternoon I found him in the same condition and the room without fire. The next morning at about 8 o'clock we found him in practically the same condition. No one knew of our visits to the hospital except two workmen, who were working on the sewer ditch in front of the hospital. To them I made myself known and the purpose of my going to the hospital. I refer now, of course, to the visits we made after we were instructed not to visit the hospital. On neither of these visits was there an attendant in the room or fire in the stove. A perfectly well man would have become sick in that room. The mercury was around zero all of the time.

At this time I went direct to the chief of the medical staff and told him the situation and asked to be permitted to go and attend my boy. He immediately gave orders that I be admitted and be given every facility for caring for my son. I went at once, but I was too late, as he died about 15 minutes after I got into the ward and before I was permitted to do anything for him.

That you may know something of the fearful handicap that the Government works under in the matter of competent help, I give you this one instance.

Now, I want you to note this:

I requested the attendant to give my son a drink of water. He went out and brought in a small bowl of water, and tried to get son to drink from it, but he could not. He said I guess that I had better get a funnel. (The boy was lying on his back with his mouth open.) He came back in a moment with a funnel made of a piece of newspaper, and, putting it in my son's mouth, was in the act of pouring the bowl of water into my son's throat when I stopped him. He said what shall I do? I said get a spoon. The poor fellow had not thought of that. My son died in a few moments.

I at once hastened to the office of the adjutant, and asked for the body, and was very courteously treated and assured that I could have the body that evening. I then hastened back to the ward where my son died to see how the body was prepared for burial, and, as I had my pass into the building, I did not stop and knock but opened the door to enter when it struck something that would not let it open further. I looked and saw that it was my son's body lying on the floor of the hall, and it was his head that I struck with the door.

I received every possible courtesy from the officers and medical attendants at the base hospital. I am not now filing any complaint against any man. I have no other purpose in giving you these facts than to get you to do your utmost to see that these boys of ours who are yet to die at these camps may have the care that every true man wishes that they might have. There are at least four witnesses to most all of the facts that I have written here who will be willing to testify to the truth of them if it would be the means of helping the authorities to bring about better conditions.

I trust, ————, that you will believe me when I say that I am not in any sense seeking revenge for the death of my son. If in his dying he is the means of securing better attention for the many boys that are yet to suffer and die in these camps, I shall feel that his death was not in vain. Wishing for you success in your endeavors for humanity, I am,

Sincerely, your friend,

———— ————

I read this because I want you to see the patriotic spirit in the hearts of this people, notwithstanding these things exist, which should be remedied.

Mr. TILLMAN. Who wrote that?

Mr. CHAMBERLAIN. I will show it to the Senator confidentially.

Mr. TILLMAN. It ought to be given to the country.

Mr. CHAMBERLAIN. Mr. President, I want everyone to know that I am speaking from the record of things and not indulging in any camouflage when my country's fate is at stake. I have put these letters in the RECORD, horrible as they are, simply because I want to arouse the people of this country so that every mother and every father who has sent a son to this Army, whether as a volunteer or as a drafted man, will write to the President of the United States and to Members of Congress from their respective districts in the same patriotic spirit in which these two letters are written, when those sons have died of neglect, not for revenge, not to punish anybody connected with this great Military Establishment in this crisis that confronts us, but in order that the fate of a beloved son or brother or husband, if you please, may arouse the attention of the country to the necessities of the occasion and save the lives of young men who are valuable units for the salvation and protection of America.

Mr. President, I have talked longer than I intended. I could not in one day strike bottom with the evidence we have showing inefficiency, and I am saying this without any unkind feeling toward Secretary Baker. When these measures come up for consideration, if the Senate wants to go into it more fully, the testimony will be printed, and I think if Senators want to act on their own judgment rather than because the Commander in Chief of the Army and Navy wants a thing to be done, I can convince them these laws ought to be passed.

I realize that we ought not to cripple the hand of the President. There is not anybody who wants to do that, but no man's judgment is as good as the concrete judgment of America. I do not care who he may be and how great he may be, he can not know as much as the world knows. I know how busy the President is, and I want to help him. God knows I would do anything to help him, notwithstanding the opinion he has of me as expressed in his public statement, and I believe I can say without egotism that no man has tried harder to help him in everything that he has desired for the proper conduct of this war than I. I have not done it because it was his or any man's policy. I have done it because America was at war and these things appealed to me as being right, and because I thought the country needed them. I voted to sustain the coal order the other day, although I thought it was a foolish order made by Mr. Garfield. I voted for it on the theory that I wanted to help save the young lives of America and our allies in France. The evidence before the committee shows that at the time the order was made there were over 127 vessels in the harbor of New York loaded with supplies for the allies, and they could not get coal to send them out. That is the reason why I voted to sustain that order.

My friends, if there had been any program in this war; if there had been any plan laid out for the conduct of this war the coal situation never would have happened, and that is what I am complaining of. That is why our committee proposes in one of its bills to have a war cabinet that can map out a program or policy under the sole direction and authority of the President for six months, or any length of time, as any business man would do. In this great business establishment of ours, because war is a great business proposition now, why has not some plan been worked out, and I challenge the production of a plan or a program. There is not anybody connected with the establishment who has time to do it. The distinguished President of the United States could not do it if he tried, because he has more to do now than he can possibly attend to. The war cabinet of Great Britain do not do anything else than is indicated in the bill which the committee has prepared.

I think there was one thing in the statement I made in New York to the effect that the Military Establishment had almost ceased functioning. That is a pretty broad charge. I repeat the charge, and as evidence of it I call your attention to this fact: There was a Quartermaster General's Department that had $800,000,000 to expend for supplies for the Government. It, practically under the instruction of the distinguished Secretary of War, turned the whole thing over to a distinguished retired merchant or manufacturer of worsted goods—I think his business was at Cleveland, Ohio—and the Quartermaster General's Department has simply been a rubber-stamp proposition since war was declared. If turning over the functions of this great office to a civilian merchant was not a cessation of functioning on the part of the Government, what in Heaven's name would you call it? This agent made the contracts to be signed by the Quartermaster General, he prepared for the manufacture of the commodities, bought the goods, and presented them to the Quartermaster General for distribution, and that is all. I felt sorry for the Quartermaster General. Not only did they do that, but they took the soldiers' overcoats that were 100 per cent wool, even then lighter than the British and the French, and reduced the woolen content to 65 per cent wool and 35 per cent of shoddy or reworked wool, and then they got along so nicely with that they reduced the wool content of soldiers' overcoats to 50 per cent of wool and 50 per cent of shoddy or reworked goods.

Mr. THOMAS. What is the name of the man?

Mr. CHAMBERLAIN. Mr. Eisenman. I have no criticism of Mr. Eisenman. No matter what people may say about him he has done or tried to do a patriotic work. He may be criticized about very many things, but I think he has done fairly well. What I am getting at just now is not what he has done, but the surrender of this function by the Quartermaster Department to an individual.

The answer to that was that it was to conserve wool. There may be a woolen shortage, but France has not found it necessary to conserve wool in that way. If anybody has got to wear shoddy it ought to be the civilian who stays at home, and we should give the soldier the best uniform it is possible to make in America. If there must be a shortage of provisions let the civilian who stays at home go short and hungry, but feed the soldier who is to carry the gun. That may be a wrong conception of duty, but that is the way it appeals to me.

Mr. President, I wish to give another indication of inefficiency, and I want you to understand I am not doing this in any spirit of unfriendliness to the Secretary of War. He has been my personal friend. I am only doing it because I feel it is my duty. As another evidence of inefficiency the woolgrowers of the West came here last April, I think, shortly after the war broke out, and offered to furnish the Government with the clip of that year. The Government did not take it because they thought the price charged was too high, and possibly the growers were charging a pretty good price. It was a little below or about the current market price, but the authorities would not take it. Later on they came here again and offered it and the authorities

would not take it. Later on we made contracts for large quantities of wool, but wool had then gone up to a very high figure.

Now, Mr. President, anybody would have known, it seems to me, any efficient business man must have known, that to clothe a million and a half men or possibly two million men we would have to buy every pound of wool possible and manufacture it into clothing. Yet it went into the hands of speculators and dealers, and when the Government got ready to buy, it had to buy at a high price. I think all will agree with me that while there has been great work performed there has been much left undone that might have been done if efficient methods had been in vogue in the War Department.

Now, we have only investigated two great departments, but we are going to investigate others. Notwithstanding some may object to our making these investigations, we feel that it ought to be done. The President says in his statement——

Mr. VARDAMAN. May I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from Mississippi?

Mr. CHAMBERLAIN. I would very much rather not yield.

Mr. VARDAMAN. I merely wish to ask the Senator who fixes the weight of the textiles worn?

Mr. CHAMBERLAIN. It has been determined in these cases by Mr. Eisenman in consultation with other members of the Council of National Defense, and the Quartermaster General, and other officers, but his judgment has generally been followed.

Mr. VARDAMAN. Is it lighter than it was?

Mr. CHAMBERLAIN. It is not lighter, but the texture now used is not as warm as wool.

Mr. VARDAMAN. What was the purpose?

Mr. CHAMBERLAIN. The conservation of wool. I would rather have more attention paid to the conservation of life, as is done in France and Great Britain.

A young British officer the other day appeared before our committee dressed in a splendid uniform, a good deal heavier in ounces than our uniforms.

Mr. HITCHCOCK. Possibly the answer of the Senator to the question may be misunderstood. I hope he will make it clear that the uniforms for our soldiers are made of material which is 4 ounces per yard lighter than those worn by the British or French soldier.

Mr. CHAMBERLAIN. That is correct. I stated it in general terms, but I did not show the exact difference. I am glad the Senator gave it.

Now, Mr. President, let me call attention to what the President says in his public statement:

> There have been delays and disappointments and partial miscarriages of plans, all of which have been drawn into the foreground and exaggerated by the investigations which have been in progress since the Congress assembled—investigations which drew indispensable officials of the department constantly away from their work and officers from their commands and contributed a great deal to such delay and confusion as had inevitably arisen. But, by comparison with what has been accomplished, these things, much as they were to be regretted, were insignificant, and no mistake has been made which has been repeated.
>
> Nothing helpful or likely to speed or facilitate the war tasks of the Government has come out of such criticism and investigation. I understand that reorganizations by legislation are to be proposed—I have not been consulted about them and have learned of them only at second hand—but their proposal came after effective measures of reorganization had been thoughtfully and maturely perfected, and inasmuch as these measures have been the result of experience, they are much more likely than any others to be effective, if the Congress will but remove the few statutory obstacles of rigid departmental organization which stand in their way.

Now, with all due respect for the President of the United States, he serves notice on Congress that they had no business meddling with this affair either by investigation or legislation. If the Senate of the United States feels it to be its duty to go into an investigation, it must not do so unless its course meets the smile of Executive favor. Now, I differ radically and essentially from that view. We are a great coordinate part of this Government; and I am going to take the liberty of calling the attention of my Democratic friends to a Democrat of days gone by, a leader who dared to protest against Executive interference with congressional action. When I become a rubber stamp in the discharge of my duty I shall get out of the Senate and out of public life and let some one more subservient take my place. You will remember, Senators, that there was on one occasion another Democrat in the Senate, who was appointed the leader of his party, when there was a Democrat in the White House. You remember when the famous Wilson bill was up for consideration it did not meet with Executive favor as it passed this body, and the President wrote a pretty stiff letter while the bill was in conference between the two bodies upbraiding Congress for what it had done.

That letter was read into the CONGRESSIONAL RECORD by Mr. Wilson, who was chairman of the Ways and Means Committee of the House, and although he had been in conference according to the RECORD with his comembers, the first time any of them saw it was when it was printed in the RECORD or possibly printed in a paper. Now, here is what Senator Arthur Pue Gorman, of Maryland, said about that letter. I have not indulged in any such hostile criticism as this, both because I have too much respect for the great office he holds, and further because I am in perfect sympathy with all the President wants to do in prosecuting this war. I want to help him. There is no anger in my heart and no malice. I want my friends to distinctly understand that. I would go to the White House at any hour of the day or night to help the President win this war and discuss any proposition that might come up, no matter what he thinks of me. I place my country above all other considerations.

Here is what Mr. Gorman said on the occasion referred to:

> As I have said, sir, this is a most extraordinary proceeding for a Democrat, elected to the highest place in the Government, and fellow Democrat in another high place, where they have the right to speak and legislate generally, to join with the commune in traducing the Senate of the United States, to blacken the characters of Senators who are as honorable as they are, who are as patriotic as they ever can be, who have done as much to serve their party as the men who are now the beneficiaries of your labor and mine, to taunt and jeer at us before the country as the advocates of trusts and as guilty of dishonor and perfidy.
>
> Mr. President, it is time to speak. The limit of endurance has been reached. The Senate owes it to itself. Every Senator here who is a part of this Democratic majority owes it to himself. There is no power, no matter how great, in this country, even the President with his patronage, that would keep me silent longer under the charges, under the imputations so freely made from such distinguished quarters. I hurl back the accusation—

Says Senator Gorman—

> and say that this treatment of their fellows is discreditable. It is destructive to the Government that men in high position should attempt to lower this body, a conservative body, consisting, when full, of 88 worthy representatives of States.
>
> No man can reach here by devious ways and remain long. The Senate is composed of men who represent the best thought of the country, men who have stood and battled for tariff reform when those in higher places dared not show their heads; men who, when another place was overrun and those in it had not the courage to stand and fight a tyrant, stood here at the risk of health, at the risk of fortune, of all that is dear, and saved the liberties of the country. Then these traducers of the Senate could not be seen. We will not be traduced longer, Mr. President, the facts must come.

I glory in the spirit that was shown by Senator Gorman. I occupy a little different position. This charge by our distinguished President has not been hurled at the Senate; it is hurled at my devoted head. I am only one of 96; I am only a unit in this body; but above and over it all is a great principle that the Senate, Democrats and Republicans, and the country at large ought to stand for. It may be me to-day; it may be the Senate to-morrow, or any or some individual Member; it may come in five years when somebody else is in the Senate; it does not make any difference who that person may be; I insist upon the principle, not because I have been assailed; that this body as a coordinate branch of the Government has a right to speak as it pleases as to conditions. The Senate can investigate any man or any set of men that it sees fit to investigate, and do it at its own sweet will without suggestion and without let or hindrance. If the Senate will only assert that right once, then we will not be troubled with this condition very often in the future. The Senate ought to assert its dignity and its part and parcel in this great governmental machine.

Now, let us go back a little longer and see what other great men in this country thought about Executive interference with legislative business, because, with all due respect to the President, that is what the statement quoted means, that we are interfering by these investigations and hindering the proper conduct of the war.

Here is what Senator Blackburn read into the RECORD while this discussion was on, and, by the way, let me say that two distinguished Senators from the South, Senator Vest, of Missouri, and Senator Jones, of Arkansas, took the same position. God bless them! May sweet memories of them long linger around these sacred halls and may their spirits animate the Senate in the discharge of its duty during the whole conduct of this war.

Senator Blackburn read this into the RECORD from an old fogy of the days gone by, but he had some part to play and played it gallantly in the early days of the Republic. Mr. Blackburn read this from Washington's Farewell Address:

> It is important, likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it, which predominate in the human heart, is sufficient to satisfy us of the truth of this position.
>
> The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasions of the other, has been evinced by experiments, ancient and modern—some of them in our country, and under our own eyes. To preserve them must be as

necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way in which the Constitution designates. But let there be no change by usurpation; for though this in one instance may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield.

Senators, I am not resenting the intimation contained in the President's statement about these investigations, constituting an interference with the prosecution of the war, but I am simply calling the attention of the Senate to the condition that may confront them at almost any time. However, is it entirely true that this investigation has done no good? Why, Mr. President, there has been an attempted reorganization of the military system since we started into it. Of course, it is claimed that the reorganization was commenced before we got busy. For instance, with all due deference to my good friend, Gen. Sharpe, who is a splendid man and a patriotic citizen, he was wholly unfitted for that job, and he has gone out of it, and they have put Gen. Goethals in. That is a part of the reorganization. With all due deference to my friend, Gen. Crozier, who has been a gallant soldier and a brilliant man, I think that in these days that move so fast, perhaps, he was not quite the man for the place, and he was practically taken out of the active control of the Ordnance Department, and Gen. Wheeler was put in.

What else have they done? They have put Mr. Eisenman just where he was with the old régime but under Gen. Goethals. They have put into the Ordnance Department another distinguished gentleman, Mr. Samuel McRoberts, who is a very able man, and I think will possibly help bring order out of chaos.

Mr. TILLMAN. Will the Senator answer an inquiry?

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from South Carolina?

Mr. CHAMBERLAIN. Yes.

Mr. TILLMAN. I want to know what the Military Affairs Committee was doing while all this mismanagement was going on?

Mr. CHAMBERLAIN. In time of peace?

Mr. TILLMAN. Oh, no. The War Department has been reorganized.

Mr. CHAMBERLAIN. We are trying now, I will say to the Senator from South Carolina, to help out things. I do not want to mention any names, but I could mention the names of distinguished Members of the Senate and House who have always stood in opposition to a reorganization that was a reorganization in fact, and they are doing it now.

Mr. TILLMAN. I have never opposed a reorganization in the War Department, but I do oppose any reorganization of the Navy Department.

Mr. CHAMBERLAIN. Well, we have not proposed any such reorganization. If the Senator will only take the trouble to read the bill which we have here, he will find that it does not take an iota of power away from the President. It gives him more. There is no effort being made to create a single organization that the President could not control.

But, getting back to the point I was making, I desire to say that this investigation has done good; it has removed some inefficients, and is bringing about some changes in a defective organization. But the Secretary still retains the Council of National Defense and its subcommittees as a purchasing or some sort of an agency between the President and the Army. It has no power, but is simply an advisory body. It can not nor can its committees enforce its orders.

Mr. OWEN. With no statutory power?

Mr. CHAMBERLAIN. With absolutely none. The Council of National Defense is simply an advisory body, that is all; it has no executive power. Those are the boards that are to take charge of and handle this new organization.

I say, instead of having this voluntary organization between the President and the Army, they ought to have one strong man between the President and the Army completely under the President's direction and control to handle this whole situation, and to utilize whatever organizations are now or may be created by order of the President. I merely call your attention to the fact that we have done some good.

Senators, the President says that we have not consulted him about this legislation. I am very sorry the President said that. Now, speaking as a Democrat, and not as an American for a few moments—[laughter in the galleries]——

The PRESIDENT pro tempore. The Chair wishes to admonish the occupants of the galleries that any signs of approval or disapproval will result in a clearing of the galleries. This is positive, and will be done.

Mr. CHAMBERLAIN. The Senator from Nebraska [Mr. HITCHCOCK] and I, while these hearings were going on, went to the White House and told the President the way things had been developing before the committee and that we thought he ought to know it. We went into it pretty fully. We stayed there an hour. I think the President was surprised at some of the things we told him; in fact, he expressed surprise. The remedy was the thing that was in our minds. I said that the proposition for a director of munitions had been under consideration by me for a long while; that I had been studying the British system, and that something like that as a strong intermediary between the President and the Army ought to be a remedy for the situation. The conversation was not confidential, as I understood. We were simply talking about conditions. I would not even refer to it but for the fact that it is charged as to our committee—a splendid body of men—that none of them had discussed this legislation with the President. The President did not approve or disapprove, but he had the information just the same.

Several days afterwards—I do not know how long—the President wrote a letter to me in reference to that bill. I would not give that letter to the public but for the fact that I am charged by the President with a distortion of the truth. Now, I am compelled, in defense of my own reputation, as well as in order that the position of this committee may be understood, to put the letter in the RECORD, and I am going to do so. The letter is as follows:

(Personal.)

THE WHITE HOUSE,
Washington, January 11, 1918.

MY DEAR SENATOR: When you and Senator HITCHCOCK were at the White House the other evening we were discussing various suggestions of coordination and means of speeding up the military programme and among other things you told me that you had in mind a bill for the creation of a munitions ministry.

That, of course, set my mind to work on that particular suggestion, and I feel that I ought to say to you, now that the matter is clear in my mind, that I hope sincerely no such recoordination will be attempted. For one thing, it would naturally include the Navy as well as the Army and would, so far as the Navy is concerned, bring about, I fear, a dislocation of activities which would cause delay where there is none that is avoidable; and in regard to the Army, I think that nothing substantial would be accomplished. Indeed, I believe that delay would inevitably be produced by such a measure.

I have had in the last few months a great deal of experience in trying to coordinate things, and upon every fresh coordination delay inevitably results and not only delay, but all sorts of cross currents of demoralization which are very serious impediments to the effective conduct of business.

Rather intimate information from the other side of the water convinces me that the munitions ministries which have been set up there have not fulfilled the expectations of those who advocated them, and the structure of those governments is so utterly different from our own that we could not, if we would, create any such parity of power and influence between the head of such a bureau and the heads of the permanent departments as can be created under such political arrangements as the French and English.

In short, my dear Senator, my judgment is decidedly that we would not only be disappointed in the results, but that to attempt such a thing would greatly embarrass the processes of coordination and of action upon which I have spent a great deal of thought and pains, and which I believe are more and more rapidly yielding us the results we desire.

I felt that I ought not to keep you in ignorance of what had been going on in my mind with regard to this important matter.

Cordially and sincerely yours,

WOODROW WILSON.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate.

Was it quite fair for him to charge that he had not been consulted?

Mr. JAMES. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from Kentucky?

Mr. CHAMBERLAIN. I yield.

Mr. JAMES. Is it not true that the President when he stated that he had not been consulted referred to the "superior war cabinet" bill and not to the "munitions ministry" bill?

Mr. CHAMBERLAIN. That may be so; I think it is susceptible of that construction.

Mr. JAMES. I will say to the Senator that, hearing on yesterday that he was construing the letter of the President, which referred merely to the proposed munitions ministry bill, as a reference to the "superior war cabinet" and therefore that he intended to urge that position as rather questioning the President's statement, I called up the White House and told the President of my information. He sent me a letter which I am sure the Senator will not have the slightest objection to being read by the Secretary.

Mr. CHAMBERLAIN. I will be glad to have it go into the RECORD.

The PRESIDENT pro tempore. Without objection, the Secretary will read.

The Secretary read as follows:

THE WHITE HOUSE,
Washington, January 23, 1918.

MY DEAR SENATOR: You have been kind enough to tell me that you had heard that I had written a letter to the chairman of the Senate Military Affairs Commitee concerning the idea of a munitions minister, and you asked me whether I did write such a letter. I did, and am glad to send you herewith a copy of it.

The consultation referred to with Senator CHAMBERLAIN, to whom the letter is addressed, was upon the subject of the various difficulties and delays that had been encountered by the War Department, as shown by the testimony before the Senate committee, and the Senator merely mentioned to me that he had a bill in mind to create a munitions ministry. He gave me no detail of the bill he had in mind, and it was only when I learned afterwards from others of the real character of the proposals that I felt it my duty to write to the Senator and appraise him of my attitude. I assumed from what I heard later that that particular proposal had been abandoned, and I was referring in my statement of the other day to the very surprising proposal to create a superior war cabinet of a type unknown to our practice or institutions.

I give you these details merely to reply to your kind inquiry and let you know all the facts of the case as you desire.

Cordially and sincerely, yours,

WOODROW WILSON.

Hon. OLLIE M. JAMES,
United States Senate.

Mr. CHAMBERLAIN. I am very glad, indeed, to have that go into the RECORD. The letter practically states the facts. The letter to me states them just as clearly, because it mentions the same proposal for the creation of a director of munitions.

Mr. JAMES. But it is true, I believe the Senator in perfect fairness to the President would like to say, that the President's statement that he was not consulted about the "superior war cabinet" bill was true. He was not consulted about that, was he?

Mr. CHAMBERLAIN. Well, that is subject to some qualifications. Without questioning the statement of the President, let me tell you what happened. The Military Affairs Committee on Friday appointed the Senator from Nebraska [Mr. HITCHCOCK] as a committee of one to go down and confer with the Secretary of War, which he did. Whether the President was informed about it or not, I do not know.

Mr. JAMES. Is it quite fair, does the Senator think, to charge the President with having information that was given by a Senator to a member of his Cabinet? Probably the Cabinet had not met and the matter had never been discussed.

Mr. CHAMBERLAIN. I did not intend to be understood as questioning the veracity of the President in any way; I am only stating what did happen.

Mr. JAMES. I feel sure the Senator did not; but I believe that, upon second thought, the Senator will realize when he reads the letter the President directed to him, together with the letter directed to me, they make it perfectly clear that the President is absolutely right in his statement that he was not consulted.

Mr. WILLIAMS. Mr. President, will the Senator yield to me for a moment?

Mr. CHAMBERLAIN. I really should like to go on.

Mr. WILLIAMS. The President said that he had information about the war-cabinet bill, but that he got it secondhand.

Mr. CHAMBERLAIN. Let us not be misunderstood about it. Here is the President's language in his published statement:

> I understand that reorganizations by legislation are to be proposed. I have not been consulted about them and have learned of them only at secondhand.

I do not know whether that is broad enough to include the munitions bill or not; but that is the language used. I am just stating my version of it. It goes to the country just the same that I was trying to "put over" something on the President without letting him know anything about it; that is all. I do not want that impression to go out. I am not questioning the veracity of the President, even if mine has been questioned.

There is much that I might say, but only one thing I want to say in conclusion. The President in his statement says that:

> To add, as Senator CHAMBERLAIN did, that there is inefficiency in every department and bureau of the Government is to show such ignorance of actual conditions as to make it impossible to attach any importance to his statement.

As I undertook to show the President in my letter, I was referring to the Military Establishment only in my impeachment, and my audience understood that I was referring to the Military Establishment. I did not want it understood that I impeached the efficiency of every department of the Government. The statement was really a little broader in that regard than I would have made it if I had sat down and had written the speech. I would have confined it to the War Department. It was a sweeping statement, impusively and impetuously made, and intended by me to include only the Military Establishment. I think I tried to explain that it was too sweeping, and now in this public manner I state that I did not intend to impeach the efficiency of all the departments of the Government. I was in no position to do that. I had not investigated as to all, but I intended to impeach, and I do impeach, the efficiency of the Military Establishment, and I think I have shown enough to sustain my charge of inefficiency.

Now, it is said we have not done any good. Let me tell you that that very statement of inefficiency has done some good, not only as regards the War Department, as stated by me a while ago, but it has speeded up at least one other department. My good friend Secretary Redfield, very courteously inclosed me this letter. I will not have it read but I will put it in the RECORD, to show that my statement induced the Secretary to appeal to his whole office force to try to speed up and do better, so that the charge of inefficiency might not rest on them. I admire the spirit in which Secretary Redfield took my suggestion. It was a suggestion made to help and not to hurt. I ask that Secretary Redfield's letter be inserted in the RECORD at this point.

The PRESIDENT pro tempore. In the absence of objection, it is so ordered.

The letter referred to is as follows:

"THRIVE BY THRIFT, BUY WAR SAVINGS STAMPS."

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, January 23, 1918.

MY DEAR SENATOR: The letter of which the inclosed is a copy has been handed each member of the department's force in Washington and placed by publication before its force throughout the country.

Yours, very truly,

WILLIAM C. REDFIELD,
Secretary.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate, Washington, D. C.

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, January 21, 1918.

To the officers and workers in the Department of Commerce:

United States Senator GEORGE E. CHAMBERLAIN, chairman of the Senate Committee on Military Affairs, is reported through the press to have said on the 19th instant, in an address before the National Security League:

"The military establishment of America has fallen down * * * It has almost stopped functioning * * * because of inefficiency IN EVERY BUREAU and IN EVERY DEPARTMENT of the Government of the United States."

The emphasis is mine.

We in this department form no part of the military establishment, though in every branch we are in full cooperation with it. We are included, however, under the charge that inefficiency "in EVERY bureau" and "in EVERY department" has led to the result said to exist. If it exists it is said to be at least in part our fault. All departments, all bureaus, are sentenced together. Such a statement from such a source must (if we may assume it to be correctly reported), be given weight. It is either true or false as regards ourselves. What lesson can we learn from it?

Candidly I had not believed any such sweeping condemnation could be justly made of our mutual service. The words of cordial praise that comes often unsolicited from many sides about every one of our services, the commendation of the business and industrial world, the noble spirit of self-sacrifice so freely shown by you in many forms, the known and definite results of our common efforts, the constant touch with all our work that you know it is my pleasure and privilege to try to maintain, these and what I had permitted myself to think 30 years of industrial and executive experience had taught me had led to the belief that in this department, so far as the law and the funds at our disposal permit, we have on the whole a highly effective organization even when judged by severe standards of industrial practice. Nor, let me say in justice to you, am I aware that any external inquiry into the work of the department has been made upon which to base a charge to the contrary effect. We are, as you know, constantly studying our work in all its forms with a view to its improvement.

But this is beside the mark. Our work, if good, will speak for itself. We have neither duty nor right of self-praise. What I ask you, every one of you, to consider for yourself is whether this charge is true of you, of your division or bureau, of your part, whatever it be, in our common work. For now more than ever must we do our work well. The slacker in work, if such there be, plays Germany's game. Inefficiency is a sin against your country. Red tape, unless required by law, is an offense against patriotism. Let us speak plainly. If inefficiency exists it must cease or the ineffective ones must go. This is no hour for hesitancy about persons.

But having thus in all seriousness said, let me add in conclusion that I fully believe the firm confidence I hold in you is for sufficient cause and will be more than justified by the high effectiveness of your service.

Yours, very truly,

WILLIAM C. REDFIELD,
Secretary.

Mr. CHAMBERLAIN. God knows I have tried my very best to do things here to help speed the work of preparation for this war, not as a Democrat, but because my heart was in it and because I believe it was right to do so. I have frequently done things in opposition to members of my own party and in opposition to many distinguished men on the Republican side, but together we have tried to improve the Military Establishment.

The last suggestion of the President in his charge against me is:

> I am bound to infer that that statement sprang out of opposition to the administration's whole policy rather than out of any serious intention to reform its practice.

Et tu, Brute! That is "the unkindest cut of all." My colleagues, I have stood here in season and out of season to get through nearly every piece of military legislation that has been put on the statute books in the past three years and that my friend Baker now boasts of and that the President is proud of, with what success I leave to the Senate and to the country to judge. I have taken charge of other measures here. I do not claim any credit for that; I give my colleagues equal credit for

these things; but I happened to represent the committees on the floor, and I worked most assiduously all the time. I will say this, however, that I have not stood for any measure because it was any man's measure; I have stood for it because it was for America, to assist her in this crisis that now confronts her. That is why I have done it.

I am not opposed to the President's policies. I was born in a country where Democrats were indigenous to the soil. I took my politics west with me 42 years ago, to a State which was Republican when I first went there and has been ever since. I have been a Democrat all the time, and I am a Democrat now; but I have some convictions about these matters and other public questions. When I have supported all these measures I have done it because I thought they were right and not because I got orders from anywhere.

I have differed from the President on a number of occasions, and I have not hesitated to do so. I differed from the President when the Panama tolls question was under consideration; I differed very radically from him and did all in the world I could to keep the measure for the repeal of the Panama free-tolls act of 1912, advocated by him, off the statute books not only because it was contrary to our platform of 1912 but because I did not consider it right. I have differed with our distinguished Executive on a number of nominations which he has sent here; but nearly all of the policies he advocates are Democratic, and nearly all the policies that he has proposed I have stood for. I think you will find that in very few instances have I separated from Democratic colleagues; and when I have done so it has been because I felt I was right. I will say that frequently I have followed my colleagues and followed the President on matters of policy when I thought they were all wrong; but I did it just the same. However, whenever it comes to a question where a principle is involved and my conscience is enlisted, I follow no man; I follow my conscience. I am doing that to-day, my colleagues, when I am undertaking to call the attention of the country to the dangers that confront America.

In God's name, are we going to get over to France? Within 10 months after the war broke out Canada had her gallant sons in the trenches assisting in some of the most desperate battles of the war. With her sparse settlements, with her lack of wealth as compared to that of the United States, she got her brave boys—and they are practically Americans, my friends—over there; but America can not get there. Where is the trouble? Mr. President, if we do not get there, and get there quickly, it may be too late to go, and, as my good friend the Senator from Iowa [Mr. KENYON] said here the other day, it would be better for a man to lose his life and to see his family die than to see the Teuton invade America.

You Senators know that there are soldiers along the Atlantic seaboard who ought to have gone to France six weeks or two months ago. They do not go. Why is it? At Mineola there were a lot of Oregon and other brave boys who went from a southern encampment to that bleak and barren place, and where some of them were kept for over a month in extremely cold weather, not sufficiently clad, and without the comforts that camp life ought to have furnished them, waiting to get over. There must be something wrong somewhere.

If America is going to play any part in this war, she will have to get at it pretty soon. France is expecting us and the other allies are expecting us, and it seems to me, Mr. President, that the only way to speed up our preparations, the only way to get "over there," is to arouse America to the necessity of the time and the danger of the crisis. When once aroused I have no fear but that America will rise in her might and furnish an example of sacrifice, of courage, and of patriotism that will make the brightest pages of our history pale into insignificance as compared with the fighting of our boys on foreign soil.

Mr. President and Senators, I apologize for having taken up so much of your time. You can realize that my reputation is all I have, and the love that my family and my friends have for me at home. With that reputation destroyed and that love gone, life would have no attraction for me; with my reputation assailed, with my country in danger, I know that you will excuse me for having trespassed so long on your time and patience; and believe me when I tell you that there is no man here to-day and there is no man in America who would go to the relief of President Wilson more quickly than I in our country's crisis, although I feel I have been so grossly maligned by him. I thank the Senate.

Mr. KIRBY. Mr. President, no man who is a Member of this body will accuse me of trying to curry favor with anybody in or out of office; but I have listened to the speech of my distinguished colleague, the chairman of the Military Affairs Committee of the Senate [Mr. CHAMBERLAIN], and I do not believe it ought to go unchallenged or unanswered. I do not question his patriotism, his integrity, or his ability, but I believe the spectacle we have witnessed here to-day is a condemnation of the soundness of his judgment.

What is the condition as we find it? We find the distinguished chairman of the Military Affairs Committee yonder in New York saying that the Military Establishment of the Nation has fallen down; that it is inefficient and incompetent. Has the distinguished chairman of the Military Affairs Committee taken the judgment of that committee upon that question, and have they declared that to be their view as the result of the investigation? That has not been done. Has the distinguished chairman of the Committee on Military Affairs, who certainly is responsible as chairman to this great body, and who ought to be and is supposed to be in touch with the administration, with the war-waging power—has he reported the condition as he now sees it, that the Military Establishment is inefficient and broken down, to the Commander in Chief of the Army? Did he do so before making the disclosure in New York? It has not been done. Instead, the chairman of the Military Affairs Committee has gone to New York, and, acting on his own judgment, has made a statement, as a result, he says, of his opinion made up from the investigation that has been going on, and has challenged the Military Establishment, and charged that it has broken down, that it is inefficient, and that it can not cope with conditions. I challenge the statement of it all.

The investigation that has been developed before our committee does not warrant much of the stuff that has been said here to-day; and it does not warrant at all, anywhere, the statement that the Military Establishment has broken down or has been inefficient, when you come to dealing with the great matters that have to be dealt with, and have been dealt with successfully, as I allege here and now.

Now, let us get down to some of the specific charges that have been made.

The Senator says we have had reports from the commanders of the different divisions at the different camps. That is true. He has said that these reports have shown that as late as December 3 there were shortages in woolen overcoats, in woolen blouses, and in woolen breeches; that the men were not all properly clothed throughout the cantonments and on the fields yonder in France. That is true as to the 3d day of December. All had not been supplied in the cantonments then; but all have since been supplied, and all would have been supplied then but for some negligence, probably, or inefficiency on the part of some particular man.

Let us see what was done. This supplies committee has been criticized here. Here is a man who was called in from civil life. Why? Because the Military Establishment had broken down? No; but because it wanted expert advice and assistance, it called in a man or men who could do these things. The committee was created, the committee came together, the committee acted, and what was the result? They have increased the supply of manufactured products where it was possible; and not only that, but they have clothed the Army, both in the cantonments and in the field in France. That has been done in eight months. Does that show inefficiency?

The Senator says one Quartermaster General might not have been able to do it. Perhaps he was not able to do it, but this agency was called in to assist the department. It was effective, and with this agency performed the service, and the statement can not be successfully contradicted.

They talk about the soldiers down at Houston not having as much tent space as ought to be provided for each particular man. I am a hunter, Mr. President. I go out hunting sometimes down in Arkansas, and as late as the middle of December, 8 or 10 of us sometimes sleep in an 8-by-10 tent, and we have never found any injurious effects from it; and usually down in that country around Houston and Waco, and even down in my country, as late as the middle of December a man could ordinarily sleep outside without any tent, and with only an Army blanket, and be entirely comfortable. The weather conditions have been unusual. They have made it necessary that we should supply more of this clothing, and it probably ought to have been supplied a little earlier, but it could not be done. It was humanly impossible under the conditions existing with the manufactories and the supply of raw material. Now, if a thing can not be done, would you say on that account that the Military Establishment had fallen down? No. That sort of an impression ought not to go out to this country when the facts do not warrant it.

They say, "Why does not the committee come in with a report?" The committee, in my opinion, ought to have made a report. The committee ought to have said: "Here is our deliberate judgment. A majority of us think that so-and-so and so-and-so is the condition, and that this investigation reveals and establishes that fact." But the committee has not done that,

and I challenge the right of the chairman to say what the evidence shows or does not show, and to make the broad assertion that he has made up yonder, and I say the facts do not warrant it.

There is another proposition: The Senator says that in 1914 it was apparent that war was going to come on, and that the Ordnance Department was absolutely quiescent, and that no move was made to manufacture heavy ordnance. He cites that as an instance of why the Military Establishment is inefficient. In 1914 the United States had not gone into the war, and since 1914 we fought out a presidential campaign on the proposition that we should not go into the war. Then why, in 1914, should the military organization have insisted that we ought to manufacture heavy ordnance? Why should they be regarded as inefficient when, later than that time, we fought out a presidential campaign on that issue alone? Is there any indication of inefficiency there? I think not.

Some member of the Military Affairs Committee, insisting with a witness that the manufacture of ordnance should have been begun in 1914, asked him if he did not know that our ambassador, Mr. Gerard, over in Germany, had said then that the German people were unfriendly, and that some day we were going to have trouble? Do you suppose that the Ordnance Department or the Secretary of War is going on what the ambassador to Germany might have reported here in a secret way in 1914? Would we have expected anything of that kind? No. No man would have expected it, no man would have justified it, and no man would have excused it then if money had been expended along that line.

Another thing that is said about the Ordnance Department is that we have no heavy guns. The Senator said we are not able now to put our men yonder in the trenches in France and supply them with heavy guns. Why? Because we did not in 1914 go to manufacturing them? No; he said we have not been able to manufacture guns. He did not say we did not have the guns. We have them. They are there. They are in the hands of our soldiers to-day, and can be used effectively when we put our men in the fighting front.

"Yes; but," the Senator said, "we had to buy them from France." That is true; we had to buy them from France, but that is an evidence of military efficiency. We bought them where we could get them, where we needed them, instead of trying to manufacture them, which would have taken a longer time. They had ample guns to supply our troops; we had ample money with which to purchase them, and time was of the essence of the condition. We bought the guns that we needed, because we could get them supplied there. We did not need to transport them from here across the ocean and take any chance on that. It might have been well, even had we had guns already manufactured, to have bought them instead yonder, where they already were in touch or could easily be put in the hands of our soldiers who are expected to use them. There is no evidence of inefficiency there.

It seems to me that that is conclusive evidence of high efficiency—to get the thing that you need when you need it, and it makes no difference where, so you can supply it. That was done. I do not see any inefficiency there.

The Senator says there is not a single trench mortar for training soldiers in our home camps. It may be true that they have not got as many trench mortars as they ought to have down there in the cantonments. They have not got as many of some of these machine guns as they ought to have for training; but they are prepared to deliver them in quantity, even the Browning gun, next month. It is not exactly accurate to say we have no machine guns, because we have bought the Shoshon gun, we have bought the Maxim-Vickers gun, we have bought the Colt gun, even the Lewis gun; we have bought them in all the quantity in which they could be produced, except the Lewis gun, and in the quantity in which it was determined they would be needed. That has already been done, and yet the intimation is made that nothing at all has been done.

If I am making a statement here to-day that is not warranted by the record as shown down there, let some man challenge it. I have attended the investigation. That has been developed, and that has been done.

I am not going to talk at any great length here; but as to the question of tentage, we had to increase our manufacturing capacity of tentage from 3,000,000 yards a year to supply a demand for 89,000,000 yards, and it has been done. Is there any inefficiency about that?

Now, as to the uniforms. Of course, Mr. President, my remarks on this occasion will be disjointed. The uniforms have been criticized. They say there ought to be more virgin wool in the uniform, that it would last longer, it would be warmer. The testimony I heard before the committee does not warrant that criticism. The uniform to-day is not any lighter than the uniform we have always had. It is of exactly the same weight that it always has been in the Army of the United States—that is, the coat and breeches, the uniform—and it is made now of 65 per cent virgin wool and 35 per cent reworked wool, which some call shoddy. That is the condition to-day, whereas it used to be 75 per cent wool and 25 per cent cotton; and experts doubted and differed about which was the more valuable cloth, which was the warmer, and which lasted longer. Even this reworked stuff must come up to certain specifications and have a certain tensile strength. That prevents its being rotten, or prevents its being worthless.

I want to make this statement here and let anyone challenge it who will: I say that no man, no officer, and no soldier from anywhere in the United States or from the battle front in France said that his uniform was insufficient, said that it was defective in wearing qualities or in warmth, or that it had not proven entirely satisfactory. No man, officer or soldier, said so to the committee—no man at all—and I asked several. I said: "What is your judgment, and what are the facts as reported to you, about the goodness of this uniform?" No man has said anything like that it was unsatisfactory. Some experts did say it should be heavier in weight.

As to the overcoats, this reworked wool, and the supply committee: The intimation has been made that the supply committee were to blame about that, but that is not warranted. The specifications were agreed upon, and the supply committee produced the stuff that they said was desirable and must be had. It is a 50-50 overcoat, about 50 per cent reworked wool and 50 per cent virgin wool.

The reworked wool, or what they call shoddy, is new cloth that has never been used, wool cloth that is torn to pieces and is put in with this other amount of wool. That has not extended to the blankets, and not 35 per cent of the overcoats have gotten down to those constituent elements.

That is the condition along that line. I am not going to talk extensively about that.

The rifle manufacture has been criticized. Maybe it would have been better if we had had Springfield rifles in the hands of every soldier in the United States the very minute that he was drafted; but, if so, they could not have been used. No man is expected to use his rifle, except to become efficient in target shooting, until he goes across the sea. Every man on the other side has been supplied with clothing, with ammunition, with rifles, with machine guns, and everything else to best equip him for effective fighting. No man will dispute that. It can not be disputed.

There have not been, until recently, enough rifles for the men in these home encampments, because we have not been able to make them in sufficient quantities. We might have bought the Enfield rifles, but the Springfield rifle is the best rifle in the world, so far as our experts state and so far as experience has shown. We thought it would be better to give them the best rifle if we had time to do it, and, under the conditions existing, I say that the military department has done well. It has done this thing and the rifles are in the hands of the soldiers now. There has never come to this committee, in the three or four weeks that I have been there, any complaint whatever of any soldier going hungry, or being supplied with any but the best food that could be bought in the country, or as good food as might be had by any man anywhere. That is another condition.

Now, as to the clothing: They did not get this clothing, as I say, in some places because the cold weather was not anticipated and the time was short. The cloth had been manufactured, the contracts had been made for the delivery, it had already gone from the manufactory, but not in time, I am informed by the Quartermaster Department, to reach them all. Sometimes the clothing had been manufactured, the uniforms were made, and some of them were too small. Our men have grown larger than they were in the old Army, back yonder in 1860. A greater percentage of them require large uniforms. Some of them had to be made over again, rather other uniforms had to be made, and time was lost in that way.

Then there is another thing that was inefficient in some ways, but we thought that might be corrected. Some one department of the Quartermaster Corps down here got more of the supplies than it ought to have had, and they were not taken from that department and sent to some other department that was in greater need of them. That was a condition that ought to have been remedied perhaps, but it was remedied as soon as the condition developed sufficiently to be known.

Now, as to the hospital proposition: It is true that soldiers have died in camp. It is true that soldiers must die upon the field of battle. It is unfortunate that if a man must die he can not die with arms in his hand, on the field of battle, fight-

ing for his country's cause; but it never has been that all could do so. It is unfortunate that a few of these soldiers have died; but the hospital facilities have been supplied. There might have been neglect in some particular instance. It may be so; but would that be apt to get back to the Secretary of War? It was shown in this instance that the medical department were disposed to remedy all the conditions that it possibly could. They seemed to be kindly disposed; they seemed to know their business; and they agreed to do everything that could be done to alleviate the condition.

Is it possible that people think that measles will develop because a man wears a cotton shirt or a woolen shirt; or is it possible that it is still believed that a man might have spinal meningitis because he did not have on a particular kind of shoe, or that a man might have pneumonia for that reason? No. Those are germ diseases, and when the man gets the germs he might be weakened, of course, in his condition to a point where he could not resist the ravages of the disease; but generally it is produced by the germ and is not affected by these other circumstances.

The hospital condition, so far as I understand, is not very unsatisfactory. Of course many people have been sick. There have been many deaths from pneumonia and measles. There always have been in armies, and there always will be. Pneumonia and measles are necessarily fatal diseases to a large extent. We have not been able to overcome that condition yet, and we never will be, I fear.

I am not an apologist for anybody in this administration. The President has always been able to take care of himself, and the Secretary of War, so far as I know, has been able to look after his own interests. I simply thought I ought to say this much to the people who might be disturbed by the speech of the Senator and the disclosures that have been made, only partially, of certain instances that do not affect the great general result that has been accomplished.

What difference does it make out yonder in the cabin or the home in Oregon if Mr. and Mrs. John Smith know that Sam did not have his overcoat within a week of the time he ought to have had it, or that he ought to have had it two weeks earlier? What difference would it make about supplying the overcoat? None. I might, however, reduce those people to a condition where they distrusted the Government and the administration, and doubted its power to accomplish the end that we have gone into the war to accomplish.

There may be other members of the Military Affairs Committee who are going to speak here to-day. I want to assume entire responsibility, however, for what I have said; and I say to you, as a man who has heard this investigation, as a man who is accustomed to weighing testimony, as a man who is accustomed to rendering judgment, that my opinion of the condition as it exists to-day is that the military department has not fallen down. The military department, where it has been deficient, has remedied the condition by volunteer boards of the best talent in the United States, and that is all that could be done if you had the law that is proposed by the Senator from Oregon.

Now, that has been done. I am not saying anything about the law. I am referring to the condition. This voluntary advisory agency was added to the military department because it recognized the need for it, and it accomplished the result through this means. That has been done. That is already done.

I am not going to talk to you further. It may be that I ought not to have talked at all, but my judgment led me to believe that somebody ought to say this much for the benefit of the country under these conditions, and I have said it.

Mr. HITCHCOCK. I ask that the bill introduced by the Senator from Oregon [Mr. CHAMBERLAIN] be now referred to the Committee on Military Affairs.

The PRESIDENT pro tempore. Without objection, the bill will be read the second time by its title and referred to the Committee on Military Affairs.

The bill (S. 3583) to establish a war cabinet and to define the jurisdiction and authority thereof was read the second time by its title and referred to the Committee on Military Affairs.

HEADS OF EXECUTIVE DEPARTMENTS.

Mr. HARDWICK. Mr. President, I wish to make a short statement to the Senate.

On the 4th day of January, 1918, I submitted this resolution in the Senate:

Senate resolution 175.

Resolved, That the President of the United States be requested to inform the Senate, if not incompatible with the public interest, by what warrant or authority of law the several heads of the executive departments hold their offices.

Mr. President, for many years and under many administrations every President of the United States who was reelected has at the beginning of his second term sent to the Senate his Cabinet nominations, and the Senate has always, except in one or two rare instances, promptly confirmed those nominations without question. The Constitution requires that these officers shall be confirmed by the Senate; and it has seemed to me that in times like these, when we were granting all sorts of unusual, large, extraordinary, and in some cases autocratic powers to the present Chief Executive, it was especially incumbent upon the Executive to comply with the spirit of the Constitution, even if the statutes in relation to these Cabinet officers in most cases did authorize the incumbents of these particular offices to hold them until their successors were appointed and confirmed, as is the case with respect to most of them.

But it happens, Mr. President, that by express provisions of statute law the Postmaster General of the United States does not hold his office over from one term to another, the statute providing in express terms that the Postmaster General shall hold office only during the term of the President by whom he was appointed, and for one month longer, and no longer. So that, as a matter of fact, the country ever since April 4, 1917, has been legally without a Postmaster General, and the position of head of one of the greatest executive departments of the Government has been unfilled, so far as law goes.

The object of the resolution I offered was to direct attention to that situation. I understand, however, that that is about to be met by a renomination of the Postmaster General, and that when I yield the floor the Senator from Virginia [Mr. MARTIN] is about to move an executive session to consider that nomination. I merely want to congratulate the country on the fact that the President has at last found out what the law is, and has at last complied with it; and I would still further congratulate both the country and the President if the President would comply with the spirit of the Constitution about all these things, as well as the letter of the law, and would follow the custom of his predecessors as well as obey the Constitution of the United States by sending to the Senate nominations for the other Cabinet places, as well as that of Postmaster General.

THE GARABED INVENTION.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the joint resolution, H. J. Res. 174, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. JAMES. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. JAMES, Mr. GORE, and Mr. BRANDEGEE conferees on the part of the Senate.

HIDE AND LEATHER SITUATION (H. DOC. NO. 857).

The PRESIDENT pro tempore laid before the Senate a communication from the Federal Trade Commission, transmitting a preliminary report on the hide and leather situation, stating certain facts ascertained in an investigation of hide, leather, and leather products undertaken by the commission under resolution of December 31, 1917, and in connection with the investigation of animal food products and by-products, which the commission is making pursuant to the President's direction, which, with the accompanying paper, was referred to the Committee on Interstate Commerce and ordered to be printed.

REPORT OF THE EIGHT-HOUR COMMISSION (H. DOC. NO. 690).

The PRESIDENT pro tempore laid before the Senate a communication from the Eight Hour Commission, transmitting a report of the commission appointed in accordance with the act of September 3 and 5, 1916, to observe the operation and effects of the institution of the eight-hour standard workday for railroad employees, which, with the accompanying paper, was referred to the Committee on Interstate Commerce.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a bill (H. R. 8696) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1919, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to a concurrent resolution authorizing the Clerk, in the enrollment of the bill (H. R. 195) providing for the sale of the coal and asphalt deposits in the segregated mineral land in the Choctaw

and Chickasaw Nations, Oklahoma, to strike out the word "applied," on page 5, line 13, and to insert in lieu thereof the word "apply," in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. FRELINGHUYSEN presented resolutions adopted by the Board of City Commissioners of Jersey City, N. J., favoring an increase in the salaries of all civilian employees, which were referred to the Committee on Appropriations.

Mr. JONES of Washington presented resolutions adopted by the Metal Trades Council of Seattle, Wash., favoring the erection by the United States Shipping Board of a sufficient number of houses for workers in the shipyards in that city, which were referred to the Committee on Commerce.

Mr. PHELAN presented a petition of the Chamber of Commerce of San Luis Obispo, Cal., favoring the construction of the proposed military highway from Blaine, Wash., to San Diego, Cal., which was referred to the Committee on Military Affairs.

He also presented a petition of the Napa Farm Bureau, of Napa, Cal., remonstrating against the importation of Chinese coolie labor, which was referred to the Committee on Education and Labor.

Mr. McLEAN presented a petition of the Chamber of Commerce of Stamford, Conn., praying for the enactment of legislation providing for the formation of a war council, which was ordered to lie on the table.

He also presented a petition of the Connecticut Pedic Society, praying for the enactment of legislation providing for the establishment of a chiropody unit in the United States Army, which was referred to the Committee on Military Affairs.

REPORTS OF COMMITTEE ON NAVAL AFFAIRS.

Mr. TILLMAN, from the Committee on Naval Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 3404) to authorize the President to drop from the rolls any naval or Marine Corps officer absent without leave for three months or who has been convicted of any offense by the civil authorities, and prohibiting such officer's reappointment (Rept. No. 209);

A bill (S. 302) authorizing the Secretary of the Navy to make donation of condemned naval guns and cannon balls to the John Wannebo Camp, No. 9, United Spanish War Veterans, Everett, Wash., to be placed in public parks (Rept. No. 210);

A bill (S. 3006) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes (Rept. No. 211);

A bill (S. 3126) to provide temporary promotion for retired officers of the Navy and Marine Corps performing active duty during the period of the present war (Rept. No. 212);

A bill (S. 3129) to provide for the disposition of the effects of deceased persons in the naval service (Rept. No. 213);

A bill (S. 3130) to amend section 1570 of the Revised Statutes of the United States (Rept. No. 214);

A bill (S. 3131) for the relief of Col. Littleton W. T. Waller, United States Marine Corps (Rept. No. 215);

A bill (S. 3400) to regulate the pay of retired chief warrant officers on active duty (Rept. No. 216);

A bill (S. 3406) to authorize the Secretary of the Navy to determine where and when there are no public quarters available for officers of the Navy and Marine Corps (Rept. No. 217);

A bill (S. 3427) for the relief of certain ex-paymasters' clerks (Rept. No. 218);

A bill (S. 3445) to authorize the payment of gun pointers and gun captains while temporarily absent from their regular stations, and for other purposes (Rept. No. 219); and

A bill (S. 3446) to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1918, and for other purposes," approved March 4, 1917 (Rept. No. 220).

He also, from the same committee, to which was referred the bill (S. 3402) to fix the age limits for candidates for admission to the United States Naval Academy, reported it with an amendment and submitted a report (No. 221) thereon.

He also, from the same committee, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

A bill (S. 179) to correct the naval record of Fred C. Konrad (Rept. No. 222); and

A bill (S. 3401) to authorize the President to temporarily reduce the course of instruction at the United States Naval Academy (Rept. No. 223).

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CALDER:

A bill (S. 3629) for the relief of Charles Haythorpe; to the Committee on Patents.

By Mr. WATSON:

A bill (S. 3630) granting an increase of pension to James Showers (with accompanying papers); to the Committee on Pensions.

LANDS IN OKLAHOMA.

The PRESIDENT pro tempore laid before the Senate the following concurrent resolution (H. Con. Res. 34) of the House of Representatives, which was read:

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H. R. 195) entitled "An act providing for the sale of the coal and asphalt deposits in the segregated mineral land in the Choctaw and Chickasaw Nations, Okla.," the Clerk be, and he is hereby, authorized and directed to strike out the word "applied," on page 5, line 13, and to insert in lieu thereof the word "apply."

Mr. OWEN. I move that the Senate concur in the resolution of the House.

The motion was agreed to.

HOUSE BILL REFERRED.

H. R. 8696. An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1919, was read twice by its title and referred to the Committee on Indian Affairs.

EXECUTIVE SESSION.

Mr. MARTIN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 20 minutes spent in executive session the doors were reopened.

ADJOURNMENT TO MONDAY.

Mr. MARTIN. I move that the Senate adjourn until Monday at 12 o'clock.

The motion was agreed to; and (at 3 o'clock and 40 minutes p. m.) the Senate adjourned until Monday, January 28, 1918, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 24, 1918.

POSTMASTER GENERAL.

Albert Sidney Burleson, of Texas, to be Postmaster General.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

Capt. Richard H. Williams, Coast Artillery Corps, to be major from December 29, 1917, vice Maj. Alden Trotter, detailed in Ammunition Train.

Capt. Alfred M. Mason, Coast Artillery Corps, to be major from December 29, 1917, vice Capt. Michael H. Barry, detailed in Ammunition Train.

Capt. Kenneth C. Masteller, Coast Artillery Corps (General Staff), to be major from December 29, 1917, vice Maj. Theodore H. Koch, detailed in Ammunition Train.

Capt. Joseph Matson, Coast Artillery Corps, to be major from December 29, 1917, vice Maj. Kenneth C. Masteller, retained in the General Staff.

CORPS OF ENGINEERS.

To be first lieutenant with rank from October 4, 1917, to fill an original vacancy.

Second Lieut. Simon Medine, Corps of Engineers.

To be first lieutenants with rank from October 16, 1917, to fill original vacancies.

Second Lieut. Samuel L. Kuhn, Corps of Engineers.
Second Lieut. Louis Graham, Corps of Engineers.
Second Lieut. Roy M. McCutchen, Corps of Engineers.
Second Lieut. William Lohmeyer, jr., Corps of Engineers.
Second Lieut. William A. Clark, Corps of Engineers.
Second Lieut. Aubrey H. Bond, Corps of Engineers.
Second Lieut. Hubert W. Collins, Corps of Engineers.
Second Lieut. Harold J. McDonald, Corps of Engineers.
Second Lieut. Maurice P. Van Buren, Corps of Engineers.
Second Lieut. Frederick S. H. Smith, Corps of Engineers.
Second Lieut. Frank B. Hastie, Corps of Engineers.
Second Lieut. Harold Van V. Fay, Corps of Engineers.
Second Lieut. Oscar R. Peterson, Corps of Engineers.

Second Lieut. Thomas K. Meloy, Corps of Engineers.
Second Lieut. Robert A. Love, Corps of Engineers.
Second Lieut. Bennet H. Bowley, jr., Corps of Engineers.
Second Lieut. Robert D. Ingalls, Corps of Engineers.
Second Lieut. William L. G. Mackenzie, Corps of Engineers.
Second Lieut. Walter L. Medding, Corps of Engineers.
Second Lieut. Warren A. Lyon, Corps of Engineers.
Second Lieut. Roger W. Parkhurst, Corps of Engineers.
Second Lieut. Albert C. Lieber, jr., Corps of Engineers.
Second Lieut. Robert K. Munroe, Corps of Engineers.
Second Lieut. James A. Bjerregaard, Corps of Engineers.
Second Lieut. Eugene F. Gaebler, Corps of Engineers.
Second Lieut. William C. Atwater, Corps of Engineers.
Second Lieut. Henry E. Strout, jr., Corps of Engineers.
Second Lieut. John A. Strang, Corps of Engineers.
Second Lieut. George E. Robinson, Corps of Engineers.
Second Lieut. Frank C. Rogers, Corps of Engineers.
Second Lieut. Philip N. Cristal, Corps of Engineers.
Second Lieut. Clifford H. Springer, Corps of Engineers.
Second Lieut. Edward P. Morton, Corps of Engineers.
Second Lieut. Langley S. Homer, Corps of Engineers.
Second Lieut. George J. Nold, Corps of Engineers.

TEMPORARY PROMOTIONS IN THE ARMY.

INFANTRY ARM.

To be majors with rank from August 5, 1917.

Capt. Paul W. Beck, Infantry, vice Maj. Edwin Bell, appointed colonel in the National Army.

Capt. Robert I. Rees, Infantry (General Staff), vice Maj. John S. Battle, appointed colonel in the National Army.

Capt. John J. Miller, Infantry, vice Maj. Robert I. Rees, retained in the General Staff.

Capt. Jesse M. Cullison, Infantry, vice Maj. William E. Welch, appointed colonel in the National Army.

Capt. William H. Noble, Infantry (Quartermaster Corps), vice Maj. Frank L. Wells, appointed colonel in the National Army.

Capt. Wilbur A. McDaniel, Infantry, vice Maj. William H. Noble, retained in the Quartermaster Corps.

Capt. Evert R. Wilson, Infantry, vice Maj. James E. Harbeson, appointed colonel in the National Army.

Capt. Philip Powers, Infantry, vice Maj. Pegram Whitworth, appointed colonel in the National Army.

Capt. Clenard McLaughlin, Infantry, detached officers' list, vice Maj. Thomas W. Darrah, appointed colonel in the National Army.

Capt. Edward B. Mitchell, Infantry, vice Maj. Lorrain T. Richardson, appointed colonel in the National Army.

Capt. James H. Como, Infantry (Quartermaster Corps), vice Maj. Charles R. Howland, appointed colonel in the National Army.

Capt. Harol D. Coburn, Infantry, detached officers' list, vice Maj. James H. Como, retained in the Quartermaster Corps.

Capt. Allen J. Greer, Infantry (General Staff), vice Maj. Louis M. Nuttman, appointed colonel in the National Army.

Capt. Robert Whitfield, Infantry, detached officers' list, vice Maj. Allen J. Greer, retained in the General Staff.

Capt. Abraham U. Loeb, Infantry, vice Maj. Glenn Davis, appointed colonel in the National Army.

Capt. Constant Cordier, Infantry (General Staff), vice Maj. Franklin S. Hutton, appointed colonel in the National Army.

Capt. James M. Loud, Infantry, vice Maj. Constant Cordier, retained in the General Staff.

Capt. J. De Camp Hall, Infantry, vice Maj. Fine W. Smith, appointed colonel in the National Army.

Capt. Davis C. Anderson, Infantry, detached officers' list, vice Maj. Walter S. McBroom, appointed colonel in the National Army.

Capt. Robert D. Carter, Infantry, vice Maj. Robert H. Allen, appointed colonel in the National Army.

Capt. Douglas Potts, Infantry, detached officers' list, vice Maj. Dwight W. Ryther, appointed colonel in the National Army.

Capt. Vincent M. Elmore, Infantry, vice Maj. Frederick B. Shaw, appointed colonel in the National Army.

Capt. Benjamin R. Wade, Infantry, vice Maj. William F. Creary, promoted lieutenant colonel.

Capt. George E. Goodrich, Infantry, vice Maj. Herschel Tupes, promoted lieutenant colonel.

Capt. Edwin S. Hartshorn, Infantry, vice Maj. Isaac Newell, promoted lieutenant colonel.

Capt. Clark R. Elliott, Infantry, vice Maj. Lawrence B. Simonds, promoted lieutenant colonel.

Capt. Ralph B. Lister, Infantry, vice Maj. Frederick W. Lewis, promoted lieutenant colonel.

Capt. Harry E. Comstock, Infantry, vice Maj. James N. Pickering, promoted lieutenant colonel.

Capt. William R. Standiford, Infantry (General Staff), vice Maj. William A. Burnside, promoted lieutenant colonel.

Capt. Frederick S. Young, Infantry (General Staff), vice Maj. William R. Standiford, retained in the General Staff.

Capt. Thomas S. Moorman, Infantry (Quartermaster Corps), vice Maj. Frederick S. Young, retained in the General Staff.

Capt. Charles H. Morrow, Infantry, vice Maj. Thomas S. Moorman, retained in the Quartermaster Corps.

Capt. Brady G. Ruttencutter, vice Maj. Russell C. Langdon, promoted lieutenant colonel.

Capt. Jennings B. Wilson, Infantry, vice Maj. Harry H. Tebbetts, promoted lieutenant colonel.

Capt. William O. Smith, Infantry (Quartermaster Corps), vice Maj. Frank C. Bolles, promoted lieutenant colonel.

Capt. Clarence K. La Motte, Infantry, vice Maj. William O. Smith, retained in the Quartermaster Corps.

Capt. George M. Holley, Infantry, vice Maj. James W. Clinton, promoted lieutenant colonel.

Capt. Edgar S. Stayer, Infantry (Quartermaster Corps), vice Maj. Alexander T. Ovenshine, promoted lieutenant colonel.

Capt. Charles H. Errington, Infantry (Quartermaster Corps), vice Maj. Edgar S. Stayer, retained in the Quartermaster Corps.

Capt. George C. Shaw, Infantry, vice Maj. Charles H. Errington, retained in the Quartermaster Corps.

Capt. Charles E. Reese, Infantry, detached officers' list, vice Maj. Henry E. Eames, promoted lieutenant colonel.

Capt. Robert S. Knox, Infantry, detached officers list, vice Maj. Carroll F. Armistead, promoted lieutenant colonel.

Capt. William A. Castle, Infantry (General Staff), vice Maj. Paul Giddings, promoted lieutenant colonel.

Capt. Harry D. Blasland, Infantry, vice Maj. William A. Castle, retained in the General Staff.

Capt. Edward H. Andres, Infantry (Quartermaster Corps), vice Maj. Alfred T. Smith, promoted lieutenant colonel.

Capt. Thomas J. Rogers, Infantry, vice Maj. Edward H. Andres, retained in the Quartermaster Corps.

Capt. Edwin J. Bracken, Infantry, vice Maj. Charles D. Roberts, appointed lieutenant colonel in the National Army.

Capt. George W. England, Infantry, vice Maj. Preston Brown, appointed lieutenant colonel in the National Army.

Capt. Clyde B. Parker, Infantry, vice Maj. Robert McCleave, appointed lieutenant colonel in the National Army.

Capt. Alvin C. Voris, Infantry (Signal Corps), vice Maj. John L. De Witt, appointed lieutenant in the National Army.

Capt. Frank R. Curtis, Infantry (Signal Corps), vice Maj. Alvin C. Voris, retained in the Signal Corps.

Capt. Fred L. Davidson, Infantry, vice Maj. Frank R. Curtis, retained in the Signal Corps.

Capt. George E. Kumpe, Infantry, vice Maj. William H. Waldron, appointed lieutenant colonel in the National Army.

Capt. Milo C. Corey, Infantry, vice Maj. Thomas M. Anderson, jr., promoted lieutenant colonel.

Capt. Arthur M. Ferguson, Infantry, detached officers' list, vice Maj. John B. Hunt, promoted lieutenant colonel.

Capt. De Witt W. Chamberlin, Infantry (Quartermaster Corps), vice Maj. Claude H. Miller, promoted lieutenant colonel.

Capt. Walter H. Johnson, Infantry, vice Maj. De Witt W. Chamberlin, retained in the Quartermaster Corps.

Capt. Robert G. Rutherford, jr., Infantry, vice Maj. John H. Hughes, promoted lieutenant colonel.

Capt. Robert E. Grinstead, Infantry (Quartermaster Corps), vice Maj. Rufus E. Longan, promoted lieutenant colonel.

Capt. Albert S. Williams, Infantry, vice Maj. Robert E. Grinstead, retained in the Quartermaster Corps.

Capt. William B. Graham, Infantry (Quartermaster Corps), vice Maj. Edward E. Roche, promoted lieutenant colonel.

Capt. Charles J. Nelson, Infantry (Quartermaster Corps), vice Maj. William B. Graham, retained in the Quartermaster Corps.

Capt. E. Alexis Jeunet, Infantry, vice Maj. Charles J. Nelson, retained in the Quartermaster Corps.

Capt. Charles H. Danforth, Infantry, vice Maj. Henry M. Dichmann, promoted lieutenant colonel.

Capt. Gideon H. Williams, Infantry, detached officers' list, vice Maj. Charles S. Lincoln, appointed lieutenant colonel in the National Army.

Capt. Fred W. Bugbee, Infantry, vice Maj. Halstead Dorey, promoted lieutenant colonel.

Capt. Leonard T. Baker, Infantry, vice Maj. Edgar T. Conley, promoted lieutenant colonel.

Capt. Charles S. Frank, Infantry (Quartermaster Corps), vice Maj. George J. Holden, appointed lieutenant colonel in the National Army.

Capt. Franklin S. Leisenring, Infantry (Quartermaster Corps), vice Maj. Charles S. Frank, retained in the Quartermaster Corps.

Capt. Charles F. Andrews, Infantry, vice Maj. Franklin S. Leisenring, retained in the Quartermaster Corps.

Capt. Allan L. Briggs, Infantry, vice Maj. Easton R. Gibson, appointed lieutenant colonel in the National Army.

Capt. James M. Petty, Infantry, vice Maj. Walter C. Sweeney, appointed lieutenant colonel in the National Army.

Capt. John B. Shuman, Infantry, vice Maj. John Robertson, promoted lieutenant colonel.

Capt. Charles G. Lawrence, Infantry (Quartermaster Corps), vice Maj. James V. Heidt, promoted lieutenant colonel.

Capt. Frederic G. Kellond, Infantry, vice Maj. Charles G. Lawrence, retained in the Quartermaster Corps.

Capt. William P. Kitts, Infantry, vice Maj. Patrick H. Mullay, promoted lieutenant colonel.

Capt. Walter Harvey, Infantry, vice Maj. Frank D. Wickham, appointed lieutenant colonel in the National Army.

Capt. Frank B. Davis, Infantry, vice Maj. John J. Toffey, appointed lieutenant colonel in the National Army.

Capt. Harry D. Mitchell, Infantry, detached officers' list, vice Maj. Mark Wheeler, appointed lieutenant colonel in the National Army.

Capt. Ode C. Nichols' Infantry, vice Maj. Ivers W. Leonard, appointed lieutenant colonel in the National Army.

Capt. Kirwin T. Smith, Infantry, vice Maj. Pearl M. Shaffer, appointed lieutenant colonel in the National Army.

HOUSE OF REPRESENTATIVES.

THURSDAY, *January 24, 1918.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou, who art from everlasting to everlasting, our God and our Father, infinite in wisdom, power, and love, we come to Thee in prayer, believing that Thou art able to strengthen us to resist the evils from within and from without.

Impart unto us, we beseech Thee, grace sufficient unto this day, that we may register ourselves on the side of right and truth and justice, and at its close lie down to peaceful slumbers, assured that Thou art our refuge and our strength; and Thine be the praise through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

SWEARING IN OF A MEMBER.

Mr. LEE of Georgia. Mr. Speaker, my colleague, Mr. WILLIAM C. WRIGHT, of the fourth district of Georgia, is present and is ready to take the oath of office.

The SPEAKER. The Chair has the credentials of Mr. WRIGHT, properly signed by the governor and the secretary of state, and Mr. WRIGHT will come forward and be sworn.

Mr. WRIGHT appeared at the bar of the House and took the oath of office.

CALL OF THE HOUSE.

The SPEAKER. The gentleman from Ohio [Mr. FESS], under a special order of the House, is recognized for 10 minutes.

Mr. LONDON. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. KITCHIN. I suggest to the gentleman from New York that he withhold that until the gentleman from Ohio has concluded.

Mr. LONDON. Oh, the gentleman from Ohio deserves a proper audience, and I insist upon the point.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. Evidently there is not.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

Bland	Fairchild, B. L.	Lenroot	Sanders, N. Y.
Brumbaugh	Fairchild, G. W.	Lobeck	Saunders, Va.
Caldwell	Flynn	McCulloch	Scott, Pa.
Cantrill	Fuller, Mass.	Maher	Scully
Capstick	Garland	Mann	Sherley
Carter, Mass.	Godwin, N. C.	Miller, Wash.	Sims
Carter, Okla.	Goodall	Mondell	Slemp
Chandler, N. Y.	Gould	Mott	Smith, T. F.
Church	Graham, Pa.	Nelson	Snyder
Cooper, Ohio	Gray, N. J.	Nichols, Mich.	Stiness
Costello	Griest	Olney	Sullivan
Currie, Mich.	Hamill	O'Shaunessy	Swift
Curry, Cal.	Hamilton, N. Y.	Overmyer	Templeton
Dale, N. Y.	Heintz	Paige	Treadway
Dale, Vt.	Hollingsworth	Porter	Vare
Davidson	Hood	Pratt	Wilson, Ill.
Dempsey	Hutchinson	Price	Wilson, La.
Dill	Johnson, S. Dak.	Ragsdale	Winslow
Dooling	Johnson, Wash.	Riordan	Wood, Ind.
Drukker	Jones, Va.	Roberts	Woodyard
Estopinal	Kless, Pa.	Rodenberg	Zihlman
Evans	LaGuardia	Rowland	

The SPEAKER. On this roll 340 Members have answered to their names, a quorum.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

The SPEAKER. The gentleman from Ohio is recognized for 10 minutes.

AUSTRIA-HUNGARY.

Mr. FESS. Mr. Speaker and Members of the House, I would like to have the attention of the House a little while on the significance of the dispatches that have been carried in the newspapers for the last four days in relation to the situation in Austria and Hungary. While it is always a doubtful thing to take at full value what is said in these foreign dispatches, since you can not tell how much is in the interest of publicity, this particular situation is very ominous and full of suggestion.

and if I may be permitted to say it, I think there is great promise, if one dare use such an expression in reference to what Austria would call a misfortune, in a revolution, the end of which no one can now undertake to tell. Austria-Hungary, quite unlike Germany, has never been free from the danger of revolution. The Austrian Government, with its dual monarchy, is an organization which is a combination of one empire and one sovereign kingdom with a common head. Each of these units has a separate and independent legislative department, as well as executive department. They do, however, have a common king, who gets his position by virtue of belonging to the House of Hapsburg, which has been the ruling house of both Austria and Hungary since the close of the sixteenth century. In 1867 there was an agreement reached by which there should be a uniform or single government, although each legislature sits separately to legislate on all matters except that of finance, foreign affairs, and military affairs. These matters are under the common rule of the two, and are the main departments of the ministry. When the legislatures can not get together on matters of legislation they reach a uniform conclusion through their houses of delegates, which are in reality a committee of estimates selected from the legislative houses, 20 from the upper house and 40 from the lower house, making 60 members in each part of the dual monarchy. These men sit separately and make their recommendations in writing, and after three efforts to agree, in case they fail they then sit together and vote it out as one body. There has also been for years a combination for commercial purposes called the Commercial Customs Union, that lasts during a 10-year period. That has been going on for a good while, with very much dissatisfaction in recen. years. So, Mr. Speaker, it was a common thought throughout much of the world that with the death of the late Emperor, Francis Joseph, the dual monarchy would break up into its separate units, as before 1867, but the heat of war prevented that, and the monarchy still stands in its dual character.

But there is a very serious condition that arises out of dissatisfaction which must be increasingly widespread and ominous. First, because of economic or industrial conditions there. You might say that it is grounded on social unrest that you find in Russia and in a lesser degree in Germany. However, while the papers state that the social or economic condition is the most prominent source of disaffection, just now, I believe, as a student of history, that the unrest is below the economic and industrial depression partly due to the war, because that would be temporary. But, fellow Members of the House, if you take either one of these units you find a condition unlike any other place in Europe, which must make for an increasing and permanent unrest until relief is provided. For example, the ruling people of Austria are the Germans, speaking the German language, but they are not in uniform sympathy with the Germans in the German Empire, and must not, therefore, be regarded wholly subservient to the wishes of the Hohenzollern régime. They are widely different, because, while the German Empire is made up of 75 per cent Protestant in religion, the Austrian Empire, speaking not of Hungary but of Austria, is made up of 88 per cent Catholic. They have not been together except in military alliances. The Kaiser has never been able to win the Catholic element in Germany. In this field we see the greatest diplomacy undertaken by him when he appointed Von Hertling, the Bavarian, to be chancellor of the Empire, who, by the way, is a Catholic, in order to win the clerical element in the Reichstag. The difference between Austria and Germany on the religious question is now and has always been acute. However, that is not the chief item of unrest between these two German groups. There is a much more serious condition. Austria must see that she is a loser in this war in any case. If the central powers succeed, Austria loses. If the entente powers succeed, she does not lose any worse. Germany not only furnishes the brains of all the military organizations of Austria to-day, but she also furnishes munitions and the money, in the form of scrip, with which to buy the munitions that are supplied by Germany. Germany is now and has been from the beginning taking munitions out of Belgium and the ore out of the mines of France and of Serbia, taking the material out of which to make the munitions and selling them to Austria, as well as Bulgaria and Turkey, and loaning the scrip to these countries, especially to Austria, with which to pay for it. I wish to emphasize the business aspect of this country in relation to Austria. In other words, Germany is fighting this war with profit to herself, save the loss of men, and that is a frightful loss to her. But she is taking what does not belong to her, save by might, and in her ability to market it to her allies she puts them under abject slavery to her, from which Austria alone can never recover. That is generally conceded. As long as Germany's printing presses will run she will loan this scrip to Austria with which to pay for the supplies that she buys from Germany, and in that way she has become inextricably a subservient, servile slave to the German Empire, and she must see it. I think that it is recognized now among a large proportion of her people that if the central powers win she loses. Germany's pan-Germanism, which sees German domination from Hamburg to Bagdad, is well known to Austria. Politically Austria is made up of 23,000,000 people. Out of that 28,000,000 not quite 10,000,000 speak the German language and are the ruling element in Austria. Ten millions out of 28,000,000—slightly over 33⅓ per cent. This one-third rules the other two-thirds of her people.

The SPEAKER. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent that the gentleman may proceed—for how many minutes?

Mr. FESS. For 10 minutes.

Mr. STAFFORD. For 10 minutes.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that the gentleman from Ohio may proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FESS. Mr. Speaker, this Austro-Hungarian territory is an interesting State, from the standpoint of nationality. Here are the Slavs, the people who became the ruling element in this section of the world in quite an early period. I will, if the House will permit me, insert in the RECORD a hasty sketch of the changes of this section under rulership since the seventh century. I do not want to do it now, because I have not the time. Here came a peculiar people in the history of the world, called the Magyar. They are a warlike people, and they drove themselves westward into the very heart of the Slav section and divided the Slav people into the northern and the southern Slav. The Magyars are the ruling people in Hungary. They could not go beyond what now is the German border. They did overrun great portions of Austria, and later on were driven back. This people is a unique people. They do not readily coalesce with other people. Their autonomy in government, as well as their language and their customs, has been retained. But Austria began to expand—or rather the House of Hapsburg—until it covers a great portion of this Slavic people, who have been overrun both to the north and to the south by the Magyar. To the north you have the famous Bohemian country, one of the oldest in Europe. This is a famous people, who have maintained their independence in their language and customs and very largely in law, but they are a subject people. A little to the east are the Poles, under the Province of Silesia. Farther east are the Ruthenians, in the Province of Galicia, under the control of Austria. In this section is a large aggregation of Slav people, still insistent upon their rights, but totally subject to a people who are foreign to them. Then, down in the southern country are the southern Slav, the Serbo-Croats. You therefore have the Croatians and also an Italian element in Dalmatia. In other words, in the country of Austria alone you have 16,000,000 of Slavic people denied their privilege in government by only 10,000,000, who are the ruling element in the country and who are German.

Over in here [indicating on the map] are the Roumanians, who are Roman in nationality, and speak the modern Latin. You also have the Slovenes, many of whom are under this dual Government. They are Slavish. You also have Bosnia, another Slavic people; Bulgaria, settled by the Bulgars, also Slavic. In other words, here is a foreign country ruling through a minority, with a hand of iron, a vast population that vastly outnumbers them.

Going to their Government, we find the Government of Austria made up of two houses. The Reichsrath is made up of the upper and lower house. In the upper house there are 14 princes from the royal family, 81 nobles—landlords—10 archbishops, and 7 bishops, who bear their title by inheritance, and from 150 to 170 of selectives chosen by the Emperor at his will. And that is the real legislative body now in Austria, responsible to nobody except the Emperor.

If I would be permitted to give you the make-up of the lower house, there are 17 Provinces in Austria—I am not now talking about Hungary but Austria alone. You understand they maintain their separate entities. There are 17 Provinces here, represented in the Reichsrath. The lower house has 516 members, as follows: Lower Austria has 64 members; upper Austria, 22; Saltzburg, 7; Styria, 30; Corinthia, 10; Carniola, 12; Trieste, 5; and Gorz, 6—191. In these eight Provinces the German element is strong but not exclusive. There are many of them out of sympathy with the régime governed by the German element. On the other hand, note the other Provinces: Bohemia has 130; Moravia, which is the Slovak, has 49; Silesia, the Polish, has 15; Galicia, the Ruthenian, 106; Bukowina, 14; Dalmatia, the Italian, 11. We here have 325 members representing the

subject people in the lower house, all of whom are dissatisfied with Austrian domination, while in the former group we have 191, many of whom are out of sympathy with the ruling house in Germany. Quite naturally the question arises, "Why could not these subject people, therefore, overrule anything that would be brought up in the lower house?" Yes; they could. But do not forget that the lower house of Austria, so far as I can ascertain, has not been in session since March of 1914. The house of delegates supersede the law-making body.

Mr. MOORE of Pennsylvania. May I ask why?

Mr. FESS. In time of war in a country so governed it might not do to let them come together. It must appear to us all that the representatives in that legislative body must not interfere with the monarch. With a situation like that constitutionally, where these people have a semblance or show of right, all of which is denied them, there is unrest, and inevitably so. I should like to take the time to indicate the political phase of this situation as indicated by party division.

The German Nationalists in the lower house number 100, the Christian Socialists 73, the German Socialists 49. The three groups which I have given are all Germans. Of these 222 German representatives, 122 of them are Socialists in politics, and as such are opposed to the German régime as carried on by Kaiser William in the German Empire. They have been, historically speaking, entirely out of sympathy with pan-Germanism on the Kaiser's platform. And yet that is the German element in Austria.

The real significance is more marked when we note the political complexion in the balance of this house. The Bohemian Club has 84 members, the Bohemia Social Democrats 25, the Poles 70, and the Polish Social Democrats 9, and 111 others variously divided.

Mr. GARD. Mr. Speaker, at this time I ask unanimous consent that the gentleman's time may be extended 10 additional minutes.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the time of his colleague be extended for 10 minutes. Is there objection?

There was no objection.

Mr. FESS. I am very much obliged to my colleague.

These elements that are non-German, in Austria, expressed by the political differentiation to which I was calling the attention of the House when my time expired, will make up 299 of the membership, while the German element is 222; and, mark you, that element is divided, because they are the Nationalists, in which are found those members who hold to and support the Crown, and, on the other hand, the Socialists, which constitute the greater number, who insist upon being given more rights. And this group are all the German or ruling element. So that when we enter into the inner condition of Austria—and what I say about Austria in a lesser sense could be said about Hungary—you see every element of revolution is present, awaiting the chance for an outlet.

The Hungarian Government is organized on a similar basis to the Austrian Government, so that what I have said about Austria can in a lesser way be said about Hungary. When we examine the provincial or local legislatures you find the famous Landtag in Austria and Hungary, as you have it in Germany, where are found their election districts. There is but one house in the provincial legislature. What is singular in both of these countries is that the electorate is so classified that the elected people are not popularly representative. For example: They are divided into six classes: (1) Bishops and archbishops of Catholic and Greek Churches; (2) rectors of universities; (3) owners of great estates elected by taxpaying landowners; (4) representatives of towns, elected by citizens possessed of specified municipal rights; (5) representatives of boards of commerce, selected by members; (6) representatives of the rural communities elected by all those who pay direct tax. The electoral system is so constituted that when you eliminate, or rather when you consider all of the limitations that are written in the law, you have eliminated the popular right of participating in the legislation in the Landtag by the majority, as we here understand democracy, by this peculiar method of election. In other words, one element represents a certain class, religious in character; another element a less-favored class, but nevertheless favored in education facilities; and still another class distinguished by business, and so on. It is not a representation of people but of groups, which is never possible in a democracy. All this shows fertile soil for deep-seated unrest.

So, Members of the House, when you take up the dispatches that are coming out of Vienna the past few days, I think that there is rational ground for our belief that a break-up is promised in the dual monarchy.

Mr. SUMNERS. Will the gentleman yield for a question?

Mr. FESS. I will.

Mr. SUMNERS. To what extent does this division in the representative party indicate the division in the body of the citizenship? I understand the gentleman stated that the citizenship was not properly represented in the legislative body.

Mr. FESS. If I understand the question, it is, How many people would be represented by this particular circle or that particular class?

Mr. SUMNERS. Yes. What conclusion is the Government to draw as to the division of the people with reference to this war?

Mr. FESS. The conclusion I wanted to leave with the House is that the vast mass of the people have very little voice in legislation, while the selected few have a great voice. That is what I wanted to leave with the House.

The reason why I wanted to present this phase of it at this time is that the Committee on Foreign Affairs has reported a bill to exempt from the operation of the alien-enemy act these several subject peoples now resident in the United States that are, when considered under international law, conceded subjects of Austria-Hungary, but who are perforce very much opposed to Austria-Hungary. They are the Czechs from Bohemia, the Slovaks from Moravia, the Poles from Silesia, the Ruthenians from Galicia, and a great number of Roumanians from the eastern section of Hungary, a great number of Serbians from the south country, and many Italians from the Adriatic country, and also very many Croatians and Slovenes. I looked up our immigration tables. It is stated therein that we have about 3,000,000 of them in this country, many of them not citizens; why I do not know. But just the moment the opportunity came, by our declaration of war, for them to show their opposition to their ancient enemy and their favor for our country they sprang to the colors and went into the Army. But we were not at war with Austria-Hungary for many months, and when we declared war against the dual monarchy internationally we made them alien enemies, which embarrassed both them and us. We can not enlist alien enemies, and those in the service if taken prisoner would, of course, be executed at once as traitors. We have reported a bill in order to remove so far as our country can that international inability. It does not assure them, however, exemption from execution if they are taken prisoner. But, gentlemen, I meant to say that their conduct shows the spirit of unrest in that country. They are volunteering, and they have gone at once to fight the battles of our country as well as to fight against their ancient enemy.

Our subcommittee had before it, on its own solicitation, the famous pianist, Paderewski. I shall never forget the plea that he made when for two hours he pleaded for the right of the Poles in this country to form a separate unit, not to be coalesced and lost by absorption in the American Army, but to be a unit of Poles from America, by the side of the American soldier, the French soldier, the British soldier, and the Italian soldier, to fight his enemy; and when we raised the question as to whether or not we could do it, he said the psychology of the situation was most significant and easily explained. Those people in that country are restless; they have suffered for centuries; they have suffered lack of freedom. They are not naturally rebellious, except that they want the right to use their own language, and they wish to observe their own customs, and they desire the right of freedom of worship according to their own conscience, and they do not want to be oppressed; and if they could know that there upon the west front there was to be a unit of soldiers made up solely of this class, and another of that class, the influence on their kin in those oppressed countries could not be easily overestimated. The spirit of revolt against oppression is ever present and will be wonderfully stimulated by such action.

The SPEAKER. The time of the gentleman from Ohio has again expired.

Mr. HAMILTON of Michigan. Mr. Speaker, I ask unanimous consent that the gentleman may be permitted to proceed until he finishes his remarks.

Mr. FOSTER. Mr. Speaker, I will not agree to that at all.

Mr. HAMILTON of Michigan. Say, 10 minutes.

Mr. FESS. One minute, Mr. Speaker, is all that I will take.

Mr. HAMILTON of Michigan. Make it five minutes.

Mr. FESS. Very well. I thank my friend from Michigan.

The SPEAKER. The gentleman from Michigan asks unanimous consent that the gentleman from Ohio may proceed for five minutes. Is there objection?

There was no objection.

Mr. FESS. There is a dispute among authorities as to the classification of this population in Hungary. One of the leading Hungarian scholars in America claims that at least 60 per cent of that population are a subject people and in a state of unrest, but the figures that I have taken that are usually regarded as authentic—taken from the census—made this classifi-

cation: The Magyars in Hungary, who are the ruling class and not German, understand, really not friendly to the Germans, are 10,000,000 in round numbers, while the Germans are only 2,000,000 in Hungary; the Slovaks 2,000,000—I am giving in round numbers—the Roumanians 3,000,000, the Lithuanians half a million, the Croatians 2,000,000, the Serbians a little over 1,000,000, and then others, including the Jews, would be half a million. In this list of figures you see the same thing. The ruling class, the Magyars, with no sympathy with the Germans and the German people, are still in a minority, so that this whole empire is a mere polyglot of Europe and becoming this minute a whirlpool; and if there should be an overturning, which is not at all impossible but most probable, it would be not only economic and social but political as well, and I should not be at all surprised to see within the next few days some powerful uprisings. Of course it must be understood the German Army, or rather German officers of the Austrian Army, has control, and will stop short of nothing to suppress it. It will then be a case of the loyalty of the soldier, for without that this country would overturn the house of Hapsburg overnight.

Mr. MEEKER. Mr. Speaker, will the gentleman yield for a question there?

Mr. FESS. Yes.

Mr. MEEKER. Is it the opinion of the gentleman that if such an arrangement should be made, as was suggested by the famous Pole in this country, it would aid in that movement?

Mr. FESS. I think without a doubt it would aid; and not only that, but I think we are thoroughly justified in taking any step that is honorable to lead to that consummation. We would not do it—we would not stir up any unrest—in a country with which we are not at war, but we are justified in stirring up any sort of unrest in our enemy's country. There is no diplomatic delicacy in that, and if we can do this and get the word to them—and Paderewski says it will trickle through and they will get it—it is one of the ways to weaken our enemy, and we ought to do it.

Mr. HAMILTON of Michigan. Has the gentleman anything to say as to what has been done to carry out Paderewski's suggestion?

Mr. FESS. I understand steps have been taken and such units are now being formed and training for such officering has already been undertaken. The gentleman from Pennsylvania [Mr. FARR] so informs me.

I am not speaking of what is being done by other countries of our allies. It is known there are such units on the front already.

Mr. Speaker, I now wish, at the risk of some duplication, to devote some time to a brief statement of the historical development of the situation in the dual monarchy, with special reference to facts which give a basis for a break; also a brief statement of the Balkan problem.

THE CHANGING MAP OF EUROPE.

Austria-Hungary is a dual monarchy made up of the addition of two sovereignties, with all the attributes of control in government—equal save that the common Emperor, either by choice or obligation, resides in the capital of one of them. Each monarchy exercises supreme control over its own affairs, attempts agreement over matters common to both, and is composed of various and diverse peoples subject to the ruling house, but unwilling subjects because of the refusal of either to consult them in matters of the highest interest to them. Austria is composed of three kingdoms, two margraviates, two archduchies, six duchies, two principalities, and two Crown lands. The Emperor, who holds his sovereign position at will and with the consent of none but himself, is head of each of these Provinces, and therefore bears the title "His Imperial and Apostolic Royal Majesty, Emperor of Austria, King of Bohemia, and so forth, and Apostolic King of Hungary." He is the head of a hereditary house, the oldest in Europe. By virtue of this headship all Austria consists of family lands, whose titles date back to the Duke of Alsace in the seventh century. This Empire evolved through conquest and inheritance, through blood and marriage, from a house whose Hapsburg identity began in the ninth century. In those days of Charlemagne, when the Hapsburg family began to receive recognition, there was neither Austria nor Hungary, but all the country now known as the dual monarchy was occupied by Slavs, the original peoples to claim the Danubian country, save a very small portion, which was under Charlemagne, the Teuton. Even that was Slav country, but overrun by the empire builder. By the close of the twelfth century the country now occupied by the dual monarchy was still occupied by Slav peoples with specific territorial boundaries mapped out for the Bulgars, Serbians, Slavonians, Croatians, and Bosnians. Bohemia and Silesia were parts of the Empire of Frederick Barbarossa, as was a mere strip of country then called Austria. At this time the Kingdom of Hungary was between the Kingdom of Poland on the north and the Slav Provinces on the south. The famous fighting tribe known as Magyar, arising out of the east, came pouring in through the Slav countries, until, like a wedge, it drove into the very heart of this early Danubian people, splitting them into two quite distinct peoples from a territorial standpoint, but not racial. Henceforth the Magyar invasion, which established the Hungarian nation in the very heart of this ancient Slav people, permanently divided them into the northern Slav and the southern Slav nations.

A map of this period will show Hungary stretching from Bulgaria to Bavaria and from Bosnia to Moravia. Austria is insignificant, but the Hapsburg House included with Austria the Provinces of Styria, Corinthia, and Carniola. The great Hungarian wedge did not obliterate the independent Slav kingdoms such as Poland, Bohemia, Silesia, Galicia, and Lithuania. However, the Czechs and Slovaks were under the Empire at this time, but did not lose their autonomy. It will be noted the Hapsburg house in the fourteenth century was quite insignificant in its dominions as compared to a later period.

Near the close of the fourteenth century the Servian principalities occupied most of the archipelago between Bulgaria on the east and Dalmatia and Albania along the Adriatic. Turkey in Europe had not yet become a serious reality. The chief country outside of Serbia was Hungary, which stretched from Bulgaria and Serbia on the south to Poland and Bohemia on the north and the Holy Roman Empire on the west, including both Bosnia and Dalmatia. As was said, Austria was a mere spot on the map.

In the time of Charles the Fifth, in the sixteenth century, the Ottoman Empire overran all of the southern Slav countries, which is the beginning of the troublesome Balkan problem never more sensitive than now, and the real cause of the present war. Bohemia joined with Hungary for independence, but the House of Hapsburg, by conquest and heredity, secured a foothold in most of western Europe. This is the one significant fact of this century. It is the beginning of the Bohemian and Moravian persecutions. In the middle of the seventeenth century the Turk extended the Ottoman Empire beyond and including all the southern Slav country, also Hungary and Transylvania, while the Hapsburg House added within its boundaries the kingdom of Bohemia. The Slav, both north and south, became subject, the former to the Austrian control, the latter to the Ottoman or Turkish control. In the eighteenth century the Ottoman Empire was driven back by the Hapsburg power, which then included northern Italy, the southern Slav countries of Croatia, Slavonica, the northern Slav countries of Bohemia, Silesia, and Moravia, as well as Transylvania. Austria and Hungary were at this time as distinct as were the north and south Slav countries. Thus these Slav countries supplied two autocratic nationalities with spoils of warfare as they contended with each other for territory that belonged to neither, except by right of the sword. At the opening of the nineteenth century Napoleon remapped Europe. The Turkish Empire still included the southern Slav countries; the House of Hapsburg was confined to Austria, Hungary, and Bohemia; the confederation of the Rhine occupied what is now Germany, while the empire of Napoleon occupied most of what was left of Europe.

In all these years the various Slav countries, though subject, were ever contending for independence as a right. One hundred years later, at the opening of the present century, the dual monarchy, Austria-Hungary, which assumed this dual character after all Europe had rocked in the revolutions of 1848, was a mere conglomeration of diverse peoples. Neither half possessed the character of national spirit, much less did the Empire realize such character. Austria was made up of Slavs, Germans, Italians, Roumanians, and Magyars. The Germans, less numerous, were nevertheless the ruling element, while the others were unwilling subjects. The Slavs were divided geographically but not otherwise into northern and southern. Among the former, as was stated before, were the Czechs or Bohemians, Slovaks or Moravians, the Poles of Silesia, and the Ruthenians of Galicia, together the larger portion of the population. The southern or Yugoslavs were those in Croatia and Slavonia.

WHY THE SPIRIT OF REVOLUTION?

There never has been a time when the Austrian Government, the most reactionary in modern times, did not face a spirit of revolution surging through the mass consciousness of a subjected people which at all times outnumbered the ruling population. This country at the opening of the war was the overlord of nationalities like the Czechs of Bohemia, the Slovaks

of Moravia, the Poles of Silesia, the Ruthenians of Galicia, the Serbo-Croats of Croatia, all of which as historical entities are vastly older than anything Austrian, save the House of Hapsburg, which originally was foreign to this Empire. To-day Austria is but a vassal of Germany, which may delay the inevitable outbreak of an oppressed people.

These subject people have a passion for nationality that has persisted with a tenacity throughout centuries of torture and oppression that is an abiding wonder. Take Bohemia as one example, a kingdom so powerful as to wage a contest with Charlemagne; a country of which it was said, "The nation that rules Bohemia will rule Europe." This country has been under the heel of almost every autocratic ruling house in Europe; a country which has been the battle ground of religion of all sects, of rival houses in government, of contending nationalities. Over her boundaries have surged back and forth hordes of warlike peoples. The country of the famous John Huss saw a religious war whose severity is not known in civilized history. In 1621 Bohemian leaders were executed, and her constitution was suppressed; her property in lands was handed over to despoilers. All she possessed as a country, save her indomitable spirit, was taken from her. Every effort, ranging from attempted bribery to wholesale murder, was used in efforts running through a period of 200 years to stifle the passion for national independence. But all in vain. How different in the ruling nation. There is not now, neither can there be, what might properly be called a national spirit in Austria. The ruling house is by the power of the sword maintaining the hereditary throne, not by the consent of the people. This house for 12 centuries has been in existence and has maintained its rule by the sword. The system of the electorate, in name popular but in reality a mere farce, is so divided that the landowners absolutely control the nation. The system of education, which saw in 1908 an illiteracy of 40 per cent of her people, was conducted in the interest of Germans, the ruling class. In the dual monarchy there is no such thing as the fatherland or the motherland. The people in Bohemia, Silesia, Moravia, Galicia, Croatia, Slavonia, and Dalmatia have always looked upon Austria as an oppressor which denies to peoples of strict national entities older than the Empire the most sacred and inalienable rights, such as the use of their own language, their style of worship, their peculiar habits of thought as expressed in dress and various customs, and their independence in government. These Provinces possess national passions all at variance with autocratic government, while the Empire exercises power usurped by the sword against the will of these oppressed people—a condition which compels a chasm impossible to bridge.

This situation explains the recent reference of the premier of England when he said:

> Although we agree with President Wilson that the breaking up of Austria-Hungary is no part of our war aims, we feel that unless genuine self-government on true democratic principles is granted those Austro-Hungarian nationalities who have long desired it, it is impossible to hope for removal of those causes of unrest in that part of Europe which so long have threatened its genuine peace. The right of self-government should apply to enemy as well as friend. On the same ground we regard with vital satisfaction the legitimate claims of the Italians for union with those of their own race and tongue. We also mean to press that justice be done to the men of Roumanian blood and speech to their legitimate aspirations. If these conditions were fulfilled Austria-Hungary would become a power whose strength would conduce to the permanent peace and freedom of Europe instead of being an instrument of the pernicious Prussian military autocracy.

It is to this situation the President referred when in his war aims he said:

> The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development.

One year ago when Lloyd-George spoke of the aims of the allies he used specific language touching these peoples, in which he declared these aims include "the liberation of Slavs, Italians, Roumanians, and Czechoslovaks from foreign domination." This is the oft-repeated demand of the allies, of self-determination in matters of the government of a people.

DEMANDS OF THE OPPRESSED PEOPLES IN AUSTRIA.

These subject people, who far outnumber the ruling people, and by race, religion, and language are differentiated from them, constantly persist in certain well-defined demands. They ask for their liberty and political independence, that they may form their ideal federation, in which the genius of each people might develop along its own national trait and passion. Among these peoples are to be found various differences in religion. They demand the right to worship according to their light. They demand the right to the adoption and free use of their own tongue, which would enhance their intellectual as well as commercial intercourse. They have an ambition for a native literature couched in the language of their fathers. They naturally wish to be free to announce and espouse such political philosophy as their forward-looking men might wish to develop. Their views of democracy, which would naturally be averse to monarchy, should not be suppressed, they claim, simply because it may not be acceptable to a ruling class whose position is attained by birth and by the consent of no one. These people for centuries have been more or less communistic, which principle tenaciously adheres to them.

They demand this custom, which has become law to them, shall not be denied by a ruling power entirely foreign in sympathy with these national traits. These foregoing demands have grown into a passion with most of the population of the monarchy, while, on the other hand, Austria-Hungary as a ruling power has no sympathy whatever with the various claims of these subject people who make up at least 60 per cent of the Empire, and most of whom are Slavs. Even in Hungary the half of the Empire generally regarded more modern has followed the lead of the Austrian half. The Magyar, the ruling element in Hungary, is less autocratic than the German, the ruling element in Austria. Yet in the former oppression is evident.

As will be recalled, all this territory was once occupied by the Slavs. When the Magyars drove a wedge into the heart of the Slav territory and thus definitely separated it into the northern and southern Slav countries, they succeeded for the time in preventing a great Slav kingdom in the Danubian country by weakening national defense. In the northern the oldest inhabitants, independent politically, were overrun by Teutons and Magyars, and thus became subject, but they never lost their identity. The southern or Yugo-Slavs were partially overrun. However, the Serbian, Montenegrin, and Bulgarian—the Roumanian were not Slavs—successfully resisted both Teuton and Magyar control, but all except Montenegro suffered Turkish conquest.

THE BALKAN SITUATION.

This at once opens up the Balkan situation, which is by far the most complicated, as well as the most sensitive, issue in European politics. A careful examination will explain why any disturbance in this quarter of the world compels all Europe to hold its breath until quiet is restored. Here is the real whirlpool of Europe. It is the receptacle which became a veritable vortex into which was poured, in ages past, an assortment of almost every people of the world. The Romans and Greeks from the west; the Slav, the Bulgar, and the Hun from north and east; the Goths, the Visigoths, the Vandals, the Lombards from the north and west; and the Turks from the southwest. Here were traces of the Semitic tribes from the Levant. In this peninsula were found Romans, the Goths and Huns, the Tartars and Slavs, the Serbs and Bulgars, the Saracens, the Turks, and the Normans. This peninsula was the meeting place of streams of population from every quarter. Through it have poured streams of national force, representing every phase of religion, every form of government, every system of trade, and many cults of a complicated civilization. It was the track of the invader from north, east, and west and the scene of many a racial conflict. It has been the battle ground of ideas as well as armed forces. Among its people to-day can be noted a unity in a great variety. There have survived here a people of common characteristics yet widely different. The Greek in Greece, the Slav in Serbia, Montenegro, and Bulgaria, and the Roman in Roumania. Yet in some ways Bulgaria is closely related to Turkey, while Montenegro and Serbia, somewhat influenced, never had sympathy with either Turkey, Rome, or the Teuton, but always Slav. Dalmatia, Italian in sympathy, but subject to Austria, has ever been, and will continue to be, a bone of contention until allowed to select its allegiance. These are the scenes where have been fought the age-long battles for autonomy against Turkish conquest on the one hand and Teuton-Magyar invasions on the other. Being Slav, Russia has kept a watchful eye over them, urging a union or at least a Balkan federation in spirit if not in form. To Russia more than to any other country is due the spirit of a Balkan union. The purpose is apparent to all students of nation building. There must not be an unfriendly power between the Russian Empire and the Mediterranean waters.

It has been apparent for years that Germany and Austria have looked to an outlet to the Mediterranean. It is but a part of the famous Mittel-Europia ambition of the Teuton, so prominently stressed just now. Turkey has long held the Dardanelles, which closes out Russia. The Slav Provinces lie in the way of the Teuton's march on Macedonia and bar him from the Mediterranean except via Dalmatia, nominally a kingdom of Austria but Italian in character, which lies west of Bosnia, a Slavic people, but in governmental control belonged to Turkey. In the seventies Austria was allowed, without the consent of Bosnia, to occupy it by a military force. This Teuton aggres-

sion by agreement with Turkey, but against the wishes of both Bosnia and the Slav interests, pointed to the Teuton movement and future trouble with Russia. Later, when Turkey had her troubles with the Balkan States, which was almost perennial if not unceasing, Austria took advantage of the situation and annexed both Bosnia and Herzegovina to her domains. This was regarded as wholly without right or justice to the people of these Slav areas, and conclusive of the purpose of enlarging her dominion and a step nearer to the Teuton goal—the Mediterranean. Had the spirit of union in the Balkans been strong enough to overcome the state of jealousy among them this Austrian conquest would not have occurred. In 1914, when Austria, because of the assassination of her heir in the capital of Bosnia, demanded of Serbia to permit an army to cooperate in the suppression of alleged rebellious juntas within Serbian territory, the real purpose to place an Austrian army in Serbia could not be misunderstood, in the light of her aggression two years before. It was obvious; hence Germany's interest on the one hand and Russia's on the other in Austria's ultimatum to Serbia. This unfortunate peninsula, which has been watered by the best blood of the various peoples of the Old World as the early hordes marched to and fro, now as conquerors, then as conquered, is still holding the attention of the world. For ages Turkey yearned to cover it with Moslem authority. She enjoyed a success for years, only to lose out for all time to come.

Russia in her laudable ambition to reach the sea has maintained a consistent purpose to insure a Balkan federation of Slav nationalities strong enough to resist aggression from whatever quarter, and thereby insure a friendly connection with Mediterranean people.

England, ever watchful over her interests on all seas, and especially the Mediterranean, desired a Balkan group strong enough to stay the southern wave of Teuton ambition, on the one hand, and to maintain a balance between them and Turkey, that the latter may remain the keeper of the gateway from Asia to Europe. Her control of Constantinople was preferable, since it was safer in the hands of a second-rate power than in control of a first-class power, as either Russia or a Teutonic nation.

This accounts for England's attitude of friendship for Turkey in Europe throughout the past 100 years.

Hence, when Austria announced her indefensible ultimatum, which in effect was a declaration of subjection of Serbia to Austria, Germany was interested in the success of her ally, while Russia was alarmed for the same reason. Hence the rapid succession of military events and the world-wide confusion over war's alarms.

Mr. Speaker, I did not mean to discuss at this time the Balkan situation, although it is the heart of world war at its inception. I desire to do no more here than to throw light upon the unhappy subject people of the dual monarchy, that we may do justice to that portion of them who reside within our borders, and who at the earliest opportunity entered the Army to fight against their oppressor from whom they fled to seek shelter in America. They are not only fighting for America but against their oppressor, for the liberty of their people still under the yoke of bondage. This situation indicates Austrian disintegration. There is an ominous unrest among the subject people of the dual monarchy, because they are without freedom in an empire that now has become doubly oppressive since its population is totally under the Germans, whether in Austria or Hungary. Hundreds of thousands of these dissatisfied people have in years past left their homes to find a haven in America. The census of 1910 gives 2,702,000 people in our country from Austria alone. They represent more than half the population of the empire, charged with the same national instincts. Many of those who came here entered the ranks of the allies to fight the enemy of their people. To-day there is a Bohemian army of not less than 120,000 somewhere in line. Whatever significance can be attached to the general uprisings now in the dual monarchy it is not too much to say that Austria must break. She is ruled by one family instead of by 10 nations, of which she is to-day composed. Who can tell the effect upon these subject people of the knowledge if it can be gotten to them of an army of their countrymen in ranks fighting for their liberation?

Mr. Speaker, anyone conversant with the history of this reactionary nation and the treatment of the majority of the people within her domains, all of whom are denied their liberties, must conclude that one result of the war must be a complete emancipation of these peoples from the yoke of the Hapsburg oppressor. We may see this accomplished yet by those of the oppressed.

AGRICULTURAL APPROPRIATIONS.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919; and, pending that, I would like to see if we can not come to some agreement about the time for general debate. What suggestion has the gentleman from Iowa to make?

Mr. HAUGEN. I have enough requests here to take about six hours to accommodate. They are very urgent requests, and if it is possible to accommodate them I hope it will be done. It would require six hours.

Mr. LEVER. On that basis it would take 12 hours' debate. I do not think we should have that much debate.

Mr. HAUGEN. I appreciate that that will require a great deal of time, but I was stating the fact.

Mr. LEVER. I will say to the gentleman from Iowa that I myself have many requests for time, but I have been informing those who have made the requests and those to whom I have promised time that we ought to reduce it somewhat. I wonder if the gentleman could not get along with two and one-half hours?

Mr. HAUGEN. That would be more than cutting the time in two. I may say that much of the discussion on this side is going to be devoted to the bill by members of the committee and other Members who have given a good deal of study to certain of its provisions. For that reason I think they should be accommodated, because there will really be no time lost. The time will be consumed in the five-minute debate, if not given in general debate.

Mr. LEVER. If we are willing to be a little more liberal in the matter of time, would the gentleman be willing to agree that the general debate shall be confined to the bill?

Mr. HAUGEN. I do not think so. That would be to change the rule entirely. I do not think we ought to change the rule. We ought to adhere to the rule and expedite matters as far as possible. I am perfectly in sympathy with the gentleman in his desire to expedite the passage of this bill. I am perfectly willing, as far as I am concerned, to meet at 11 o'clock and run these debates along in the evening, or do anything to expedite the passage of the bill; but I believe we can do it by accommodating the gentlemen who have requested the time.

Mr. GILLETT. I suggest that we meet at 11 o'clock to-morrow morning for general debate. I do not think there will be any opposition on this side. I would not like to have the House meet at 11 o'clock under the five-minute rule, but for general debate I do not think there would be any objection.

Mr. LEVER. Let me make this suggestion to the gentleman from Iowa: It is now 10 minutes after 1. If the House stays in session until 6 o'clock this afternoon and meets at 11 o'clock to-morrow morning, will the gentleman agree that the general debate shall continue during the day and for two hours to-morrow? That would give about seven hours' general debate.

Mr. HAUGEN. Much of that time might be consumed in roll calls and one thing and another; and if so, Members would be deprived of the privilege.

Mr. LEVER. I take it that the roll calls would not be taken out of that time. I meant two solid hours to-morrow for debate.

Mr. HAUGEN. I think the best way and the proper way would be to fix the time.

Mr. LEVER. I would much prefer to do that, myself.

Mr. HAUGEN. Is it possible to arrange for 10 hours, to cut the time down to five hours on each side?

Mr. LEVER. I think we can get along with seven hours on this proposition, the gentleman taking three and a half and I the same.

Mr. HAUGEN. As I have stated, I have requests for six hours, which would require 12 hours, 6 hours on a side. Cutting it to three and a half hours on a side, of course, is cutting the time nearly in half, and the requests which I have for time are urgent.

Mr. LEVER. Would the gentleman be willing to begin the general debate now, run it until 6 o'clock, and commencing at 11 to-morrow, run the debate until 3 o'clock in the afternoon?

Mr. HAUGEN. I think the proper and usual way is to agree on a certain number of hours.

Mr. GILLETT. That would be practically 10 hours. I think we would agree to that, and begin at 11 o'clock to-morrow.

Mr. HAUGEN. I think I can arrange with some of these gentlemen to cut down their time somewhat and probably can get along with five hours; but I really believe we will make time by agreeing to five hours on a side.

Mr. LEVER. I agree it is always much better to fix the time for general debate.

Mr. GILLETT. I do not think we ought to set an hour to-morrow for the closing of general debate, because then roll calls or conference reports or any unexpected thing which might come up would be taken out of the time.

Mr. LEVER. That is the point I am making. I prefer to fix so many hours for general debate.

Mr. GILLETT. Yes.

Mr. LEVER. And I suggest to the gentleman eight hours for general debate.

Mr. KITCHIN. That is practically two days.

Mr. LEVER. That is practically two days.

Mr. HAUGEN. After conferring with my colleagues, I will compromise on nine hours.

Mr. LEVER. I have compromised myself, from five hours to eight.

Mr. WALSH. Will the gentleman yield?

Mr. LEVER. I yield to the gentleman from Massachusetts for a question.

Mr. WALSH. What is the reason for this apparent desire for haste on this measure? Are there any other important appropriation bills waiting for action?

Mr. KITCHIN. The diplomatic and consular appropriation bill.

Mr. LEVER. I understand the diplomatic bill is ready, and that the legislative bill is practically ready.

Mr. STAFFORD. If the gentleman will permit me, the subcommittee framing the legislative, executive, and judicial appropriation bill will not conclude their hearings for several days to come.

Mr. LEVER. Of course, the gentleman understands that it will take several days to pass this bill after we get into the consideration of it under the five-minute rule. I understand the legislative bill will be ready for consideration after the diplomatic bill.

Mr. KITCHIN. And the diplomatic bill will be ready immediately after this bill.

Mr. LEVER. I hope the gentleman will agree to the eight-hour proposition.

Mr. HAUGEN. It really can not be done. I do not think we can expedite the passage of the bill by agreeing to that.

Mr. KITCHIN. I suggest to the gentleman that it does look like we ought to get through with the general debate certainly by to-morrow night. Let us agree to conclude it to-morrow.

Mr. HAUGEN. That is all right.

Mr. WALSH. The time to be divided equally.

Mr. GILLETT. And meet at 11 o'clock to-morrow.

The SPEAKER. What is the request? Has the gentleman from South Carolina any request to make?

Mr. LEVER. Mr. Speaker, I am trying to confer with the numerous gentlemen around me here, to see what is the best request to submit. I suggest to the gentleman from Iowa that we agree to conclude the debate before the House adjourns to-morrow.

Mr. GILLETT. And meet at 11 o'clock to-morrow morning.

The SPEAKER. We have not got any unanimous consent to meet at 11 o'clock.

Mr. LEVER. I am going to make that request now.

Mr. ALEXANDER. Mr. Speaker, our Committee on the Merchant Marine and Fisheries are having some very important hearings, and they meet at 10.30. If they come here at 11 o'clock they will have to discontinue the committee meeting. We have a very important hearing set for to-morrow morning. If you are going to consume two days in general debate, I do not think that you ought to interfere with the other business of the committees of the House.

Mr. GILLETT. I agree with the gentleman from Missouri that I would not agree to come in at 11 o'clock except for general debate.

Mr. ALEXANDER. If the general debate is illuminating, the Members of the House ought to hear it, and if it is simply bunk, you might as well cut it out. [Laughter and applause.]

Mr. LEVER. Mr. Speaker, I ask unanimous consent that general debate shall continue until the House adjourns to-morrow; that the time be equally divided between the gentleman from Iowa, Mr. HAUGEN, and myself, and that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. The gentleman from South Carolina moves that the House resolve itself into Committee of the Whole House on the state of the Union, and pending that he asks unanimous consent that general debate end when the House adjourns to-morrow; that the House shall meet at 11 o'clock to-morrow, and the time shall be equally divided between himself and the gentleman from Iowa [Mr. HAUGEN.] Is there objection?

There was no objection.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CRISP in the chair.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to dispense with the first reading of the bill.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to dispense with the first reading of the bill. Is there objection?

There was no objection.

The CHAIRMAN. Under the order of the House, the time is to be equally divided between the gentleman from South Carolina, Mr. LEVER, and the gentleman from Iowa, Mr. HAUGEN.

Mr. LEVER. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio, Mr. SHERWOOD.

Mr. SHERWOOD. Mr. Chairman, after listening to such a powerful, such a lucid, and such a valuable address as we heard from my distinguished colleague from Ohio, Dr. FESS, I thought that perhaps your minds might be relieved by something in a lighter vein.

At the very outset of this great world war we find ourselves short of both cavalry, artillery, and general-utility horses. And all our so-called military experts concede the absolute necessity for cavalry on the flanks of an army or to cover a retreat. In the Boer war, in South Africa, the most expensive aggressive war of conquest Great Britain ever made in a century, the lack of cavalry to fight the Boers, who were all mounted on fleet-footed ponies, cost Great Britain more lives of soldiers and more money than all the 42 wars waged during the entire eventful reign of Queen Victoria.

To-day we are seriously hampered in our war preparations for lack of horses, and that demand can not be supplied. It was claimed by most of our so-called military experts, at the time the United States entered the war, that the aeroplane would take the place of the mounted soldier; but now the demand for cavalry is universal. In a recent number of the Breeders' Gazette, one of the oldest and ablest stock-farm journals published in the United States, I find an editorial voicing the immediate demand for cavalry in order to win the war. From time immemorial it has been the swift mobilizing cavalry that has won battles in the critical crises of wavering battle lines. This was a vital lesson we learned early in the first battle of the Civil War, when a charge of the Black Horse Cavalry of Virginia put to rout a superior force of Infantry in the first Battle of Bull Run.

And in the two-years war in South Africa, England learned a severe lesson of humiliation when 7,000 Boer farmers, mounted on Boer ponies—and neither Boers nor ponies ever saw the inside of a military academy—caused the retreat across the Tegula River of 42,000 trained veterans of England, commanded by the widely renowned Gen. Buller.

And in the present world war it was the Italian Cavalry, covering the retreat of the Italian Army from the Austro-Hungarian border to the Piave River, that saved the bulk of that army and the most valuable of artillery and stores and munitions. Not only are we short of artillery but of men trained to take care of horses.

An up-to-date high-rank Army officer recently said:

> The man who knows how to take care of animals in this country has become very scarce. We must provide thousands of men capable of taking care of animals and who can shoe a horse, drive a team, and adjust a pack saddle. You can not train a horseshoer in less than four months; you can teach a man to pack or drive a team in about two months. Without horseshoers, packers, and teamsters we can not have an army. The men who handle machine guns will be of little service unless they are taught to take care of mules. Without teamsters we can not have an army.

We know how all the high authority—machine-motor experts—have been indulging in big display-line prophesies of a horseless age. We remember vividly of the many predictions of the machine and chemical laboratory war prophets of a horseless war; that the experts in the bird-flying aeroplanes, dropping the awe-provoking bombs, would do the terrible work on the flanks and in the rear of a hostile army, with no further use for the cavalry horse, whose swiftness in battle is conceded to be five times the velocity of a foot soldier.

This is my excuse to-day for exploiting the horse. Our shortage of the speed horse, the saddle horse, and the general utility horse is largely due to hostile legislation against horse racing, the most alluring, recreative, and wholesome of all the outdoor sports and pastimes. Legislation that has financially ruined and driven thousands of expert breeders out of business; leg-

islation aimed at so-called gambling on the pastime, with the inevitable result that we have inaugurated prize fighting, the most brutal and degrading of all the pastimes of the people, with the nose smashers and rib crackers of the prize ring masquerading as our theatrical stars, and gambling on ring contests and football and baseball and election contests increased tenfold. [Applause.] This is my excuse for exploiting man's best animal friend in all the avenues of life, in history, in chivalry, in the holy crusades, and on the red fields of war.

WHY GOD CREATED THE HORSE.

In the domain of the utilities, in the more esthetic field of the recreations, in poetry and song and sculpture, and on the red fields of war the horse, since creation's dawn, has been the omnipresent companion and helpmate of his master—man. Let us now scan the law of the inevitable—the natural loves and instincts of man as illustrated by all history. From the ancient Pharaoh of the Exodus to Gen. Phil Sheridan, the horse has shared the honors of war, the glamors of love, the wild witchery of chivalric tournament, and the gloom and glory of all the crusades, Christian and Mohammedan. [Applause.]

THE HORSE IN THE EARLY CRUSADES.

A thousand years before Christianity began the horse was one of the most potent deities of the weird and fascinating religion of the pagan world. The history of his achievements covers three continents and runs through 10 portentious centuries of triumphs, wars, and conquests.

As a potent missionary of the Christian religion, the horse was first conspicuous at the close of the eleventh century. At the Council of Clermont in 1095 Pope Urban II, in the spirit of religious fanaticism, called upon the church to rescue Jerusalem and recover the Holy Land. This great appeal started the holy crusades that continued over 200 years and at one time involved all western Europe.

The first crusade (1069–1099), organized by that great plebeian, Peter the Hermit, failed because they had no horses. Nearly all his soldiers were slain by the Mohammedan Turks in Asia Minor. The second crusade, organized in 1097, was led by Knights of the Holy Cross; and no soldier could be a knight who was not mounted, and he must also be a horseman, strong enough to wear steel armor and to wield a broadsword. On June 7, 1099, 20,000 of these crusaders reached the Holy City, Jerusalem. After a five weeks' siege the city was captured by a cavalry charge of the most reckless daring. Godfrey, the leader, wrote home as follows:

In Solomon's Porch and in his Temple our knights rode in the blood of the Saracens up to the knees of their horses.

The seventh and last crusade did not end until 1272, and while I am not here to say that the mounted cavalier with sword and spear was the true follower of the lowly Nazarene, the mailed knights of the Middle Ages were the avant couriers of that kind of Christian civilization that dominates all Europe to-day, and it is getting a firm grip on the United States.

In discussing the moral influence of the crusades, that eminent scholar and poetist, Daniel Coit Gilman, president of Johns Hopkins University, says:

The constant contact for two centuries with the more advanced Byzantine and Arabic culture taught the crusaders many lessons in civilization.

So much for the horse of chivalry in advancing Christian civilization in Europe.

THE HORSE IN NEW WORLD HISTORY.

In the New World the horse has been a much more potent and pervading force than in the old in the evangelization of the idol worshipers of the western continent. Hernando Cortez, the conqueror of Mexico, as an anointed Knight of the Cross, could never have subdued the fierce and warlike Aztec nation without the Spanish war horse of the sixteenth century. It may not be known that the entire force of Cortez when he successfully captured the strongly fortified City of Mexico was less than 1,000 Spanish foot soldiers and only 87 splendidly mounted knights riding powerful Spanish horses, incased in steel armor. The Aztec warriors had never before seen a horse, and they regarded him as a supernatural terror—death dealing and irresistible.

The history of the conquest of Mexico reads like an Arabian Nights' tale. Though Hernando Cortez had only a few hundred men, in two weeks after entering the capital of the warlike and powerful Aztec empire he captured the holy sovereign, Montezuma, and took possession of the Aztec treasury, valued at six and a half million dollars, and all of Montezuma's ministers.

And what Hernando Cortez and his cavaliers did to the Aztecs of Mexico a still more daring knight and horseman, Francisco Pizarro, did to the prehistoric Incas of Peru in 1535; and he did it with his knights on horseback in armor of steel.

THE HORSE IN SACRED HISTORY.

In all religions the horse has ever been an omnipresent factor. The fascinating mythology of the Greeks, a race, in their prime, foremost in art and civilization, is full of the horse.

The Mohammedan religion is also toned by the horse. Borak was the milk-white horse that had the wings of an eagle and a human face. He carried the prophet Mohammed from earth to the seventh Heaven. And the seventh Heaven, in the Mohammedan religion, is the dizziest parlor in the top mansion of the blissful skies. The name is Arabic, meaning the lightning.

Haizum was one of the horses of the archangel Gabriel. Read the Koran and you will see. Hrimfaxi is the horse of night, from whose bit fall the "rime drops," which every night bedew the earth. This is found in Scandinavian mythology.

If you will look to Revelation you will see that it is the pale horse upon which death rides, and as death ends all in this world I will here end my story of the horse as a Christian missionary, with a cheerful remembrance from the Old Testament prophet, Elijah—second book of Kings:

And it came to pass, as they still went on and talked, that, behold, there appeared a chariot of fire and horses of fire and parted them both asunder, and Elijah went up by a whirlwind into Heaven.

It is evident without the horses Elijah would never have reached that lofty altitude. [Laughter and applause.]

THE HORSE IN CHIVALRY.

Chivalry derives its name from the French word "cheval," a horse, and the word "knight," which originally meant boy, was subsequently applied to the boy when he was able to mount and successfully manage a horse. In the so-called age of chivalry the mounted knight was in war at the service of his sovereign or chief, and in peace he graced the court as the gallant of the ladies in the castle, where he shared the banquets and participated in the jousts and tournaments with which the bravest of the brave cheered their leisure.

TOURNAMENTS ORIGINATED IN FRANCE.

The tournaments of the knights on horseback, in steel-clad armor, originated in France. They were organized to kill time in times of peace, and against the protest of the clergy. Afterwards and during the so-called holy crusades—in the battles of the centuries—of the cavaliers of the Cross, against the legions of Mohammed, the clergy indorsed and encouraged the crusaders.

HOW CHIVALRY HUMANIZED WAR.

The age of chivalry was an age of fierce adventure; and long and bloody wars, in which the horse was the chief factor; but it humanized war, inaugurated knightly honor, and did much to eliminate the brutal instincts which before had found vent in the butchery or slavery of soldiers captured in battle. Knightly honor, the growth of chivalry, forbade a knight to kill another knight when he was unhorsed or had dropped his lance or called for mercy. Chivalry also did much to elevate woman to her true place as the equal companion of man. And it was distinctly forbidden in all the jousts and tournaments where knights fought on horseback to even wound a horse. In fact, the horse was the true badge of a knight. No villain or serf was ever allowed to ride on horseback or carry a lance. The horse in the chivalric age did for knightly conduct what the horse of pagan civilization did toward humanizing the Romans. When Nero sat above Rome Christian martyrs were taken to the arena to be devoured by wild beasts, caught in the German forests, in the applauding presence of the Roman populace. Later, under the Emperor Augustus, under a gentler and more benign civilization, the chariot races, in which the horse was the main factor, supplanted the brutal bouts in the bloody arena. And in the age of chivalry the horse did for Christian civilization what the chariot races did in Rome for pagan civilization. He made mankind better and more humane.

WHAT CHIVALRY HAS DONE FOR LITERATURE.

The history and traditions of the age of chivalry have enriched all modern poetry and literature. The history of chivalry is a rich storehouse of poetic material that all our modern poets have used generously to glamour and allure both fiction and poesy. Spencer, Sir Walter Scott, Longfellow, and Tennyson have drawn plots, romances, and poems liberally from chivalry, but none so successfully as Lord Byron and Washington Irving. Next to Waterloo, Byron's most thrilling dramatic poem is "Mazeppa," in which the wild horse of the Ukraine is the leading factor of the poem. Few students of English literature know that Mazeppa, lashed naked to the back of a wild horse, was a real historical character and not a fictitious hero born in the brain of the great poet. "Mazeppa," the poem, was drawn almost literally from history. Mazeppa was a knight of chivalry.

He was born in 1645 and had a knightly pedigree, standard through both sire and dam.

THE MODERN POETS EXPLOITED HORSE HEROICS.

All the poets of modern times put horses under their heroes. King Richard III, according to Shakespeare, offered his whole kingdom for a horse after his game steed fell dead on the bloody battle field of Bosworth. He could not get another horse on his offer, and thereby lost the battle and the crown, and the blood of Plantagenet was dried up forever, and the blood of Tudor came in to rule England, all for lack of a horse.

All the standard English poets were horse fanciers. Sir Walter Scott, in immortal Marmion, puts into Lady Heron's sweet mouth the story of "Young Lochinvar," one of the most thrilling musical gems in the English language. And young Lochinvar's horse is the supreme factor of the escapade. You remember when young Lochinvar stole away the bride that was about to wed "a laggard in love and a dastard in war" he caught her on the home stretch, and throwing her willing form behind his own, astride his prancing steed, while two pair of chivalric legs were thrilling the throbbing ribs of his game flier, the lads and lassies of the laggard bridegroom had no steeds fleet enough to follow, and young Lochinvar got away with everything. [Laughter.]

Even Tennyson, late poet laureate of England, with all his finical, fine ladyisms of versification, occasionally braces up into the robust heroic when he mounts the English thoroughbred. He does this in "Locksley Hall," but his best effort by far is "The Charge of the Light Brigade." But Tennyson is hardly in the same class with Sir Walter Scott. In all the minstrelsy of Scott the horse always comes in to gild the heroics, whether he sings of love or war.

And the finest dramatic poem of our great Civil War is "Sheridan's Ride," written by our Ohio poet, T. Buchanan Read, in which the horse is the hero, because without that game flier Sheridan could never have turned defeat into victory in that immortal 20-mile ride from Winchester to Cedar Creek. Have you ever stopped to think what would have become of our Army that critical day had Sheridan attempted that perilous ride in an automobile with a busted tire. [Laughter.] Could he have inspired the boys with courage anew sitting in a pulseless machine, even without a busted tire, instead of the black charger, that with foam on his flanks and nostrils red as blood and eyes flashing fire carried the courage of his great master into the hearts of the musketeers.

THE TROUBADOURS AND THE HORSE.

In the songs of the troubadours the horse is everywhere sung. Many of these songs were written by women. The troubadours were the offspring of chivalry. They first appeared in France in the eleventh century and sung their last lyric poetry in Spain in the fourteenth. The troubadours composed and sang songs, and one of the accomplishments was to play the harp or make melody of the feline intestines over the bridge of a guitar. They were the inventors of lyric poetry, devoted entirely to sentimentalism. They were often mounted when attached to courts of princes and nobles, and they sang praises to the gallantry of knights, and often indulged in rustic rhymes on the degeneracy of the clergy. Our own Washington Irving won his greatest fame in fiction imbibing the lyric songs and romances and wild witching tales of the Moslem Moors. Lyrics once sung in the subtle moonlight to the black-eyed daughters of Andalusia, who danced in the orange groves of the Gaudalquiver in the heroic age of Moorish chivalry. [Applause.]

None of the historians are able to tell when the domesticated horse was first ridden by barbarous man, as he is now ridden to death by the soldiers of Europe in the pending war.

The ancient Egyptians, the Assyrians, and the Hittites all used the horse to war chariots, and later the Etruscans and Greeks in chariot races and triumphal processions. Neither did the ancient Egyptians ride horses. We first meet with a notice that the horse was ridden among the Greeks of the Homeric period. Just when Homer lived and loved and sung no one knows, but Herodotus, the oldest of the Greek historians, places Homer's fitful days on earth as 400 years preceding his own, and we read that Herodotus was cavorting around the ancient cities of Memphis, Heliopolis, Athens, and Babylon about 430 years before Christ. There were no metropolitan daily papers or horse papers in those desperately wicked old times in Babylon, and it is nowhere recorded how Herodotus was mounted, or whether he was mounted at all.

THE HORSE IN MYTHOLOGY.

Scandinavian history is full of the horse and so is Scandinavian mythology. Abakur, the favorite war horse of King Sunna, was so called because the word Abakur means in the Scandinavian language "A hot one." Hence the term "hot stuff," as applied to-day to an extreme speed trotter, may be a term of Scandinavian origin.

Arion, which is the Greek for war horse, was also a flyer. He was the horse of the giant Hercules, given to Adrastos. He ran with incredible swiftness, and this is why the Greeks deified him.

And the fascinating and picturesque and mysterious religion of ancient Hindustan is full of reference to the horse. The marvelous prophet Buddha was the greatest horseman of his time. His favorite horse was Kantaka, a pure white stallion, that is thus described in the "Sacred Books of the East." "A gallant steed, white as the foam of the sea, full maned and flowing tail. Head like the king of parrots, belly like the deer, breath like the dragons, wide forehead, claw-shaped nostrils, and eyes like the gazelle."

After the lapse of over 25 centuries Buddhism still stands first among the four great religions in the number of its devotees.

Our Aryan ancestors on the plains of India sang the Vedic hymns even before the epics of Homer, celebrating the horsemanship of the Greeks and Trojans, before they were voiced by human speech. The Vedic gods are thus sung: "Riding in chariots, charged with lightning, resounding with beautiful songs, and winged with horses."

Ancient Rome was also aglow with the war horse, even back to the dimmest of her early days. Incitatus was the favorite war horse of the cruel Roman Emperor Caligula. He made him both priest and consul, and he had an ivory manger and drank wine (as did priest and consul) out of a golden pail. The word Incitatus, in stately Latin, stands for "Spurred on." Evidently he had speed.

Celer, the favorite horse of the Roman Emperor Verus, was fed on almonds and raisins and covered with royal purple and given a marble box stall in the imperial palace. Bucephalus, the favorite horse of Alexander the Great, would allow no one to mount him but his royal master, and to him he would always kneel. Alexander built a city for his mausoleum, which he named Bucephala in his honor.

Flying Pegasus was one of the most brilliant of the Greek gods. Pegasus is represented as a winged horse that was always fed and watered by nymphs at springs and fountains. He was the genius of poetic song and always appeared to the Greek poets as the inspiration of the dizziest poetic effort. It was the beautiful goddess Eos or Aurora, the personification of the morning dawn, "who shot the Orient through with gold," called by Milton the "rosy-fingered morn," that rode the winged horse Pegasus. She rode him in the rosy blush of morn from the earth to high Olympus, the home of all the gods.

We learn that the god Neptune controlled all the waters of the great ocean (the Mediterranean sea being the only ocean the Greeks knew) and that he created the horse. Homer in his Iliad sings of Neptune thus: "He yokes the chariot his swift steeds, with feet of brass and manes of gold, and himself (Neptune), clad in gold, drives over the waves."

Prof. Murray's Manual of Mythology, speaking of Neptune and his sea horses, says: "The sea rejoices and makes way for him. His horses speed lightly over the waves and never a drop of water touches the brazen axle."

This seems like an improbable horse story, but no more improbable than "Billy" Sunday's statement that he has driven the devil out of Washington. [Laughter and applause.]

THE HORSE IN THE RECREATIONS.

For nearly half a century nearly all our preachers with a few notable exceptions, Rev. Henry Ward Beecher and Rev. T. Dewitt Talmage, have been denouncing horse racing as immoral and have been largely instrumental in putting this wholesome and recreative pastime under the ban of hostile legislation.

A very eloquent Chicago preacher, good intentioned and on the right track in denouncing an extravagant champagne supper of the "400" after the horse show, charges the horse show with the dissolute innovation. Here is where the learned divine is unlearned. The banquet after the horse show is not new, neither is there anything particularly new in the horse show. The modern horse show is a very old love that has come back in different guise and environment. And the afterfeast of the so-called swell set, with the effervescent spirit in the champagne, is not new. Over 20 centuries ago in Rome, after the victorious charioteers had put away their billhooks, the Roman senators and consuls and captains of the Pretorian guards, who had won coin on the races, stamped with the phiz of Caesar, adjourned to the room Apollo, where feasts were spread more lavishly than any dilettant midnight supper of our "400" after the horse show. Lucullus, a Roman consul, not half as well fixed as either the Morgans or Armours, or even Thomas W. Lawson, gave a wine supper to the conquering soldier Caesar

and the more pompous Pompey, in which the brains of 100 peacocks and 500 nightingales were served as a delicacy in the room Apollo, and his wine bill alone was $6,500. If our Chicago preacher has said that human nature has changed but little since the pagan world of 2,000 years ago, so far as the habits and tastes of notable men are concerned, he would have come nearer to the bull's-eye. [Laughter.]

MOST FAMOUS WAR HORSES.

The Assyrian sculptures are the most ancient and are estimated to date some 4,200 years before Christ. And these sculptures contain more representatives of horses, caparisoned and equipped to ride than of men.

THE FIRST VERIFIED WAR HORSE.

The first real horse that is fully verified as a war horse, or a horse of the heroics, is Bucephalus, the favorite war horse of Alexander the Great, who was born 325 years before Christ. Evidently the Macedonians were breeding horses for quality, as Plutarch, one of the earliest of reliable historians, says that Bucephalus was offered to King Philip, the father of Alexander the Great for 13 talents, or $12,590. It is not my purpose to mention any of the famous war horses of the pagan world, except to note the fact that Bucephalus was the first war horse of heroic quality to get into current history.

THE HERO HORSES OF MODERN WARS.

Let us now skip 2,000 years of man's constant warring, including the so-called age of chivalry, and start our brief story of the horse heroics with the dying years of the eighteenth century.

If I should name six of the most famous hero horses of the nineteenth century, I would mention Marengo, the favorite war horse of Napoleon; Copenhagen, the favorite of the Duke of Wellington; Cincinnati, the famous war horse of Gen. Grant; Traveller, the noted war horse of Gen. Robert E. Lee; Lexington, the horse Gen. Sherman rode on the Atlanta campaign; and Winchester, the game and fleet black stallion that carried Gen. Phil Sheridan from Winchester to Cedar Creek, 20 miles, that gray October morning in 1864. Winchester has the unique distinction of a continental commemoration in a dramatic war poem, and the further distinction of having his master for a biographer.

George Washington was a tried and capable soldier in the old French war, so-called, of 1755, fighting on the side of England. When Washington, then a young colonel, accompanied the English commanding general, Braddock, in the old French war, he took with him three magnificent horses—English-bred hunters—from his Virginia estate. One of these horses, a dark-gray stallion, named Greenway. In a fierce battle fought July 9, 1755, Gen. Braddock was killed and his army defeated. Col. Washington was his aid-de-camp. Braddock lost five horses shot under him, a world's record, as I believe, and Col. Washington had two shot under him. Writing of the battle nine days later, at Fort Cumberland, to his brother John, Washington says:

> I have been protected by Providence beyond all expectation. I had four bullets through my coat and two horses shot under me, and yet escaped unhurt.

When Gen. Washington left Virginia, June 30, 1775, to take command of the Continental Armies, then at Cambridge, Mass., he took with him five horses of his own breeding. His favorite was a magnificent bay stallion, 16 hands high. When Gen. Washington made his first appearance at Cambridge mounted on this magnificent horse, he enthused and charmed not only the Army but the motley throng of revolutionary patriots gathered there to greet for the first time the hero of the epoch.

Before the close of the war Washington acquired by gift and purchase seven other war horses. Fairfax was the name of the horse that Washington rode the day he took command of the Army. At the Battle of Trenton Fairfax was so badly wounded that Washington had to abandon him. At the Battle of Monmouth, June 28, 1778, Washington rode a white horse—Blue Skin—presented him by Gov. Livingston, of New Jersey. The day was excessively hot, and the heat and terrors of the fight killed Blue Skin. Washington then rode to the end of the fight that day a magnificent chestnut mare with flaxen mane and tail, called Dolly—rather a tame name for a battle hero. Another of Washington's favorite war horses was a light-colored sorrel, 16 hands, with a white face and four white legs. This stallion was a gift from Gov. Nelson, of Virginia, and Washington named him Nelson in honor of the donor. This horse lived to the end of the war, and Gen. Washington rode him on the day of the final surrender of Lord Cornwallis, October 19, 1781. [Applause.]

After the war Nelson led a life of ease at Mount Vernon. He survived his immortal master and died at the remarkable age of 36 years. Thomas Jefferson often said that Washington was the greatest horseman of his time. [Applause.]

THE WAR HORSES OF NAPOLEON.

Probably the most famous war horse of the nineteenth century was Napoleon's Marengo. And horse lovers will wonder why it is that in all the many hundred biographies that have been written—in six languages—of the greatest empire builder of modern times so little has been said of the famous horses that carried him to victory in so many great battles.

We have the authority of Louis Napoleon, who said at Chiselhurst in 1872 that Marengo was the favorite horse of this great captain of the French. He was an Arab stallion captured from a Mameluke chief during Napoleon's Egyptian campaign. Marengo was about 15¾ hands high, of very high style, and almost white. He was seven times wounded in battle. Napoleon rode him last at Waterloo, where Marengo was shot in the left hip. He, too, like Nelson, survived his royal master and died at the age of 36 years. Napoleon rode Marengo in the following great battles: Marengo, Austerlitz, Jena, Wagram, in the disastrous Russian campaign, and at Waterloo. Another war horse of Napoleon was an Arab stallion named Ali. On the downfall of Napoleon a French gentleman purchased Marengo and another well-tried war horse of Napoleon, named Jaffa, and transferred them to his estate in England.

On the 16th of May, 1797, Napoleon rode his famous war horse Marengo to the top of the bell tower of St. Mark's Cathedral, Venice, that he might signal to his fleet in the bay that the proud Queen of the Adriatic Sea had surrendered. This bell tower is 333 feet high, 45 feet higher than the lantern above the great central dome of our National Capitol. With the exception of the fiery chariot horse that Elijah rode up to heaven, this is the most remarkable feat of dizzy-headed horsemanship ever recorded in either sacred or profane history. [Laughter.] Napoleon had 19 horses shot under him—the world's record.

Another famous horse that has been preserved true to life form is the war horse Stonewall Jackson rode the day of his tragic death. This horse is now the central attraction of the relic room of the Confederate Soldiers' Home in Richmond, Va.

THE FAMOUS WAR HORSE OF THE IRON DUKE.

Copenhagen won his fame as the horse the Duke of Wellington rode at the decisive battle of Waterloo—a battle that ended the conquering career of Napoleon and gave enduring fame to the Duke of Wellington. Copenhagen has inspired more animal hero worship than any horse in all history, ancient or modern. Copenhagen was a powerful chestnut stallion, 16 hands high, an English thoroughbred, a grandson of the famous English race horse Eclipse. The Duke of Wellington bought him in 1813, paying 400 guineas for him, or $2,000. His magnificent form, style, and high quality is indicated by this price.

At 4 o'clock June 18, 1815, the day the great duke and Copenhagen won immortal fame, Wellington mounted Copenhagen and was in the saddle continuously for 18 hours. And when the day was done and the duke had held his historic interview with the Prussian Field Marshal Blucher, the duke dismounted and turned Copenhagen over to his orderly.

It will be remembered that the English Government presented the Iron Duke with a splendid estate for his good day's work at Waterloo.

The Iron Duke's last act before leaving Strathfield, a few days before Copenhagen's death, was to walk out to his paddock and pet the great war horse who carried him to immortality at Waterloo. The Iron Duke's eldest son, known as the second Duke of Wellington, erected two monuments, one to the duke and the other to Copenhagen, both of Italian marble. The monument to Copenhagen stands under the shadow of a large Turkish oak on the estate presented the duke, where the famous horse was buried, with this inscription:

> Here lies Copenhagen, the charger ridden by the Duke of Wellington the entire day at the Battle of Waterloo. Born 1808, died 1835.

During the Civil War I saw nearly all the commanding generals of the Army of Ohio, the Army of the Cumberland, the Army of the Tennessee under fire. I saw Gen. Hooker several times under fire, once at Resaca. I saw him in the full uniform of a major general, yellow sash and all the plumes, riding at the extreme front, almost abreast of our advance skirmish line. He was mounted on a powerful high-headed bay stallion, red nostriled and furious, the most daring and inspiring figure I ever saw on a battle field.

GEN. JOHN A. LOGAN

Was the incarnation of vital energy and reckless courage. I saw him ride to the front at Atlanta and rally the staggering battalions, after the death of Gen. McPherson, in that fierce conflict of the 22d of July. Logan rode that day his famous war horse, Black Jack, a coal-black horse that he rode in many battles. Black Jack was poisoned by the political enemies of Gen.

Logan, in southern Illinois, after the war, during a heated campaign. They fed Black Jack a pound of ground glass.

I saw Gen. McPherson as he rode to his death at Atlanta. Next to Gen. Joe Hooker, he was considered the finest mounted officer of our Army. I saw him often under fire during the Atlanta campaign, always splendidly mounted.

I saw Gen. Sherman under fire at Atlanta and at Kenesaw Mountain. His favorite horse was Lexington, presented to him by admiring friends when he commanded the Department of Kentucky. Gen. Sherman was never an impressive figure on horseback. As he rode through our lines on the march in the Atlanta campaign, sometimes at midday and sometimes in the midnight march, he always rode with bowed head in fatigue uniform.

GEN. JAMES B. STEEDMAN.

The first distinguished soldier I ever saw under fire was Gen. James B. Steedman, then colonel of the Fourteenth Ohio Volunteer Infantry, in the battle of Philippi, the first battle of the Civil War. He won his twin stars in the fiercest part of the Chickamauga battle field and at the most critical period of the conflict. It was here that Gen. Steedman snatched the flag of the One hundred and fifteenth Illinois from the hands of the color sergeant, when the regiment was in retreat, ordered the "About, face," and "Follow your general." The regiment obeyed, and Steedman spurred his war horse up the death-swept slope, carrying the flag. A few leaps into the hell of fire and the horse was shot dead and Gen. Steedman was thrown violently far over his head and severely stunned. But he was too game to leave the field. The horse he rode at Chickamauga was a magnificent bay gelding of commanding style, over 16 hands high. He was captured at Mill Springs in the battle in which Confederate Gen. Zollicoffer was killed. Hence this horse that died the hero's death at Chickamauga fought on both sides of the conflict.

GEN. PHIL SHERIDAN.

Gen. Sheridan's ride and rally of the retreating army at Cedar Creek does not rank in importance with Gen. Steedman's forced march and saving service to the Army of the Cumberland at Chickamauga, but Steedman had no poet and Sheridan had one inspired. The greatest dramatic poem of the war, written by that Ohio poet, T. Buchanan Read, could never have been inspired except for the fleet stallion that carried Gen. Phil Sheridan from Winchester to Cedar Creek that gray October morning in 1864. He rode a coal black stallion, over 16 hands high, three-quarters thoroughbred. After the battle he was named "Winchester." Before the battle he was called "Rienzi."

GEN. GEORGE A. CUSTER.

Gen. Custer, mounted, was an inspiration. He was a devotee of the horse and was always talking about his war horses. From the time he left West Point to join the Army, in the Civil War, until the close of his eventful life in June, 1876, in the Little Big Horn Valley, his daily life was largely on horseback. Probably the man never lived whose endurance in the saddle was greater than his. The favorite war horse of Gen. Custer was a brown horse called "Dandy." He was 15½ hands, a compact, muscular horse, fine head and neck. He marched in the ranks of Custer's little army of daring troopers on June 25, 1876, against the confederated Sioux Tribes, that terrible day of the massacre of Custer and his men, in the valley of the Little Big Horn, and was shot through the shoulder. The only horse that survived this savage carnival of death was Comanche, and he was seven times wounded and left to die by the Indians. He was found afterwards by our soldiers seven miles from the battle field and was removed to Fort Reilly, Kans., where he recovered and was adopted by the United States Government. No one was ever permitted to mount him.

GEN. U. S. GRANT.

I first saw Gen. Grant mounted near Raleigh, N. C., at the grand review of Sherman's army, after the final surrender of all the armies of the Confederacy. Gen. Grant was never a showy soldier on horseback, like Hooker, McPherson, or Custer. He was too short bodied, square shouldered, and short necked to make a picturesque figure on horseback. His most famous war horse was Cincinnati, presented to him by some of his admiring Ohio friends at Cincinnati previous to his taking command of the Army of the Potomac. Neither was Grant a theme for the song poets of the war, like Sheridan and the yellow-haired Custer, or Gen. Lee, Stonewall Jackson, or Albert Sidney Johnson, of the Confederates.

GEN. PAT CLEBURNE.

The two Confederate generals that I saw nearest in both life and in death I saw in that desperate charge at Franklin, November 30, 1864. These two were Gen. Pat Cleburne and Gen. John Adams. Gen. Cleburne was the most dashing division commander of Hood's army. Gen. Adams and his horse fell at the left front of my command and Gen. Cleburne a few yards to the left. My mount, a crow-black mare of high mettle—Firefly—that I had ridden in 20 battles, was shot about the time that Cleburne fell. She reared high in the air and fell with a stunning thud. But I was young and spry then and was up again in time to be at the culmination of the charge—the awful clash of hostile bayonets in that ghastly carnival of blood.

I have corresponded with a number of ex-Confederate soldiers, including Capt. Sykes, of Aberdeen, Miss., who served on Gen. Cleburne's staff at Franklin, but can get no information of his war horses.

I have also some lurid and enduring battle memories of Gens. "Pap" Thomas, Burnside, Stanley, Schofield, O. O. Howard, A. J. Smith, Rosecrans, Slocum, McCook, Butterfield, Stoneman, Couch, Opdyke, Hobson, Cox, and many others.

It is worthy of mention that the city of San Antonio, Tex., presented Gen. Pershing with a magnificent saddle horse when he left to take command of all our armies. Gen. Pershing, mounted on this horse in Paris, created the wildest enthusiasm, and the city of Paris presented Gen. Pershing with the finest war horse (French bred) that money could buy. It was largely due to these two magnificent thoroughbreds that Gen. Pershing was made the popular idol of the French Republic.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BRUMBAUGH. Mr. Chairman, this is one of the most interesting addresses I ever listened to, and I ask that the gentleman be permitted to conclude his remarks.

The CHAIRMAN. By direction of the House, the time is in the control of the gentleman from South Carolina and the gentleman from Iowa.

Mr. LEVER. I regret, Mr. Chairman, that the pressure for time is such that I can yield the gentleman but five minutes more.

THE HORSE IN THE HEROICS.

Mr. SHERWOOD. From time immemorial the horse has been immortalized with his immortal master. He has been perpetuated in stone and iron and bronze with the poets, philosophers, and soldiers of the world.

In Berlin it is Frederick the Great and his horse.

In Trafalgar Square, London, it is Lord Wellington and his horse.

In Paris it is Napoleon and his horse.

In our National Capital it is Grant and his horse, Jackson and his horse, Sherman and his horse, Gen. Logan and his horse, and glorious old "Pap" Thomas and his horse. In Richmond it is Washington and his horse, Robert E. Lee and his horse, and Stonewall Jackson and his horse.

On the obelisks of dead old Egypt, on the Arch of Trajan at Rome, and the arch of triumph that Napoleon built in Paris to celebrate his victories, the horse and his hero rider are multiplied on every ascending circle.

The Old Testament prophetess Miriam, taking her timbrels to swell the song of triumph which Moses gave to the poetry of the ages, in celebrating the drowning of Pharaoh and his cavalry in the Red Sea, says:

Sing ye to the Lord, for He hath triumphed gloriously. The horse and his rider He hath thrown into the sea.

You will notice that the inspired prophetess gives the horse first mention over the soldier, doubtless on his merits, as the more humane of the two.

Darwin does not tell us in his great work on the evolution of the human race the number of years which elapsed between the development of the man-like ape and the ape-like man, but since history was born in the womb of the dead centuries, we know that the horse with hoofs has been coexistent with the devil with hoofs. Prof. Leidy, very high authority, says, "The prehistoric man had a prehistoric horse for a companion." We have the same high authority for the statement that the horse in a wild state existed on this continent long before Columbus discovered America. Probably the prehistoric man and the prehistoric horse were cavorting over the hills and through the valleys of the American Continent long before Adam and Eve were browsing the apple blossoms in the Garden of Eden. [Laughter and applause.]

The trend of all Christian civilization from the Pharaoh of the Exodus to Gen. Phil Sheridan is to paint the horse in the heroics. In the glamors of war, in the wild witchery of chivalric missions to Jerusalem, amid the gloom and glory of the holy crusades, in the conquests of Mexico and Peru, and in all our modern wars the horse is everywhere a potent and puissant factor. And in the peopling and advancement of the United States, before the advent of steam and electric motors, the horse has ever been recognized as man's greatest helpmate.

Nowhere is the horse of the heroics more conspicuous than in sculpture. Sculpture beats history and is more potent than books, which only speak language. Some 20 languages have passed into the grave along with dead nations, while the monuments and statues and tombs built by these dead nations still stand. The Roman Empire is dead and the Roman race has died out of Italy, but the heroic statue of Cæsar mounted on his war horse crossing the Rubicon still stands. The Latin language is dead, but the arch of Trajan and his horse still stands. Napoleon is dead and his empire is dead, but the arch of triumph that the great Corsican built in Paris to celebrate his victories, with the horse and his hero rider multiplied on every ascending circle, still stands. The ancient city of Moscow, once the templed capital of the Russian Empire, has its most forceful reminder of its past in the heroic statue of Peter the Great and his horse.

Old Egypt, when in the golden age of her best civilization, was devoted to the horse. Her pyramids, which are still standing, ages after her civilization has perished, are silent witnesses that the early Egyptians were patrons of man's best animal friend.

And China, whose history, both heroic and mythologic, outdates all the civilization around the world, once held the horse sacred above all the other animals. The Chinese account of the creation of the world beats all the world's records. The sacred books of Confucius claim that 2,267,000 years elapsed between the time when the powers of heaven and earth united to produce a man, and, of course, that man was a Chinaman.

Prof. Starr, of the Chicago University, in his valuable book entitled "First Steps in Human Progress," discusses in a cursory way early Arabic civilization. He says in his book that as far back as Egyptian records go we find the horse in use, and in China are records of his presence and use as a tamed animal for thousands of years.

The biological student of the real human essence calls health the full and free manifestation of life. The life that is worth living is the life that is full of vigorous, healthy enjoyment. Of all the games to amuse and entertain, the horse furnishes the most recreative and the most morally wholesome. Our mental and physical lives are indissolubly linked together.

Some men imagine themselves moral reformers when they are only solemn and morose from a torpid liver. A torpid liver may promote indigestion, but never a high moral inspiration. [Laughter.]

We shall always have machine motors, as we have wax flowers and crockery dolls and paste diamonds. But wax flowers will never shed fragrance on the bosom of a divine woman like the God-blown blossoms, and crockery dolls will never take the place of real babies; neither will the counterfeit blaze of paste diamonds ever mock successfully the brilliant rainbow tints of the real gems. And the live horse, the horse of history and poetry and sculpture and the heroics, will ever remain man's best and most wholesome animal friend. The horse stands for good health, for life that is full of life, for pure air and sunshine; and let no lean-headed, crimpled-mouth clacquer masquerading as a teacher of grim gloom stand between us and the sun. In all countries and in all ages the horse is inseparably associated with human history and development. No other animal has such omniprescence and no other animal has ever exerted such a potent force in the evolution of the human race. Sculpture is radiant and glowing with monuments and arches and frescoes commemorating heroes, poets, prophets, and great generals who were devotees of this most alluring and beneficent of all God's best gifts to mankind.

The best and widest field for reformers to-day is to aid in the repeal of all restrictive laws that are dead and have never been enforced and to help us learn the lesson that all history teaches—that you can not legislate virtue in the hearts of men. The only way to inculcate virtue is to have the teachers practice it. A boy is like a calf. When he gets full of the milk of human kindness he wants to kick up and play and give vent to the life that is in him; and the man is only the developed boy. Some men are never developed. [Laughter.]

The bicycle, that was a crazy-headed fad 25 years ago as a recreative motor, left us a heritage of some six distinct nervous and spinal diseases, with no counter benefits; and the auto, more useful, more recreative, more alluring, killed more human beings last year than the horse in a century.

I am not here to exploit the war horse exclusively, but the horse of the recreations, the horse of peace, the horse that carries his master in the exhilaration of the wind, along pleasant valleys, by running brooks, and meadows green with verdure, by woods vocal with the song of birds, to make him forget his nervous worry over business cares and catch an appetite and the serene joy that awaits good digestion and a conscience devoid of guile. I still hope that the live horse will ever be the most wholesome recreative factor for the live man; and he is only good when alive, not, like the miser or the pig—no good to the world until after death. [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. RUBEY having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Young, one of its clerks, announced that the Senate had passed without amendment the following resolution:

House concurrent resolution 34.

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H. R. 195) entitled "An act providing for the sale of coal and asphalt deposits in the segregated mineral lands in the Choctaw and Chickasaw Nations, Okla.," the Clerk be, and he is hereby, authorized and directed to strike out the word "applied," on page 5, line 13, and insert in lieu thereof the word "apply."

The message also announced that the Senate had insisted upon its amendments to the joint resolution (H. J. Res. 174) for the purpose of promoting efficiency for the utilization of the resources and industries of the United States for lessening the expenses of war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. JAMES, Mr. GORE, and Mr. BRANDEGEE as the conferees on the part of the Senate.

The message also announced that the President had approved and signed bill and joint resolution of the following titles:

On January 18, 1918:

S. 3235. An act amending section 32, Federal farm-loan act, approved July 17, 1916.

On January 12, 1918:

S. J. Res. 106. Joint resolution extending until January 1, 1919, the effective date of section 10 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

Mr. HAUGEN. Mr. Chairman, I yield to the gentleman from New York [Mr. SIEGEL] three minutes.

Mr. SIEGEL. Mr. Chairman, in my time I ask to have the Clerk read the following newspaper article.

The Clerk read as follows:

REASSURE ITALIANS—REPRESENTATIVE LAGUARDIA SAYS WILSON'S PEACE AIMS ARE THEIRS.

ROME, *January 18* (delayed).

The latest Wilson message is still a topic of discussion in the press as well as in political circles. Representative LaGuardia, of New York, who is in Europe on military service, and was present at the recent capitol demonstration in honor of America, said to the New York Times correspondent:

"I consider the President's message a great document. It is clear, concise, and to the point. It must be read in connection with his war message of April 2, 1917. From these two documents the purpose of our entering the war, our unselfish motives, our determination to bring about justice to all concerned while asking nothing for ourselves, is established forever. It was favorably received in France, and had the effect of reassuring and inspiring confidence in the French people.

"Yes; I have read the editorials in the Italian papers. I was greatly surprised that doubt should be expressed as to its true meaning in reference to Italian aspirations and interests. It is true that some papers even expressed dissatisfaction. I am certain, however, that this was the result of a hasty reading of the message, without due consideration of the past utterances of the President, on which he based his peace terms.

"There can be no doubt in the mind of anyone who is aware of the President's accurate knowledge of local conditions in the Adriatic and the general understanding in the United States of the lot of the nationalities in the unredeemed Provinces, that when the President refers to lines of clearly recognizable nationality he means that the unredeemed Provinces of Trent, Trieste, and Istra must be restored to Italy just as much as Alsace-Lorraine to France. If Italians are doubtful as to the meaning of this point, or if there is doubt as to the nationality of the territories which they covet, then they are seeking aggrandizement to which they are not entitled and which will not be in the interest of their future welfare. But every American knows just what the unredeemed Provinces are by tradition, language, and history, and that we in the United States will not consider our mission fulfilled unless they are restored.

"That I take to be the intent of the President's words, and that I shall endeavor to make clear to the Italian people."

Mr. HAUGEN. Mr. Chairman, I yield 20 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Chairman, this day will go down into history, probably, as very important. It is perhaps a little too early to determine whether its importance will rest upon the speech just made by the gentleman from Alabama [Mr. HEFLIN] or the speech that has been made at the other end of this Capitol. It is rather unfortunate for the gentleman from Alabama that during his speech the press gallery was entirely empty. If it had not been for that fact probably the gentleman at the other end of the Capitol would have received a line and the gentleman from Alabama's speech would have covered the front page of all the papers in the country.

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. CAMPBELL of Kansas. Did the gentleman look to see whether the press gallery was full when the gentleman from Alabama began?

Mr. LENROOT. I was not here when the gentleman from Alabama began his speech. The gentleman from Alabama made a patriotic speech, although there was nothing new or important in it. He did make one statement that we can all indorse, irrespective of party. He said that when we sent our boys to the trenches they were not asked whether they were Republicans or Democrats. That is true. The only place that that question is asked in the carrying on of this war is in the civil appointments made by the executive branch of this Government. [Applause on the Republican side.] But, Mr. Chairman, it was not my purpose in asking for this time to discuss any of these questions, but I want to take the time that is allotted to me in the discussion of a very nonpartisan question and to a very large extent a local question pertaining to the bill that is now before us, making appropriations for the Department of Agriculture.

Mr. Chairman, one of the most important problems before the country to-day is the increase of food production and of wool. A very large proportion of the appropriations made in this bill is for that purpose, but most of the millions we are spending through the Department of Agriculture are for increasing production upon farms already developed. We have done very little toward assisting in developing fertile lands now lying idle. In fact, outside of the money we are spending in reclamation of public lands and surveying and classifying public lands open to homestead entry we are doing practically nothing. It ought to be a matter of national concern that every acre of arable land should be utilized for production. It is my purpose to-day to speak of the undeveloped lands of northern Wisconsin and the upper peninsula of Michigan, the opportunities there for the settler, the sheepmen, and the stockmen, discuss the character of these lands, the reason why they are undeveloped, and what is needed to bring them into the class of productive lands.

Northern Wisconsin and upper Michigan were for the most part originally covered with dense forests. Lumbering was the chief occupation. Little thought was given to the agricultural possibilities of the land. Roads that were passable in the summer were few, schools and churches were far between. The result was that for many years after the timber was removed this territory was known chiefly to the sportsman, who found a paradise of hunting and fishing. But as older sections were developed this "grassland of America," as it has been well named, is being developed, although the process is much slower than it should be. We have now about 16,000,000 acres of undeveloped, fertile land in the northern part of these two States, and development is going on at the rate of less than 150,000 acres per year. Why is it so slow? It is not because of the character of the land, for no better land exists in America for intensive farming, and especially for dairying and the raising of live stock and sheep. No section of America offers surer rewards to the farmer than this. To the man with good health and willing to work and with a thousand dollars it says come, to the man with a hundred thousand dollars it says come, for every dollar put in here will return manyfold. There is but one class of people who are not welcome, and that is the speculator. We want only men who are willing to seek rewards from what the development of the lands will bring them. Speculation is the enemy of development, and we want none of it. I was born in this section. There I have always lived and I speak from personal knowledge of what this country is. Draw a line through central Wisconsin from the Mississippi River to Lake Michigan and all of Wisconsin north of that line and the upper peninsula of Michigan comprises the territory I am discussing. Here we have thousands of lakes and many rivers of the purest water. We have soil which will produce more than forty times as much as the soil of the 320-acre homesteads of the West. Some of us to-day will live to see this the richest dairying section of America. While general diversified farming will be found profitable, it is the dairying, live-stock, and sheep industry which is the most attractive.

SOIL.

This section has a variety of soils nearly all exceedingly fertile. The United States Department of Agriculture has made soil surveys of a portion of the area, and the conclusions arrived at are very favorable. In its report on the survey of the Bayfield area, bordering upon Lake Superior, it is stated, "it was not until after the timber had been removed and a few scattered acres brought under cultivation that the great fertility of these lands was recognized. Wherever the land was cleared grain, grass, and garden crops flourished, the luxuriance of their growth being limited only by their adaptation to the soil types upon which they grew."

In its report upon the soil survey of the north part of north central Wisconsin it is stated, "Dairying and general farming are the chief lines along which agriculture is developing. The most important crops are hay, oats, potatoes, barley, and corn, with rye and wheat as crops of less importance. Potato growing offers excellent opportunities especially on the sandy loam soil. The region, as a whole, is well adopted to dairying and general farming."

CLIMATE AND RAINFALL.

The average annual rainfall in this region is from 28 to 34 inches, which is about the same as northern Iowa and northwestern New York. The temperature is about the same as northern New York. It is the climatic conditions together with the purest water and fertile soil that will make northern Wisconsin and northern Michigan the greatest dairy region of the world.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. MORGAN. I am very much interested because the question he is discussing applies more or less all over the United States. I wonder if, before he gets through, he would suggest some means of aiding in the development of this country, in the way of short-term credit facilities by the Federal Government?

Mr. LENROOT. I have not gone into that.

Mr. PLATT. Mr. Chairman, will the gentleman yield? A few days ago I had the pleasure of meeting the president of the Federal land bank in St. Paul, and having lived in the gentleman's city of Superior for one year, I am interested in the question he is discussing. I had a very interesting talk with this gentleman about the development of this very land, land that had once been forests. He told me it was progressing favorably, and that they made some very satisfactory loans on that land.

Mr. LENROOT. That is true.

ROADS.

One of the greatest drawbacks to the development of this region has been the lack of good roads. This is speedily being remedied, and during the past five years wonderful progress has been made. Every county in northern Wisconsin now has trunk-line roads built with State aid, and branch or town roads are rapidly being built.

MARKETS.

It is in the matter of markets that this region is peculiarly favored. To the north we have the cities of Ashland, Superior, and Duluth with a combined population of more than 150,000; to the west St. Paul and Minneapolis with more than 500,000; and to the south Chicago and Milwaukee. Any part of the territory can be reached in one night's ride from Chicago. All of the great railway systems of the Northwest enter it. Nine lines of railway traverse it north and south and four east and west, each with a large number of feeders and branch lines. In addition there is water transportation on Lake Superior from Superior, Ashland, Washburn, Bayfield, Marquette, and a large number of smaller cities.

CHURCHES AND SCHOOLS.

Notwithstanding the fact that this section is sparsely settled, it is well supplied with churches and schools, and there is plenty of opportunities to locate near in the vicinity of schools and churches already established.

LIVE STOCK AND SHEEP.

From a national standpoint the opportunities here for increasing our live stock and sheep are of the first importance. While our milk cows are increasing in about the same ratio as the increase of our population, this is not true of beef cattle. The problem of meat supply is yearly becoming greater. The wool situation is even more serious. We have 4,000,000 less sheep than we had seven years ago. In the 1900 census there were found 61,503,713 sheep; in the 1910 census, 52,447,861, and the Agricultural Department estimates that in 1916 we had 48,483,000. Our total production of wool in 1916 was 288,490,000 pounds. That year we imported 534,828,022 pounds. Increase of our own meat and wool production as one of our means of national defense is just as necessary as maintaining a Navy. Therefore, to omit anything that may be done to increase this production is most unwise. The lands of which I am speaking can do much to improve this situation.

Frank J. Hagenbarth, of Salt Lake City, Utah, president of the National Wool Growers' Association, a few weks ago made an investigation of these lands, and in a speech at Menomonie, Mich., on October 10, before the Wisconsin Advancement Association and the Upper Peninsula Development Association, said: "You have the best country on earth for live stock and grazing. You can easily take care of 8,000,000 sheep and 1,000,000 cattle."

Speaking of the conditions in the far West he said, "The trouble now existing in the cattle and sheep countries of the great West is not that the homestead law has brought in settlers to drive away the cattlemen, but it has permitted valuable holdings to come under the control of land sharks and speculators who are driving the cattlemen to seek new fields for their flocks and herds. It is this fault which has decreased the stock raising 35 per cent and made for you the greatest opportunity which has ever come to any section of the United States."

Mr. B. O. Parker, of the Wisconsin State Department of Agriculture, in a recent article upon this section quoted a stockman as stating that he had made a gain of 200 pounds per head on heifers and cows grazing upon these lands from July 17 to October 10, and further quoted him as follows: "That is the greatest natural pasture land I have ever seen, and raises the finest blue grass and clover outside of Kentucky, and it excels Kentucky in that is doesn't dry out in July and August."

John Fletcher, vice president of the Fort Dearborn National Bank, Chicago, in a speech before the Wisconsin Advancement Association at Milwaukee, on November 22 last, said: "The shrinkage from Montana, Wyoming, and Idaho in shipping sheep to Chicago is estimated at 10 pounds per head. From Wisconsin to Chicago the shrinkage is only 4 pounds per head. The freight from Wyoming, Montana, or Idaho to Chicago is $250 per car. From Wisconsin to Chicago it is less than $50 per car. The capacity of a double-deck carload is 250 sheep. The shrinkage on one car, 250 head, 10 pounds per head, is 2,500 pounds. Twenty-five hundred pounds means 25 sheep. Twenty-five sheep, at $10 cash, means $250. Two hundred and fifty dollars is the freight on five cars of sheep from Wisconsin to Chicago."

Mr. DOUGHTON. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. DOUGHTON. I am very interested in the gentleman's discussion. I want to ask if the lands he describes as being so valuable for stock raising are Government lands or privately owned lands?

Mr. LENROOT. They are practically all private lands.

I quote from a bulletin on sheep raising issued by the University of Wisconsin:

Favorable climatic conditions for sheep raising are to be found in upper Wisconsin. In the summer time the weather does not get as hot as farther south, and during the winter the air, though cold, is dry and the cold is not felt as much as when the air is damp. Sheep are used in many parts of upper Wisconsin for clearing brush land. Many men who keep a flock of from 300 to 400 head for land clearing find investment very profitable.

Quoting further from the bulletin:

Clover hay, which is a splendid feed for wintering sheep, is very plentiful in upper Wisconsin. Other small grains are raised, and the straw can be used for winter feed. All kind of root crops can be grown more successfully and with less expense in the upper than in the southern part of the State. One sheep raiser in Bayfield County harvested more than 1,043 bushels of rutabagas from an acre. Roots furnish very good succulent feed for sheep.

It further states:

Thirty acres of cut-over land in the red-clay districts will on the average provide pasture for approximately 100 head, 50 ewes and 50 lambs. On densely wooded mixed hardwood lands where grass has not gotten much of a foothold half that number of sheep will be sufficient. What is true of sheep is true of live stock generally. Every settler will do well to raise sheep, even if only a small number. By so doing he profits in two ways—the cash income from wool and mutton and the clearing of the brush. The man who will go into this section and engage in dairying, raising sheep and cattle, if he will use intelligent effort, is sure to be successful.

THE COST OF THE LAND.

There are no lands in this section that can be secured for nothing. There are no lands anywhere in the United States of the character of these that can be secured for nothing; but, considering their fertility, the climate, and the nearness to markets, there is no cheaper land anywhere. Prices of the best undeveloped lands range from $10 to $25 per acre, lands which when cleared and put under cultivation will soon be worth more than $100 per acre. There are opportunities to fit every pocketbook, from the man with a few hundred dollars to the man with a hundred thousand dollars, provided, always, that the purchaser will utilize and develop the land.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. CAMPBELL of Kansas. What is the nature of the soil?

Mr. LENROOT. The soil ranges all the way from heavy clay to light sandy loam. There is only a very small percentage of this land that is not arable in the fullest extent of the term.

Mr. CAMPBELL of Kansas. What is the timber?

Mr. LENROOT. Hardwood and pine originally. This was one of the greatest white-pine forests of America. It is pine cut-over lands that offer the greatest opportunities for live stock and sheep raising.

Mr. CAMPBELL of Kansas. And the amount per acre that the gentleman gave carries with it such timber as is on the land?

Mr. LENROOT. Oh, yes. The pine timber has been cut over. These are practically what are known as cut-over lands; but there is a great deal of hardwood land, containing birch and spruce and timber of that kind, and very often the settler is able to secure enough from the timber to pay for the land.

Mr. YOUNG of Texas. In the cut-over land in our section of the country one of the troublesome problems is removing the stumpage. What is the relief the gentleman has for that?

Mr. LENROOT. The only difficulty we have with reference to removing the stumps is where the land has been covered by large pine trees. That, then, takes time and dynamite. That is not true of the hardwood land at all. There is no difficulty there.

Mr. PLATT. The president of the St. Paul bank told me the other day that they had a special machine for pulling out those stumps and that the settlers were cooperating with each other in putting this machine in and clearing the land quite rapidly.

Mr. LENROOT. Yes; our State has done wonders in the line of assisting in that way, and we have organizations going through all of northern Wisconsin with these new machines, demonstrating them, and we are making very rapid progress. Our difficulty—and that is why I am making this speech to-day—is not with the men who are there trying to develop, but bringing the lands to the attention of men who will be glad to go upon them if they knew of them and develop them as they are now being developed by those who are there.

This is no get-rich-without-effort country. The man who would seek rewards here must work for them, must earn them with labor of hand or brain, but for such the rewards are certain. I quote from an advertisement of a land company offering lands at from $10 to $20 per acre—"$10 cash and $10 per month, or payments extended as long as $10 in improvements are put on the property." "We will also start you with a house, barn, and garden, and grubstake you while you develop your farm." Of course, no one should purchase lands without a personal examination. This is true of land wherever located. The prospective settler should first communicate with some reliable organization and secure detailed information. If he will write the commissioner of immigration, Wisconsin department of agriculture, Madison, Wis., the Wisconsin Advancement Association, Milwaukee, concerning Wisconsin lands, and the Upper Peninsula Development Bureau, Marquette, Mich., concerning Michigan lands, he can be certain of securing helpful and reliable information.

The two latter organizations are prepared to offer special inducements to large sheep and cattle men who require large tracts for grazing purposes.

I can not in this brief time give more than an outline of the splendid opportunities awaiting those who, with either labor or money or both, will develop these lands. My chief purpose in discussing this matter to-day is to endeavor to secure a greater cooperation upon the part of the National Government in bringing these opportunities before those who would avail themselves of them. In this connection I quote from a recent article in the American Sheep Breeder, published in Chicago:

Hagenbarth advised the Wisconsin and Michigan people to bombard Washington and get the Government interested in pushing cut-over lands for sheep. O. K. suggestion, but why in thunder don't the Government investigate without urging? This Government of ours has seen the sheep biz slipping down the toboggan, and what has the Government done to stop it? For 15 years the American Sheep Breeder has preached the cut-over land gospel for sheep. We have published the strongest kind of testimony, proving that these lands were admirably adapted for sheep raising. But the West was blind. The Government occasionally called attention to this country, along with other sections, that might be sheeped. It takes a heck of a while to interest the Government in anything but politics. Now that a wool crisis is on sheep will come before politics. Of course, it takes a national crisis to wake up the American people, and Congress is the last institution to open its optics. In Wisconsin and Michigan agricultural colleges have told the story of successful sheep experiments on the cut-over land, but Washington has paid little attention.

I hope that now, with the pressing necessity of increasing our food and wool production, these conditions will not much longer exist, and that the National Government will do what it can to secure the development not only of these lands but fertile undeveloped lands wherever they exist in the United States. Large appropriations are not required, but systematic methods should be employed to bring such lands to the attention of men who are in a position to develop them.

In conclusion I wish to quote what Dr. H. L. Russell, dean of the College of Agriculture of the University of Wisconsin, has said of these lands:

Blessed with an abundant rainfall and a pure and unlimited water supply, possessing a soil of virgin fertility, and splendidly suited to diversified farming, and located within a night's ride of markets for several million people, three-fourths of whom are consumers and not

producers, this vast and largely unoccupied area is equivalent to a newly discovered State. The route from the Wisconsin producer to a great body of consumers is comparatively short and the consequent toll much reduced.

The agricultural resources of these sections have long remained hidden under the stumps and the second growth of the forest cover, but their real value is being appreciated more and more each year. These lands await the redeeming hands of the pioneer who will put them into active service for mankind in helping to support and develop human life. To him who reclaims and transforms a waste into a productive farm and home the State owes much.

[Applause.]

Mr. HAUGEN. Mr. Chairman, I yield 45 minutes to the gentleman from North Dakota [Mr. YOUNG].

Mr. YOUNG of North Dakota. Mr. Chairman, the winter wheat crop of this country is in very bad condition. The last report shows that the crop is worse than at any time since crop records were kept. That means that we ought to be thinking about the spring crop—the crop that is to be planted next spring. The greatest menace to the spring crop is black rust, and the scientists are now generally agreed that the cause of epidemics of black rust is the barberry bush. Until recently there was much disagreement as to what was the effect of the barberry bush.

Mr. WASON. Mr. Chairman, the gentleman speaks of the barberry bush. Does it grow in the gentleman's section of the country?

Mr. YOUNG of North Dakota. Certainly.

Mr. WASON. Can the gentleman give the House something of its characteristics and growth and effect upon the wheat?

Mr. YOUNG of North Dakota. I will say to the gentleman that the barberry not only grows in North Dakota but throughout all the States. It grows right here in Washington, and I have here a bush, a clipping from a hedge at the north side of the Library of Congress. It is a small ornamental shrub, used usually for a hedge. It has bright yellow flowers and brilliant autumnal tints in varying shades of orange and red.

I believe in some places they take the little red berries and make jams or jellies out of them, but in the United States, so far as I know, they are not used commercially at all. They also make an acid, malic acid, but as far as I know that is not produced in the United States. It is purely an ornamental shrub. In colonial days the people were satisfied that the barberry bush was the cause of rust and most of the Colonies passed laws for the eradication of the barberry bush. The Colony of Massachusetts passed such a law in 1755, and a statement issued at that time read like this: "It has been found by experience that the blasting of wheat and other English grains is occasioned by barberry bushes to the great loss of the people of this Province." Massachusetts reached that conclusion again about 30 years ago and passed a similar law. Back just 101 years ago experiments were made in Denmark and they reached the conclusion that the barberry bush was the cause of black rust. Then, like Massachusetts, they had a relapse and not until 1903 did they come to the same conclusion again. In 1903 they passed a law in Denmark for the eradication of the barberry bush and there has not been an epidemic of black rust there since that time.

Mr. PLATT. Will the gentleman yield?

Mr. YOUNG of North Dakota. Yes.

Mr. PLATT. Is the gentleman going to tell just how the barberry bush has an influence in producing black rust? Is it bacteria growing on the barberry bush that gets into the wheat?

Mr. YOUNG of North Dakota. Yes; the barberry bush is what the scientists call the host for a parasite that develops there during the winter and during the summer it transfers to the wheat fields. Curiously enough the wheat field acts as a host to a parasite that goes back to the barberry bush, and so it makes a complete life cycle. The barberry bush is the nursing ground in the cold winter, particularly in our country, where the black-rust parasites or germs will not live unless they get on a barberry bush. They will not live out in the wheat field.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. YOUNG of North Dakota. I will.

Mr. SMITH of Michigan. Is it not true they can treat the seed wheat with formaldehyde and other substances and prevent any rust, and is not that being used and is it not effective as a preventative of rust?

Mr. YOUNG of North Dakota. That is a preventative of smut, but not of black rust. The only thing that we have tried seriously in the past is to discover a rust-resistant seed and we have not succeeded in that direction, at least only partially. Now, as I have already stated, the scientists have come to an agreement that the barberry bush is the thing to destroy in order to get rid of black rust and stop epidemics of that rust. Dr. William A. Taylor, when before our committee last June, made this statement. He is the Chief of the Bureau of Plant Industry.

We are now prosecuting a survey study of the wheat-rust situation from the South northward, in order to get at what the wise course would be with reference to attempting systematic barberry eradication, particularly in the northern spring-wheat territory. We have there a case, as you know of a disease which is to a large extent dependent on this other plant, the barberry, for its perpetuation and spread. Denmark has apparently, with very complete success, accomplished control of rust by complete eradication of the barberry.

A few days ago Dr. Kellerman, of the Department of Agriculture, was also before our committee, and he made this statement:

The black rust, or stem rust, is especially serious from time to time. That disease sweeps over the spring-wheat area as an epidemic, in some cases almost the total crop being destroyed. In 1915 it was very bad, and many of the fields that were affected did not produce enough wheat to pay for harvesting. The investigations during the past few years indicate clearly that the native barberry plant is responsible to a very considerable degree for these epidemics. The disease will overwinter on the barberry and will start from the barberry back to the wheat with greatly increased vigor. Although it is not possible to completely eradicate black rust by the eradication of barberry, it appears certain that the severity of the black-rust epidemic can be greatly reduced by systematic and thorough eradication of the native barberry. This is not likely to be particularly difficult, since the Japanese barberry is in most cases preferred as an ornamental plant, and the Japanese barberry is not susceptible to this disease. So in this case the Japanese barberry will be a substitute for the native barberry and the disadvantage of completely eradicating the ornamental plantings will be very largely met in this way.

Now, as to the question of the amount of damage, and that is the most important consideration now with the Government, when the entire people of the country are looking to the farmers for a record crop of wheat in 1918. I want to call your attention to the fact that in 1916 there were 180,000,000 bushels of wheat destroyed in the hard spring wheat belt alone from black rust. Here is a telegram from the commissioner of agriculture of North Dakota, Hon. John N. Hagan. He says:

North Dakota has destroyed nearly all barberry bushes.

In this respect I want to say, so far as our own State, North Dakota, is concerned, that we have got this problem pretty well under control. As I have just quoted from the commissioner of agriculture, we destroyed practically all barberry bushes in North Dakota last year and we will get the rest this year. The trouble is we have not got any control beyond our State boundaries. We are still exposed to the winds from Minnesota, South Dakota, and Manitoba carrying the parasite in the form of a very fine dust which can be carried hundreds of miles by the wind. It is a national problem. If we could settle this question of black rust in North Dakota we would not be down here asking for a larger appropriation to fight black rust. It is because we can not go beyond the State line, we can not invade Minnesota, South Dakota, and other States. Here is the place to tackle this big proposition.

Mr. HAUGEN. Will the gentleman yield?

Mr. YOUNG of North Dakota. I will.

Mr. HAUGEN. The black rust is a fungus on the plant?

Mr. YOUNG of North Dakota. Yes.

Mr. HAUGEN. And it has for its host the various grains in the second stage? In its first stage it has for its host the barberry bush?

Mr. YOUNG of North Dakota. Yes.

Mr. HAUGEN. It develops under certain conditions of air, moisture, and temperature, and with hot winds and heavy dew and rains it develops the black rust, and the spores being lighter than air are carried perhaps many hundred miles by the wind.

Mr. YOUNG of North Dakota. That is true.

Mr. HAUGEN. Like the dandelion, for instance. It is carried a great distance, therefore it is not in the power of one State to control it.

Mr. YOUNG of North Dakota. It is distinctly a national problem. I will go further than that. It is an international problem. We must get Canada interested in this proposition. A little later I will read a telegram showing that the people up there are alive to the needs of cooperation with us.

Now, to continue reading this telegram from Commissioner Hagan, who has been very active in the fight against the barberry bush—in fact, the first public official outside of agricultural colleges to take it up. He says:

In 1916 State lost many million bushels of wheat on account of rust. For best results other States must destroy. Nineteen hundred and three Denmark destroyed barberry bushes, and have had no rust since. Use influence to get national appropriation. It will increase food supply in wheat States.

The president of our agricultural college, E. F. Ladd, wired me as follows:

The estimated loss in spring wheat belt in 1916 was 180,000,000 bushels.

Now, if we should happen to have any such calamity as that this year it would be a very severe blow to this war. I have already called attention to the fact that the winter crop is poorer now than it has been at any time in the history of the country since we have kept records of the crop, and it is up to us now to put the best foot forward. We know that in 1916, in the hard-wheat belt alone, we lost 180,000,000 bushels of wheat from black rust, and we know how that can be prevented. If we dig all the barberry bushes before May 15, 1918, we are not going to have any black rust in the United States. And some of these people in the towns who want to help out the war by plowing up their tennis courts and putting in potatoes can help it a mighty sight more by digging up the barberry bushes.

Mr. SMITH of Michigan. Will the gentleman yield there?

Mr. YOUNG of North Dakota. Certainly.

Mr. SMITH of Michigan. Is it not true that the climatic conditions, the rains and other storms, have something to do with creating the condition of rust on wheat?

Mr. YOUNG of North Dakota. Certainly. So far as the spores from the barberry bushes are concerned, they are present every year. If we had just a certain kind of climatic conditions each year, we would have black rust every year and it would destroy the crop.

Now, the fact that it misses in some years does not mean that we can gamble in 1918 that it is going to. If we get a certain kind of climatic conditions this year, and if we do not take care of the barberry bush, we are going to witness perhaps 200,000,000 bushels of wheat destroyed by rust. If the climate happened to be all right, and we could gamble on that, we might let these barberry bushes grow and still have our crop.

Mr. PLATT. Is the barberry bush, or has it been, of pretty general distribution in North Dakota? Does it grow in fields or along the fences or around houses as an ornament?

Mr. YOUNG of North Dakota. In most cases it has been set out as an ornamental shrub, and it is found mostly in towns and villages.

Mr. PLATT. It does not spread and become wild?

Mr. YOUNG of North Dakota. No. Over in Michigan, on our farm, there was some growing out in the pasture field. I do not know how it got there. But it is not a bush that spreads easily. It is an ornamental shrub that is set out.

Mr. PLATT. The task of destroying it, then, would not be a very tremendous one?

Mr. YOUNG of North Dakota. I do not think it would.

Mr. MORGAN. It is a well-established fact that with the hot winds and humidity and heavy dew the calamity the gentleman mentions is sure to follow?

Mr. YOUNG of North Dakota. Certainly; when the barberry is present.

Mr. HAUGEN. And one barberry bush would be sufficient to infect the whole county? Has the demonstration been carried on satisfactorily in Denmark?

Mr. YOUNG of North Dakota. Yes. It is a most serious menace even in small quantities.

Now, to continue President Ladd's telegram, he says:

North Dakota estimated wheat in 1916 was not less than 160,000,000 bushels. Rust in one week cut yield to 39,000,000 bushels.

I am talking about our own State. In 1916 the United States Government crop estimate was 160,000,000 bushels and it was cut down by black rust to 39,000,000 bushels. He says:

All important that barberry bush be eradicated in wheat belt. North Dakota has enacted and put in force an eradication law. Tristate Grain Growers' Convention passed resolution calling for destruction of all barberry bushes and appointed a committee on Friday to go to Washington to urge measure for protection of country. Similar committee appointed from conference at Crookston. Fifty thousand dollars not too much for eradication of bush in spring-wheat belt alone, and bill should carry authorization for eradication of all barberry.

The convention that passed the resolution to which he refers was made up of farmers from Minnesota, South Dakota, and North Dakota, representing the biggest portion of the hard-wheat belt in the United States, which, as you know, extends on up into Canada.

Prof. H. L. Bolley, who has made a very careful study of grain diseases and plant diseases for a number of years, and especially in respect to black rust, is confident that the black rust can be destroyed, can be eliminated, by the destruction of the barberry bushes.

He wires me as follows:

FARGO, N. DAK., *January 20, 1918.*

Hon. GEORGE M. YOUNG,
House of Representatives, Washington, D. C.:

Have the bill for rust control authorize and order the immediate eradication of all rust-bearing strains of the common barberry bush throughout the Nation as an emergency measure likely to prove of direct value in increasing the yield of present and future cereal crops, and particularly of wheat.

H. L. BOLLEY.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from North Dakota yield to the gentleman from New York?

Mr. YOUNG of North Dakota. Certainly.

Mr. PLATT. Does the black rust affect winter wheat, too?

Mr. YOUNG of North Dakota. It will affect any wheat, but so far as our section of the country is concerned, it is more apt to get the spring wheat. We do not raise winter wheat in North Dakota.

Mr. HAUGEN. The fact is that the winter wheat matures usually before the hot wind comes?

Mr. YOUNG of North Dakota. Yes. You will notice that Prof. Bolley urges that this be put upon a national basis. Of course, a number of the States do not raise any wheat at all, and there are some others that do not raise very much, and I think some of this appropriation, if we make it, ought to be used to educate the people of those States where they do not raise much wheat to the importance of destroying the barberry bushes. Now, it is not going to be a very big task to destroy all the barberry bushes in the United States if the people themselves understand that it is a war measure, that it is necessary to do this in order to win the war. That is going to be one of the things that the department will have to do; that is, carry on a campaign of education.

A telegram has been received from the Canadian department of agriculture at Ottawa saying that they thoroughly appreciate the danger this year to the wheat crop in the Canadian Provinces and that they will cooperate to the fullest extent with our country in fighting the barberry bush.

Such a telegram as that was sent to Prof. Bolley at Fargo last week, and this morning I was talking to some of our officials here at Washington on the subject, and they told me they have had assurances from the Agricultural Department at Ottawa, and that they are apparently even more eager to enter a campaign against the barberry bush than we are here in this country. He says they appreciate in Canada, just as we do here, that it will not do much good to destroy it in Manitoba and Saskatchewan if we keep it in North Dakota and Minnesota, and that it will not do much good to destroy it in North Dakota and Minnesota if they allow it to grow in Saskatchewan and Manitoba.

We are asking a total appropriation of $50,000, $30,000 larger than that of last year, which was $20,000. I am pleased to say that an amendment to that effect offered by me on the last day of the consideration of the bill in committee was acted on favorably, and the item is carried in the committee report.

Mr. Chairman, the campaign that ought to be carried on throughout the country by the department, and which will undoubtedly be followed, will be along the line of arousing the people to action through the county agents, through the schools and the colleges and the farm journals and the milling and trade journals, and by a still more comprehensive appeal made through all the newspapers of the country, designed to reach all the people, especially those who live in the towns and villages, because there is where most of the barberry bushes happen to be. Then it will be necessary, I think, too, to have a quarantine established between the different States. The department already has the power under the quarantine laws to regulate and even prohibit all shipments of barberry bushes between the different States.

There is another point that ought not to be overlooked, and I want to call the attention of the chairman of the committee particularly to it, and that is that this appropriation ought to be made available immediately. I am assured by Dr. Kellerman and by Dr. Humphrey and others in the Department of Agriculture that it will not do any good to kill or pull this plant after May 15.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of North Dakota. Certainly.

Mr. LEVER. I will say to my colleague on the committee that so far as I am concerned, if he can get by a point of order against making it immediately available, I will have no objection to it.

Mr. YOUNG of North Dakota. Well, I submit that no Member of this House is likely to make a point of order against money proposed to be spent to save the wheat crop this year, and I do not believe that anyone will make a point of order on this item for that reason.

Mr. LEVER. I am satisfied if all the membership of the House could hear the gentleman's discussion on the necessity for it they would not make the point of order. I will try to get the language changed in view of his statement and his quotation of Dr. Kellerman and Dr. Humphrey.

Mr. YOUNG of North Dakota. I appreciate very much the assurance given by the chairman of the committee, and I also appreciate the fact that he was glad to consent to an increase of the appropriation carried last year of $20,000 up to $50,000, as proposed by me, doubtless appreciating the tremendous importance of not taking any chance this year of letting our wheat be destroyed or largely reduced by the rust.

Dr. Humphrey made this statement to me in respect to the work that has been done in Denmark. He said:

Prior to 1903, when the barberry-eradication law was passed in Denmark, epidemics occurred with considerable frequency, and often with very great severity, causing in some years an almost total loss of crops in some sections. After the passage of the eradication law in 1903 the eradication of barberry was systematically pursued, and since that time the shrub has been practically eliminated from the country, with the result that there has been a corresponding diminution in the occurrence of rust outbreaks and in the severity of the same, until at the present time there is practically no loss from rust in Denmark. When all of the shrubs are destroyed in that country, there may be no loss from black rust whatsoever.

I hope you will note that last sentence. Dr. Humphrey says that when they are all destroyed, every single one of them in Denmark, there may be absolutely no loss in that country.

Mr. LEVER. Mr. Chairman, will the gentleman yield for a question?

Mr. YOUNG of North Dakota. Certainly.

Mr. LEVER. I assume that the gentleman has discussed this matter very thoroughly with Dr. Humphrey, and I would like to inquire if Dr. Humphrey has made up his mind as a scientist as to whether or not the eradication of the barberry bush will result in getting rid of this black-rust trouble or is the proposition still in the debatable stage?

Mr. YOUNG of North Dakota. I will say to the gentleman that Dr. Humphrey, who talked with me to-day in the presence of Dr. Kellerman, says that very recently all doubt upon this subject has been removed.

Mr. LEVER. I am very glad to hear that, because it makes the problem very much simpler.

Mr. YOUNG of North Dakota. Now, this is the thing that bothered the scientists in the past. It was like a herring drawn across the trail that confused them. They found that farther to the south the black-rust spores would live in the wheat fields throughout the winter, and the thought was that as in most of the wheat sections now on account of the cold the barberry bush is the only thing through which the rust parasite can live through the winter, their proposition was that if you killed the barberry, what good would it do, because in the warmer States the spores live through the winter and would be blown across the States. They have found now that where the spores do live through the winter, where it is more mild, they will not propagate when they are blown into the hard-wheat belt. So they have now reached the firm conclusion that the barberry bush is the host which perpetuates the black rust, and that the extermination of the barberry bush will practically rid us of any trouble from black rust.

Mr. WELLING. Will the gentleman yield?

Mr. YOUNG of North Dakota. Yes.

Mr. WELLING. I have not had the advantage of hearing all of the gentleman's interesting speech, and I would like to find out, if I can, how wide an area in the United States is affected by the black rust, or by the particular plant that seems to propagate it.

Mr. YOUNG of North Dakota. It affects every place where wheat is grown, more or less, but more particularly North and South Dakota, Minnesota, Montana, Illinois, and away on through as far as Ohio, and also in Texas. It is a national problem without any question.

Mr. LEVER. I am interested in the gentleman's statement that in certain sections of the country, under certain climatic conditions, the spores of this rust would live through the winter, notwithstanding the fact that it might not have as a host plant the barberry bush, but that it would not propagate itself in North Dakota. I was wondering if it would propagate itself under the climatic conditions in which it lived during the winter. Do I make myself clear?

Mr. YOUNG of North Dakota. The gentleman makes himself perfectly clear on that point, but I am not able to give him the information that he ought to rely on. I prefer that he would talk that over with the experts down at the department. I asked them that question this morning, and I am not absolutely sure what their answer was; but I gathered generally from what they said that by eradicating the barberry bush from the United States we would never have very serious trouble again from black rust anywhere in the country; and that is in keeping with all the old records they have had in the past. For instance, in Massachusetts and in Connecticut and in the old Colonies they discovered that the barberry bush was the fruitful cause of black rust, and no doubt it is a host or host for it everywhere East and West, North and South, and it either increases the amount of it or is the total cause of it—either one or the other. In the hard-wheat belt it is the entire cause.

Mr. HAUGEN. The gentleman has spoken of wheat. Other crops, such as the oat crop, are damaged equally. It does not affect the wheat crop alone, but it affects the oat crop as much as the wheat crop.

Mr. YOUNG of North Dakota. Also rye.

Mr. HAUGEN. In my State we are more especially interested in the oat crop. Until black rust came along our wheat yield was generally high; but black rust came along in 1878, and since that time we have not been able to produce much wheat. Occasionally we do grow a fairly good crop of wheat, but seldom as good as before we had the black rust. The black rust follows the hot winds, heavy dew, and the rain.

Mr. YOUNG of North Dakota. I will say also that it attacks rye and some of the other small grains, as well as oats.

Mr. HAUGEN. All of them.

Mr. WELLING. Is the gentleman able to say whether or not the black rust that he refers to is the same as the red rust that affects us sometimes out in the arid region, in my State and elsewhere?

Mr. YOUNG of North Dakota. No; not at all.

Mr. WELLING. It is a different proposition?

Mr. YOUNG of North Dakota. A different proposition; very much more serious.

Mr. HAUGEN. Entirely different.

Mr. YOUNG of North Dakota. It attacks the stem, and if it attacks it at the right time there is very little wheat. As I mentioned a little while ago, before the gentleman came in, in 1916 the official crop estimate for North Dakota was 160,000,000 bushels, and it was cut down by black rust to 39,000,000 bushels. And I want to say also that that 39,000,000 bushels, on account of the shrunken condition of the wheat, brought a very low price, and there was quite a lot of dockage in it. The wheat made excellent flour, but the grain dealers took an unfair advantage of the farmers because of the appearance of the grain. That, however, is a subject which I can not go into with my limited time.

Mr. WELLING. How much is being carried in the bill for the eradication of this plant?

Mr. YOUNG of North Dakota. Fifty thousand dollars.

Mr. WELLING. Does the gentleman feel that that is in any way adequate to eradicate this host plant that the gentleman is speaking about?

Mr. YOUNG of North Dakota. I wish the gentleman had made that statement in the committee room. I tried to get as much money as I could, and I thought the committee were fairly liberal with me when they let me have $50,000, although a very much greater sum could be used. It does seem to me that this is a proposition upon which the people of the United States ought not to gamble for a second. We ought to make dead sure that every barberry bush in the United States is destroyed before May 15 of this year, no matter how much money it takes.

Mr. WELLING. Fifty thousand dollars represents only about 25,000 bushels of wheat nowadays.

Mr. YOUNG of North Dakota. Yes.

Mr. WELLING. The experience you have had in your own State, which you have just quoted, would seem to justify a much larger expenditure if the thing is susceptible of successful combating.

Mr. YOUNG of North Dakota. As far as North Dakota is concerned, we have already appropriated money in that State to eradicate this plant; but it will not do any good for us to destroy it if other States do not destroy it also. I am not putting it on the ground of saving some money for the farmers who put in grain this year, although that is very important. I am putting it upon the ground that we must raise a big crop of spring wheat this year, and upon the further fact that the winter crop of wheat is poorer than it has been at any time in the crop history of this country. We must face this condition as it is. Since crop records have been kept in the United States we have never had an average condition so poor for winter wheat as at this time; and I am urging you now to stand by this appropriation, as I say, not because of its effect upon the individual farmer, but because of its possible effect on this war. If there is an item anywhere before any committee of this Congress that is distinctly a war item, this is the one. There is not anything more important in connection with bracing ourselves to fight this war through, and fight it through right, than to make sure of a big wheat crop this year. I will not object at all if the gentleman from Utah, when this item comes before the committee, moves to increase it.

Mr. HAUGEN. Will the gentleman yield?

Mr. YOUNG of North Dakota. Yes.

Mr. HAUGEN. I think it is but fair to the committee to state that the department's estimate was $20,000, and the committee increased it to $50,000. We feel that we have dealt liberally in this matter. If they think that more than $50,000 can be used, they can move to increase it; but the department has to carry on the work, and it is a question as to how much the department can use in the coming spring. I think that $50,000 is all that can be used to good advantage. It has to be done largely through the States Relations Service.

Mr. YOUNG of North Dakota. It depends upon how extensive a campaign of education shall be carried on. If we attempt to carry on a campaign such as the Food Administration is carrying on in respect to food, it would run up into the hundreds of thousands of dollars. If we undertake to educate all the people in the States where they do not raise wheat, as well as those where they do, to the idea that it is going to help to shorten this war to destroy the barberry bushes growing on the lawns in front of their houses—if we undertake to convince every man that that is the thing to do, it might reach a very large sum. I do not know how much free advertising the department can get, but I presume it can get a lot out of the agricultural journals and the milling-trade journals and all the newspapers of the country. They have all been very generous in giving space to everything that would help in the prosecution of the war. I presume that a large amount of publicity may be given without pay.

Mr. WELLING. Will the gentleman yield?

Mr. YOUNG of North Dakota. Yes.

Mr. WELLING. I do not want in any way to criticize the committee for the appropriation. I know something about the significance of pests in this western country, although this particular one has not invaded my State. I know how necessary it is that they should be adequately met when they first arrive.

Mr. YOUNG of North Dakota. There is another item that I desire to call attention to, which is this: A very serious seed-grain problem presents itself in many of the States. Congressman JOHN M. BAER has introduced a bill to help farmers to obtain seed wheat upon credit. I regret that the time yielded to me has about expired. Otherwise, I would present facts showing the necessity of passing the Baer bill if we are to expect a big crop this year. Upon a later date I shall address the House upon the subject of seed grain. The danger from a lack of seed wheat is one of the strongest reasons why we should make no mistake on the question of black rust. I do not think there is any doubt at all that quite a large number of farmers in the United States will not put in wheat this year simply because they have not the seed and have no money to buy it and not sufficient credit. If that is true, and if Congress does not provide some method by which farmers can buy seed wheat on time, it is one more reason, one added reason, why we should see to it that the wheat crop this year is not destroyed by black rust.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. I yield the gentleman five minutes more.

Mr. YOUNG of North Dakota. Gov. Frasier, of North Dakota, being alive to the vital importance of the seed problem, has called the legislature together in extra session for the purpose of dealing with it. I do not know how many States will take similar action. It is expected in North Dakota that the legislature will authorize counties to bond themselves for the purpose of buying seed wheat which they can sell on time to those who have no money to buy it. Yet, even after that authorization is made, there will still be the problem of selling the bonds. They will be short-time bonds. There is a regular commercial market for long-time county bonds, but no regular market, no established place, where short-time bonds—six months, seven or eight months' paper in the shape of bonds of counties—may be sold. Even if there should be a ready market for their bonds there is a limit to what each county can do in the way of voting bonds to buy grain.

Even if the farmers are helped in that respect I think there will be in our State a good many fields that will not be seeded to wheat this year, simply because they can not raise money to buy the seed. In Montana I think the situation is worse than in the western half of our State, and there will doubtless be quite a large acreage that will not be seeded to wheat, because they have not the seed. Some of you gentlemen here know the conditions in Texas and some of the other States. This all argues, I think, the importance of making provision to take care of the one preventable thing, the destruction of the wheat crop, by destroying the barberry bushes. When this item is reached in the bill I, of course, do not expect that anybody here now—and I am glad so many have remained to hear me—I do not expect anyone will make a point of order against having this item made immediately available, because I am sure that everyone here appreciates the fact that if we do not destroy the barberry bushes before May 15 it will not do any good to destroy them afterwards. This appropriation will be useless to us unless it is made immediately available. If anyone proposes to make that point of order, I hope all of you who are here now will help to persuade him to withdraw it. The Food Administration is making a great and, to my mind, a very commendable campaign to save food, particularly breadstuffs. But with their wheatless days, their expenditure of hundreds of thousands of dollars in publicity and otherwise, at most they can not hope to save more than 180,000,000 bushels of wheat. In 1916 180,000,000 bushels of wheat were destroyed by black rust in the hard-wheat belt alone. I appeal to you, gentlemen, to join us of the Committee on Agriculture in passing this appropriation item to make the recurrence of such a calamity impossible. [Applause.]

Mr. HAUGEN. Will the gentleman from South Carolina use some of his time?

Mr. LEVER. I have been overwhelmingly besieged for time, but the besiegers do not happen to be here at present.

Mr. GARRETT of Tennessee. Mr. Chairman, I make the point of order that no quorum is present.

Mr. LEVER. I hope the gentleman will not do that.

Mr. HAUGEN. The gentleman from Idaho, to whom I next yield, will be here in a minute.

Mr. GARRETT of Tennessee. Mr. Chairman, I will withdraw the point of order.

Mr. LEVER. Mr. Chairman, in the meantime I would like to ask the members of the committee, in order that we may expedite the consideration of the bill when it reaches discussion under the five-minute rule, to read carefully the report that accompanies the bill. The report has been carefully prepared with a good deal of trouble, and undertakes to give in some detail the lines of work that are to be undertaken under each item and with each appropriation. If gentlemen who are not on the Agricultural Committee will familiarize themselves in a degree with the report, I am satisfied that it will save all of us on the committee having to go through the necessity of explaining these various and sundry items as they come up in the bill. I may say further that in reporting the bill the committee has made it after very careful inquiry into the needs of the Department of Agriculture.

In most of the items there has been little, if any, change. The committee on its own initiative in some cases has increased or decreased these appropriations, as in the judgment of the committee was thought wise. One of the larger increases is most important. A considerable increase in the appropriation was made for the control of tuberculosis in food animals—in cattle and in hogs. The expenditures of the Department of Agriculture for that purpose during the current fiscal year will amount, as I recall it, to about $117,000. The department in its estimates requested an increase over that amount of $66,000. The committee of its own accord added to this until the appropriation, as carried in the bill for that purpose, amounts to $250,000. I took this matter up myself, after a discussion in the committee with representatives of the Secretary's office, and I was informed by them that the Secretary felt that the department could very wisely use $250,000 during the next fiscal year in work attempting to control and prevent the spread of tuberculosis in food animals. The estimates of losses from this disease of cattle and hogs vary anywhere from $25,000,000 to $30,000,000 a year, and yet all of us know that there is an absolute world shortage in meat-producing animals, due, of course, to the heavy drains of the war. The committee therefore felt that it was justified in providing additional funds for stimulating, encouraging, and promoting this line of work, and therefore upon its motion increased the appropriation.

Mr. GOODWIN of Arkansas. To what extent have the activities of the Government been extended in endeavoring to control tuberculosis in live stock?

Mr. LEVER. I would say that the only extensive effort to control and eradicate tuberculosis, aside from the study of the disease itself, was taken up this fiscal year under an appropriation which is now carried in the Agricultural appropriation act for this year.

Mr. GOODWIN of Arkansas. Does the gentleman know what success, if any, the Government has made in that direction?

Mr. LEVER. Of course, the work has been largely experimental, and it has been going on for not more than six or eight months, but the reports are encouraging to the effect that with proper handling, proper appropriations, and patience and a long pull, we ought to ultimately control this disease.

Mr. GOODWIN of Arkansas. I think it is an important work and ought to be liberally provided for.

Mr. HAUGEN. Mr. Chairman, I yield 30 minutes to the gentleman from New York [Mr. FRANCIS].

Mr. FRANCIS. Mr. Chairman, it is most timely at this point in our session to bring to the attention of Congress all accurate testimony available concerning conditions in our great National Army camps. We have all had reports from our young constituents concerning the treatment they have received, and the revelations in the testimony before the Senate Military Committee have brought home to us a realization that all has not been going well. With a desire to inform myself as to conditions on the ground, I took time during the past few days to visit five of our camps, and wish to submit my observations and conclusions for the information of this body.

CAMP DEVENS.

Camp Devens is our most northerly camp. As you approach it, your worst fears, based upon frequent rumors of the extraordinary cold weather prevailing at that spot, seem about to be entirely fulfilled. It is a complete snow scene. The fields are white; the roads and drill grounds are white; the roofs, and everything but the four walls of the buildings. Everything is covered with a foot of snow. The mistake of putting a permanent training camp so far north is manifest. But great as was the mistake, the rigors of the situation have to a considerable degree been overcome by the extraordinary industry of those assigned to the place.

There are several commendable features about this camp. Though it was placed on a rough and hilly site, months of work have overcome the handicap and there are now many excellent level drill grounds. Though it is complexly arranged, a host of intelligent signs make traveling about easy. It is particularly characteristic of this camp that signs and directions everywhere, indoors and out, make duties clear and identification simple. Other camps might imitate this feature with profit. There is also a large and fully equipped motor truck, full of all conceivable shoemaking and repairing machinery, which operates under its own power, and can take care of the footwear of an entire division. This is an important feature, and is worth the serious attention of the War Department. But what stands out preeminent at this camp is the general air of interest and activity. Everyone is doing something.

Numerous construction and repair tasks are under way. The vast blanket of snow is not permitted to be an obstacle. The men are well clothed and fed and their quarters are warm and comfortable.

Much, however, remains to be done. Owing to the faulty location many more inequalities of ground must be removed in the spring. The garrison shoes, which have been issued to the men have not been successful, and have broken down after brief usage. Even after long urging the War Department has not yet sent a sufficient supply of large-sized overcoats. There is, however, an over supply of small coats. One is lead to believe that there must be a chart of sizes of overcoats for a division in Washington, and that the failure of the boys at camp to respond to the sizes printed on the chart is considered such a violation of regulations that the boys must be made to suffer. In particular, there is an inexcusable scarcity of school buildings. Many special schools of instruction in gunnery, range finding, bombing, and similar work are in operation, but there is no place to hold them except out of doors on the snow, or in the barracks among the beds. Under either environment this highly necessary military instruction is handicapped. At the hospital, where there are also several large classes, there are neither sufficient rooms for teaching or adequate quarters to house those who are temporarily there or the nurses.

In the field of ordnance there is a painful scarcity of equipment. There are enough horses but not enough saddles or bridles or halters. The horses were rescued from a stable which upon the first thaw left them standing in a foot of water. As for artillery, I saw at least 50 wooden guns mounted on carriage wheels and many more similar makeshift limbers. There was one wooden model of a 3-inch field piece, a clever imitation and typical of the Yankee ingenuity displayed at the camp. But what a commentary on the efficiency of our War Department to have to construct a wooden gun after we have been at war nearly a year. There should be 72 field guns and howitzers at the camp, but there are less than a dozen old-fashioned pieces. There should have been at least one modern gun for instruction. The camp has no modern machine guns. From a huge dugout of snow a large howitzer protruded, but unfortunately it was only of wood. In one regiment two naval guns have somehow been obtained, and at the side of them are two ingenious but sad-looking creations, a 1-pounder and a trench gun, made from lengths of gas and water pipe.

In spite of all this the spirit of the camp is excellent. There is a wonderful depot brigade exchange which has paid a $200 dividend to 35 companies and has $10,000 in the bank. The spirit of the officers is one of creative energy, a spirit that might be imitated with profit in Washington. It is refreshing to spend a few days with these practical men who are creating an army on the ground and not behind a barricade of desks.

CAMP UPTON.

Camp Upton is one of the best known of the National Army Camps because of its proximity to the great city of New York. Thousands have visited it weekly and know its bare and frozen vistas by heart. Because of this location it has had the benefit of much special attention.

The hospital is well equipped and has never been overcrowded. The health of the camp compares favorably with that of any other. The food here has always been of superior quality, and it is obvious that there is an excellent spirit both at work and play among the men. Many forms of recreation have been successfully instituted.

There are, however, several features that are not at all satisfactory. The Field Artillery regiments have virtually no guns to drill with—not even wooden guns—so far as I could see. For four months the men have been going through the motions with this chief article of attack represented by an area marked on the ground. Consider how much invaluable time for technical instruction has been lost.

The shoes at the camp have been a failure. The camp's newspaper published prominently in its columns the fact that several shoes were found to contain paper and glue fillings in the heels and soles. All of the men who can afford it purchase durable shoes outside.

In laying out the camp the conventional design was strictly followed, with unfortunate consequences. The country at Yaphank is rolling, and the rigid adherence to the plan resulted in some quarters being placed in hollows of the ground. Naturally during the recent snowfalls and thaws the floors of some were flooded. Many barracks, though not flooded, are to-day totally surrounded by frozen ponds. Extensive drainage must be provided in the future if the camp is to be kept open. At the present time all roads of approach to the camp are of soft dirt frozen into prodigous ruts. Something must be done before the spring thaw, or Upton will be isolated except by railroad. This is a serious situation, of which no cognizance seems to have been taken at Washington. Carloads of cinders should be on the way there now.

There are several minor matters worthy of comment. The military police, which should have 300 horses, has only 30, and is without saddles, save 10 which it borrowed. There are 4,000 horses in camp, but through the complete lack of halters none can be used. There is an ample supply of horseshoes but no nails, and the standing joke of the police is which is the best way to tie the shoes onto hoofs. There are not even yet sufficient woolen gloves for the men, and, in spite of the fact that the wet weather of spring is soon to be here, there are only a few hundred of overshoes in camp. There should be 30,000, in view of the quality of the shoes and of the soil, or we will have an outbreak of grip and pneumonia.

It is doubtful if the camp was wisely placed. The surrounding country is somewhat marshy and has a reputation of excessive heat and mosquitoes in summer. An effort must be made to drain these marshes. In spite of all, however, substantial progress has been made in Infantry work, and it was my pleasure to see an admirable drill of a regiment of Engineers.

CAMP MILLS.

My first impression as I approached Camp Mills, the abandoned National Guard camp on Long Island, was that it had been hit by a hurricane. Tent poles stuck up in the air at rakish angles, some with swaying guy ropes, some with strips of tattered canvas, while near by other tents of various sizes and shapes swayed and flapped unsteadily in the icy wind. My advent upon the ground only magnified the scene of desolation. For a mile in either direction was a field with a sorrowful outfit of torn and abandoned tents in all stages of destruction. From long rows of mess kitchens ragged burlap coverings fluttered in the gale.

It seems that the Rainbow Division had left in a hurry, as the approach of winter brought on pneumonia, and had left so hastily that it had no time to strike camp. For some weeks the outfit was left standing in the face of oncoming winter, and by the time the War Department had acted the damage was done. About 250 tents were still standing. These were, for the most part, frozen to the ground; that is, they had been ditched and the earth thrown against the sides, leaving a solid mass of ice and frozen earth. These tents were gradually being lashed to pieces in the wind. About 300 tents were down on the ground and frozen in solid. Pools of water had formed in the folds of the canvas and were now ice.

Through this wreckage protruded tent poles and angular stove pipes. All this outfit was a total loss.

In some fields I could see that the equipment had been taken down, the poles and pins removed, and the ground cleared. A soldier informed me that the destruction was not complete, but that over a thousand tents had been packed away. I went to look over the method of storage. There are at the camp about 6 or 7 rows of mess kitchens of about 20 kitchens to a row. These buildings have roofs covered with tar paper, but the sides are only protected with screening or burlap. As I entered the first one, I found how the tents were stored. They were stacked in piles. Through the ragged burlap the winter gale, with its fine snow, blew in. On two sides the burlap was entirely down. The floor was of dirt. In this shack I counted, roughly, 100 tents folded and roped, but with the bottom layer frozen in pools of water. The kitchen also contained some 500 camp cots, collapsed and stacked, but with the bottom row likewise frozen in. After tramping a mile and looking into many of these abandoned kitchens, I found it was the same everywhere. They all contained stacks of equipment virtually unprotected from the weather. They must have held between one and two thousand one-time valuable canvas homes, but now hopelessly on the way to destruction in the falling snow.

A further survey of the field revealed in one spot a huge heap of tents, more than 200, utterly unprotected in the open air. In another spot was a pile of stoves and stovepipes fast rusting. Near the railroad was a pile of baled hay, a hundred or more feet in length, entirely unprotected. A few soldiers of the camp guard were wandering about picking up an occasional stove or shovel by way of salvage.

The first natural question is, What is the amount of the loss? The Army and Navy Register of January 5, 1918, puts it at $300,000. Roughly speaking, it can be said that the entire camp equipment of a division was abandoned, not abandoned on the field of battle, but within 30 miles of New York. Some can be saved if it is taken away now before it is destroyed by the weather to come, but the part that is frozen in can never be recovered. The loss at this camp has a double significance, because, while these tents were going to ruin, severe epidemics racked Camp Sevier and Camp Funston and Camp Bowie from overcrowding.

CAMP DIX.

Camp Dix, like Camp Devens, was on the day of my visit blanketed with snow. It was not as deep, perhaps, but it was accompanied by a temperature below freezing. Companies of our soldier boys were going through their setting-up exercises in overcoats in the snowy fields. The air was bracing, for the camp is located in the famous central healthy zone of New Jersey. The whole setting was an ideal one for winter sports but hardly for military training. Here, as elsewhere, there was an enthusiastic spirit among the men. They were eager for work and military lessons by day, and during evenings kept all the pianos in camp in action. Their barracks were warm and their bath houses comfortably heated.

It was not difficult, however, to detect certain serious faults. The construction of the camp buildings must have been unusually faulty, as already parts of the walls are drawing apart, leaving large cracks. In particular the hospital has suffered. The hospital is not even yet done, although it is fully occupied, and a recital of its shortcomings reflects seriously upon those responsible for its condition. Its sterilizers are incomplete. It is short of all kinds of surgical instruments. The walls of the operating rooms are not only drawing apart but were not sanitary or air-tight when constructed, and are not so built that they may be washed down or sterilized. In some of the wings the ventilators in the roofs have been defectively built, allowing rain to beat in and leak down. The dark room is still light, as there is no black paint in the camp. In the head department the construction is the worst. The operating rooms not only have insanitary walls but wooden floors. The hospital only has a partial fire equipment, and the fire house connected with it has never been built. It has not sufficient auto trucks for its business, and it has inadequate telephone facilities. Unless these defects are remedied promptly they may well be the cause of serious consequences.

The situation in respect of ordnance is deplorable as elsewhere. Men are training with disused Colt automatics. They have never seen the type of machine gun that they are to use, and, indeed, do not know what it is to be, so that they may study the designs. There is no modern artillery in the camp whatsoever, though there is some old material for drills. There are no automatic revolvers.

In equipment for the men there is a shortage of large-size overcoats, and of the new and necessary winter caps. Companies of men were still marching about in the freezing weather with the old-style campaign hat. The military police alone were adequately clothed. The situation with respect to shoes is obscure, but many who had had two pairs issued to them have been ordered to return one pair for reasons unknown. Many men have bought their own shoes as those issued were uncomfortable. Other minor matters are open to comment. There are not enough schoolhouses. No provision has been made to meet the spring thaw, and the natives prophesy weeks of impassable country roads. There is a lack of equipment for the horses. The men, however, are working on looking forward with hope to the day when they will go across, but no matter how much spirit they show they will never be a well-trained army until we put in their hands the implements that they are going to use at the front.

CAMP MEADE.

The greeting at Camp Meade was a heavy snowstorm, entitling this camp to be classified with those farther north as not suitable for winter training. It is far enough north to be subject to heavy snowfalls and yet not sufficiently far to have the offsetting benefit of continued cold weather, which is not unhealthy for warmly clad people. At Camp Meade there are freezing spells and thaws, making it a fertile field for colds and grippe. The southern negroes who have been transferred to this camp for training have felt this particularly. In this connection, it is to be said that the policy which sent the southern negro north to a snowy country for his training can be justified only on exceedingly narrow grounds. It has resulted in unnecessary sickness among their numbers, and the time is going to come on the battle front when the social question involved will have to be met.

The chief distinctive attraction at this camp is the schools. There are several for machine gunnery, bomb work, liaison work, and artillery, and all housed in commodious buildings and busy all day with classes. The eagerness and intelligence of the soldier students is subject of comment by all the instructors. There are also two extensive sets of works in the field for training men in open attack, with trenches, obstacles, and dummies to be encountered. As at Camp Devens, there is a general air of diligent preparation about the camp.

The base hospital, however, is by no means in a satisfactory condition. There are not yet sufficient officers' quarters nor sufficient hot water for such that exist. The walls of the operating rooms are not sanitary. The operating room in the head department not only has defective walls, but it is planned to cover the floor with linoleum, which will not last under acids and from which blood stains can not be eradicated. The plumbing in many parts of the hospital is defective. There is such a bad selection and shortage of instruments that many of the doctors have been forced to supply the deficiency out of their own pockets.

It may be mentioned here that the heating system at all the hospitals is defective. There is no return system and thousands of gallons of hot water are thrown away, involving a wastage of tons of coal.

The soldiers are not yet completely equipped for winter, though it is nearly February. There is only a partial supply of winter caps and rubber overshoes. There is still a shortage of woolen gloves and leggings, and while the stock of woolen uniform coats is numerically sufficient, there is a shortage in several sizes. The boys complain that they should be required to pay full fare on the near-by railroad, in view of the fact that there is a special reduced rate on the road to Camp Upton. They complain also that the allotment money which should go to their parents is two and three months overdue, which works great hardships at home.

The ordnance situation is substantially the same as elsewhere. There are only a few old field guns for drilling. There are not sufficient machine guns, but those that the camp has are being put to best advantage in the schools. Though there are plenty of horses, there are not enough saddles or saddle blankets. In fact, this matter of horses is an example of the lack of coordination in Army plans. All over the country are thousands of horses eating their heads off week after week which can not be used because there is no ordnance to be drawn and no harness to draw it with if it existed.

CONCLUSION.

This brief review of conditions on the ground is suggestive in itself, but the general situation must be considered before attempting a full interpretation.

Two outstanding features came to my notice at every point—first, the unsatisfactory relations between the camps and Washington; second, the gunfire situation.

In respect of the first, it was the constant complaint that everything involving routine through Washington was accompanied with interminable delay. As one of the officers put it, it took him three months to get out of Washington what he could go to town and get in three days if he wanted to pay for it himself. True there were occasional exceptions in matters of soldiers' clothing, but repeated requisitions have been sent from some camps for supplies and equipment without result, and even without acknowledgment. There were numerous complaints from the men that allotments to their families were several months behind, and they felt justly incensed that the Government should withhold the money that they had earned. Also at one camp three men who were disabled and who had been recommended for discharge have been idling around for over three weeks awaiting word from Washington. Moreover, orders emanating from Washington are too rigid in character. Not even commanding generals at camps have authority to modify the regulations of the Quartermaster Department in details of construction. The Regular Army officers are dissatisfied because promotion has been confined to within the division, and their juniors in rank are constantly going over their heads in new commands. The active and alert men at the camp accept the situation as one of the necessary evils of life. They have no envy for the bullet-proof, swivel-chaired jobs in the War Building.

The second observation is concerning the artillery and the machine guns. It is humiliating to go to camp after camp and be faced with ingenious wooden dummies. The breakdown of the Ordnance Department is brought home as it never could be before a committee. Let us consider the situation of modern warfare broadly. The one great thing that has been brought home to us over and over again is that the way to win the war is by gunfire. We know that we must train thousands in the intricacies of modern artillery practice. So important is this work that scores of expert French and British officers have been taken from the front to teach the necessary technique. How do you think a foreign officer feels who has now for four months, in our tenth month of war, been teaching machine-gun fire from blue prints and blackboard drawings? Many of them feel that they should go back to the trenches on the western front, where there is man's work to be done. They are tired waiting for machine guns. It is inexcusable that from our supply at Springfield half a dozen of the modern types should not have been sent to each camp long ago. As one foreign officer put it, with three Vickers guns he could turn out 75 machine-gun instructors a month, and could have been doing this for four months. England has been making 2,000 Lewis guns a month, and could have readily sent us 100. Our Army will never be more than an army of paraders until we have taught it gunfire. In the matter of field artillery the situation is equally bad. We have been teaching men how to place guns that they have never seen; how to range them with instruments they have only read about in books, and how to charge them with shells that exist only in photographs. In this, the chief and greatest factor of modern warfare, we are now 10 months at war with no proficiency in the field.

This leads me to consider the final question, that interests us all, of what is the matter with the War Department. Before I attempt to answer this I want to say that no one can visit our camps without a realization that a great and impressive work has been done and that the fullest recognition should be given to those who have done it.

But I have asked this question because a still greater task is ahead of us than we have accomplished. Many of us, Members of Congress, have spent nine weary months being shunted from door to door and from officer to officer, and we know well what is the most obvious fault. We know it is filled with incompetents and deadwood. It is so, because we know the men. We can point out specifically men now sitting at desks who would not last a month in civil employment. We have found generals doing the work of clerks and captains doing the work of errand boys. What our War Department needs first and foremost is a Kitchener to clear the deadwood out. No theory of administration can make deadwood animate. It has got to go.

In the second place, we know that the work of the War Department is faulty, because the organization of the War Department is defective. No amount of minor organization can remedy it. The trouble is that it is philosophically wrong at the head. I can best illustrate this in this manner: The most successful modern form of business organization is the American corporation. This corporation has two heads; one is the chairman of the executive committee, whose duty it is to create policies; and the other is the president, whose duty it is to carry out the policies. He is the administrative head. We frequently pay chairmen of our executive committees $100,000 a year to do nothing but think. We do not permit them to undertake administrative tasks. We know they can not think if they have to constantly act. It is the president of the corporation who is expected to provide the driving power. Now, the trouble with the organization of the War Department is that the double duty of creating policies and furnishing administrative power is vested in one man. He is the Secretary of War. Neither he nor any one man in the United States can carry these two burdens in this war. This war is the greatest business ever undertaken in America. We must treat it as the practical business man of America would. These two functions now vested in the Secretary must be distributed if we are going to get both plan and action in the War Department.

I have offered these suggestions by way of constructive criticism and not in a spirit of attack or hostility. Furthermore, what we must do with the War Department we must do with the entire administrative branch of the United States Government. The Nation needs an industrial plan. We must select men of brains and give them the time to create this plan. We must let others carry it out. This war is essentially a war of industrial production, and if we do not place in positions of authority the great industrial leaders of the country we will meet with disaster. [Applause.]

Mr. HAUGEN. Mr. Chairman, I yield 25 minutes to the gentleman from Oklahoma [Mr. MORGAN].

Mr. MORGAN. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MORGAN. Mr. Chairman, we are considering the agricultural appropriation bill, a measure of vital interest not merely to farmers but to the whole country. We are in a great war. It is conceded that there is nothing more important than the increase in our food production. Therefore Congress should promptly enact all legislation that will contribute to this end. In the national platforms of the two great political parties of this Nation in 1912 there was a distinct pledge to the farmers of the United States that the National Government would give them credit facilities equal to those possessed by trade, commerce, and manufacturing. By the act approved July 17, 1916, we enacted a law to provide the farmers of the United States with long-time farm-mortgage credit. That applies only to farm-mortgage credit. It is a long-time credit system. Under it loans can not be secured for less than five years. There is another kind of credit the farmer must have. It is known as short-term or personal credit. Fully one-half of the $6,000,000,000 indebtedness of the farmer is short-term loans from individuals, merchants, and banks. Our system of farm credit is not complete, and we will not have redeemed our pledge to the farmers until we shall have established a system of short-term farm credit. Fully one-third of our farmers are tenants, who can not utilize the long-term farm-mortgage system, because they have no farms to mortgage. A large percentage of men who have farms do not need or desire five-year loans. They do need and can utilize short-term loans. There is another point. It is on short-term personal loans that farmers pay the highest rate of interest. It is on such loans that extortionate rates of interest are usually charged. Until the short-term farm-credit system shall have been established we will not have lifted the burden of high interest rates from the farmer or given agriculture the credit facilities essential to its prosperity. So I appeal to my colleagues in this House, Republicans and Democrats, to join with me in the preparation and passage of a short-term farm-credit bill.

With a view to doing my part in this great undertaking, I have prepared and introduced a bill (H. R. 8827) for this purpose. It is entitled "A bill to provide short-term credit for the farmers of the United States, and for other purposes."

By permission granted me to extend my remarks, I will print the bill in full as "Appendix A."

OUTLINE OF PLAN.

The bill H. R. 8827, introduced by me, proposes—

1. To authorize farmers to incorporate local credit organizations, under the name of "Federal farm credit societies."

2. To establish 12 regional banks, to be known as national farm-credit banks.

3. To require the Federal reserve banks to rediscount, under proper restrictions, the notes of farmers when indorsed by a local credit society and a regional bank, and to authorize all other banks to discount or rediscount such paper.

4. To make the regional banks Government depositaries and to authorize special deposits therein by the Secretary of the Treasury, and to permit the regional banks, through the local credit societies, to utilize these deposits in extending credit to the farmers of the United States upon the same terms that com-

mercial banks use such deposits in extending credit to trade, commerce, and manufacturing.

5. To authorize regional banks to issue and sell farm-credit debentures, based upon the notes of farmers, when indorsed by a local Federal farm-credit society and a regional bank.

NATIONAL FARM-CREDIT BANKS.

Under the provisions of my bill, the 12 regional banks are designated as "national farm-credit banks." The following summary describes their chief characteristics:

1. One of these banks will be located in each of the 12 Federal land-bank districts, and the national farm-credit bank and the Federal land bank, in each of said districts, will be twin institutions, located in the same city, doing business in the same building, having the same men for directors and officers, assistants and employees, and yet be entirely separate and independent corporations, promoting a different line of agricultural credit, and in no way responsible for each other's contracts or debts.

2. Exclusive of the capital subscribed by Federal farm-credit societies, which must be equal to one-tenth of the amount of credit extended to such societies, every national farm-credit bank, before beginning business, must have a minimum capital of $1,000,000, which if not otherwise subscribed, will be taken by the Federal Government.

3. They may receive deposits, pay interest thereon, borrow money, use their funds in making loans to Federal farm-credit societies, and by discounting notes with the Federal reserve banks and other financial institutions, they are to become the avenues through which credit will flow from its sources to the farms.

4. National farm-credit banks, in furnishing credit for the local society, will rely (1) upon their capital, (2) upon deposits from individuals or the Federal Government, (3) upon the sale of debentures, and (4) upon rediscounting the notes of the farmers, when indorsed by local societies, with the Federal reserve banks and other banking and financial institutions.

5. Each national farm-credit bank will be primarily liable for its own debts and debentures, but in case of a failure of any one of such banks, all other such banks will be required to contribute to prevent loss to its creditors.

Mr. LOBECK. Will the gentleman yield?

Mr. MORGAN. I am glad to yield to the able and distinguished gentleman from Nebraska.

Mr. LOBECK. May I ask if the bill the gentleman introduced covers the idea of loaning money to these tenant farmers on short time, or does it tend to assist them in buying farms, implements, grain, seed, and so forth?

Mr. MORGAN. The plan provides for furnishing them with short-term credit for any productive purpose, to extend for one year. The tenant farmer must develop his business. As a tenant he must make sufficient money—say, half the price of the farm—before he can use the long-term, farm-mortgage banks to aid him in buying a farm.

Increased personal credit at a low rate of interest, used to purchase additional live stock, better farm implements, machinery, tools, and other equipment, seeds and fertilizers, and to employ labor, will enable the tenant to enlarge his business operations, increase his production, and augment his annual savings. The short-term personal credit will lead him up to the point where he will have sufficient means to enable him to utilize the Federal land banks in securing a long-time loan, through the assistance of which he rises from the tenant class to the position of proprietor and owner.

Mr. LOBECK. Now, is this money in addition to the money that is loaned by the Government under the land-bank theory?

Mr. MORGAN. I did not understand the gentleman.

Mr. LOBECK. Is this money the gentleman provides a short loan by the Government in addition to the money loaned on the land owned by the borrower?

Mr. MORGAN. Certainly. It is from entirely different institutions.

Mr. LOBECK. The Government is not intending to loan to other people, who do not have farming property or own land?

Mr. MORGAN. It loans to anybody who can furnish the required security for a personal loan, just as commercial banks now make loans upon personal security or chattel mortgage. Many men who have little property have credit and, if necessary, can furnish indorsers for any reasonable amount.

Mr. LOBECK. I understand the Canadian Government is loaning to men to whom they sell land or grant land in certain cases to develop their farms and——

Mr. MORGAN. Yes; the Canadian Government, as well as many other governments, has been much more liberal in loaning money to farmers and in aiding them to become landowners than has the United States.

FEDERAL FARM-CREDIT SOCIETIES.

The chief features of the local Federal farm-credit societies may be outlined as follows:

First. They will be corporations, operating in restricted areas, serving a limited farm population, controlled by borrowers, and managed by a board of five directors, with a president, vice president, and secretary-treasurer, who will be the only paid official.

Second. They will not be banks, receiving deposits or doing a general banking business, but will be credit societies, utilizing the local commercial banks for depositories.

Third. Exclusive of the capital subscribed by borrowers, each society will have a minimum working capital of $2,500, which, if not otherwise subscribed, will be furnished by the Federal Government.

Fourth. Each borrower will be required to subscribe to the capital of the local society in an amount equal to one-tenth of the loan granted, which may be paid for out of the proceeds of the loan, and on the payment of the note such stock may be canceled and the face value thereof credited on the note.

Fifth. Local societies are authorized to charge one-half of 1 per cent per annum interest in excess of the interest rate which the regional bank charges the local society, and from this margin will be expected to meet administrative expenses and be able to pay dividends on stock held by borrowers sufficient to offset the interest paid by them on money invested in the stock held in the local society, but no dividends will be paid on stock held by the Government.

Sixth. Local societies will make loans on their own account entirely independent of the regional bank, and will thus be in a position to transact business promptly and to close loans without delay.

Seventh. Local societies, in borrowing money from regional banks or in having their notes discounted thereby, will subscribe to the capital stock of the regional bank in an amount equal to one-tenth of the credit extended by the regional bank.

Eighth. Shareholders in local societies are liable for the debts of such societies only to the amount of stock held; but the principle of the unlimited liability, practiced by many of the European short-term farm credit societies, will apply as between societies, so that in case of the bankruptcy of a local society all other societies will be required to contribute to prevent losses to creditors.

Ninth. Local societies are made exempt from local or Federal taxation, are prohibited from charging an interest rate in excess of 6 per cent per annum, can not make loans for less than $10 or for more than $1,000, and all loans must be secured by the signature of two responsible indorsers, or by chattel mortgage, or by bonds or other adequate collateral security.

IMPORTANT DIFFERENCE.

Under the provisions of my bill, H. R. 8827, the local credit societies differ radically from the ordinary local credit society under European short-term credit systems. In Europe generally local credit societies receive deposits and do a general banking business. Under my bill local credit societies are not authorized to receive deposits or to conduct a general banking business. There should be some good reason for this proposed change. Some of these reasons are as follows:

1. To permit local societies to receive deposits and conduct a general banking business means a duplication of banking institutions in almost every community in the land. This country already has an abundance, if not a superabundance, of banking institutions. The increase in the number of banks in the community does not, as is generally supposed, greatly enlarge the credit resources of the community. Their chief credit power comes from deposits. The banks render a service to the public, but the public pays for it. When banks are too numerous it simply means increased charges on the public in some form. Banks compete for deposits, but their interest rates in a given community are quite uniform. Clearly, therefore, the National Government should not bring into existence an entirely new set of banking institutions, located in every communiay, and covering the entire country, unless such a course is necessary to accomplish the purpose in view, namely, to provide the farmers with adequate credit facilities at a low rate of interest.

2. The receiving of deposits and the conducting of a general banking business will require local societies to invest much larger capital. The people in this country, including the farmers, are accustomed to make their deposits and do business at the local commercial banks. To compete with these banks in securing deposits the local societies must do business upon a scale which compares favorably with the facilities, opportunities, and advantages offered by the local banks. To do this, the farmers must furnish large additional capital. This would hinder rather than help the success of the local institutions.

3. To receive deposits and conduct a general banking business, in competition with local commercial banks, will largely increase the expenses of operating, managing, and maintaining such societies. The farmers who borrow must, of course, pay this expense. This means higher interest rates. Economy in administration is one of the chief principles upon which European societies depend to insure low rates of interest.

4. To receive deposits and conduct a general banking business by local societies means a much greater cost to the Federal Government in their supervision, regulation, and control. We should not, of course, overlook the expense which the National Government will be to in the supervision of these institutions, because the expense thereof must be raised by general taxation, and the farmers, constituting more than one-third of the population of the United States, must pay their share.

5. To receive deposits and conduct a general banking business adds very greatly to the complexity of the business operations thereof. Other things being equal, simplicity in business is always desirable. Farmers who manage local societies are not expected to be experts in commercial or banking business, as bankers are not experts in farming. Unless it is absolutely essential, the local credit societies which the farmers are to manage should not be authorized to conduct a business which from its very nature is difficult, complex, and intricate and in which they have had no training.

6. To receive deposits and conduct a general banking business by the local societies will require far greater skill and efficiency in the managers thereof, and this will mean higher-priced salaries and greater expenses.

7. The more complicated a business is the greater danger there will be of financial failure. "Too many irons in the fire" is applicable to all kinds of corporations, including farm-credit institutions, as it is to individuals. There is danger in complexity of business. A short-term farm-mortgage credit system, when fully established in the United States, will be by far the largest institution of the kind in the world. In founding it every precaution should be taken to secure its safety and permanency. It should be built upon a solid and enduring foundation. No practice, principle, or feature should be utilized in its construction that will endanger its safety.

8. To permit local credit societies to receive deposits and to conduct a general banking business would place them in direct competition with the local commercial banks in every community. This might develop antagonism which might result disastrously or injuriously to either or both. The law gives private parties the right to organize commercial banks, and it is an eminently useful and respectable business. There are, of course, unconscionable bankers. So there are bad men in all occupations. The object of short-term farm-mortgage credit is not to injure bankers or to destroy their business. But this is a free country and equality of opportunity should be conceded and guaranteed to all. The farmers, therefore, should be given ungrudgingly the opportunity to organize with a view to increasing their credit facilities, to reduce the cost thereof, and to utilize these credit facilities to expand and extend and enlarge the great industry of agriculture and to promote their own material interests. To do this will not mean loss to commercial banks or to other legitimate business institutions. It will mean greater prosperity and happiness for all. I do not, therefore, advocate better credit facilities and lower interest rates to farmers in the spirit of antagonism to banks or other business interests. I do it in a spirit of broad patriotism, knowing in my heart that it will promote not only the material prosperity of farmers, but that it will contribute to the social, educational, and religious advancement of our farm population, increase the wealth of the Nation, and promote the general welfare of the American people.

Mr. COX. Will the gentleman yield for a question?

Mr. MORGAN. I will be glad to yield to my distinguished friend from Indiana.

Mr. COX. The gentleman has kept up with this question more closely than I have and knows more about it than I do. Can he tell me what is being done in the way of joint-stock company banks that are provided for under the farm-loan banks?

Mr. MORGAN. I talked with one of the officers of the Federal Farm Loan Board, and my memory is that he said that there had been two organized and those were in the gentleman's own State—Indiana.

Mr. COX. I did not think any had been organized in my State.

Mr. MORGAN. I think he said two.

Mr. CANDLER of Mississippi. I think I heard the chairman of the Farm Loan Board state that there were four in the United States, and that they were all in the eastern part of the country and confined entirely to that section.

Mr. COX. I was called out and did not hear all the gentleman said. I quite agree with the gentleman, but I can not make up my mind, very correctly at any rate, where the farm-loan mortgage system is going to benefit the fellow that did not have a piece of land. I never was able to figure out in my own mind a satisfactory solution of the problem, that that system would enable me to buy land unless I had land or some other tangible substance to start with on which I could borrow money. Now, the gentleman's plan, I take it, is a substitute for that to benefit that class of people?

Mr. MORGAN. Yes, sir; and also the farm laborer, and the owner of a farm who can use short-term credit more profitably than a loan extending five years or more.

Mr. COX. How do you propose to do it—to loan directly from the Government to the borrower? If so, on what security?

Mr. MORGAN. No; not directly from the Government. Here is the plan: There will be local societies, the Government furnishing the working capital of $2,500 or whatever amount may be fixed.

Mr. COX. Do not forget your thought: Would that local corporation correspond to the national farm-loan associations under the Federal Farm Loan System?

Mr. MORGAN. It would, except that the local society in my proposed system of short-term credits would do business independently of the regional bank, so far as making loans is concerned, while in the land-credit system the local associations do not close loans. They send their application up to the regional bank will have no control whatever in making loans, veneiencing farmers. I opposed this plan, and we must find some way to change it. In the short-term credit system the regional bank will have no control whatever in making loans. The local society alone will be responsible for the loan and act on it promptly.

Mr. COX. Where would the local society get the money to loan in the first place?

Mr. MORGAN. In the first instance, the bill provides that the local society must have at least a minimum cash capital of $2,500, exclusive of capital subscribed by borrowers.

Mr. COX. Paid up?

Mr. MORGAN. Paid up before it can do business. And I provide that if the public, exclusive of the borrowers, does not subscribe this capital, it will be subscribed by the Government, through the Secretary of the Treasury. The local society, so long as it has funds, will make loans to borrowers. Then it indorses these notes to the regional banks, which loans to the local society money to be reloaned to the farmers. So the process goes on indefinitely. The farmer's note is good when indorsed by two persons, but when the same paper is indorsed by the local society it is still better, and when finally it is indorsed by a regional bank, it becomes as good as old.

Mr. COX. Because it has behind it the local institution?

Mr. MORGAN. Yes. It will have behind it the local institution, and finally the regional and the entire system.

Mr. COX. What is the minimum number now required under the gentleman's bill to start a local society?

Mr. MORGAN. Ten persons.

Mr. COX. The minimum capitalization is what?

Mr. MORGAN. Two thousand five hundred dollars, and the minimum capitalization of the regional bank is $1,000,000.

Mr. COX. The minimum capitalization is $2,500, and that must be paid-in cash?

Mr. MORGAN. Yes; that must be paid-in cash, and that is exclusive of any capital subscribed by borrowers.

Mr. COX. Then the local organization could loan that $2,500 on real estate, I take it, or——

Mr. MORGAN. No; on personal security.

Mr. COX. And accept notes on the loan, and the regional bank could rediscount those notes again?

Mr. MORGAN. Yes.

Mr. COX. And through that process the gentleman proposes to raise that money?

Mr. MORGAN. Yes.

GOVERNMENTAL AID.

In the preparation of this bill I intended to authorize the National Government to render all the aid, either by funds or through supervision and control, that was essential to the success of the system. Thus far I think the Government should go and no farther. The aid extended consists—

First. In the enactment of national legislation, authorizing these institutions, which in a manner vouches for their safety and usefulness.

Second. The local societies and regional banks are not only placed under the supervision of the Federal Government, but extensive control in their management is given through the authority of the Federal Farm Loan Board and the three public

directors of the regional banks appointed by the Federal Government.

Third. Under the provisions of the bill the Federal Government will furnish the working capital of $2,500 for each local society and $1,000,000 capital for each of the regional banks, unless said capital shall be otherwise subscribed.

Fourth. The Federal reserve banks are authorized to rediscount the notes of the farmers when indorsed by a local society and a regional bank, and such notes thus become the basis upon which a part of our national currency is issued.

Fifth. National banks are authorized to loan money to or discount the paper of local societies.

Sixth. Regional banks are made Government depositaries and the Secretary of the Treasury is authorized to make a special deposit therewith in an amount not exceeding $12,000,000 in one year, and any of such deposits may be loaned to local farm-credit societies, to the same extent and upon the same terms commercial banks may loan such deposits.

Seventh. Local societies and regional banks are exempted from all national, State, and local taxation.

Mr. LOBECK. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. Certainly.

Mr. LOBECK. Finally, after all, the Government is the backer?

Mr. MORGAN. No more than in the land-credit system.

Mr. LOBECK. But as to the really great amount of capital that is needed, the Government through its millions of dollars in the Treasury is the backer of the institution?

Mr. MORGAN. I say it is on the same plan as the land-credit system. We have already adopted that system in the land-credit system, so that it would not be a matter for much argument now.

Mr. LOBECK. What position did the gentleman take when it was a matter of asking the Treasury to take $100,000,000 worth of bonds for the years 1918 and 1919, when we had it before the House the other day?

Mr. MORGAN. I supported that amendment to the law.

Mr. LOBECK. I am glad to hear it.

SAFE AND SOUND.

Mr. MORGAN. The plan proposed is designed to be a perfectly safe and an absolutely sound system of short-term farm credit. Safety, security, and stability are essential to success in any system of finance. Without these characteristics investors will not have confidence in the institutions without which they are doomed to failure. I have endeavored, therefore, to create a system that would be safe, sound, and stable. The local credit societies will be comparatively small institutions. The shareholders will be intimately associated. They will reside in the same community. Each man's reputation for industry, sobriety, and honesty will be known. Every borrower will be required to secure his note with the signatures of two responsible persons, or by chattel mortgage, or by the delivery of bonds or other adequate collateral security. These local societies are not designed to be charitable institutions. All who borrow will be expected to pay, and every precaution will be taken to insure same. Every shareholder will be personally interested in the payment of any loan made. If a borrower fails to pay, every other shareholder will suffer loss thereby. These local credit societies will be expected to exercise fully as much care in extending credit as an ordinary commercial bank. Every borrower is required to subscribe to the capital stock of the local society an amount equal to one-tenth of his loan. The main object in requiring this subscription is to make the local society financially responsible. This stock stands as a guaranty fund. That is the chief purpose of it. The borrower pays for his stock out of the proceeds of his loan; he is allowed to cancel his stock on the payment of the loan and have the amount credited on the face of his note. Dividends are paid on his stock, but the amount stands as collateral security not only for the payment of the borrower's note but also for the debts of the society. Societies are prohibited from going in debt in an amount in excess of ten times their capital stock. Automatically the capital of the society increases with the loans at a fixed ratio and will stand as a guaranty fund equal to one-tenth of the debts of the society.

The business of the local societies and of the regional banks will be restricted to credit transactions. Simplicity in business is an element of safety. Complexity in business is an element of danger. European experience has demonstrated this fact. "Too many irons in the fire" is liable to be disastrous to banking institutions, as it is to an individual in business. Confinement of business to a single line will be a source of strength and safety to the local societies and the regional banks.

The regional banks will furnish credit only to local credit societies. In Europe regional and central farm-credit banks furnish credit not only to local credit societies but to all kinds of cooperative societies which are conducting extensive business transactions. For numerous reasons these corporations are more liable to suffer financial losses than pure credit societies making comparatively small loans to farmers with every loan secured.

There is another proposition still more important in this connection. The only credit extended by the regional banks will be to local credit societies. The local credit societies are indorsers for each other. The principle of unlimited liability is applied as between local societies. If a local society meets with financial reverses, all other such societies are legally bound to come to its rescue. If it fails and its assets are insufficient to meet its liabilities, all other societies are required to contribute an amount sufficient to save creditors from loss. There can be no loss through extending credit to a local society, unless the entire system goes down. The regional banks are simply the local societies in concentration. The regional banks suffer no loss except through failure of a local society, and this loss can not occur, unless all such societies fail.

Of course, the local societies and regional banks are not only under Government supervision but, in part, under control of the Federal Government, and thus surrounded by every safeguard to insure their honest, efficient, and conservative management.

Mr. LEVER. I have read the gentleman's very interesting book on Rural Credit. It has been some time since I read it, and I do not recall whether the gentleman discusses this proposition or not.

Mr. MORGAN. In that book, which the gentleman sees fit to compliment—for which I thank him very much—I discussed only the land-credit proposition.

Mr. COX. Will the gentleman yield right there?

Mr. MORGAN. Yes.

Mr. COX. Has the gentleman's plan been tried out in any other country? If so, in what country?

Mr. MORGAN. I was just coming to that. I was going to speak of the system which France has adopted. I have adopted in large measure the system which France established some 20 years ago, and which the authorities I read have complimented very highly. Now, what is the plan of France? It has local credit societies. It has regional banks—98 of them—one in each State and Province. Perhaps we ought to have more than 12, or we ought to let these regional banks have branches in each State. France has local societies and 98 regional banks, and the Bank of France is required to rediscount the farmers' paper, when indorsed by the local societies and these regional banks, the same as it discounts the paper of the great commercial interests of the Nation. It has always been the policy of France that the Bank of France should aid agriculture upon equal terms with trade, commerce, and manufacturing. We have never done that. Later on I will discuss further the French system and show what aid the Bank of France renders agriculture.

Mr. LOBECK. As far as the gentleman knows, has this been conducive to larger agricultural production in France?

Mr. MORGAN. Unquestionably it has. It has been in operation only perhaps about 20 years, but Hon. Myron T. Herrick in his book on rural credits, says that under its national system in 15 years France gave its farmers the most symmetrical short-term credit system possessed by any nation in the world.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN. I should like 10 minutes more.

Mr. HAUGEN. I yield to the gentleman 10 minutes more.

Mr. LOBECK. Then the object of the gentleman's bill is that by providing these short-time loans the small farmer, or any farmer for that matter, will be helped to produce larger crops for the benefit of humanity in this country?

Mr. MORGAN. Yes.

Mr. LOBECK. And the gentleman thinks it would be helpful in every way?

Mr. MORGAN. Yes; and it is a fact that we do not realize the power of credit. Our great industrial interests, our great manufacturing interests, are depending upon credit, and we never could have built up the great industrial interests we have in this country except through the extension of credit. Credit as a power, as an instrument, as a force, as a factor in production can be utilized in agriculture the same as in commerce and trade and manufacturing.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. CANDLER of Mississippi. I do not know that I caught exactly how the gentleman is going to supply the funds to make these loans. As I understand, the local organization has a capital of $2,500.

Mr. MORGAN. Exclusive of the capital subscribed by the borrowers.

Mr. CANDLER of Mississippi. When that source of supply is exhausted, where does the money come from to supply the additional funds?

Mr. MORGAN. The local society sends notes to the amount of $2,500 to the regional bank. That bank discounts those notes and sends the society $2,500, which is reloaned to farmers.

Mr. CANDLER of Mississippi. I am deeply interested in the subject. I am in favor of a complete credit system, including long-time and short-term credit. Is there any provision for the sale of bonds?

Mr. MORGAN. Yes; I have provided another way in which to raise money. The regional banks are authorized to issue debentures. I call them debentures to distinguish them from the bonds of the Federal banks. They are supposed to be issued on short terms, one to five years, secured by the notes of the farmers, and they will become standard securities, because these debentures rest on the credit of the local societies and the regional banks. All the regional banks are bound together. So these debentures issued by the regional banks would be gilt-edged securities and could be disposed of on the money market.

Mr. CANDLER of Mississippi. The security given by the farmer is his personal note?

Mr. MORGAN. The farmer has to give two indorsers or a chattel mortgage or deposit collateral security. In other words, it is not supposed to be a charitable institution. The credit will not be extended on any other idea than that it shall be paid.

Mr. CANDLER of Mississippi. Is there any limitation as to the valuation of the property?

Mr. MORGAN. I do not think my bill requires a limitation, but simply provides that it shall be adequate security.

Mr. LOBECK. Will the gentleman yield?

Mr. MORGAN. I will yield to the gentleman.

Mr. LOBECK. Suppose I want to borrow $250 for summer work and I have not got the 10 per cent, $25, to put up?

Mr. MORGAN. You would make application for a loan sufficient so that after taking out the 10 per cent you would still have sufficient funds left.

Mr. LOBECK. Then I get $225. But really, after all, would not the local organization furnish the money for the stock which I take?

Mr. MORGAN. No; because you give the local society $25 to invest in stock in the regional bank. It is credit and not cash we are dealing with. The local organization has $250 of your paper and it has only paid you $225. It is $25 to the good, so to speak. It discounts your note at the regional bank, gets $250 in cash, but invests $25 in stock in the regional bank. The account is squared. When you pay your note your stock is canceled, the amount thereof, $25, is credited on your note, and you pay back only the $225 you actually received. This is an arrangement or invention by which the local societies and the regional banks will be provided with capital. The borrowers furnish their own capital. They must either do this or continue as they do now to pay private capital high interest rates. The 10 per cent which my bill requires borrowers to invest in stock of the local society is probably more than is necessary. But if a local society manages its affairs economically, the stock in these societies will pay high dividends, higher than the interest rate. But the investment of each borrower in stock in the society is what makes the whole system safe, and that is the thing which insures low rates of interest and an abundance of credit.

Mr. LOBECK. The real idea is to get cheap money at low interest for the man that needs it for producing crops?

Mr. MORGAN. The chief idea is this: If you were a farmer and wanted to borrow $250, you would apply for membership in a local society. With the indorsement of two of your neighbors, the local society makes you a loan, indorses your note, becomes liable thereon, and then the whole system, comprising thousands of societies and 12 regional banks, with their tens of millions of dollars capital, become your indorser, and your note, however humble a man you may be, becomes as good as our national currency.

Mr. LOBECK. I thank the gentleman for giving me more credit than I have had for a long time. [Laughter.]

Mr. MORGAN. For his great interest in their behalf I am sure the American farmers will give the gentleman more "credit" than even I have given him.

Mr. CANDLER of Mississippi. Are all of the local organizations responsible for the debts of each other?

Mr. MORGAN. Yes; in case their own assets will not pay it.

I wish before I close to discuss what I regard as a very important provision. It is the proposal to require, under reasonable limitations and all proper safeguards, Federal reserve banks to rediscount the farmers' notes.

REDISCOUNTING BY FEDERAL RESERVE BANKS.

One of the provisions which may develop controversy is that contained in section 9 of the bill which authorizes any Federal reserve bank to rediscount the notes of farmers when indorsed by the local society and the regional bank. This provision, I believe, is sound in principle and eminently just to the farmers and to our greatest industry, agriculture. Its adoption, in my judgment, would not introduce any element of danger in our national currency system. At present agriculture does not receive the aid from our national banking and currency system that such system extends to the great industrial and commercial interests of the Nation. This not only restricts the growth of agriculture, but it discriminates against the farmers who constitute more than one-third of our population.

Section 11 of the Federal reserve act provides:

Upon indorsement of any of its member banks, * * * any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used for such purposes, the Federal Reserve Board to have the right to determine or define the character of the paper thus eligible for discount within the meaning of this act. Nothing in this act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise, from being eligible for such discount.

There is a proviso in the paragraph which reads as follows:

Provided, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months, exclusive of days of grace, may be discounted in an amount to be limited to a percentage of the assets of the Federal reserve bank, to be ascertained and fixed by the Federal Reserve Board.

The meaning of the foregoing provisions is not very clear. The first clause of the first paragraph quoted seems to restrict the notes, drafts, and bills of exchange, which may be discounted by Federal reserve banks, to those "arising out of actual commercial transactions." The average loan made by a bank to the average farmer in the United States does not arise "out of actual commercial transactions," as that term is understood and construed. The second clause apparently enlarges on the first, but still gives the Federal Reserve Board the right to define "the character of the paper thus eligible for discount." I do not know to what extent the various provisions of this section have been construed, but evidently the entire matter is left to the judgment of the Federal Reserve Board.

The above provisions do, however, on their face, recognize the propriety, as well as the importance, of extending to the great industry of agriculture the assistance of the Federal reserve banks. As Congress has already recognized the propriety of requiring the Federal reserve banks to discount agricultural paper, it would seem there could be no valid objection to authorizing such banks to rediscount the notes of the farmer when indorsed by a local credit society and a regional bank.

The plan to have the Federal reserve bank rediscount the notes of farmers, when indorsed by a local credit society and a regional bank, is supported by very high authority in Europe. France has a system of short-term credit institutions corresponding almost identically with the plan of H. R. 8827, introduced by me. The local credit societies in the French system are known as the Credit Agricole Mutuel. Above the local credit societies there were, in 1912, 98 regional banks, at least one in each State or Province. The local societies secure funds by indorsing their paper and having the same discounted at the regional banks, which in turn rediscount the same with the Bank of France. Referring to the short-term farm credit system in France and the workings of the institutions created to promote such credit, Hon. Myron T. Herrick, in his book entitled "Rural Credits," on pages 335 and 336, says:

The regional banks are authorized to discount the negotiable instruments made by members of the local societies and indorsed by such societies and also to make loans to such societies for working funds. The paper having thus three signatures, those of the borrowing farmer, the local society, and the regional bank, is "bankable according to the commercial and banking code, and the regional bank may rediscount it at the Bank of France or at any other of the big credit institutions in France, provided the time is not over nine months."

In Senate Document No. 214, Sixty-third Congress, entitled "Agricultural Cooperation and Rural Credit in Europe," pages 651 and 653, inclusive, there is a statement made by M. Aupetit, chief of the department of economic studies to the Bank of France, relative to the Bank of France and the aid it renders the farmers. He says:

The Bank of France assists agriculture in three ways, which should be distinguished. First, it facilitates the individual agriculturists in securing loans and discounts. Second, it makes possible the success of agricultural credit banks and facilitates the rediscount which they offer the commercial banks. Third, it provided the government with funds in the form of an advance and an annual grant with which to supply the needs of the agricultural credit banks.

Again he says:

The Bank of France also makes every effort to assist the local banks, and has given pioneer assistance to the local credit banks. These local credit banks, as has been explained, have two functions. In the first place, they act as independent banks so far as their capital and deposits are concerned. The advance made by the State enables them to act as independent banks. As soon as the credit demands of their clients exceed their own resources, they render assistance to their members by rediscounting their bills at the Bank of France through the medium of the regional bank. While these banks usually rediscount with the Bank of France, it should be understood that they are free to rediscount them with any other bank they may select. * * * At the present time the Bank of France conducts regular discounting business with all of the 100 regional banks, and through them with more than 3,000 of the local cooperative credit banks. The third way in which the Bank of France assists agricultural credit in France is by granting large sums to the Government to be used to finance the local and regional credit banks.

SHORT-TERM FARM CREDIT IN GERMANY.

In Germany there are two chief systems of short-term cooperative credit institutions. One is the Shulze-Delitzsch system and the other is the Raiffeisen system. The latter is the largest factor in furnishing short-term credit to the farmers of Germany. In each of these there are local credit societies, State, provincial, or regional institutions, and a large central bank. In the Raiffeisen system the central institution is the Central Agricultural Loan Bank, which has 13 branches, which serve as regional banks and through which the local societies do business. The central institution, which serves the local credit societies, which do not belong to the Raiffeisen system, is the Prussian Central Cooperative Bank of Berlin, which Prussia founded and endowed with a capital of $18,000,000.

Taking the short-term farm credit systems of the two great nations, France and Germany, as the best models from which to copy our system of short-term farm credit, we must have, first, local credit societies; second, regional banks of some kind, with which the local societies will do business; and, third, some kind of a central institution of large capital and resources, which will bring the individual farmer, through the local societies and the regional banks, in touch with the great reservoirs of credit of the nation. We must follow France, which utilizes the Bank of France for this purpose, or we must follow Germany, which has created and endowed a great central institution for this purpose. I believe the French policy is the better one. Our Federal reserve banks, in their position in our banking and currency and credit system, occupy the same position that the Bank of France occupies in the banking, currency, and credit system of France. I am, therefore, in favor of making our Federal reserve banks an important factor in providing suitable short-term credit to the farmers of the United States, and thus giving the 6,500,000 farmers of the United States a front seat in our great national banking, currency, and credit system.

APPENDIX A.

A bill (H. R. 8827) to provide short-term credit for the farmers of the United States, and for other purposes.

Be it enacted, etc., That the short title of this act shall be "The national farm-credit act." Its administration shall be under the direction of the Federal Farm Loan Board, which shall have the same power of supervision and control over national farm-credit banks and Federal farm-credit societies, created under this act, that it has over Federal land banks and national farm-loan associations created under the "Federal farm-loan act." That the provisions of said last-named act, in so far as they may be applicable and not in conflict with the provisions of this act, are hereby reenacted and made applicable to national farm-credit banks, Federal farm-credit societies, their directors, officers, assistants, clerks, other employees, persons, and corporations, and the provisions of sections 29, 31, 33, and 34 are hereby specifically reenacted and made applicable as aforesaid.

The Federal Farm Loan Board shall fix what proportion of the expense of operating the Federal land bank and the national farm-credit bank of each Federal land-bank district shall be paid by each of said banks.

DEFINITIONS.

SEC. 2. That the term "farm-credit debenture" shall be held to include all debentures secured by collateral deposited with the farm-loan registrar under the terms of this act; the terms "national bank" and "national banking association," used in this act, shall be held to be synonymous and interchangeable; and the term "member bank" shall be held to mean any national bank, State bank, or bank or trust company which has become a member of one of the reserve banks created by the Federal reserve act, approved December 23, 1913.

FARM-LOAN REGISTRAR.

SEC. 3. That the farm-loan registrar of each Federal land bank district shall bear the same relation with reference to the national farm-credit bank of said district, and the issue of farm-credit debentures, that he now bears with reference to the Federal land bank of said district, and the issue of farm-loan bonds, and said registrar shall exercise similar powers and perform similar duties relative thereto in addition to duties specifically prescribed herein.

NATIONAL FARM-CREDIT BANKS.

SEC. 4. That there is hereby created in each Federal land-bank district a national farm-credit bank, with its principal office located in the same city and in the same building wherein the Federal land bank of said district is located.

The directors of each Federal land bank, at the time of the passage of this act, shall be the temporary directors of the national farm-credit bank in the Federal land-bank district wherein such national farm-credit bank is located. They shall give such bonds, receive such compensation as the Federal Farm Loan Board shall prescribe, and from their number the Federal Farm Loan Board shall choose a president, vice president, secretary, and treasurer of said board. Thereafter each national farm-credit bank and each Federal land bank located in the same Federal land bank district shall be under the management of the same directors, who shall utilize, so far as practical, the same officers, attorneys, experts, assistants, clerks, laborers, and other employees in the management of the business of said banks.

The said temporary directors shall make an organization certificate, containing in substance that which is required in the organization of Federal land banks as provided in section 4 of the Federal farm-loan act, and upon duly making and filing of said organization certificate the bank shall become as from the date of the execution thereof a body corporate, and as such and in the name designated in said certificate shall have the same powers as are conferred upon Federal land banks in the aforesaid section 4 of said "Federal farm-loan act," and such additional powers as may be herein granted.

Thereafter the board of directors of every Federal land bank and of every national farm-credit bank shall be selected as hereinafter specified and shall consist of nine members, each holding office for three years. Six of said directors shall be known as local directors, three of whom shall be chosen by and be representative of national farm-loan associations, and three of whom shall be chosen by and be representative of Federal farm-credit societies. The remaining three directors shall be known as district directors and shall be appointed by the Federal Farm Loan Board and shall represent the public interest. Any provision in section 4 of the Federal farm-loan act in conflict with the provisions of this paragraph is hereby repealed. No director, officer, or employee of any kind or character shall have any increase in his salary or pay by reason of being in the service of both the said banks, unless authorized by the Federal Farm Loan Board.

CAPITAL OF NATIONAL FARM-CREDIT BANKS.

SEC. 5. That every national farm-credit bank shall have, before beginning business, a subscribed capital stock of not less than $1,000,000, divided into shares of $5 each. That the provisions of section 5 of the Federal farm-loan act relative to subscriptions to the capital stock of Federal land banks, in so far as the same may be applicable, are hereby made applicable to subscriptions to the capital stock of national farm-credit banks.

If within 30 days after the opening of subscription books therefor any part of the minimum capital stock of $1,000,000 shall remain unsubscribed, it shall be the duty of the Secretary of the Treasury to subscribe the balance thereof on behalf of the United States, and the Secretary of the Treasury is hereby authorized and directed to take out shares corresponding to the unsubscribed balance and pay for the same out of any moneys in the Treasury not otherwise appropriated.

RESERVES AND DIVIDENDS.

SEC. 6. That the Federal Farm Loan Board shall prescribe what proportion of the net earnings of national farm-credit banks shall semi-annually be carried to the reserve account, what amount of reserve shall be maintained before dividends shall be paid, and prescribe at what time notes upon which payment of either interest or principal is in default shall be deducted from the assets thereof, and how the reserves of such banks shall be invested and safeguarded.

REPORTS.

SEC. 7. That the Federal Farm Loan Board shall annually make a full report of its operations and of the business, financial condition, assets, expenditures, number of employees, their salaries, and other appropriate information of each of the national farm-credit banks. Said report shall be made to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of Congress.

National farm-credit banks shall make quarterly and annual reports to the Federal Farm Loan Board, including such information as shall be required by said board.

DEPOSITS, LOANS, AND INDORSEMENTS.

SEC. 8. That every national farm-credit bank may receive deposits, pay interest thereon, borrow money, loan its funds to Federal farm-credit societies, issue and sell debentures as provided in this act, indorse notes received from Federal farm-credit societies to any individual, bank or corporation, including any Federal reserve bank, for the purpose of having said notes discounted or rediscounted: *Provided*, That no Federal farm-credit society shall at any time borrow money or be indebted in a sum in excess of ten times the amount of its paid-up capital stock.

DISCOUNT BY FEDERAL RESERVE BANKS.

SEC. 9. That upon the indorsement of any member bank of the Federal Reserve System, or of any national farm-credit bank, any Federal reserve bank may rediscount notes taken by any Federal farm-credit society in the usual course of business, or the notes of such society which have a maturity, at the time of discount, of not more than one year.

GOVERNMENT DEPOSITARIES.

SEC. 10. That all national farm-credit banks organized under this act, when designated for that purpose by the Secretary of the Treasury, shall be depositaries of public money, except receipts from customs; they may also be employed as financial agents of the Government, and as such depositaries and agents shall perform all such reasonable duties as the Government may require.

Said banks may loan to Federal farm-credit societies such percentage of Government deposits as may be prescribed by the Secretary of the Treasury, and under such conditions and regulations, with reference to the security therefor, as said Secretary may prescribe to insure the payments thereof.

SPECIAL DEPOSIT FOR LOAN PURPOSES.

SEC. 11. That the Secretary of the Treasury is hereby authorized to deposit with national farm-credit banks a sum of money not to exceed in the aggregate $12,000,000 in any one calendar year to be loaned by said banks to Federal farm-credit societies in such amounts, at such rates of interest not to exceed 5 per cent per annum, with such security, and under such rules and regulations as shall be prescribed by the Federal Farm Loan Board with the approval of the Secretary of the Treasury.

FARM-CREDIT DEBENTURES.

SEC. 12. That any national farm-credit bank may issue farm-credit debentures under the terms of this act, with the approval of the Federal Farm Loan Board, when application therefor is made through the farm-loan registrar. With said application said bank shall tender the said registrar, as collateral security, the notes of Federal farm-credit societies duly indorsed or assigned to said bank or United States Gov-

ernment or Federal farm-loan bonds, not less in aggregate amount than the sum of the debentures proposed to be issued.

On approval for an issue of farm-credit debentures, the said registrar shall proceed as soon as practicable thereafter to secure the execution of said debentures and the delivery thereof to said bank. The notes accepted as collateral security for the issue of farm-credit debentures shall be assigned to said registrar in trust and shall be held by him as collateral security for the payment thereof.

The Federal Farm Loan Board shall prescribe rules regulating the redemption of said notes or bonds, allowing the substitution of other notes and bonds for any portion thereof, and for the safeguarding of such securities in the hands of the registrar.

Debentures issued by any national farm-credit bank shall not exceed the amount of collateral security pledged therefor, or be more than ten times the amount of the capital stock of said bank.

The debentures shall be issued in denominations of $10, $25, $50, $100, $500, and $1,000, shall run for such time as may be prescribed by the Federal Farm Loan Board, shall bear a rate of interest not to exceed 5 per cent per annum, shall be in such form and in series of such amounts as the Federal Farm Loan Board shall prescribe, and may be issued as coupon bonds with coupons for interest payments attached or as registered bonds, and the same shall be interchangeable.

That the provisions of the Federal farm-loan act relative to the preparation, engraving, and delivery of farm-loan bonds are hereby made applicable to farm-credit debentures.

LIABILITY OF NATIONAL FARM-CREDIT BANKS.

SEC. 13. That every national farm-credit bank issuing farm-credit debentures shall be primarily liable therefor, and shall also be liable, upon presentation of farm-credit debenture coupons, for interest payments due upon any farm-credit debenture issued by other national farm-credit banks, and remaining unpaid in consequence of the default of such other national farm-credit bank; and every such bank shall likewise be liable for such portion of the principal of farm-credit debentures, so issued, as shall not be paid, after the assets of any such other national farm-credit bank shall have been liquidated and distributed: *Provided*, That such loss, if any, either of interest or of principal, shall be assessed by the Federal Farm Loan Board against solvent national farm-credit banks liable therefor in proportion to the amount of farm-credit debentures which each may have outstanding at the time of such assessment.

Every national farm-credit bank shall be primarily liable for all its contracts, debts, liabilities, and financial obligations of every kind and character; and every such bank shall likewise be liable for such portion of the debts, liabilities, and financial obligations of any other such bank which shall not be paid after the assets thereof shall have been liquidated and distributed: *Provided*, That such losses, if any, shall be assessed by the Federal Farm Loan Board against solvent banks liable therefor in proportion to the amount of their capital stock at the time of such assessment: *Provided further*, That the Federal Farm Loan Board may, by order duly made, create and establish a guaranty fund to which all such banks shall be required to contribute an equitable amount annually and from which shall be paid any of the debts, liabilities, and financial obligations of any such society after the assets thereof shall have been liquidated and distributed; but the creation of such guaranty fund shall in no way relieve any such bank from its liability to make further contribution under any assessment which shall be made by the Federal Farm Loan Board under the provisions of this section.

Every national farm-credit bank shall, by specific provision in its organization certificate, and by appropriate action of its board of directors, duly recorded in its minutes, obligate itself to become liable as provided in this section.

Farm-credit debentures shall be signed by the president of the bank issuing the same and attested by its secretary, and contain such other matter as may be prescribed by the Federal Farm Loan Board.

Coupon or interest payments upon debentures shall be payable at the national farm-credit bank by which they were issued, in gold or lawful money, and on payment shall be duly canceled by said bank. The Federal Farm Loan Board may authorize such payment at any national farm-credit bank or at any other bank.

The Federal Farm Loan Board may, by rule and regulation not inconsistent with the provisions of this act, further regulate the control of the issue and payment of farm-credit debentures and the application of payments thereon.

FEDERAL FARM-CREDIT SOCIETIES.

SEC. 14. That corporations, to be known as Federal farm-credit societies, may be organized by 10 or more natural persons under the provisions of this act and under such rules, regulations, and organization certificate as shall be prescribed by the Federal Farm Loan Board. Such application for incorporation shall be made in duplicate and transmitted to the national farm-credit bank of the Federal land-bank district in which said society is proposed to be incorporated. Said bank, after obtaining such information as desired, shall divide the county wherein the proposed society is located into districts. Thereafter but one of such societies shall be organized in each of the said districts so formed, except by special order of the Federal Farm Loan Board: *Provided*, That the said board may thereafter, upon proper showing and by order duly made, change the boundaries of said districts and either increase or decrease the number thereof. Any national farm-credit bank receiving an application for incorporation of a Federal farm-credit society, after dividing the county in which said society is to be located into districts as aforesaid, shall transmit one copy of the organization certificate to the Federal Farm Loan Board and retain the other copy thereof.

Upon duly making and filing its organization certificate with the Federal Farm Loan Board, the society shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in its organization certificate, it shall have power—

First. To adopt and use a corporate seal.

Second. To have succession until it is dissolved by act of Congress or under the provisions of this act.

Third. To make contracts.

Fourth. To sue and be sued, complain, interplead, and defend, in any court of law or equity, as fully as natural persons.

Fifth. To elect and appoint directors, and by its board of directors to elect a president and vice president, and appoint a secretary-treasurer and such other officers and employees as may be prescribed by the Federal Farm Loan Board.

Sixth. To prescribe by its board of directors, subject to the regulation of the Federal Farm Loan Board, by-laws not inconsistent with law.

Seventh. To exercise by its board of directors, or duly authorized officers or agents, all such incidental powers as shall be necessary to carry on the business of such society as herein authorized.

Eighth. To acquire and dispose of such property, real or personal, as may be necessary or convenient for the transaction of its business.

Ninth. To indorse, and thereby become liable for the payment of notes taken from its shareholders, to loan its funds to shareholders who are actively engaged in agriculture, for productive purposes only; to borrow money; and to transact such other business and perform such other acts as shall be provided in this act.

DIRECTORS AND OFFICERS.

SEC. 15. That Federal farm-credit societies shall be managed by a board of five directors, who shall be named in the organization certificate, and who shall serve until their successors shall be elected and qualified.

By a majority vote, such directors shall elect a president, vice president, and secretary-treasurer of said board. After the organization of such society, directors shall be elected by a majority vote of the stockholders of said corporation. In such election, and in all other business before the shareholders, each shareholder shall have but one vote. The secretary-treasurer may not be a director or shareholder in said society. Directors shall be citizens of the United States, residents of the State and county in which such corporation is located, and shall be persons actively engaged in the business of farming. They shall give such bonds as shall be prescribed by the Federal Farm Loan Board.

The duties of directors and officers of Federal farm-credit societies shall be such as are prescribed herein and such as usually pertain to directors and officers of national-banking associations, and they shall serve without salary.

It shall be the duty of the secretary-treasurer of every Federal farm-credit society to act as custodian of its funds, notes, securities, papers, records, and other property. The board of directors shall designate some State or National bank as the depository of the society. The secretary-treasurer shall deposit all the funds of the society in such depository and provide, either in such depository or elsewhere, some safe and secure place in which he shall keep the notes, securities, records, and papers of such society. He shall receive such compensation as shall be fixed by the directors, subject to the approval of the Federal Farm Loan Board.

DEPOSITORIES, LOANS BY NATIONAL BANKS.

SEC. 16. That every member bank of the Federal Reserve System, when designated as the depository of any Federal farm-credit society, is hereby required to act as such, and every State bank, when so designated, may act as such.

Any bank acting as the depository of a Federal farm-credit society shall pay such interest on the deposits of such society as shall be agreed upon. Every national or other bank is authorized to make loans to any Federal farm-credit society on such terms and security as may be agreed upon, and any State bank may make loans to the society when the same is not in violation of the laws of the State in which it is located.

Every national or other bank is authorized to act as secretary-treasurer of any Federal farm-credit society, and any State bank may so act when not in conflict with the laws of the State in which it is incorporated, and any officer of said banks may so act.

SUPERVISION.

SEC. 17. That the Federal Farm Loan Board shall provide for careful supervision and examination of Federal farm-credit societies and is authorized to make special rules and regulations to insure economical administration thereof.

REPORTS.

SEC. 18. That Federal farm-credit societies shall make monthly, quarterly, and annual reports to the national farm-credit bank of the district in which they are located, in such form and covering such information as shall be prescribed by the Federal Farm Loan Board.

CAPITAL STOCK OF FEDERAL FARM-CREDIT SOCIETIES.

SEC. 19. That every Federal farm-credit society shall have, before beginning business, a subscribed cash capital of not less than $2,500, exclusive of capital subscribed by prospective borrowers.

The Federal Farm Loan Board is authorized to prescribe the times and conditions of the payment of subscriptions to the capital stock, to reject any subscription in its discretion, and to require subscribers to furnish adequate security for the payment thereof.

The capital stock of each Federal farm-credit society shall be divided into shares of $1 each, and may be subscribed for and held by any individual, firm, or corporation, or by the Government of any county, municipality, State, or of the United States.

Stock held by borrowers of Federal farm-credit societies shall not be transferred or hypothecated, and the certificates therefor shall so state.

Stock owned by the Government of the United States in Federal farm-credit societies shall receive no dividends, but all other stock shall share in dividend distributions without preference.

It shall be the duty of the directors of every Federal farm-credit society, as soon as practicable after the charter for such society has been issued, to open books of subscription to the capital stock of said society. Every person subscribing to the capital stock thereof shall indicate whether or not he intends to become a borrower from said society. If within 30 days after the opening of said books any part of the minimum capitalization of $2,500 herein prescribed for Federal farm-credit societies, exclusive of subscriptions made by prospective borrowers, shall remain unsubscribed, it shall be the duty of the Secretary of the Treasury to subscribe the balance thereof on behalf of the United States, said subscription to be subject to call, in whole or in part, by the board of directors of said national farm-credit society upon 30 days' notice, with the approval of the Federal Farm Loan Board; and the Secretary of the Treasury is hereby authorized and directed to take out shares corresponding to the unsubscribed balance as called, and to pay for the same out of any moneys in the Treasury not otherwise appropriated.

It shall be the duty of the Federal Farm Loan Board to prescribe rules, regulations, and conditions upon which the Secretary of the Treasury shall pay for said stock, and may require the directors and officers of said society to give bond or other security for safeguarding said funds.

The Government of the United States shall have no vote for the shares of stock held by it at meetings of shareholders, but the Federal Farm Loan Board shall prescribe rules and regulations for the protection of the interests of the Government on account of stock held by it.

After the subscriptions to the capital stock of any Federal farm-credit society, exclusive of the amount subscribed by the Government of the United States, shall amount to $25,000, the stock held by the Government of the United States shall be canceled and retired, and the said Government shall be paid the par value thereof. The retirement of said stock and the payment thereof to the Government shall be made semi-annually and shall cover such a period of years as shall be prescribed by the Federal Farm Loan Board.

Every Federal farm-credit society shall keep a certain amount of its capital stock in quick assets, the character of such assets and the amount thereof to be prescribed by the Federal Farm Loan Board, and said board shall further prescribe for any additional reserve fund to be kept and maintained by said society.

LOANS.

SEC. 20. That Federal farm-credit societies shall make loans only to shareholders who are farmers. No loan shall be made for less than $10 nor for more than $1,000 or for a longer time than one year. No loan shall be made to a shareholder in an amount greater than 10 times the paid-up capital stock he holds in said society. The stock held in such societies by any borrower therefrom shall not be transferable and shall be held as collateral security for the payment of any loan made to such borrower, but such shareholder shall be paid any dividends accruing on said capital stock while it is outstanding. Any shareholder who has been a borrower may on his request, on payment of his note in full, have his stock canceled, and he shall thereupon be paid an amount in cash equal to the par value of his stock, or have the same applied in final payment of his note, subject to any reduction that may be necessary to pay the proportionate share of said stock to meet any impairment of the capital of any society at the time payment may be made.

That before the organization certificate shall be issued to any Federal farm-credit society the national farm-credit bank under which said society is to operate may investigate the solvency and character of the applicants for such certificate, and then determine whether in their judgment a charter should be granted to it, and make report thereof for the action and approval of the Federal Farm Loan Board.

Any person desiring to borrow money from a Federal farm-loan society shall make written application to purchase stock in said society equal to one-tenth of the amount of the loan desired, and may reserve the right to pay for said stock out of the proceeds of said loan. No loan shall be made except on the written approval of at least three of the directors.

The directors of any Federal farm-credit society may appoint among its shareholders such committees as may be necessary to aid it in transacting its business.

Federal farm-credit societies are prohibited from incurring indebtedness for administration expenses which in any way impairs the minimum capital required in the organization of such societies.

Federal farm-credit societies in borrowing money, except when borrowing money from a national farm-credit bank, shall secure said loans by the notes of its members or by other collateral security, and in no case shall any sum be borrowed in excess of 90 per cent of the face value of the notes or other collateral securing said loan.

Every Federal farm-credit society, when it shall sell any of the notes of its members, or shall discount the same, shall set aside 10 per cent of the proceeds thereof to the reserve fund of the society, and the same shall be used thereafter only for such purpose or purposes as shall be provided for said reserve fund.

DEBTS AND OBLIGATIONS OF FEDERAL FARM-CREDIT SOCIETIES.

SEC. 21. That every Federal farm-credit society shall be primarily liable for all its contracts, debts, liabilities, and financial obligations of every kind and character; and every such society shall likewise be liable for such portion of the debts, liabilities, and financial obligations which shall not be paid after the assets of any other such society shall have been liquidated and distributed: *Provided*, That such losses, if any, shall be assessed by the Federal Farm Loan Board against solvent societies liable therefor in proportion to the amount of their capital stock at the time of such assessment: *Provided further*, That the Federal Farm Loan Board by order duly made may create and establish a guaranty fund to which all Federal farm-credit societies shall be required to contribute an equitable amount annually and from which shall be paid any of the debts, liabilities, and financial obligations of any such society after the assets thereof shall have been liquidated and distributed, but the creation of such guaranty fund shall in no way relieve any Federal farm-credit society from its liability to make further contribution under any assessment which may be made by the Federal Farm Loan Board under the provisions of this section.

Every Federal farm-credit society shall in its application for incorporation assume the financial liability provided in this section and its organization certificate shall so specify.

RESPONSIBILITY OF SHAREHOLDERS.

SEC. 22. That shareholders of every Federal farm-credit society shall be held individually responsible, equally and ratably and not one for another, for all contracts, debts, and engagements of such society to the extent of the amount of stock owned by them at the par value thereof. Stock held in Federal farm-credit societies shall not be transferable.

The stock held by any shareholder in any Federal farm-credit society shall be held in trust by such society to meet the obligations of any shareholder as a member of said society, and shall be exempt from any debt, judgment lien, execution, attachment, or other process issued out of any State court, or out of any court of the United States.

EXEMPTION FROM TAXATION.

SEC. 23. That every national farm-credit bank and every Federal farm-credit society, including the capital and reserve or surplus thereof, and the income derived therefrom, shall be exempt from Federal, State, municipal, and local taxation, except taxes upon real estate held, purchased, or taken by said bank or society, under the provisions of this act.

Notes and other legal obligations executed to Federal farm-credit societies, or to national farm-credit banks, and farm-credit debentures issued under the provisions of this act shall be deemed and held to be instrumentalities of the Government of the United States, and as such they, and the income derived therefrom, shall be exempt from Federal, State, municipal, and local taxation.

LOANS BY FEDERAL FARM-CREDIT SOCIETIES.

SEC. 24. That any Federal farm-credit society desiring to borrow money of a national farm-credit bank shall execute its note, duly signed by the president of the board of directors and the secretary-treasurer of said society, and shall transmit as collateral security therefor the duly indorsed notes of its shareholders, in amount not less than the face of the loan applied for, and shall subscribe for stock in said national farm-credit bank in an amount equal to one-tenth of the face of said loan, which stock shall be held in trust as collateral security for the payment of said loan.

That when payments of interest or principal shall be made on any such note, the same shall be held as a trust fund for the payment of such notes and the note of the Federal farm-credit society secured thereby. All such payments shall be forthwith credited on the note of the society and the note of the shareholder paying the same.

RATE OF INTEREST.

SEC. 25. That Federal farm-credit societies shall not charge a rate of interest in excess of 6 per cent per annum.

National farm-credit banks shall not charge any Federal farm-credit society a rate of interest in excess of 5½ per cent per annum, and in no case shall any national farm-credit bank charge a Federal farm-credit society a rate of interest which exceeds by more than one-half of 1 per cent annually the rate of discount paid by said bank, or the rate of interest it pays on borrowed money.

LOAN COMMITTEE.

SEC. 26. That the president, vice president, and one other director, to be elected by the board of directors, shall constitute the loan committee of each Federal farm-credit society. Said committee shall investigate and report upon the character of each applicant for a loan, and as to the security offered therefor. No loan shall be made except upon the approval of a majority of the board of directors.

SECURITY FOR LOANS.

SEC. 27. That Federal farm-credit societies shall make loans only when secured as follows:

(a) By the signature of two responsible indorsers.

(b) By a chattel mortgage upon personal property worth at least double the amount of the loan.

(c) By a chattel mortgage upon growing crops when secured also by at least one responsible indorser.

(d) By the delivery of bonds, notes, or other securities in such amount and of such a character as shall afford ample security for the loan.

(e) By such other security as may be prescribed by the Federal Farm Loan Board.

REPEALING CLAUSE.

SEC. 28. That all acts or parts of acts inconsistent with this act are hereby repealed, and this act shall take effect upon its passage. The right to amend, alter, or repeal this act is hereby expressly reserved.

Mr. HAUGEN. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. JUUL].

Mr. JUUL. Mr. Chairman, some years ago as a member of a senatorial committee in my State, I visited the State University at Champaign and Urbana. Among the interesting things shown to the senators were certain machines for testing the resisting powers of wood and metals.

I remember certain machines for testing timber; an upright piece of wood several feet long and probably 6 inches by 6 inches was placed in this machine and pressure was applied. Over the machine was an indicator, like a steam gauge, that recorded hundreds and thousands of pounds of pressure applied to the wood by the machine. I believe that finally, under ever so many thousand pounds of pressure, the fiber in the wood gave way and, technically speaking, it "failed." The test had shown the number of thousands of pounds that that particular kind of wood could stand. Under the Constitution and laws of the United States it was contemplated that the enormous pressure that this world war is forcing upon the Congress was to be divided in approximately 434 parts, each part or unit of the House to stand at least a share of it, so that no single man should go to pieces or fail, either physically or mentally, trying to stand up under the strain all alone or by himself. [Laughter.]

But by virtue of some system probably in vogue for many years, before I and many of the gentlemen came here, it seems that the burden of the Government unjustly rests upon a very few gentlemen. I am now judging the situation by reading the CONGRESSIONAL RECORD, where I find that one gentleman addressed the House and had his name printed in the RECORD 118 times in one single day. [Laughter.]

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. JUUL. Oh, I will be through in half a minute.

Mr. GARRETT of Tennessee. Does the gentleman think it is entirely fair to make these remarks in the absence of the gentleman from Wisconsin [Mr. STAFFORD]?

Mr. JUUL. I have mentioned no names. I want to say to the gentleman that once we had a police official out in Chicago who called the policemen together one morning in the squad room and said, "I am not going to mention any names, but if Schultz don't stop drinking, some policeman is going to lose his star." [Laughter.]

The question that is naturally agitating my mind is whether the one man or the few men having to stand the enormous strain have failed under it, or whether the four hundred and thirty-odd gentlemen have failed under the strain of watching the few gentlemen fail under the system of placing this enormous burden upon the shoulders of half a dozen men. As a failure it is best illustrated by the fact that the great number of men in the House have become so tender-hearted that the moment the grind starts and the few gentlemen start in addressing the House, thereby assuming all the burdens, all the rest of the Members desert the Hall and walk out of the building. [Laughter.] Did I say walk? No; I was mistaken; they do not walk out, they run out; and it is necessary to ring a bell

three times to bring them back, and when they do come back and find that the same four or five gentlemen are still under the pressure, trying to carry the burden that 433 men should divide and carry, these four hundred-odd men immediately, when they have responded to their names, feel so badly that as soon as they have answered "Here" to the call of their names, they again run out, feeling that things are being attended to so much better than they could possibly attend to them. [Laughter.]

If one of the gentlemen who has come over to respond to his name should for a moment forget himself and ask for permission to help carry the burden and watch the indicator, helping the few gentlemen to stand the strain, he is immediately jumped on, sat on, and squelched, and in unmistakable manner informed that the proper place for the four hundred-odd gentlemen is over in the House Office Building addressing envelopes and mailing seeds to their constituents in the rural districts. [Laughter.]

It is the hopeless situation created which compels the four hundred-odd gentlemen to come over and watch the indicator over the machine that is squeezing both the physical and mental life out of the half dozen gentlemen that have succeeded in emptying the Hall of Congress so that the average business is being transacted with about 30 gentlemen present. Count them now!

And to my mind the indicator is pointing out that 100 times a day for one gentleman, no matter what his attainments, is too much of a physical and mental strain, both for the gentleman who is to be under the terrific pressure and also for the four hundred-odd gentlemen who have to watch him to the point of breaking or failure. And let us be fair with one another. What would happen to a manager if he was running the biggest and best show on earth if he would send his star performer out to address the audience 118 times in a single evening? His show would "bust"; that is all. [Laughter.]

When all other means have failed to drive the Members away from the debates and back to the House Office Building the following may be tried successfully, and was tried the other day: A gentleman not of the select few has the audacity to attempt to participate in the debate and he is squelched by one of the select gentlemen in this manner: "Has not the gentleman illustrated the fact that a little learning is sometimes a very dangerous thing?"

In other words, a colleague on the floor is willing to hold up a brother Member as ignorant in order to take the "pep" and grit out of him and thus prevent him from ever coming back; and the gentleman who has used the floor over a hundred times in a single day rises and objects to another Member having a few minutes of the time of the House.

Verily, advertising is a good thing; and verily, verily, I say unto you that he who bloweth not his own horn, his horn it shall not be blowed. But is there not such a thing as blowing a horn a little too often? [Laughter.]

Gentlemen, I want to say this: I have come over on this floor and I have meant to participate. I have meant to work. I never was a shirker. I was the chairman of the committee on the judiciary in the senate of my State for a number of years, and I worked night and day; but I tell you it is mighty humiliating and awfully hard for all the new people to come in and be sat on and made to feel that they are not wanted. I do not mean to say that it is the intention of anybody to make any gentleman walk out of this Hall with that feeling in his heart; but I want to tell you that I have done it time and again when I have seen the younger Members stand up here only to have somebody sit on them because they knew the ins and outs of this business and the younger ones did not. I want to conclude by saying that you gentlemen who sit here and transact business every day are putting an entirely wrong gauge on the other fellows by thinking they are ignorant because they are silent. [Applause.]

Mr. LEVER. Mr. Chairman, I regret very much that the gentlemen to whom this speech might seem to appeal are not present, but I hope they will read it in the RECORD to-morrow.

Mr. JUUL. I want to say to the gentleman that I have not mentioned any names. I wanted particularly to refrain from doing so.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CRISP, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9054, the agricultural appropriation bill, and had come to no resolution thereon.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 195. An act providing for the sale of the coal and asphalt deposits in the segregated mineral land in the Choctaw and Chickasaw Nations, Okla.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 22 minutes p. m.), in accordance with the order heretofore made, the House adjourned until to-morrow, Friday, January 25, 1918, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 3 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the chairman of the Federal Trade Commission, transmitting a preliminary report on the hide and leather situation, stating certain facts ascertained in an investigation of hides, leather, and leather products undertaken by the commission's resolution of December 31, 1917 (H. Doc. No. 857); to the Committee on Interstate and Foreign Commerce and ordered to be printed, with illustration.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Commissioners of the District of Columbia submitting a supplemental estimate of appropriation required for the repair of the fire boat of the fire department for the fiscal year 1918 (H. Doc. No. 858); to the Committee on Appropriations and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GREEN of Iowa (by request): A bill (H. R. 9215) imposing and levying a direct tax upon the real and personal property in the United States for the amount of each liberty loan during the present war; to the Committee on Ways and Means.

By Mr. DUPRÉ: A bill (H. R. 9216) to construct and equip a lighthouse depot for the eighth lighthouse district at New Orleans, La., or vicinity; to the Committee on Interstate and Foreign Commerce.

By Mr. PADGETT: A bill (H. R. 9217) to increase temporarily the enlisted strength of the Navy, and for other purposes; to the Committee on Naval Affairs.

By Mr. BROWNE: A bill (H. R. 9218) to repeal an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and all amendments thereto; to the Committee on the Judiciary.

By Mr. DIES: A bill (H. R. 9219) to authorize the construction of a dam or dams, a lock or locks, and other works and constructions in and across Sabine Lake, at or near its mouth where it enters Sabine Pass, or at or near the mouth of the Neches and Sabine Rivers and between the said rivers, or at or near the mouth of either the Neches and Sabine Rivers, to conserve the freshness of the waters of the Neches and Sabine Rivers, or either of them, and to prevent the inflow of salt water into said rivers, or either of them; to the Committee on Interstate and Foreign Commerce.

By Mr. HILLIARD: A bill (H. R. 9220) to establish the Denver National Park, in the State of Colorado, and for other purposes; to the Committee on the Public Lands.

By Mr. ZIHLMAN: A bill (H. R. 9221) to increase the limit of cost and provide for the reconstruction of the Federal building at Hagerstown, Md.; to the Committee on Public Buildings and Grounds.

By Mr. COX: A bill (H. R. 9222) granting increases of pensions to soldiers of the Civil War under certain conditions; to the Committee on Invalid Pensions.

By Mr. RAINEY (by request): A bill (H. R. 9223) to amend the war-revenue act in relation to taxation of legacies and inheritances, and for other purposes; to the Committee on Ways and Means.

By Mr. EMERSON: Joint resolution (H. J. Res. 227) to pay the Garland Realty Co. rent for use of building for armory; to the Committee on Claims.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BUTLER: A bill (H. R. 9224) for the relief of Lieut. Richard Philip McCullough, United States Navy; to the Committee on Naval Affairs.

By Mr. CRAMTON: A bill (H. R. 9225) granting an increase of pension to Quail Erity; to the Committee on Invalid Pensions.

By Mr. COX. A bill (H. R. 9226) granting a pension to George W. Conrad; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9227) granting a pension to Hamilton T. Farris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9228) granting a pension to Henry T. Henson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9229) granting a pension to Louis Lady; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 9230) granting an increase of pension to Henry C. Snyder; to the Committee on Invalid Pensions.

By Mr. GLYNN: A bill (H. R. 9231) granting a pension to John M. Culver; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 9232) for the relief of Francis M. Myers or Francis Meyer; to the Committee on Military Affairs.

By Mr. HERSEY: A bill (H. R. 9233) granting an increase of pension to George B. McKechnie; to the Committee on Invalid Pensions.

By Mr. KELLEY of Michigan: A bill (H. R. 9234) to correct the military record of Frederick M. Phelps; to the Committee on Military Affairs.

By Mr. LOBECK: A bill (H. R. 9235) granting an increase of pension to John H. Travis; to the Committee on Invalid Pensions.

By Mr. OVERMYER: A bill (H. R. 9236) granting a pension to Dorcas A. Wilcox; to the Committee on Invalid Pensions.

By Miss RANKIN: A bill (H. R. 9237) granting a pension to Nick Hoffman; to the Committee on Pensions.

Also, a bill (H. R. 9238) granting a pension to Claude Wallace; to the Committee on Pensions.

Also, a bill (H. R. 9239) to authorize the Secretary of the Interior to issue patent to G. H. Beckwith for certain land within the Flathead Indian Reservation, Mont.; to the Committee on the Public Lands.

By Mr. ROMJUE: A bill (H. R. 9240) granting an increase of pension to Dwight Simpson; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 9241) granting a pension to Joseph H. Waters; to the Committee on Pensions.

By Mr. SNOOK: A bill (H. R. 9242) granting an increase of pension to David Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9243) granting a pension to Elizabeth Carter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9244) granting a pension to Robert S. Peterson; to the Committee on Pensions.

Also, a bill (H. R. 9245) for the relief of William L. Wiles; to the Committee on Military Affairs.

By Mr. WATSON of Pennsylvania: A bill (H. R. 9246) granting an increase of pension to Pearl Gertrude George; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Hawaiian Protective Association, relative to prohibition in Hawaii; to the Committee on Insular Affairs.

By Mr. CARY: Memorial of Milwaukee (Wis.) Pharmaceutical Association, favoring the Edmonds bill relative to Government recognizing pharmacy in the Army and Navy; to the Committee on Military Affairs.

By Mr. DALE of New York: Petition of the West Disinfecting Co., New York City, favoring Senator CALDER's daylight-saving law; to the Committee on Interstate and Foreign Commerce.

Also, resolution of the chamber of commerce, Dover, N. J., protesting against increase of postage rates to periodicals; to the Committee on Ways and Means.

Also, petition of R. J. Caldwell & Co., urging the passage of the Chamberlain bill for universal military training; to the Committee on Military Affairs.

Also, memorial of Massachusetts Dairyman's Association, demanding the repeal of the postal-rates law with respect to periodicals; to the Committee on Ways and Means.

Also, resolution of the Farmers' Educational and Cooperative Union of America, adopted at its annual meeting at Jonesboro, Ark., earnestly protesting against any form of universal military training; to the Committee on Military Affairs.

Also, memorial of Buffalo Chamber of Commerce, Buffalo, N. Y., suggesting a treaty to provide for the diversion of additional power at Niagara Falls; to the Committee on Foreign Affairs.

Also, petition of the American Defense League of New York City, urging the passage within two weeks of an adequate food-conservation bill as a military necessity; to the Committee on Agriculture.

Also, resolution of the board of representatives of the Federal Employees' Union No. 2, Washington, D. C., protesting against the recommendation of the Postmaster General that the right of postal employees to organize be withdrawn; to the Committee on the Post Office and Post Roads.

Also, petition of I. T. Cross, Seattle, Wash., urging an increase of pensions to those veterans of the Civil War not in soldiers' homes; to the Committee on Invalid Pensions.

By Mr. FULLER of Illinois: Petition of L. H. Schafer & Co., of Chicago, Ill., opposing repeal of the second-class postage provisions of the war-revenue act; to the Committee on Ways and Means.

Also, petition of Bernard C. Steiner, librarian of the Enoch Pratt Free Library, of Baltimore, opposing the zone system for second-class postal rates; to the Committee on the Post Office and Post Roads.

Also, petition of I. T. Cross, of Seattle, Wash., favoring increase of Civil War pensions; to the Committee on Invalid Pensions.

Also, memorial of Sons and Daughters of Liberty, favoring the Burnett bill (H. R. 5667), relative to deportation of certain aliens, etc.; to the Committee on Immigration and Naturalization.

By Mr. HAMILTON of New York: Affidavits to accompany H. R. 8878, granting a pension to Mary Bursee; to the Committee on Invalid Pensions.

Also, affidavits to accompany H. R. 8876, granting a pension to Eliza Hess Smith; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: Petition of G. D. Crawford; C. S. Dell, president of John J. Greer & Co.; J. A. Bokel Co.; Maurice M. Osing; and the Melvale Distillery Co., all of Baltimore, Md., protesting against any reduction in postage rates for second-class matter; to the Committee on Ways and Means.

Also, a letter from the librarian of the Enoch Pratt Free Library and resolutions adopted by the Maryland State Federation of Women's Clubs, asking that the zonal postal rates for periodicals be repealed; to the Committee on Ways and Means.

Also, petition of M. Bates Stephens, secretary Maryland State Board of Education, favoring Senate bill 18, providing for a department of education with a secretary of education in the President's Cabinet; to the Committee on Education.

Also, petition of the Henry S. Wampole Co., protesting against the repeal of the present bankruptcy law; to the Committee on the Judiciary.

Also, petition of Maryland Council of Defense, asking that the franking privilege of the Government be extended to members of the National Council of Defense and to the chairman of every State council of defense; to the Committee on the Post Office and Post Roads.

Also, a memorial from the Garrison Boulevard Improvement Association, Baltimore, Md., favoring the Madden bill, House bill 1654; to the Committee on the Post Office and Post Roads.

Also, memorial of Federal Employees' Union No. 21 and the Baltimore Federation of Labor, urging the early passage of House bill 7356; to the Committee on Appropriations.

By Mr. MOORE of Pennsylvania: Resolutions adopted by the Lauderdale Board of Trade, urging Government improvement of the Florida Coast Line Canal; to the Committee on Interstate and Foreign Commerce.

By Mr. RAKER: Memorial of J. B. Snyder, of Los Angeles, Cal., urging action to secure a greater supply of coal; to the Committee on Agriculture.

Also, memorial of Chamber of Commerce of Los Angeles, Cal., relative to punishment of disturbers of peace of our Government; to the Committee on Military Affairs.

Also, memorial of Half Century Club of America, Los Angeles, Cal., relative to appointment of Federal Interest Commission; to the Committee on Banking and Currency.

Also, petitions of Federal Employees Union, No. 2, American Federation of Labor, Washington, D. C., and Federal Trades Council, Eureka, Cal., against rulings of Postmaster General relative to privileges of post-office employees; to the Committee on the Post Office and Post Roads.

Also, memorial of San Francisco Labor Council, relative to higher compensation for postal employees; to the Committee on the Post Office and Post Roads.

Also, memorial of board of directors of the California State Automobile Association, relative to regulation of interstate use of automobiles; to the Committee on Interstate and Foreign Commerce.

By Mr. SULZER: Petition of Mr. Frank H. Newhall, advocating the passage of House bill 5010, relative to salaries of the United States Steamboat-Inspection Service; to the Committee on the Merchant Marine and Fisheries.

By Mr. TAGUE: Memorial of board of representatives of Federal Employees Union No. 2, protesting against the withdrawal of the right of postal employees to organize in affiliation with other workers; to the Committee on the Post Office and Post Roads.

By Mr. VARE: Memorial of Federal Employees Union No. 2, against Postmaster General relative to organization by Government employees; to the Committee on the Post Office and Post Roads.

HOUSE OF REPRESENTATIVES.

FRIDAY, *January 25, 1918.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O God our Father, who searchest the inmost recesses of the heart, turn on the Divine light, we beseech Thee, and help us to realize our deficiencies as individuals and as a Nation; that we may measure up to the larger life, revealed in the Lord Jesus Christ; and conscientiously and efficiently do the work Thou hast given us to do, leaving the results to Thee, who doeth all things well; that we may have the approbation of our own conscience and at last receive the heavenly benediction, "Well done, good and faithful servant, enter thou into the joy of thy Lord." For thine is the Kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9054, the Agricultural appropriation bill.

The SPEAKER. The question is on going into the Committee of the Whole House on the state of the Union.

Mr. LONDON. Mr. Speaker, I make a point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present, and evidently there is not. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 299, not voting 129, as follows:

YEAS—299.

Alexander	Cary	Elliott	Hadley
Almon	Chandler, N. Y.	Ellsworth	Hamilton, Mich.

Estopinal	Jones, Va.	Rucker	
Evans	Kahn	Sanford	
Fairchild, B. L.	Kettner	Scott, Pa.	

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. YOUNG of Texas with Mr. GARLAND.

Mr. DALE of New York with Mr. DALE of Vermont.

Mr. VENABLE with Mr. DAVIDSON.

Mr. CALDWELL with Mr. WILSON of Illinois.

Mr. THOMAS F. SMITH with Mr. WARD.

Mr. CARLIN with Mr. AUSTIN.

Mr. WRIGHT with Mr. DAVIS.

Mr. STEPHENS of Nebraska with Mr. BLAND.

Mr. WHALEY with Mr. WHEELER.

Mr. SHERLEY with Mr. CANNON.

Mr. WATKINS with Mr. WOOD of Indiana.

Mr. BOOHER with Mr. TILSON.

Mr. SMALL with Mr. DEMPSEY.

Mr. TALBOTT with Mr. TEMPLETON.

Mr. CLARK of Florida with Mr. BOWERS.

Mr. WILSON of Louisiana with Mr. RAMSEY.

Mr. CANTRILL with Mr. WOODS of Iowa.

Mr. SULLIVAN with Mr. DUNN.

Mr. WISE with Mr. CHANDLER of Oklahoma.

Mr. WALKER with Mr. PARKER of New York.

Mr. COADY with Mr. WINSLOW.

Mr. STERLING of Pennsylvania with Mr. GEORGE W. FAIRCHILD.

Mr. WEAVER with Mr. GOOD.

Mr. HARRISON of Virginia with Mr. ANTHONY.

Mr. SHALLENBERGER with Mr. BENJAMIN L. FAIRCHILD.

Mr. GODWIN of North Carolina with Mr. MORIN.

Mr. O'SHAUNESSY with Mr. MOTT.
Mr. JACOWAY with Mr. CURRIE of Michigan.
Mr. SHACKLEFORD with Mr. KAHN.
Mr. JONES of Virginia with Mr. MUDD.
Mr. OLNEY with Mr. SCOTT of Pennsylvania.
Mr. SCULLY with Mr. MEEKER.
Mr. MAHER with Mr. SANFORD.
Mr. RUCKER with Mr. MONDELL.
Mr. HAMILL with Mr. FARR.
Mr. KETTNER with Mr. NOLAN.
Mr. RIORDAN with Mr. MCKENZIE.
Mr. HOOD with Mr. NICHOLS of Michigan.
Mr. RAYBURN with Mr. MILLER of Washington.
Mr. FLYNN with Mr. LONGWORTH.
Mr. NICHOLLS of South Carolina with Mr. KREIDER.
Mr. PRICE with Mr. KINKAID.
Mr. POU with Mr. KIESS of Pennsylvania.
Mr. HUMPHREYS with Mr. IRELAND.
Mr. HOWARD with Mr. HUTCHINSON.
Mr. HOLLAND with Mr. HUSTED.
Mr. FERRIS with Mr. HOLLINGSWORTH.
On this roll call:
Mr. FIELDS with Mr. COOPER of Ohio.
Mr. EVANS with Mr. FOCHT.
Mr. ESTOPINAL with Mr. HASKELL.
Mr. EAGAN with Mr. FREAR.
Mr. DOOLING with Mr. GRIEST.
Mr. DENT with Mr. GREENE of Vermont.
Mr. DALE of New York with Mr. GRAY of New Jersey.

Mr. BROWNING. Mr. Speaker, I shall vote "aye," although I have a pair with my colleague from Maryland, Mr. TALBOTT. If he were present, he would vote "aye" also.

The name of Mr. BROWNING was called, and he answered "Yea."

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will unlock the doors.

PENSIONS.

Mr. SAUNDERS of Virginia. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Virginia rise?

Mr. SAUNDERS of Virginia. I want to submit a request for unanimous consent. I have conferred with the gentleman from South Carolina, the chairman of the Committee on Agriculture, that has charge of the bill now under consideration, and I wish to make a unanimous-consent request that as the first legislative business to-morrow we take up the bill H. R. 9160, which is a bill from the Invalid Pensions Committee, providing pensions and increase of pensions.

The SPEAKER. The gentleman from Virginia [Mr. SAUNDERS] asks unanimous consent that the first legislative bill to be considered to-morrow shall be the bill from the Invalid Pensions Committee. Is it an appropriation bill?

Mr. SAUNDERS of Virginia. It is an appropriation bill.

Mr. GILLETT. I suppose that is because we give up to-day, which is regular pension day.

Mr. SAUNDERS of Virginia. Yes. I will say in that connection that the bill is only a short one, and will take but 15 or 20 minutes.

Mr. LEVER. Mr. Speaker, in view of the statement of the gentleman from Virginia that this bill will only take a few minutes in the morning, so far as I am concerned I have no objection.

The SPEAKER. These bills never take any considerable length of time. Is there objection to the request of the gentleman from Virginia?

There was no objection.

WIDOWS' PENSIONS.

Mr. ASHBROOK. Mr. Speaker, I wish to submit a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ASHBROOK. The bill H. R. 9093, a bill to amend the widows' pension bill, appears on the House Calendar. I wish to inquire if it should not appear on the Union Calendar?

The SPEAKER. What is it?

Mr. ASHBROOK. It is a bill to amend the widows' pension bill. Of course it calls for an appropriation.

The SPEAKER. Is it a general bill?

Mr. ASHBROOK. It is a general bill.

The SPEAKER. Then, of course, it ought to be on the Union Calendar.

Mr. ASHBROOK. Mr. Speaker, I then ask unanimous consent that the bill H. R. 9093 be transferred to the Union Calendar, and also that it appear on the calendar before the bill H. R. 3547, which is a bill from the Committee on Invalid Pensions, as it was the understanding of the committee that the bill H. R. 9093 should first be reported.

The SPEAKER. You do not have to have any consent. The Chair puts it on the calendar as an original date.

Mr. ASHBROOK. A further inquiry. I wish to know, in view of the fact that the bill H. R. 3547 now appears on the Union Calendar as No. 93, whether or not this bill, now having been transferred to the Union Calendar, will follow H. R. 3547?

The SPEAKER. It is transferred as of the original date.

Mr. ASHBROOK. Both bills were filed the same day, but H. R. 9093 was filed first, with the understanding that it should so appear on the calendar.

The SPEAKER. Understanding with whom?

Mr. ASHBROOK. In the committee; and it was filed first by the clerk of the committee.

The SPEAKER. Well, the Clerk will put them on the calendar that way.

AGRICULTURE.

The motion that the committee resolve itself into the Committee of the Whole House on the state of the Union was agreed to.

Accordingly the committee resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9054, with Mr. CRISP in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919.

Mr. LEVER. Mr. Chairman, I yield 30 minutes to the gentleman from Mississippi [Mr. CANDLER]. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman and gentlemen of the House, I am very much gratified to be received, as I have been this morning, with the cheers of my fellow Members. [Applause.] It must be this splendid bill under consideration, however, you applaud, rather than me.

This bill presented by the Committee on Agriculture for your consideration deals only with the activities of the department itself. It was thought best that the appropriation bill be confined to the activities of the department and not enter upon any other field, but to reserve the other matters which may come up subsequently for further consideration, to be presented in another bill at the proper time.

If the membership will take occasion to read and to examine the very splendid report made by the distinguished chairman of the Committee on Agriculture [Mr. LEVER], on behalf of the committee, they will find a full and complete explanation of practically every provision in the bill, rendering it unnecessary to enter into a detailed discussion. Suffice it, therefore, to say this bill carries a total amount of $26,943,773. This is an apparent increase of $1,014,660 over the appropriation for the year 1918.

In the consideration of the bill the committee had before it representatives of the department, explaining its various provisions and the necessity for the appropriation. In some instances, as shown by the decrease in special items in the appropriation, it was thought by the committee necessary to make these reductions. In some instances increases were made in some of the provisions recommended by the department for justifiable reasons presented to us at the time. This shows that the bill received in all of its details full and careful consideration by the committee, and that it is a bill presenting in substance the best judgment of the whole committee in reference to the matters with which it deals. Therefore I trust when we come to the consideration of the bill for amendment under the five-minute rule, that there will be no captious objections or any unnecessary delay in the consideration of its various provisions, but that the Membership will cooperate with us who compose the committee as far as possible to expedite its passage in order that we may pass it here and send it to the Senate as soon as possible so that other important measures may as rapidly as possible receive consideration at the hands of the House.

While this bill is not in a strict and technical sense a war measure, still I do want to impress upon the House that every bureau and division of the great Agricultural Department is engaged in work to help us in winning the war; and the appropriations in this bill are for the basic groundwork and fundamental activities of the department, which stand under and uphold all the extensive and emergency work being done in

the real war work; and therefore these appropriations are necessary to keep all the work going as a harmonious system.

In this connection, therefore, I desire to call attention to the situation that existed in this country at the beginning of the war, and to the response which has been made by the people throughout the country in meeting the necessities which were then shown to exist in the condition which prevailed at that time. The Secretary says in his report:

When, on April 6, 1917, the existence of a state of war with Germany was declared by Congress, this country was facing an unsatisfactory situation in respect to its supply of foods and feedstuffs. The production in 1916 of the leading cereals, corn, wheat, oats, barley, rye, buckwheat, rice, and kafirs, was comparatively low, aggregating 4,806,000,000 bushels, as against 6,010,000,000 for 1915, 4,983,000,000 for 1914, and 4,884,000,000 the annual average for 1910–1914. The wheat crop of 1916 especially was strikingly small. It was only 639,886,000 bushels, as compared with the record production for 1915 of 1,026,000,000, with 891,000,000 for 1914, and with the average for the five years 1910–1914 of 728,000,000. It was certain, too, that on account of adverse weather conditions, the output of winter wheat for 1917 would be greatly curtailed. The world production of wheat for 1916 also was unsatisfactory, and the prospects for the ensuing year were not good. The situation was no better in respect to another conspicuously important food commodity, the Irish potato. The yield of this crop for 1916 in the United States was only 285,437,000 bushels, while for 1915 and 1914, respectively, it was 359,721,000 and 409,921,000. For the period 1910–1914 it averaged 360,772,000.

Now, then, with those conditions surrounding the country at that time, strenuous efforts were made by this department in order to bring those facts to the attention of the country and to appeal to the people to put forth every patriotic effort to remedy them by increasing the production of food and feedstuffs. The response made by the farmers of the country is shown in the report of the Secretary of Agriculture. The Secretary says:

Imbued with patriotic motives, influenced by favorable market prices, and falling in with the suggestions of the Department of Agriculture and of State agricultural agencies, the farmers of the Nation manifested much interest in the campaign for increased production and displayed efficient activity in reference both to plant and animal foodstuffs and feedstuffs. The weather conditions during the spring were generally favorable, and according to the unrevised estimates the Nation will have as the result of the work of the farmers and of all the agricultural agencies approximately 3,191,000,000 bushels of corn, 659,797,000 of wheat, 1,580,000,000 of oats, 201,659,000 of barley, 56,000,000 of rye, 16,813,000 of buckwheat, 33,256,000 of rice, 73,380,000 of kafir, 439,686,000 of Irish potatoes, 84,727,000 of sweet potatoes, 15,957,000 of commercial beans, 42,606,000 of peaches, 11,419,000 of pears, 177,733,000 of apples, and 7,621,000 tons of sugar beets. These figures represent increases of cereals in the aggregate over 1916 of 1,006,000,000 bushels and over the average for 1910–1914 of approximately 1,000,000,000 bushels, but a decrease of production in comparison with 1915 of about 199,000,000 bushels. It should be borne in mind, however, that the carry over of cereals from last year was much below the normal, and that the percentage of soft corn of the 1917 crop was unusually high. The figures also reveal the record crop of Irish potatoes of 439,000,000 bushels, 154,000,000 more than in 1916, and 79,000,000 more than the average for 1910–1914; an increased production of sweet potatoes over 1916 of 14,000,000 and of 24,000,000 over the five-year average; and of sugar beets of 950,000 tons over 1916 and of 2,230,000 over the five-year average. There was also the largest production of perishables on record. While authentic figures for meat, poultry, dairy products, and vegetable oils are not available for 1917, it appears, from rough estimates, that the quantity of these commodities for this year is slightly greater than for either 1916 or 1915 and exceeds the five-year average by two or three billion pounds.

The number of milch cows and other cattle has shown an increase during the last four or five years, the estimate for the former for the present year being 23,906,000 as against 22,768,000 a year ago and 20,497,000 in 1913, before the European war began, while that for the cattle is 43,291,000 as against 40,849,000 a year ago and 36,030,000 in 1913. Unfortunately, the number of sheep continues to decline; the estimate for 1917 is only 46,059,000 as against 48,483,000 a year ago and 51,482,000 in 1913. It is estimated that the number of hogs, which during recent years has shown an upward tendency, decreased over 4,000,000, or from 67,543,000 to 62,747,000. However, it is greater than it was at the beginning of the European war.

These patriotic activities of the farmers have largely contributed to swell to enormous proportions our foreign trade, which is shown in this statement:

COUNTRY'S FOREIGN TRADE EXCEEDS $9,000,000,000; TOTAL FOR 1917 A GAIN OF $1,300,000,000 OVER 1916.

The country's foreign trade amounted to over $9,000,000,000 in 1917, exports reaching a total of $6,226,000,000, while imports amounted to $2,952,000,000, according to a statement just issued by the Bureau of Foreign and Domestic Commerce, Department of Commerce. This is a gain of nearly $1,300,000,000 over 1916, when the total trade amounted to $7,874,000,000.

DECEMBER EXPORTS AND IMPORTS.

December exports amounted to $589,000,000, an increase of no less than $100,000,000 over November. The imports for December amounted to $228,000,000, an increase of $7,000,000 over November.

Free imports formed 76 per cent of the total in December and 72 per cent of the total for the calendar year.

The excess of exports over imports has nearly doubled in the last two years, amounting to $3,274,000,000 in 1917, against $3,091,000,000 in 1916, and $1,776,000,000 in 1915.

IMPORTS AND EXPORTS OF GOLD.

The imports of gold during December amounted to $2,500,000, as compared with $159,000,000 in December, 1916. For the year the gold imports amounted to $538,000,000, against $686,000,000 in 1916. The exports of gold amounted to $4,500,000 in December, 1917, against $28,000,000 in December, 1916. For the year the gold exports amounted to $372,000,000, as compared with $156,000,000 in 1916.

Silver imports amounted to $6,000,000 in December, as compared with $3,500,000 for the corresponding month in 1916, and to $53,000,000 for the year, against $32,000,000 in 1916. Exports of silver were valued at $10,000,000 in December, 1917, and $9,000,000 in December, 1916. For the year the silver exports amounted to $84,000,000, against $71,000,000 for 1916.

The foregoing facts show that there was a ready response by the farmers throughout the country when they knew the condition that existed and the necessity for increased production. They thus always show their love of country and evince the spirit which has ever been among them from the days of the Revolutionary fathers, who were farmers in this land, then almost a wilderness, who, led by that matchless farmer, military genius, and statesman, George Washington, secured for us American rights and liberties and the blessings of this Republic. [Applause.]

Whenever the farmers of the United States have realized that there was any just demand made upon them of any character to come to the rescue of the country they have always shown the greatest patriotism and responded to every reasonable request made of them. [Applause.] They not only always responded in time of peace but always as well in time of war.

There are three things absolutely necessary in order to bring about a successful conclusion of the world contest in which we are now engaged: First, we must have men; second, we must have the money; and third, we must have the food. Without men it is impossible to carry on war. Without money it is impossible to pay the expenses, and without food it is impossible to feed the soldiers. Men who are not fed, and well fed, are unable to fight. The farmers throughout the United States are responding along all of these lines. They are patriotically inspiring the young men of the land and furnishing their sons to go to the front in defense of the colors and the flag which we love. [Applause.]

They are subscribing to liberty loans and helping with their money to furnish the necessary sinews of war to enable the boys to do their full duty at the front, and then they are patriotically responding by an increased production of foodstuffs and feedstuffs to maintain our Army and feed our allies. All honor to the farmers of America and all patriotic citizens who are faithfully and loyally upholding their country's cause. [Applause.] This is our record in all the history of the past from the very commencement of this great Republic in which we live, through all the vicissitudes and changes that we have undergone, to this present hour.

I read a short time ago a statement by Richard T. Edmonds, the editor of the Manufacturer's Record, published in Baltimore, in which he defines the meaning of this great war in which we are engaged, in which statement I believe our patriotic and liberty-loving people agree. He says:

Germany's war is a definite war of atheism against Christianity, of barbarism against civilization. If we would—because Germany hates us more than it hated either Belgium or France—save this country from even greater horrors than Belgium and France have suffered, it is absolutely incumbent upon us to uphold the Nation to the utmost extent of our moral, physical, and financial power in this life and death grapple. There is no middle ground. Victory or defeat are the two issues at stake.

To win, every effort of the Nation to the last ounce of its strength—in the building of ships, in food production and food conservation, in increased output of iron and steel, in bettering our transportation facilities by rail and highway and water—must be put forth in enthusiastic, unending work by the men and women of this country.

It is incumbent upon everyone who realizes this situation to do his very utmost to awaken the latent patriotism of others and to quicken the knowledge of all, that they may understand the magnitude of the task and the stupendous issues involved—and these issues are the life or death of our Nation and of all civilization.

Carry into every home, preach from every pulpit, teach in every school the meaning of the war and the individual responsibility of every man, woman, and child in the country. Not until as a Nation we do this will the women and the children and the very life of our country be made safe from the danger of the awful destruction wrought in Belgium and France and wherever the armies of Germany have marched.

This defines and gives the meaning of this great war in which we are engaged. Germany forced this war upon the world. One man, the Kaiser, by his own edict, involved all the civilized nations of mankind in a world conflict that has literally set the world on fire, and he to-day is responsible for the situation that exists; and he to-day is the one man in all the universe who could by a word or edict, as he began it, end it and bring peace to the nations of mankind.

For more than 40 years he prepared. Not satisfied and not content with the fact that the other nations were willing that the tocsin of war be not sounded and that the dove of peace should hover over the peoples of the earth, he began to shake his mailed fist, rattle his shining sword, express his dissatisfaction at the conditions existing, and to declare "Me und Gott" supreme, and served notice upon the world that he would declare war unless certain demands that he made were complied with, and complied with within the short limit of 24 hours. When those demands were not complied with, then in accordance with

his previous announced purpose he did declare war, and, calling out his armies, which were ready for the conflict, within 12 days, as we well remember, he had 5,000,000 men armed to the teeth and at the front to engage in the awful and horrible tragedy which has continued during the terrible years now passed. He announced his purpose at the very beginning, and that was that he would subjugate the nations of the Old World first, and when he had subjugated them and become the supreme ruler beyond the seas he would cross the ocean to this beautiful land of ours and take down the emblem of liberty—the Stars and Stripes—and substitute in their place the flag of the German Empire, which represents autocracy and despotism.

Not only did he announce this to be his purpose and desire, but his minister of war announced it at the same time, showing that they had previously discussed it and had arrived at a conclusion in respect to it, and that it was the fixed purpose in their minds and hearts not only to engage in war with the nations across the sea but to cross over to this side and subjugate this free Republic and force it to become a dependent Province of the German Empire. Having announced that to be his purpose, he proceeded across the little country of Belgium. When his attention was called to the fact that he had entered into a solemn treaty, not only that he would not invade Belgium but that, on the contrary, he would protect its sovereignty and the security and the safety of its people, he admitted that he had entered into this solemn treaty and compact, but with a fiendish smile on his face declared he was to be supreme in all the universe, and said it was but a "scrap of paper" and he had torn it up.

His purpose was to reach France and reach the city of Paris as soon as it was possible to do so, subjugate that country first, because it was believed to be the best prepared country outside of the German Empire itself. Therefore, if he could subjugate it and convert to his own purpose and use the resources it contained, combine them together, he could overrun the other nations on the other side, and when they were subjugated combine the powers of all the nations beyond the seas under one great head, he to be that supreme head and directing force, and then cross the ocean and subjugate this country of ours and make it subservient to him. "Me und Gott," he declared, would do this.

Following this purpose and this design, he absolutely destroyed the little country of Belgium. Not being satisfied with that, he turned to poor little Serbia, that had in humiliation and in the dust agreed to every demand made on her, and absolutely destroyed it. His armed forces killed Red Cross nurses, sunk hospital ships, made breastworks out of defenseless men, women, and children, and sacked the towns, killing the unarmed inhabitants and treating the women and girls in a manner which can not be described in a public audience.

A short time ago a gentleman was delivering an address before the Red Cross Society in the city of Washington, and he said he had traveled through that little country of Serbia since this awful destruction. He said there was nothing to indicate that people had lived there except the smokeless chimneys that lifted their heads toward the skies, silent and solemn witnesses of the horrible tragedy that had been committed in that beautiful little land; that there was no evidence of thrift, no evidence of production, or anything of that kind, but devastation and destruction everywhere; and as he traveled along he noticed by the roadside bundles of clothing, which attracted his attention. Upon investigation, he found there was nothing within them. When he inquired what these smokeless chimneys meant, what the bundles of clothing meant, the reply was made, "Do you not know the German Army has been here? These smokeless chimneys are the silent witnesses to bear testimony to the awful devastation and destruction of this little country; these bundles of clothes at some time surrounded the body of an unarmed man or a helpless woman or innocent child who was ruthlessly slain without justification or cause." Not only were their bodies slain and hurled by the roadside to return to the dust from which they came, but they took their bones—bones of men, women, and little innocent children—and ground them into fertilizer to scatter over their soil to enrich it in order to increase production to maintain their army at the front. An army fighting for autocracy, fighting for despotism, fighting for the iron heel of oppression, against the army fighting for liberty, fighting for truth, fighting for righteousness and Christianity. They took the bones of innocent little children, converted them into fertilizer, which shows by its conversion the terrible and horrible contempt which they not only had for a defenseless people themselves but for their bones when their flesh had returned to the dust from which it came. [Applause.] Mother, you are in the gallery kindly listening to me to-day, and, father, you are here. How would you feel toward a people who would thus treat your little innocent, helpless child? God grant that we may all be saved from such awful sorrow and indescribable suffering by keeping Germany away from our shores, and to this end may the God of justice and the right nerve the arms of our brave soldier boys and give us through them triumphant victory. [Applause.]

So, by a violation of treaties, by the violation of all international law, agreements at The Hague, and the law of God they involved all the nations beyond the seas in this awful and this horrible conflict. The question is sometimes asked—I have it asked of me—Why is it that we, the United States of America, are involved in this awful and horrible conflict? Germany took possession, or attempted to take possession, of a part of the sea and notified us and all the nations of the world that if we attempted to come within what they called the war zone our ships would be sunk, our commerce would be destroyed, and our citizens would be killed. Not only did they make this threat, but they proceeded at once to put it into execution. As fast as vessels reached the war zone they were sunk. They created this war zone not in accordance with international law because it is unknown in international law. There was no agreement for it made at The Hague. There is no law for it written in any statute book. It was simply established by edict and by their serving notice upon all nations of the world that they must not go beyond a certain limit—500 or 1,000 miles out in the ocean and 1,000 or 1,100 miles long. They notified not only other nations, but the United States of America that we must not cross the barred zone. If they had the right to order us off a part of the seas, they had a right to order us off every single drop of water in the seas. [Applause.]

They forgot that we fought the War of 1812 for the freedom of the seas. That was the substance of everything involved in that contest. Our ships were being searched by England, our sailors were being taken off our ships, and England denied our right to the freedom of the seas—our right to engage in commerce unmolested. We served notice on them that if that continued there would be trouble between us. It did continue, and the War of 1812 between England and the United States was fought and victory came to the American arms, and our right to unmolested commerce and to the freedom of the seas was settled. It had never been denied previous to that time and never has been denied since that time until it was denied by Germany in the instance to which I have referred.

Not only that, but they fired upon our flag itself 24 different times. To fire upon the flag of the United States is an act of war, but to fire upon that flag 24 times is 24 acts of war. Not only did they fire on the American flag 24 times, but they sunk 20 ships flying the American flag. I want you this morning to look at that picture just a moment. See a ship flying the Stars and Stripes, magnificently floating upon the ocean waves, on a peaceful voyage, sailing from a port where she has a right to sail and going to a port where she has a right to land, crossing the ocean upon which she had a right to travel, when all at once one of these assassins of the sea, a submarine, that travels beneath the surface of the water, rises to the surface and bang goes a torpedo, and the American ship begins to sink beneath the ocean waves. I want you to see that flag, beautiful as it is and love it as we do, sinking gradually until it disappears beneath the surface of the ocean and then see the German flag floating triumphantly above the surface. Do you like that picture? I do not, and I am sure you do not. Not only did they sink our ships, but in addition to that they killed our citizens, more than 500 of them, unarmed and defenseless—men, women, and children, whom they sent to the bottom of the seas without justification and without excuse—in violation of international law, in violation of agreements entered into at The Hague, in violation of the laws of God, and in violation of the laws of humanity. Then, people say sometimes that the United States of America has no cause to be in this terrible war, which has been thus brought upon us and which we have been forced to engage in contrary to our desire, contrary to our purposes, and contrary to our wishes. We did everything to avoid it. God knows I did not want any war. Our great President did not want war.

He was as patient as Job himself and endured time after time the awful criticism not only on this side of the water but beyond the seas, until finally the time came when patience ceased to be a virtue, and there was nothing else left for us to do except to participate in the war in defense of our country, for the protection of our flag, and the perpetuity of this Republic. When that time came he did not hesitate, and when that time came we did not hesitate, and I do not believe that the people of the United States at the present time are hesitating as to what our duty is or what course we shall pursue. Not only did they do this, but as we well remember they attempted to stir up insurrection in our own country by telling the negroes that they

had not had their rights fully accorded to them in this country, and that if they would join with them in a conspiracy to overthrow the beautiful land in which we live that they then would be fully accorded the rights to which they were entitled and they should control and rule this land and the white people should be subservient to them instead of their being subservient to the white people. Think of that! Not only that, but they held out the inducement to Mexico that if she would join with them—and also to Japan, if she would join and help them overthrow this country—that they should be paid in our land; that Mexico should have the States of Texas, New Mexico, and Arizona, and that Japan should have California, Oregon, and Washington. In other words, they proposed to administer upon our estate and divide it up before we were dead. They proposed to take six beautiful stars from the flag which we love, which shine in their brilliancy and glory in that emblem of liberty, representing six sovereign States, and confer them upon a foreign power, upon an alien thus opposed to us and to our institutions; but, thank God, no nation in all the universe has ever been able to take a single star from that flag, and by the help and grace of the God of righteousness and of truth and of justice they never will. [Applause.]

They filled our country with spies, of whom old Bernstorff seems to have been chief, and interfered with our internal and domestic affairs. Therefore, not only have they interfered with our international commercial rights and killed our people, but they have attempted to stir up neutral nations against us and within our borders insurrection among our own people, inviting them to join with them in a conspiracy to overthrow and destroy us, and holding out to them promises of reward in the future, to be accorded to them from the resources which we possess.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. LEVER. I yield to the gentleman such further time as he desires to use. I am greatly interested in his speech and see others are. [Applause.]

Mr. CANDLER of Mississippi. I thank the distinguished chairman of the committee for his kindness.

Another very serious reason for our being in this war was caused when the Kaiser, agreeing with the President of the United States that he would desist from the horrible submarine warfare in which he had engaged for so long, and that no more would he resume it in the future, then, without consultation of any kind, simply served notice upon us during the latter days of last January that upon the 1st of February he would again resume the unrestricted submarine warfare and thus begin again to sink our ships, destroy our commerce, and kill and slaughter our people. He did not consult with us. He had entered into a solemn agreement, in one sense of the word a treaty, between his country and our country, agreed to by him and by the President of this great Republic, that he would never again engage in unrestricted submarine warfare, which he agreed at that time was contrary to international law, contrary to any agreement of any kind entered into by any nations of the world, because wherever a ship, even of a belligerent, which is carrying unarmed passengers is captured, according to international law the passengers must be protected and taken to a place of safety before the ship itself can be sunk; and it was brought to the attention of the Kaiser that these submarines were unable to take from the ships noncombatants and unarmed passengers that might be upon them and protect them and carry them to a place of safety before the ship was sunk.

They could not carry lifeboats or life rafts or anything by which they might be taken to a place of safety, and therefore for that reason, because international law required that to be done, they were not such implements of warfare as could be used anywhere in war between the civilized nations of the world. Having consented to that, he agreed he would no longer engage in such warfare. But without consultation, without interchange of any communications, without even writing a letter, he simply served notice on this Republic that at a certain time he himself, by virtue of his supreme power and divine commission to rule the world, would resume this unrestricted submarine warfare, which he had agreed was contrary to international and all other law.

Not only did he announce that, but he resumed it, and the ships began to go down, one after another, until the number went up into the hundreds; 839 ships were sunk, of which 20 were flying the American flag. Again he was in reality and demon-like cruelty not only destroying our property, but murdering our citizens. He had announced that the treaty which he had made to protect Belgium was simply a scrap of paper which he had torn up. He did not believe that the Belgian people would fight, but brave and chivalrous as they were, they did resist the invasion of their country and they fought to the death. Those of the membership of this House who have been there recently and had an opportunity to come in personal contact with those brave people, say that they are standing there upon the little piece of land that is yet left to them, proclaiming with fire in their eyes that they will fight to absolute extermination before they will permit the giving up of their land forever. [Applause.] He thought that he could tear up a scrap of paper, thought those people would not fight and were unable to fight. He presumed, I believe, that he could tear up an agreement made with the United States of America and say it was "a scrap of paper."

But, my friends, when he assumed to tear up as "a scrap of paper" an agreement between the President of the United States and himself not again to engage in this submarine warfare he called us one time too many, and the answer will be given by the boys who are now crossing the seas and who will carry Old Glory in their hands and wear the uniform of a soldier of the United States of America. [Applause.] When that answer is given to him it will be in no uncertain tones. It will be in the same spirit of 1776 and with the same aggressiveness that has been shown by our people in all the days that are past. It will be with bravery; it will be with chivalry; it will be with pure purpose and patriotic desire to uphold the right and overcome the wrong, and thereby add new luster and glory to our flag. So these are the reasons, my friends, which involved us in this war. They are the conditions that surrounded us, from which there was no escape. We had to do one of two things. We either had to fight or we had to run. Our flag has never trailed in the dust or gone down in defeat. We never have run in the days past and we never will run in the days to come. [Applause.] Some people say we declared war upon Germany. We never have declared war upon Germany up to this present moment when I stand before you here on the floor of this House. We simply passed a resolution declaring that a state of war existed between the United States and Germany. We declared that Germany was making war upon us, and, that being true, there was nothing for us to do except to defend ourselves. [Applause.] I want to ask you if they were not making war upon us when they were proposing to divide up our territory and to confer it upon other powers; if they were not making war upon us when they sent our flag beneath the ocean, to the bottom of the sea; when they were violating agreements entered into with us; and when they were killing our men, women, and children, shedding innocent blood, and sending them to the bar of eternity? If that was not war, what would be war?

We either had to fight or we had to take the other alternative. What was that? We either had to fight or to take down that flag that flies from this Capitol to-day, that flag that flies upon this Capitol, near the Goddess of Liberty that stands upon the dome of this majestic building, and take down the flag that flies from the flagstaff above the Executive Mansion, where lives to-day our great President of these United States, and put in their places two white rags as an emblem of our degredation and of our shame [applause] and send a peace commission across upon the other side and say to the Kaiser, "Mr. Kaiser, we have come to turn over to you the United States of America. It is true our forefathers fought for it and shed their precious blood upon its sacred soil in order to secure to us the great Republic in which we live, and in which we enjoy American rights and American liberty [applause]; but we, as unworthy sons of worthy sires, propose to surrender it to you without a contest. We want you to come over there and take our country, kill our old men as you have killed them in other countries you have subjugated, and you had better kill the young men, too, because some of them might be ashamed of their daddies and shoot at some of your folks and might hit you. Kill our little innocent children like you have slain them in other countries. Sprinkle over the fair land their innocent blood. Then take our beautiful women, the best, the purest, the most beautiful women in all the universe of God [applause], the women from whose eyes flash the sunshine of God's Heaven, upon whose cheeks is the glow as beautiful as the softest and sweetest tinge of the rose that bloomed in Paradise itself, from the fountain of whose heart flows the most innocent and purest blood that ever coursed the veins of God's best creation; yes, come and take mother, daughter, and sister; yes, come and take them all and treat them as you treated the good women and pure girls in the other nations across on the other side which you have subjugated and brought beneath the iron heel of your oppression and of your destruction. Treat them in such a manner as can not be described in a public audience anywhere under any circumstances." My friends, that was all there was left for us to do. We had no other alternative, and I want to say to you, before I would have taken that course and thus surrendered our country and our people to the Kaiser, I would have turned my back upon this historic hall and walked barefooted a thou-

sand miles home and gone into oblivion the balance of my days. [Great applause.]

The question is frequently asked why we are fighting across the seas. I will tell you. Listen to this: Rev. Newell Dwight Hillis, pastor of Plymouth Church, Brooklyn, N. Y., went across the ocean and made a personal investigation, and here is an extract from what he told his congregation upon his return in an address in that church:

Here upon this pulpit rests a reproduction of an iron coin given as a token to each German soldier. At the top is a German portrait of Deity, and underneath are these words: "The good old German God." To encourage the German soldier to cruelty and atrocity against Belgians and French the Deity holds a weapon in his right hand, and to dull his conscience and steel his heart to murder the token holds these words: "Smite your enemy dead. The day of judgment will not ask you for your reasons." The German atrocities of the last three years illustrate that German efficiency reached its highest point in the discovery of new and horrible devices for torturing old men, helpless women, and little children.

For three years German-Americans have protested that the stories of German atrocities were to be disbelieved as English inventions, Belgian lies, and French hypocrisies, but that day has gone by forever. When the representatives of the nations assemble for the final settlement there will be laid before the representatives of Germany affidavits, photographs, with other legal proofs that make the German atrocities to be far better established than the scalpings of the Sioux Indians on the western frontiers, the murders in the Black Hole of Calcutta, or the crimes of the Spanish Inquisition. On a battle line 300 miles in length, in whatsoever village the retreating Germans passed, the following morning accredited men hurried to the scene to make the record against the day of judgment. The photographs of dead and mutilated girls, children, and old men tell no lies. Jurists rank high two forms of testimony—the testimony of what mature men have seen and heard and the testimony of children too innocent to invent their statements, but old enough to tell what they saw.

For the first time in history the German has reduced savagery to a science; therefore, this great war for peace must go on until the German cancer is cut clean out of the body.

The cold catalogue of German atrocities now documented and in the government archives of the different nations makes up the most sickening page in history. Days spent upon the records preserved in southern Belgium, northern France, or in and about Paris, days spent in the ruined villages of Alsace and Lorraine, leave one nauseated, physically and mentally. It is one long, black series of legally-documented atrocities. Every solemn pledge that Germany signed a year and a half before at The Hague Convention as to safeguarding the Red Cross, hospitals, cathedrals, libraries, women and children, and unarmed citizens are scoffed at as a "scrap of paper." These atrocities also were committed not in a mood of drunkenness nor an hour of anger, but were organized by a so-called German efficiency and perpetrated on a deliberate, cold, precise, scientific policy of German frightfulness. It is not simply that they looted factories, carried away machinery, robbed houses, bombed every farm house and granary, left no plow nor reaper, chopped down every pear tree and plum tree and every grapevine, and poisoned all wells! The Germans slaughtered old men and matrons, mutilated captives in ways that can only be spoken of by men in whispers; violated little girls until they were dead; they thrust women and children between themselves and soldiers coming up to defend their native land; bombed and looted hospitals, Red Cross buildings; violated the white flag—while the worst atrocities can not even be named in this mixed audience.

The war general gave each German soldier his token, large as a silver dollar, bidding the soldier "Strike him dead. The day of judgment will ask you no questions." Jesus said, "Take heed that ye offend not one of My little ones." The Kaiser says, "I have done away with Jesus' teachings." The Master, who loved the little children, said, "I was an hungered and ye gave me no meat. I was athirst and ye gave me no drink. Therefore, depart from me into everlasting fire, prepared for the devil and his fellows." The war staff answers, "Don't be afraid. Look at your token. The Kaiser will take care of you in the day of judgment. Kill old men and little children, loot merchants' houses, violate women; the Kaiser will see that the God of justice asks you no questions." The result was logical and inevitable. These horrible atrocities!

Now, here is what Capt. A. P. Simmons, a United States military observer in Germany during the mobilization, having been attached to the American Embassy at Berlin, says:

Don't let any one tell you that German atrocities are merely fiction. One of the most grewsome sights I ever saw was the impaling of babies on the ends of German bayonets and their return to frantic mothers. If you knew the horrors that patient, suffering little Belgium has been through your blood would freeze in your veins.

With knowledge of these awful atrocities do you further ask why we are fighting across the seas? We have joined our allies and are fighting over there because, first, it is best, safer, and wiser to join with them and with our combined strength, resources, and power resist Germany all together, than to wait and fight single handed and alone ourselves against Germany after she had overcome all the other Nations and combined them against us, as we certainly would have to do; and second, because we want to keep Germany out of America. God forbid they should ever invade our country and destroy our cities, devastate our farms, kfll our old men and innocent children, and treat our women as they have treated those across the seas. May we, by fighting over there, save our people from the awful atrocities and fiendish and brutal treatment described by Rev. Dr. Hillis and Capt. Simmons. [Applause.]

I have been asked when I thought peace would come. I fully agree with the President of the United States in what he announced not long ago as he stood at that desk on that subject. No greater address was ever delivered to Congress, if, indeed, it has ever been equaled. But I will tell you when peace will come, and it will not come before. It will come when our allies and our boys, wearing the uniform of the United States and carrying Old Glory, shall march through the German Empire to the city of Berlin and absolutely hurl the Kaiser and those in power with him from their present places of position and imaginary supremacy to the bottomless pit of the infernal regions, where they belong, and where they ought to have been long ago. When they shall destroy autocracy and despotism, the iron heel of oppression, and substitute in its place democracy, righteousness, truth, and Christianity, and send liberty, shining like the sunshine of God's heaven, all around this world in which we live, and raise the flag of the United States of America to the topmost pinnacle, where all the nations of the earth can pay tribute to it and recognize it as the flag of equity, of justice, of righteousness, of truth, and of Christianity, and the flag that came to the rescue and saved the civilization of the world for all future time, then shall peace come, and not before, for there can be no abiding or permanent peace until these results are accomplished. [Loud applause.]

I thank you from the bottom of my heart, gentlemen of the House, for your close attention and generous evidences of approval of what I have had to say for your consideration. The issue is made up, and it is whether we shall stand by our great President, for our flag, and for our country. Let us all do so and our people will sustain us, and the God of our fathers will bless us and give to our country victory and permanent peace. [Great applause.]

Mr. HAUGEN. Mr. Chairman, I yield 40 minutes to the gentleman from Illinois [Mr. GRAHAM].

Mr. GRAHAM of Illinois. Mr. Chairman, on page 13 of this bill appears an item as follows:

For investigating the disease of tuberculosis of animals, for its control and eradication, for the tuberculin testing of animals, and for researches concerning the cause of the disease, its modes of spread, and methods of treatment and prevention, including demonstrations, the formation of organizations, and such other means as may be necessary, either independently or in cooperation with farmers, associations, State or county authorities, $250,000.

There was no similar item in the act making appropriations for the Department of Agriculture approved March 4, 1917.

I do not know of any item in this bill that is more important than this, and in the hopes that this item may be hereafter amended, I am calling attention to it at this time.

Tuberculosis, as affecting our live-stock industry, has not, in my judgment, received proper attention on the part of our Government, neither in Congress by adequate appropriations, nor by the Agricultural Department of the Government. I dare say this is because of the fact that it is not a malignant disease, quick in its effect, but a disease the spread and growth of which is so almost imperceptible that we do not observe it. However, no one thing is so threatening to the live-stock industry to-day as this disease.

Tuberculosis in live stock is essentially a disease of the stock-feeding, breeding, and dairy farms, where the cattle and swine are stabled and housed. In the ranges of the West and Southwest it is comparatively unknown. Wherever cattle and hogs are kept housed and confined, there tuberculosis breeds and spreads. Its growth is so rapid as to threaten to-day the dairy and breeding and cattle-feeding industry of the country.

By using abbattoir statistics and the results of tuberculin tests made at various places we can, with reasonable accuracy, tell how widespread this disease is. Dr. Davis S. White, in his Principles and Practice of Veterinary Science, states:

In the United States 1 per cent of the cattle are found tuberculous on slaughter, and 2.5 per cent of the hogs. Results of tuberculin tests on 400,000 head of cattle gave 10 per cent reacting. It is very probable that 1 per cent of the beef cattle and 10 per cent of the dairy and stud herds of this country are tuberculous.

I am inclined to think Dr. White is below the real facts in his estimate. An inspection of the condemnations of animals at slaughter, as given in the Yearbook of the Department of Agriculture of 1916, shows the percentage of animals condemned has risen from 1.58 per cent in 1907 to 3.35 per cent in 1916. I insert the table here:

Condemnations of animals at slaughter, 1907–1916.

Fiscal year.	Cattle		
	Whole.	Part.	Per cent.
1907	27,933	93,174	1.58
1908	33,216	67,482	1.41
1909	35,103	99,739	1.84
1910	42,426	122,167	2.07
1911	39,402	123,969	2.10
1912	50,363	134,783	2.46
1913	50,775	130,139	2.55
1914	48,356	138,085	2.77
1915	52,496	178,409	3.32
1916	57,579	188,915	3.35

This, I believe, is largely due to the growth of tuberculosis. The Secretary of Agriculture reports (Annual Report 1916, p. 15) that tuberculosis in live stock causes annually losses of $25,000,000.

In older countries, where the disease has been unchecked, it is destroying the live-stock industry. In Germany, before the war, nearly 21 per cent of the cattle and 3 per cent of the swine killed for food have been found tuberculous, while the tuberculin test showed over 50 per cent of all cattle tested reacting. Fully 25 per cent of the cattle in Germany before the war were affected, and in France 10 per cent.

War is a degenerative process, and in times of war the enforcement of our laws of sanitation and health becomes somewhat slack. For this reason we ought now to make ample provision to see that this white scourge does not gain on us during this war. Not only must we do this to conserve our meat supply, but to protect the health of our people. Tuberculosis in cattle is transmissible to human beings, and we can not afford to temporize with the health of our babies, the hope of the Nation for the next generation.

Milk drawn from tuberculous animals, as well as cheese, butter, and other raw products manufactured from it, are a source of danger to consumers. (Yearbook, Department of Agriculture, 1910, p. 235.)

That the scourge can be checked there is no question. In 1909, in the District of Columbia, a system of tuberculin tests and killing of diseased animals was initiated. In eight years the percentage of animals affected in the District has fallen from 18.87 per cent to 1.1 per cent.

The Department of Agriculture has as yet made no effort to systematically attack this disease. Such efforts as have been made are spasmodic and local. If there are not laws adequate to authorize the department to act, Congress should pass such acts, and I respectfully urge upon this committee that they give attention to this matter. The strictest kind of interstate regulations as to the shipment of tuberculous live stock should be made and enforced. Where tuberculosis is present let it be stamped out by effective quarantine and slaughter, if necessary. Let some concerted plan be adopted and then followed. It is idle for us to stand by and merely contemplate the situation, saying, as the Secretary of Agriculture does in his report of 1916:

Its very magnitude discourages the undertaking of any general plan of eradication.

If there are not sufficient laws, let the Secretary of Agriculture suggest proper ones to Congress; if the laws are adequate, then he ought to be given ample funds and requested to act. This appropriation is, in my judgment, just one-half of what it ought to be; it should be $500,000.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield for a question?

Mr. GRAHAM of Illinois. Yes.

Mr. McKENZIE. Has it not been demonstrated that in many instances animals suffering from tuberculosis have gotten well, and that the post-mortem examinations have demonstrated that fact?

Mr. GRAHAM of Illinois. Yes.

Mr. McKENZIE. And that that same animal, if given the tuberculin test, would show the curve of infection; and is it not a fact that the great difficulty in handling this proposition is what to do with those animals, and if we undertake to slaughter them, will we not slaughter hundreds of thousands of animals in the country that might otherwise recover?

Mr. GRAHAM of Illinois. I agree with my colleague. I think the best method of handling this proposition is not by indiscriminate slaughter, as was undertaken in the foot-and-mouth disease, but by quarantine wherever it is necessary and segregating these animals in the hope that they will recover. Frequently animals that are tuberculous will recover and are found on slaughtering not to be tuberculous, and frequently tuberculous animals if kept together and segregated will produce offspring not tuberculous. For that reason indiscriminate slaughter would not be desirable.

While the stock raisers of the Eastern, Northern, and Central States are seeing this plague decimating their herds and reducing their agricultural wealth and are restricted as to their expenditures to $250,000, the farmers of the South and Southwest are, by this bill, carefully protected by adequate appropriations. For instance, I observe that for the eradication of the cattle tick of the South there is appropriated $620,420; for methods of meeting the cotton boll weevil, $650,410; for the eradication of the pink bollworm, $500,000. It is extremely evident that the cotton-producing States intend to look after their own. Here is a total of $1,150,140 expended to control diseases of cotton, while $250,000 is expended to control tuberculosis; and this is true, although the total value of the cotton crop of this country last year was $1,517,558,000, and the total value of the cattle and swine on the farms of the country was $2,257,028,000.

The great live-stock industry of the North and East and Central States is not being properly guarded in this bill in comparison with the care which is used to protect the interests of the farmers of the cotton-growing States. It is high time this should be done.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I yield 40 minutes to the gentleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. Mr. Chairman, since history's dawn tuberculosis has been the scourge of man and the affliction of the brute. Dr. Flick, medical director of the Henry Phipps Institute for Prevention and Study of Tuberculosis, answering his own question "Where did the first case of consumption come from?" said "Where did the first man come from?"

Moses, in Leviticus, twenty-sixth chapter, thirteenth to sixteenth verses, and twenty-eighth chapter, twentieth to twenty-second verses, flaunts it as a penalty before his people, and places a ban upon the afflicted brutes' flesh as an offering. Isaiah, the orator, chapter 10, verses 16 to 23, and Daniel, the judge, chapter 10, verse 17, both tell of its ravages and terror. To the chosen people tuberculosis, next to leprosy, had the greatest terror of all diseases. It is a remarkable fact that this people are to this day the most nearly immune of all the civilized nations to tubercular attack. It was, however, their great affliction while in Babylonish captivity. That was a time when Hippocrates, the great Greek physician, lived and administered to the sick and wrote of their ills. It was probably more prevalent then than now.

Seven centuries later Galen, the Greek stoic physician who acquired the title of Paradoxologus as well as Paradoxopoues, who was physician to two Roman emperors and medical guardian of Commordus, son of Marcus Aurelius, told of its prevalence in Rome, whose people took it, with their other evidences of civilization and weakness, from the Greeks, who obtained it from Egypt, the home of medicine and disease. Egypt in the distant ages probably obtained it from the Far East, the home of wisdom, art, wickedness, and weakness.

Dr. Moore, of Cornell University, says, "The Talmud, especially the Mishnah, codified at the close of the second century, and the Gemara in the fifth century contained numerous enactments against the eating of such flesh." He goes on further to say that in the ninth century the Franks enacted laws against eating tubercular flesh; later the various German States, running down from century to century, and other countries, in addition to forbidding the eating, denounced the sale and gradually took control in various forms of inspection to protect the public. Dr. Moore observes, "The United States stands foremost in the efficiency of this service."

When animal tuberculosis came to America can not be precisely stated. Cattle, the leading food-producing animals, were brought to this country by the various European navigators and colonizers. Probably bovine tuberculosis came with them. Hogs, the second food-producing animal, and second only to cattle in loss from tuberculosis, were brought here about the same time, but hog cholera did not appear until much later. Tuberculosis probably came with these animals or soon thereafter.

While in every decade we have been endeavoring to improve our breeds by infusing new and stronger blood, we have also been propagating disease. In this, like in all else, we progress, but always with some penalty as the price.

As I have said, the United States has the best system of meat inspection. It is more expensive than that of any other nation. For the year 1918 we appropriated for that purpose the sum of $501,620. The large purpose of this expenditure is to detect and dispose of at the slaughter end of our food animals the individuals and parts of individuals unfit for human consumption. It occurs to me that if we would have pure water for our use, while it is well to filter at the point of consumption, would it not be well to purify the source. So if we are to spend largely at the point of inspection after slaughter, would it not be wise to purify at the source of life and growth.

Tuberculosis affects a large, though varying, percentage of cattle acording to the locality, but greatest, of course, in the North, and amounting to 63,000,000 head of cattle, and all the hogs in the United States, about 67,000,000, or a total of 130,000,000, while the total cattle possible to be affected by the tick number only 20,000,000 head.

As has been well said from this floor, $620,000 is appropriated in this bill for the eradication of the cattle tick, affecting only comparatively few animals—20,000,000—as compared with $250,000 provided for a disease that affects 130,000,000. I do not quarrel with the $620,000 appropriation for cattle tick, because I am in favor of this Government exercising all of its

energies and using largely of its means to make good its own appeal for increased food production, but in the light of the number of animals affected by these two diseases, $620,000 is absolutely indefensible if $250,000 for the eradication of tuberculosis is allowed to stand.

Tuberculosis in live stock is an older disease than hog cholera and cattle tick. Among scientific men it is understood as well as either one. The methods of dealing with the problem are also well understood and practically agreed upon. The serious problem for solution lies among interested parties. First, the owner of the animal, in which lies perhaps the means of his livelihood, and who can not for purely altruistic purposes test and slaughter upon either suspicion or proof of the disease. Second, the State or community interested in the nonspread of the disease, both from the standpoint of profitable industry and the public health. Third, the Government, whose present concern is for the saving of what food we have and the production of a large increase in meats, as well as the general public health. Moreover, since more than half the inspected meat and meat animals move in interstate commerce under the supervision and control of the General Government, the Government has a manifestly large interest in the control and the eradication of this source of loss and danger.

The bases for this enterprise are, first, economic; second, sanitary. These are, of course, not stated in the order of their ultimate importance to the Nation.

Dr. Moore states the economic features of loss to owners of live stock as follows:

1. By destroying cattle outright, as when tuberculosis is allowed to reach its full development and kill its victim.
2. By reducing the market value of the animal, as in those cases in which the beast is sold before the disease has reached such a stage as to render it entirely unmarketable.
3. By reducing the breeding value of a herd and its general productivity.
4. By causing a waste of cattle food by animals that can not give an adequate return.
5. By infecting other animals, such as calves, swine, and other cattle through the milk and through direct contact.
6. By injuring the reputation of the herd, thereby rendering it difficult to dispose of the animals or their products.
7. By destroying the enthusiasm or interest of the breeder in the maintenance of his herd at a high standard.

These are important at this time, when the Nation is making special appeals to the live-stock owner to speed up production of beef and pork. Moreover, regular days are set aside when we are enjoined not to eat meat, that the supply for our armies may not fail.

It is a hollow mockery for appeals to go out from Washington to every man who owns a beef or pork brute to feed them until they can have the maximum amount of food product upon the basis of that brute life, and then not respond to a fair appeal to reduce the loss incident to this great ravage which the producer must meet. Thousands of men in my own State, and I am one of them, feed cattle now against an almost certain loss. For two reasons we continue it. First, we hope, perhaps, that the price may change so that we may be adequately recompensed, and, secondly, and more important, it is in response to patriotism on account of the demand of the Government to produce as many pounds of beef or pork as possible.

Mr. LINTHICUM. Will the gentleman yield for a question?

Mr. SLOAN. With pleasure.

Mr. LINTHICUM. Does not the gentleman think a larger appropriation ought to be given and some law giving greater activity to this work ought to be enacted?

Mr. SLOAN. I quite agree with the gentleman from Maryland, who I know for more than two years has been deeply interested in this proposition, interested more particularly from the sanitary angle than the economic. I know the interest he has taken, and I know the large amount of information he has gathered, and I quite agree with him that what we should do is to do just what Dr. Mohler, head of the Bureau of Animal Industry, would be willing to do and will do if this Congress will permit him, and that is to make this appropriation a million of dollars, so that he can inaugurate a man-sized campaign against tuberculosis to bring about a reduction the very first year and the final eradication of this great scourge which I am discussing from an economic standpoint, of which ultimately from the sanitary phase, which in the mind of the gentleman from Maryland, is the more important.

We should move in this matter with haste and care combined. We are in better condition than European countries, which have not met this problem as they should, and in partial consequence thereof are now, in the stress of war, feeling the effects of their partial neglect.

In the matter of this appropriation I do not know precisely what is in the mind of the Secretary of Agriculture, an official for whom I have the utmost regard for his patriotism and ability. When I say that I am not giving him mere lip service I mean it. I think that perhaps he does not desire to shoulder the responsibility of a large appropriation—I am not quoting him—he may properly want to leave it where it belongs, with the Congress. If the Congress wants this campaign, I have no doubt the Department of Agriculture will see to it that it is vigorously carried on. The man in the Department of Agriculture at the head of the Bureau of Animal Industry believes in this campaign and believes that $1,000,000 can be effectively used with satisfactory results.

Renneberger estimated the loss of the cattle industry in Germany, due to tuberculosis before the war, to have been more than 90,000,000 marks annually, which would be $18,000,000. Dr. Moore, quoting Renneberger further, says:

The slaughterhouse statistics of Prussia show 14.6 per cent of the cattle and 2.14 per cent of the hogs to be tuberculous. In Saxony the percentage is 29.13 for cattle and 3.10 for hogs. In the city of Leipzig the figures are 36.4 per cent for cattle and 2.17 per cent for hogs (Siedamgrotzky). Of 20,850 animals in Belgium tested with tuberculin in 1896, 48.88 per cent reacted (Stubbe). Of 25,439 tested in Denmark from 1893 to 1895, 49.3 per cent reacted (Bang). An examination of 20,930 cattle in Great Britain, either slaughtered and examined post-mortem or tested with tuberculin, showed 5,441, or 26 per cent, affected with tuberculosis. McFadyean estimates that 30 per cent of the cows in Great Britain are tuberculous.

Why do I mention this? I mention it to show what America's opportunity is if it will rise to it.

Dr. A. D. Melvin, late head of the Bureau of Animal Industry, himself a victim of tuberculosis, in the American Veterinary Review of 1908, said:

While the saving of human life affords the highest motive for combating tuberculosis, the prevention of financial loss is alone a sufficient reason for undertaking the eradication of the disease from farm animals. Statistics of the United States Federal meat inspection for the fiscal year ending June 30, 1908, covering 53,973,337 animals, or more than one-half of all those slaughtered for food in the country, show the following percentages of tuberculosis: Adult cattle, 0.961; calves, 0.626; sheep and goats, 0. The proportion of tuberculosis is probably higher in animals slaughtered without inspection. Reports of tuberculin tests made in the 15 years from 1893 to 1908 by Federal, State, and other officers with tuberculin prepared by the Bureau of Animal Industry have been carefully analyzed and tabulated. Out of 400,000 cattle tested, mostly dairy cattle, there were 37,000 reactions, or 9.25 per cent. From these two classes of statistics it is concluded that on an average about 10 per cent of the milch cows, 1 per cent of all other cattle, and 2 per cent of the hogs in the United States are affected with tuberculosis, the average percentage of all the cattle being estimated at 3.5.

I am going to give you some more figures. Then you will see that instead of being 2 per cent for hogs it is 10 per cent for hogs, as will be stated by another authority. This statement was made in 1908 by Dr. Melvin. Now, I proceed:

The accuracy of the tuberculin test has been confirmed in a remarkable way by post-mortem examinations. Out of 23,869 reacting cattle slaughtered, lesions of tuberculosis were found in 23,585, a percentage of 98.81.

So we have a test that is almost infallible, and it is as certain and accurate as any disease test of which I know.

Properly prepared tuberculin applied by a competent person is, therefore, shown to be a wonderfully reliable agent for diagnosing tuberculosis. In cases where the test appears to give unsatisfactory results, this is usually due to the use of a poor quality of tuberculin or to ignorance or carelessness in applying it.

The economic loss on account of tuberculosis in food-producing animals is heavy. The loss of animals in which tuberculosis is found in the Federal meat inspection is estimated at $2,382,433 annually, and if the same conditions were applied to animals slaughtered without Federal inspection the annual loss for all animals slaughtered for food in the United States would increase to $3,102,433. The stock of animals on hand is also depreciated in value because of tuberculosis. Assuming that living tuberculous milch cows are annually depreciated to the extent of one-tenth of what the loss would be if they were slaughtered, other cattle one-third, and hogs one-half, the total animal depreciation amounts to $8,046,219. The annual loss from decrease in milk production is estimated at $1,150,000, and there is also some loss from impairment of breeding qualities. Taking all these items into account, the aggregate animal loss of tuberculosis in the United States is estimated at not less than $14,000,000.

Such heavy financial losses make the eradication of tuberculosis from farm animals desirable purely as an economic matter.

That was in 1908; increased value of cattle, increase of disease. Nobody fixes the estimate at over $30,000,000 to $35,000,000 and none place it at less than $25,000,000.

Dr. John R. Mohler, now head of the Bureau of Animal Industry, and perhaps the best authority on this subject in America, in response to an inquiry which I submitted to him relative to tuberculosis, its spread, and the methods and prospect of eradication, stated as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF ANIMAL INDUSTRY,
Washington, D. C., July 26, 1917.

Hon. CHARLES H. SLOAN,
House of Representatives.

DEAR MR. SLOAN: I take pleasure in transmitting herewith an article on tuberculosis eradication work prepared in accordance with your telephone request, together with bulletins and other papers relating to that disease.

Very truly, yours,

J. R. MOHLER,
Acting Chief of Bureau.

THE ERADICATION OF TUBERCULOSIS FROM LIVE STOCK.

Tuberculosis can be eradicated from all the cattle and all the swine in this Union; otherwise the Department of Agriculture would not have embarked upon such a tempestuous campaign.

To support such a broad assertion, there is an abundance of evidence obtained through the school of experience, covering a period of several years.

Tuberculosis has been eradicated from hundreds of herds in the District of Columbia, Virginia, Maryland, and other States. It has been practically exterminated from comparatively large circumscribed areas. Furthermore, wherever and whenever an effort was made to eradicate the plague and the earnest cooperation of the live-stock owners and officials has been obtained, success has never failed to crown the enterprise.

Herds of cattle, which have at the inception of the campaign contained 75 per cent of diseased animals, have been freed of the malady and have remained as free herds.

Herds which on the first test were found free of disease have, by the prudent care of their owners, been kept free of tuberculosis.

The experience the department has had, as outlined here, has been enjoyed by the veterinary officials of some States. The preponderance of successful experiments, if we may call them such, is convincing proof that when conditions are favorable tuberculosis may be eradicated.

What constitutes favorable conditions? The same state of mind of the people that obtained in the early nineties when pleuropneumonia was eradicated; in 1902, 1908, 1914, and 1915 when outbreaks of foot-and-mouth disease were eradicated; the spirit that pervaded the Western States during the cattle and sheep scabies eradication campaign; the spirit that is aiding in the eradication of hog cholera; the same state of mind, the same earnest, hearty, wholesome, and substantial cooperation that has made Texas fever eradication the marvel of live stock sanitary achievements.

Now, that is not an estimate by some expert outside of the Department of Agriculture, but by the Bureau of Animal Industry. It is the statement of the responsible head of that bureau under whose charge this campaign would be placed if given opportunity by Congress to attempt it in man fashion.

The American people can eradicate tuberculosis, or prevent its eradication, or increase its presence.

In 1907, the bureau first undertook systematic investigations in regard to the eradication of bovine tuberculosis and the results which have been obtained through 10 years of study indicate that the eradication of tuberculosis of cattle and swine is probably the largest and most difficult problem which the bureau has undertaken to solve for the benefit of the live-stock industry and the general public, which benefits from the advancement of that industry.

It has been clearly demonstrated that tuberculosis can be eradicated from herds which are heavily infected with the disease and that tuberculosis herds can be freed from tuberculosis and maintained in a healthy condition through a period of years. In the demonstration work which has been conducted in the State of Virginia the past fiscal year showed 127 herds of cattle to be without the infection of tuberculosis at the time bureau cooperation was established. In the same State 138 infected herds have been made free from tuberculosis and in accordance with the knowledge of the bureau this was accomplished in 126 cases without reinfections occurring. A large proportion of the herds were made free as the result of a single carefully applied tuberculosis test followed by the removal of reactors and the disinfection of the buildings. A second retest showed the eradication to have been completed in about 25 per cent of the herds.

The eradication of tuberculosis from cattle within a restricted area is a reasonable proposition as demonstrated in the District of Columbia, where in 1909 a compulsory tuberculin test became effective, and it was found that 18.87 per cent of the District cattle were tuberculous. This percentage was reduced as shown by the first retest to 3.2 per cent and during the fiscal year terminating June 30, 1917, only 0.84 per cent of the District cattle reacted to the tuberculin test.

It may also be of interest to note that reactions to tuberculin tests applied by inspectors of this bureau are confirmed by post-mortem examinations, exhibiting lesions of tuberculosis in between 98 and 99 per cent of the reactors which are slaughtered under Federal supervision.

The years during which these investigations have been in progress have seen the live-stock owners and the live-stock sanitary authorities awaken to a realization of the necessity and importance of cambating the spread of tuberculosis which has already made inroads in practically every section of the United States. This is especially true of the sections where intensive live-stock breeding and dairying have been practiced. In the South where this industry has been maintained in its infancy largely on acount of the prevalence of the Texas fever, cattle ticks, and the lack of diversified farming interests, the rapid eradication of these ticks, and the progress of the propaganda for diversified farming is making a new and large field for the development of both the beef and dairy cattle industries. The cattle in these sections are now but slightly infected with tuberculosis, and it would seem to be of special importance that these sections be given protection from the introduction of tuberculous cattle from the infected localities.

Forty-seven of the States require the tuberculin test as a qualification for the entry of dairy or breding cattle, but the owners of valuable herds have realized that a greater health insurance is obtained in the purchase of cattle from herds which are officially known to be free from tuberculosis.

This has led to the establishment by this bureau and by some of the States of what are known as accredited tuberculin tested herds. This plan is meeting with great favor, especially among the breeders of pure-bred and registered cattle who recognize in it a medium for increasing the volume of their business and for protecting their own valuable herds when pure-bred cattle of other blood lines are introduced for improving the strains.

On July 2, 1917, bureau offices were established at Richmond, Va.; Springfield, Mass.; Indianapolis, Ind.; South St. Paul, Minn.; Salt Lake City, Utah; and Portland, Oreg.

The Richmond office will have supervision over tuberculosis eradication in Virginia, North Carolina, South Carolina, and adjacent States in cooperation with the officials of those States. In the State of Virginia the pure food and dairy commissioner has detailed one veterinary inspector to cooperate with the bureau veterinarians. It is expected that in the near future the commissioner will have sufficient funds which will permit of the employment of several more inspectors to cooperate with the Federal force.

The work in North Carolina will be conducted in cooperation with the director of extension work. The State has assigned Dr. G. W. Roberts, professor of veterinary science at the Agricultural and Mechanical College, to work for the summer months. He will be succeeded by another qualified veterinarian in the fall. The Department of Agriculture has furnished one inspector to aid in the campaign. It is expected that immediate plans will be made for active work in South Carolina, as numerous owners of pure-bred cattle have signed up agreements to have their herds tuberculin tested.

The Springfield office will direct the work in the New England States. The campaign has already been opened in Vermont. The commissioner of agriculture for that State has employed a veterinarian and the department has detailed an employee.

There are a number of owners of pure-bred cattle in Connecticut with whom the department has been cooperating and which form a nucleus for eradication work in that State.

In the other New England States it is expected that cooperative forces will be engaged in the eradication campaign in the near future.

The Indianapolis office will supervise the cooperative campaign which will be conducted in Kentucky, Ohio, Indiana, Michigan, and Wisconsin.

The South St. Paul office will do similar work in Minnesota, Montana, North and South Dakota.

The two other offices will engage in cooperative work in Idaho, Utah, Washington, and Oregon.

The department's policy in tuberculosis eradication is a cooperative one. For every Federal employee furnished the State is expected to provide at least one veterinarian.

Just one other excerpt which I shall read from Dr. Mohler:

That there will be mistakes made and failures encountered is a foregone conclusion. It will not be uncommon to encounter the individuals and officials who will have grave forebodings of the success of the campaign, and some will prophesy abject failure. We should not be cheered too much by the forecasts of the enthusiasts or depressed inordinately by the predictions of the glooms.

Tuberculosis can not be wished away; neither can it be talked out of existence. The State must pay to exterminate it, since it has tolerated its existence these many years. The United States Congress and the legislatures of the various States will appropriate funds for the maintenance of fighting forces to cope with the situation. The live-stock owners have duties no less important than the aforementioned forces. Teamwork among all the forces will produce results which will be worth striving for and which will mean another glory for live-stock sanitation.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield right there?

Mr. SLOAN. I will be glad to do so.

Mr. HENSLEY. In order to corroborate what the gentleman is saying along that line, I would speak of just one instance I have in mind. There are a number of herds of cattle in Missouri where tuberculosis prevailed and has been eradicated. In one instance there was a milch cow, a Jersey, as pretty as a picture. I have forgotten how much milk she gave, but quite a quantity of milk. The owner of that cow refused to believe she had any tubercular trouble. He went over to the slaughter pen and saw her slaughtered. After he saw her slaughtered he said that her udders were absolutely rotten. He said, "I will never disbelieve it again." There is not any sort of question about it, and he never buys milk for his family now without first knowing that the herd from which the milk comes has been tested.

Mr. SLOAN. I thank the gentleman for his statement. It is quite true. One of the most serious propositions about this is the insidious way in which it works, and from the physical appearance how deceptive it is to know the truth about the presence or absence of tuberculosis.

There is just one reliable way of discovering it in life, and that is by the tuberculin test. Of course, the other means is the post-mortem.

Is it not a mighty good thing now and then to read a statement like that from a red-blooded man like Dr. Mohler, at the head of a great bureau of this Government, who tells the American people what should be done, how to proceed, and what can be accomplished? So it is up to this Congress to say we have faith in the man who has accomplished so much. He believes with that amount of money he can accomplish much toward eradication of tuberculosis. It is up to us to give him the opportunity, and let the Congress of the United States assume the responsibility.

Commissioner of live stock for the Chicago Live Stock Exchange, H. R. Smith, formerly for 10 years at the head of the department of animal husbandry at the State University of Nebraska, afterwards in a similar position in the State University of Minnesota, has submitted at the hearings before the Committee on Agriculture some very interesting and valuable information touching a number of phases of this tuberculosis problem. I recommend their reading.

Commissioner Smith presented among other things the following statement as to losses and prevalence of disease in the United States:

LOSSES CAUSED BY THIS DISEASE.

According to the records of the Meat Inspection Division of the United States Bureau of Animal Industry there were 25,975 beef carcasses and 44,492 pork carcasses condemned as inedible for tuberculosis alone at the seven leading Middle West markets—Chicago, Kansas City, Omaha, East St. Louis, St. Paul, Sioux City, and St. Joseph—during the fiscal year 1916. This is the equivalent of 50 trainloads of cattle and hogs of 40 cars each that were consigned to the rendering tanks at these

markets during one year because of having tuberculosis in so generalized a condition as to make the entire carcasses fit only for grease and fertilizer. There were a still greater number of carcasses passed for sterilization and sold as second-class canned beef and pork, upon which the loss was approximately 50 per cent.

PREVALENCE OF THE DISEASE IN THE UNITED STATES.

Tuberculosis is found among cattle and hogs from the Atlantic to the Pacific coast. It is not as prevalent in the Southern States as in the Northern States. Cattle are much less numerous in the South, are not so closely confined, making the conditions less favorable for the spreading of the infection and because of the prevalence of the cattle "tick" causing Texas fever fewer well-bred imported cattle have gone into the South up to this time. The following table shows the number of cattle and hogs slaughtered at the seven leading Middle West markets during the fiscal year 1916, and the number retained for tuberculosis (affected with the disease), and the number sterilized and condemned for tuberculosis.

Station.	Slaughter.	Retained for tuberculosis.	Per cent of total kill retained.	Sterilized for tuberculosis.	Per cent of total kill sterilized.	Condemned for tuberculosis.	Per cent of total kill condemned.
CATTLE.							
Omaha	707,365	14,157	2.00	832	0.12	2,207	0.31
South St. Joseph	249,858	2,285	.91	74	.03	661	.26
Kansas City	934,111	7,415	.79	421	.05	1,876	.20
National Stock Yards	540,429	3,202	.59	301	.06	996	.18
Sioux City	217,022	8,676	3.99	333	.15	1,198	.55
Chicago	1,934,862	87,102	4.50	4,742	.25	16,496	.85
St. Paul	228,172	10,829	4.57	86	.03	2,440	1.05
SWINE.							
Omaha	2,176,215	176,312	8.10	8,006	.37	4,733	.22
South St. Joseph	1,896,207	66,742	3.69	957	.05	3,269	.18
Kansas City	2,730,977	89,811	3.29	3,224	.12	4,042	.15
National Stock Yards	1,552,196	119,291	7.68	2,983	.20	2,901	.19
Sioux City	1,165,249	177,965	15.27	7,691	.66	3,515	.30
Chicago	7,343,746	1,161,339	15.81	36,273	.50	24,526	.33
St. Paul	1,503,074	81,254	5.4	1,453	.09	3,036	.20

The above table from the Bureau of Animal Industry shows that the disease is more prevalent at the northern markets. A total of 40,000,000 hogs were slaughtered during the year 1916 at all packing plants in the United States where Federal inspection is maintained. Approximately 10 per cent of these were found on post-mortem to be affected with tuberculosis.

Dairy cattle are more tuberculous than beef cattle, and the percentage of infected cattle is usually higher in the States where more dairy cattle are owned. The disease is found to be quite prevalent in beef cattle even in the so-called range States.

PRESENT BASIS FOR COOPERATION.

The scientists and authorities of the Nation and States understand the methods for control and eradication of tuberculosis as well as they do of the cattle tick or hog cholera.

1. There is needed the spread of information by the usual methods of literature, lecture, and demonstration.

2. The coordination of the National, State, and community forces.

3. A wisely managed system of compensation wherein the owner will stand one portion of the net loss, the State or community a second portion, and the Government the third portion.

The success of the United States authorities in cleaning up tuberculosis in the District of Columbia area is an evidence of what can be readily done in other areas, which can soon be made State wide and ultimately nation wide in scope.

As an evidence of the desirability for national action, I will say that while every State has some activity in this work there are 48 different systems, which should rapidly be made approximately uniform. A number of the States have not thus far kept the Bureau of Animal Industry fully supplied with their legislation or regulations concerning this work. Neither have they been supplied to the Congressional Library. I found some difficulty in obtaining full and complete data of the laws and regulations of the 48 States. I was given, however, free access to all documents and data which the Bureau of Animal Industry had, and was rendered liberal assistance in gathering information relative to the States' work. Using this, and by correspondence with the authorities of all the States, many of whom gave me considerable information while some few were limited in the scope of their replies, I was enabled to prepare, and now present as a part of my remarks, an abstract of the laws and regulations and workings thereunder in each of the 48 States:

STATE SANITARY REQUIREMENTS GOVERNING ADMISSION OF LIVE STOCK IN REFERENCE TO TUBERCULOSIS AND LAWS AND REGULATIONS WITH REFERENCE TO THE CONTROL AND ERADICATION OF TUBERCULOSIS IN LIVE STOCK.

ALABAMA.

Health certificate, including tuberculin test, for breeding and dairy cattle over 6 months of age, and feeding and grazing cattle over 2 years of age. Cattle for feeding under 2 years old require affidavit of owner that they will be kept separate from other cattle. Calves from tuberculous cows not admitted. Tuberculous cattle must be reported to State veterinarian, and such cattle can not be sold unless the seller notifies the buyer of the tuberculous infection. Tuberculous cattle must be kept in strict quarantine or isolation. Infected cattle must be slaughtered in city slaughterhouse, under supervision of city inspector; if at other place must notify State veterinarian at least five days in advance, so that he or his representative may be present. Use of tuberculous cows in dairies is strictly forbidden. All cattle reacting to tuberculin test shall be marked permanently for identification by branding with large "T" on left jaw.

ARIZONA.

State veterinarian has power to control contagious and infectious diseases under the general laws. All cattle imported shall be accompanied by health certificate, including tuberculin test for dairy and breeding cattle.

ARKANSAS.

Live-stock sanitary work under control of the board of control, State University. Health certificate for dairy and breeding cattle imported, including tuberculin test by official veterinarians.

Note from Dr. Mohler: State veterinarian expressed desire to have bureau employees cooperate with his force.

CALIFORNIA.

Law creates State veterinarian and gives him power to control and eradicate all infectious and contagious diseases. Dairy cattle and breeding bulls over 6 months of age when imported must be accompanied by health certificate, including tuberculin test. In lieu of health certificate and tuberculin-test record dairy and breeding cattle may be brought into the State when accompanied by signed statement of State veterinarian showing animals originated in herds free from tuberculosis and other communicable diseases.

COLORADO.

For importation of any bull over 6 months or any female cattle over 6 months old intended for dairy purposes animals must be accompanied with health certificate and a tuberculin-test chart, and copy must be filed with veterinary surgeon of State before cattle are shipped.

CONNECTICUT.

For importation of meat cattle over 6 months of age, permit from commissioner of domestic animals, health certificate, including tuberculin-test chart. Certificate must contain description of each animal, including age, breed, sex, and color, or numbered ear tags. When certificate is not provided meat cattle may be taken into the State under a permit from the commissioner of domestic animals and held in quarantine until examined and released by the commissioner. Commissioner to make tuberculin test of cattle within the State upon written application and at the expense of the owner, and issue a certificate and quarantine and brand the reactors, or he may appraise and kill the reactors.

DELAWARE.

Law creates live-stock sanitary board, with broad powers. Regulations provide that any cows or other cattle for dairy or breeding purposes coming into the State shall be accompanied by a certificate from an inspector in the State whence the cattle came, certifying that they have been examined and subjected to the tuberculin test and are free from disease. Cattle remain in the possession of the person who shipped them until live-stock sanitary board approves the certificate. Dairy cows and such other cattle as are for breeding purposes may be brought into the State under special permit for each shipment from the live-stock sanitary board. Such cattle shall remain in strict quarantine until examined by inspector of the board and tuberculin tested. They shall be kept apart from other cattle and the milk shall not be used or sold without previous sterilization by boiling.

FLORIDA.

Law creates live-stock sanitary board, with general powers for the prevention, suppression, and control of contagious and infectious diseases of cattle, hogs, and domestic animals, and grants them power to condemn and destroy any live stock so affected.

GEORGIA.

Law creates State veterinarian, with authority to formulate regulations necessary to check and suppress the spread of infectious and contagious diseases in live stock. Regulations provide that all cows, heifers, or bulls shipped or driven into the State must be accompanied by a health certificate, including a tuberculin test, which must be the thermal test and conform to certain other requirements. At option of State veterinarian all such cattle may be subject to a retest from 30 to 60 days after their arrival, and pending the results of the retest such cattle shall remain in strict quarantine. Regulations prohibit the use of tuberculous cows in dairies. Cattle reacting to the tuberculin test must be reported to the State veterinarian and branded "T. R." Sale of tuberculous cattle prohibited and must be slaughtered under the supervision of the State veterinarian.

IDAHO.

Health certificate, including tuberculin test, for cattle required for shipment into the State.

Note from Dr. Mohler: Tuberculosis-eradication work now being conducted in Idaho in cooperation with State veterinarian.

ILLINOIS.

Law relating to importation of cattle requires that all bulls, cows, or heifers exceeding 9 months old shall be covered by a certificate of health, including the tuberculin test made not more than 30 days prior to date of shipment, or by a permit for their consignment in quarantine for feeding purposes only. Bulls, cows, and heifers less than 9 months of age and steer or spayed heifers must be covered by an affidavit certifying to their classification. Cattle from herds which are officially registered by the authorities of the State of origin as "accredited herds" are not required to have tuberculin-test chart. Tuberculin test made for cattle within the State on application of owner, and all cattle reacting branded "T." No cattle forming part of the domestic herds of the State shall be subjected to the tuberculin test without the consent of the owner.

INDIANA.

Cattle imported into the State must have health certificate, including tuberculin test, if they are for dairy or breeding purposes. Calves under 6 months of age must have health certificate showing that they are from tuberculin-tested and free-from-tuberculous mothers. Cattle for feeding purposes covered by affidavit. No law which forces test on domestic cattle, but "accredited herds" are being established through organization and raising the requirements on milk and sale animals.

IOWA.

Cattle imported for dairy and breeding purposes must have health certificate, including tuberculin test. Cattle other than dairy and breeding cattle, except steers and cattle for immediate slaughter, shall be accompanied by a certificate of health and an affidavit certifying that the title of such cattle will not be transferred and that they will not be used for purposes other than feeding and slaughter without first notifying the State veterinarian and having them subjected to the tuberculin test. At last session of legislature the health commission undertook to have a bill passed authorizing the testing of dairy and breeding herds of cattle with appraisal of condemned animals and destruction of the same and providing for a special tax of 2 cents per head on cattle and 1 cent a head on hogs, which amount was to be used for the eradication of tuberculosis in live stock. This bill, if it had passed, would have provided about $170,000.

KANSAS.

Law creates live-stock sanitary commissioner. Regulations provided that cattle imported for dairy or breeding purposes must be accompanied by a certificate of satisfactory tuberculin test, showing them free from tuberculosis, applied within 90 days prior to date of shipment. Not required for calves under 6 months of age. Test to be made by Federal inspectors or veterinarians certified by authorities of the State of origin, but from New York State only on the test of Federal inspector. All cattle originating at public stock yards to be used for dairy purposes, registered cattle or native cattle for breeding purposes, must be tuberculin tested before they enter the State by inspector of the Federal Bureau of Animal Industry or by inspector of State of Kansas. Cattle for stocker or feeding purposes admitted on permit by complying with Bureau of Animal Industry's requirements to move interstate. Cities and towns allowed to pass ordinances compelling tuberculin test of all dairy cows. All reactors slaughtered under Federal inspection. Owners of tested herds listed in "Kansas Blue Book." Kansas had an appropriation of $10,000 for 1916, but that was exhausted. They paid one-half value of condemned animals while the fund lasted.

KENTUCKY.

Law creates live-stock sanitary board, and regulations provide that all cattle intended for dairy or breeding purposes imported shall be accompanied by certificate, including tuberculin test, showing that they are free from tuberculosis. Stockers and feeders need not necessarily be tested for tuberculosis before being brought in, but must be accompanied by certificate showing such cattle to be apparently free from tuberculosis. Calves under 6 months need not be tested to be imported, but if from tubercular dams, can not be brought into the State. Duty of any person suspecting tuberculosis in cattle to report the same to the State veterinarian. Any animal found to be tubercular shall be quarantined, isolated, or destroyed. May be killed either under inspection of State inspectors or at market under inspection of Federal inspectors. Any cow that reacts and is isloated or quarantined must be retested in not less than two or more than six months by a different veterinarian, and if again reacts shall be branded in the forehead by the letter "T," and sale for other than immediate slaughter is prohibited. Services of inspector shall be free to any farmer or owner of milk cow in testing for tuberculosis.

LOUISIANA.

All cattle brought into the State for the use of dairy or breeding purposes shall be free from tuberculosis, and the health certificate that accompanies them shall show that they have been tested with tuberculin. No test required for calves under 6 months, but calves from tuberculous cows shall be rejected. Shipment for grazing and feeding purposes permitted without test on affidavits showing cattle are intended for that purpose. All cattle sold at public stock yards for dairy or breeding purposes shall be officially tested with tuberculin and they shall be ear tagged. All veterinarians must report to live-stock sanitary board all cattle tested and whether they pass the test or react. Tuberculin is furnished free to veterinarians, and they shall apply ear tags to the reacting animals.

MAINE.

Law creates live-stock sanitary commissioner. Law provides that all persons selling pure-blood cattle or cattle represented as pure blood for breeding purposes shall before delivery make a report to the live-stock sanitary commissioner stating number of cattle sold, age, and sex and to whom sold, and such cattle shall be tested with tuberculin under direction of the live-stock sanitary commissioner, and the certificate given to the purchaser, calves under one year excepted. Law provides that no neat stock (calves, cows, steer, oxen, or bulls) or stags of any age shall be allowed to enter State of Maine, neither for dairying or breeding purposes nor for slaughter without a permit duly authorized by the live-stock sanitary commissioner. Such animals shall be tested within 30 days with tuberculin, regardless of any other test made, and shall be held in quarantine upon premises of owner until released by the live-stock sanitary commisisoner. Cattle used for dairy and breeding purposes shown in competition for prizes at State agricultural shows shall be tested within 12 months. Maximum appraisal value for pure-breed cattle $100 and $75 for grade cattle.

MARYLAND.

Bulls, cows, and heifers 6 months old and over imported into the State must be accompanied by satisfactory certificate of health and tuberculin test chart showing cattle to have been in good health within 10 days of shipment, and that they have not been exposed to other contagious or infectious diseases; not to tuberculous animals since the date of the tuberculin test. Test must have been applied within three months of date of shipment, except where animal is from a "State accredited herd," then any time within 12 months. Apparently healthy calves under 6 months, certified not to have been exposed to tuberculous animals are not required to have the tuberculin test. Apparently healthy cattle may be shipped to the Union Stock Yards, Baltimore, without previous examination and test. All bulls, cows, and heifers above the age of 6 months will be examined and tuberculin tested at this point. Admitted under permit and quarantine where satisfactory test can not be given before shipment, and then must be tested before being released from quarantine. Regulations do not apply to cattle for immediate slaughter where such animals are to be slaughtered within five days of their arrival within the State. Some progress has been made by the bureau in cooperation with Maryland authorities in eradication of tuberculosis.

MASSACHUSETTS.

Neat cattle for dairy or breeding purposes, unless consigned to quarantine station, must be accompanied by a permit of the Massachusetts department of animal industry. Tuberculin test required if over 6 months of age, either by veterinarian where shipment originates or by agent of Massachusetts on arrival at destination. Quarantined until released by the department. Tuberculin test made of animals within the State made at owner's request. Where one animal in herd is found reactor, all of the herd must be tested. Provision for compensation to cattle owners for animals condemned as tuberculous.

MICHIGAN.

Law prohibits importation into the State of cattle for breeding or dairy purposes except when such cattle are accompanied by a certificate of inspection showing that at the time of inspection and within 60 days prior to shipment said cattle had been subject to tuberculin test and were free from tuberculosis. Commission has power to test herds where tuberculosis is suspected, and either place in quarantine the reactors or else have them slaughtered. Law provides the amount that shall be paid the owners where cattle are killed.

MINNESOTA.

Law provides that it is unlawful for any transportation company to bring into the State cattle for feeding, breeding, or dairy purposes unless such animals have been examined and found free from tuberculosis, and provides that in case of cattle over 6 months of age to be used for breeding or dairy purpose the nonexistence of tuberculosis shall have been determined by the tuberculin test within 30 days preceding such importation. Test shall not be demanded of cattle intended for exhibition at town, county, district, or State fairs. Law provides that every person who suspects contagious or infectious disease must report the same to board of health. Can condemn cattle found to react to tuberculin test and law provides method and amount of appraisal.

MISSISSIPPI.

Law creates the live stock sanitary board and provides that cattle imported for dairy and breeding purposes must be accompanied with a health certificate, including the tuberculin test.

Dr. Mohler note.—No arrangements have been made for tuberculosis cooperation work, but opinion of bureau that if additional funds were available State would cooperate.

MISSOURI.

Health certificate for dairy and breeding cattle, including tuberculin test required. If any animal in lot inspected is found tuberculous, the words "Exposed to tuberculosis on day of inspection" shall be written on the certificate of health of such animals as pass. Cattle for pasturing, feeding, or immediate slaughter admitted on permit from State veterinarian. Nearly all cities in State are passing and enforcing ordinances requiring annual tuberculin test on all dairy cattle. On the authority of Congressman HENSLEY, Missouri compensates for condemned animals up to $40 for grades and $200 for pure breds.

MONTANA.

Cattle imported into the State for dairying, strictly pasture breeding, all pure breds, and all bulls over 6 months of age must be accompanied by a tuberculin test chart. Cattle for feeding purpose or for slaughter where no inspection is maintained must be accompanied by a clinical health certificate. Where for slaughter the waybill must be marked "For immediate slaughter." If cattle originate in either New York or Wisconsin health certificate must be issued by inspector of United States Bureau of Animal Industry.

Dr. Mohler note.—Cooperation work inaugurated here July 1, 1917. State has several inspectors. Bureau can only furnish one.

NEBRASKA.

All pure-bred cattle imported into the State must be moved to destination in quarantine and held under the direction of the live-stock sanitary board for an official tuberculin test, to be applied at owner's expense, under the direction of the State live-stock sanitary board, not less than 60 days after their arrival. All health certificates accompanying shipments of pure-bred cattle must be immediately forwarded to the State live-stock sanitary board upon arrival at destination. Cattle for dairy and breeding purposes over 6 months old must be accompanied with health certificates, including tuberculin test. For feeding, grazing, and range purposes permit from deputy State veterinarian without tuberculin test. If not accompanied by health certificate, cattle will be inspected at destination at owner's expense. For exhibition purposes cattle admitted on permit from deputy State veterinarian without tuberculin test, but must be accompanied with proper health certificate, and if they remain three months or more in State must submit to tuberculin test. Cattle for immediate slaughter admitted without inspection. Cattle from New York or Illinois must have health certificate, including tuberculin test, issued by inspector of United States Bureau of Animal Industry. At annual meeting of organization at Lincoln declared in favor of State appropriation to cooperate with United States where tuberculosis is suspected in excess, as shown on inspection for shipment or at packing house; balance of herd tested and owner advised to send reactors to slaughter within 15 days. If not complied with, herd quarantined. Many towns have ordinances compelling tuberculin test of dairy cows.

NEVADA.

Cattle imported for dairy or breeding purposes must be accompanied by health certificate, including tuberculin-test certificate, except range cattle transferred from the ranges of other States to the ranges of Nevada. In lieu of certificate of inspection owner must mail a statement giving the origin and destination of shipment and number of bulls, cows, steers, and calves included in the same.

MOHLER NOTE.—Little done here, but authorities indicated a willingness to cooperate as to accredited herds and otherwise.

NEW HAMPSHIRE.

All cattle over 6 months of age shall be tuberculin tested prior to entering the State. All tests must be approved by live-stock sanitary official in State where cattle are tested and permit issues upon receipt of the test charts. Destroy immediately, without remuneration for the owner, all reacting cattle that may be detected by retest or otherwise from irregular interstate shipments. Domestic herds tested upon suspicion of tuberculosis at expense of State at owner's request and promise to improve sanitary conditions. Owners of cattle killed after test upon order of commissioner, and which have been in State three months, receive 50 per cent of value, but not to exceed $100. Cattle also killed without payment from the State by allowing owner all money received from the products. Any cattle not for slaughter must be marked by ear tag or button with capital letter "T" on the same.

NEW JERSEY.

Law vests powers in control of tuberculosis among animals in department of agriculture. Health certificate required for dairy and breeding cattle, including tuberculin test. Law authorizes importation of cattle into State without requiring tuberculin test if accredited by State from which imported. State has recently organized a bureau of animal industry, which will have supervision over the eradication and control of contagious and infectious diseases.

DR. MOHLER NOTE.—Recently organized bureau of animal industry under Dr. McNull, former employee of United States bureau. Believed that cooperative eradication work can be arranged for.

NEW MEXICO.

Dairy cattle or cattle intended for the breeding of dairy cattle imported into State must be accompanied by health certificate, including tuberculin test.

NEW YORK.

Neat cattle for dairy or breeding purposes must be accompanied by certificate of health showing satisfactory tuberculin-test record. If not so accompanied, must be held in quarantine at destination within State until duly examined by representative of State department of agriculture and released. Law authorizes quarantine of infected animals and commercial use of milk or use for breeding under regulation of commissioner of agriculture, and requires segregation of young immediately after birth.

NORTH CAROLINA.

Health certificate, including certificate of tuberculin test, required for imported cattle when intended for breeding or dairy purposes.

NORTH DAKOTA.

Health certificate for all cattle imported. Cattle over 6 months of age that can be used for dairy or breeding purposes must be accompanied by tuberculin-test chart health certificate. Test and inspection must be made within 30 days of shipment. Shipments from New York, Wisconsin, and South St. Paul, Minn., must have certificate signed by inspector of the United States Bureau of Animal Industry. The live stock sanitary board authorized to test domestic herds for tuberculosis at the request of owners where owner agrees to requirements in regard to reacting cattle and sanitary conditions of rest of herd. Law provides method of appraisal, and maximum amount paid owner when cattle are ordered killed. All persons selling pure-bred cattle or cattle represented to be pure bred, for any purpose except slaughter, within the State shall report the same before delivery to the State live stock sanitary board and such cattle shall be tested with tuberculin, and if found free from disease a certificate shall be issued to the owner to be delivered to the purchaser. This shall not be required of animals under 6 months of age.

OHIO.

Health certificate, including tuberculin test, required for dairy and breeding cattle 6 months of age and over. Tuberculin test must be made within six weeks prior to the importation of cattle into the State.

OKLAHOMA.

Health certificate, including tuberculin test, required to import cattle for dairy or breeding purposes.

OREGON.

Dairy and breeding cattle, except for immediate slaughter, must be accompanied with health certificate, including tuberculin test. All cattle, excepting settlers' and homesteaders' effects, imported from east of Mississippi River and north of Tennessee and North Carolina, must first receive written permit from State veterinarian. Cattle originating in New York, Wisconsin, or South Dakota must be tuberculin tested by Federal veterinarian.

DR. MOHLER NOTE.—Oregon well organized for carrying on eradication work. Only one United States inspector in that State.

PENNSYLVANIA.

The law provides that each bovine animal over 6 months old imported into the State shall have health certificate and tuberculin-test chart showing that the examination and tuberculin test has been carried out in manner approved by the State veterinarian of Pennsylvania. Does not apply to animals for immediate slaughter, and animals for exhibition purposes are admitted on permit from State veterinarian. Importation of cattle permitted without health certificate or chart under supervision of State veterinarian and under quarantine until examined and tested by representative of live stock sanitary board and released. Examination and test at the expense of State. Unlawful for any person to sell for dairy or breeding purposes any domestic animals brought into the State for immediate slaughter or to use or permit to be used any such animals for dairy or breeding purposes. State live stock sanitary board given power to suppress, control, and eradicate dangerous, contagious, and infectious diseases among domestic animals, and they have the right to examine and test suspected animals, and it is the duty of local veterinarian to report such diseases. Have the right to order diseased cattle killed, and maximum amount to be paid owner fixed by law. Without express permission of board, it is unlawful for any person to sell, give away, or allow to stray any animal that has reacted to tuberculin test. Tuberculous animals may be branded by board. Milk as food for animals from reacting cows must be sterilized. Skimmed milk or separator slop must be pasteurized by creamery before returning for feeding purposes for animals.

RHODE ISLAND.

For importation of cattle, a physical examination required. If cattle suspicious, tuberculin test ordered by cattle commissioner.

SOUTH CAROLINA.

Health certificate required for all cattle imported, except for immediate slaughter. Tuberculin test for dairy and breeding cattle over 6 months old. Under a State law, all cattle that react under a test by the State veterinarian are paid for in part by the State. The amount is 40 per cent of the value.

Dr. MOHLER NOTE.—Bureau's understanding that trustees Clemson College will indorse bill at next legislature asking appropriation for cooperative tuberculosis eradication work.

SOUTH DAKOTA.

For importation of all cattle health certificate is required. Bulls and female cattle over 6 months old must be accompanied by a certificate showing that they have passed the tuberculin test within 30 days of date of shipment. If evidence furnished that cows and heifers are strictly range cattle and will not be used for dairy or domestic purposes, and that they originate in Arizona, New Mexico, Texas, Utah, Colorado, Montana, Wyoming, or Nevada or in Kansas or Nebraska west of the one hundredth meridian permit may be issued to admit without tuberculin test. May be brought in under quarantine and kept in quarantine until tested and released. From New York State certificate must be issued by Federal inspector. Cattle from officially accredited herds admitted without tuberculin-test chart. Western South Dakota and Nebraska considered free range and no test required for cows and heifers for feeding. Duty of live-stock sanitary board to cause to be tested for tuberculosis any cow or cows in a dairy herd from which milk is sold for human consumption when requested to do so by three or more patrons and when it believes such test advisable and necessary. When cattle are adjudged affected with tuberculosis and ordered killed they are appraised and paid for by State at one-half appraised value not to exceed $50; payment does not apply where animals react within one year after being brought into the State.

TENNESSEE.

Importation of dairy cows and meat cattle for breeding purposes is prohibited by law except in cases where they are accompanied by certificate from competent inspector and certificate shall show that cattle have been examined and subjected to the tuberculin test and are free from disease. May come in under quarantine and remain in quarantine until examined and tested by State inspectors and released. Within the State no person shall deliver for transportation or receive for transportation or remove from premises where they are located any cattle or swine affected with tuberculosis as disclosed by physical examination or by tuberculin test. Control within the State largely under the provision to control and eradicate contagious and infectious diseases under which tuberculosis cattle may be quarantined or ordered killed. Subcutaneous test the only test recognized and the requirements of the test given in the regulations. Veterinarians making test shall brand reactors with letter "T" on right jaw and report to county health officer who shall isolate and place in quarantine all branded reacting animals until they are disposed of according to law by appraisement and slaughter. Maximum valuation for grade cow, $25; pure bred, $100.

TEXAS.

All cattle imported must be accompanied by health certificate and all cattle for dairy and breeding purposes over 6 months old and cattle for exhibition must have tuberculin-test chart showing test within at least 60 days prior to time cattle enter the State. Can use either subcutaneous or intradermal test. Live stock for exhibition or show purposes must be tuberculin tested within 60 days of entry at show or exhibition unless they belong to a State accredited herd. Where tuberculosis or exposure thereto is suspected by live-stock sanitary commission they have the power to quarantine the premises and all live stock thereon and subject the same to the tuberculin test. All cattle that show positive reaction shall be removed from herd and quarantined. Cattle exposed subject to second test at end of six months but not kept in strict quarantine. All cattle quarantined on account of tuberculosis may be removed for immediate slaughter on permit of live-stock sanitary commission. Have established State accredited herds where owner lists all of his cattle and guarantees to have all tuberculin tested annually.

UTAH.

No cattle or swine affected with tuberculosis, as disclosed by a physical examination, tuberculin test, or by any other means shall be imported into the State. Bulls, work oxen, or female cattle over 6 months old intended for breeding or dairy purposes other than branded range stock must have health certificate and tuberculin-test chart showing that cattle have been examined and subjected to the tuberculin test within 40 days prior to date of shipment. Cattle for dairy or breeding purposes may be shipped into the State without tuberculosis-test chart if from accredited tuberculosis-free herd which has been tested not longer than nine months of date of shipment. Tuberculin-test chart not required of branded range bulls for breeding purposes or range. Branded range cattle shall be accompanied by health certificate. Every person who sells milk to a dairy and every person engaged in dairy business in the State shall cause every cow milked by him to be examined and subjected to the tuberculin test. Done under direction of State inspector or inspectors of United States Bureau of Animal Industry without charge. Owner, when notified, shall have cattle in barn and temperature taken at 3, 5, and 8 p. m., and injection at 9 p. m., and on following day temperatures at 7, 8, 11 a. m. and 1 and 3 p. m. Chart mailed at once to State board. Healthy cattle passing tuberculin test shall be tagged in lower right ear with metal ear label bearing a consecutive number and "Utah passed." When cattle found suspicious they shall be held for a retest after a period of not less than 40 days and shall be tagged in lower left ear with a metal ear label bearing a consecutive number and "Utah reacted." Cattle reacting to the tuberculin test shall be tagged in lower left ear with metal label bearing consecutive number and "Utah reacted," with a bangle or pendant attached bearing "Condemned." When cattle are condemned they shall be immediately appraised and slaughtered in establishment having Government meat inspection or under supervision of State inspector and result of post mortem recorded on back of tuberculin-test chart. State to pay not more than $1,000 on any claim.

VERMONT.

Cattle must be accompanied by a permit from Vermont live-stock commissioner specifying number in shipment and stating origin of shipment and destination within Vermont.

VIRGINIA.

Health certificate for dairy and breeding cattle including tuberculin test made within the preceding four months. There has very recently been some progress in cooperative work between bureau and Virginia. See statement of Dr. Kisman, hearings January 10, Committee on Agriculture.

WASHINGTON.

Tuberculin test for dairy and breeding cattle and special permit from commissioner of agriculture.

Dr. Mohler note—Work now in progress receiving excellent support of people. Opinion good results will follow if funds are provided.

WEST VIRGINIA.

All domestic animals brought into State must have health certificate showing free from contagious diseases at examination within 30 days prior, or can be brought in under quarantine. There shall be provided for each bovine animal over 6 months old that has been used or is to be used for dairy or breeding purposes a health certificate and tuberculin test chart, except animals from officially accredited herds may be admitted without tuberculin test chart. Does not apply to animals brought in for immediate slaughter or for temporary exhibition purposes. No apparently healthy bull or heifer under 6 months shall be subjected to tuberculin test. May be brought in under quarantine and remain so until tested and released. Unlawful to sell for dairy or breeding pur-

poses any domestic animal brought into the State for immediate slaughter or to use or to permit to be used any such animal for dairy or breeding purposes. The law provides that commissioner of agriculture or agents shall possess authority to test with tuberculin any bovine animal kept within the State. Shall be applied at such times as may be designated by commissioner as necessary in the control and eradication of bovine tuberculosis, and all cows whose milk is sold for human consumption or manufacture and all uncastrated beef animals shall be tested as far as may be possible. Reactors shall be branded on right side of neck with letter "T" unless owner elects to keep animal in quarantine for eight weeks, when animal shall be tested again at owner's expense, and if reacts again it shall be branded. All bovine animals in State deemed tuberculous either by physical examination or tuberculin test shall be slaughtered within a time and at a place designated by the commissioner with appraisal five days previous to date of slaughter. If owner desires to receive indemnity, required to execute agreement that he will thoroughly clean and disinfect all premises, have entire herd tested with tuberculin at such times as commissioner may designate nor to admit to his herd untested cattle and agreement to run two years. Maximum amount of appraisal $75 for pure bred and $50 for grade or nonregistered. Owner shall be furnished with copy of tuberculin test chart and report of postmortem examination.

WISCONSIN.

Importation of cattle into the State for other purposes than to be slaughtered within 10 days subsequent to such importation is prohibited, except when such cattle are accompanied by a certificate of inspection showing tuberculin test within 6 months prior to shipment, or cattle may be shipped in quarantine and be tested at first point of destination at expense of owner. Have plans within State for accredited herds and carry on tuberculin tests to a large extent. Condemned animals to be appraised and one-half paid by State, but in no event shall amount paid exceed $100.

WYOMING.

Neat cattle, health certificate. All dairy cattle, bulls, and female cattle, registered or pure bred, over 6 months old, health certificate including tuberculin test. No action as to establishing accredited herds. No work by the bureau.

And I would ask the gentlemen who are here to look over this abstract, because I have endeavored to give a fair statement of what the activities and legislation of the various States have been in this line. Now, inaccuracies may arise, but do not be too critical, although I spent a good deal of time in securing this and in compiling it.

Inaccuracies arising from changes recently made, if any have been so made, or from lack of complete statement on the part of corresponding State officer may be found in this abstract. All that I expect is that it will be a general basis for understanding the present situation as it is through the several States and the country at large.

A number of generalized facts can be deduced from the foregoing abstract.

The tuberculin test is used in 47 out of the 48 States as a prerequisite for admission of dairy or breeding animals.

Twenty States provide for the public slaughter of animals where tuberculosis has become generalized in the system. The States are as follows: Alabama, Connecticut, Florida, Georgia, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, North Dakota, Pennsylvania, South Carolina, South Dakota, Tennessee, Utah, West Virginia, and Wisconsin.

All of these except Alabama, Florida, Georgia, and Kentucky provide for compensation, the measure, of course, differing in the different States. The four States last named, I assume, possibly not warrantably, that the county or State which authorizes the forced slaughter would recognize or be compelled to recognize a claim for actual damage suffered by the owner.

Mr. HENSLEY. Missouri can be included, I will say to the gentleman from Nebraska.

Mr. SLOAN. In the matter of payment?

Mr. HENSLEY. In the matter of payment, unless that law was repealed by the last legislature.

Mr. SLOAN. The information coming from your State did not include that, because I looked for it carefully. I am glad the gentleman has made the statement. I will put it in my abstract. I will say that the Congressman states it. My information from the State of Missouri did not include it; neither did it exclude it in terms.

The following States recognize what is known as accredited herds: Illinois, Indiana, Kansas, Maryland, Texas, and West Virginia.

An accredited herd means a herd containing one or more pure-bred animals, the remainder being either pure bred or grades which have been properly tested, found free of tuberculosis, and also kept under such conditions as to not probably contract the disease.

It is quite possible that within the last few months other States, under direction of their live-stock authorities, have adopted the accredited herd system. I suggest this because there has been a great activity among the live stock.

I mention the following facts not directly toward the two items of appropriation but as a matter of importance for our consideration, a lesson that we can draw from the present war.

I took occasion recently to examine the statistics of cattle in the South at two important epochs:

First, 1860 to 1870.

Second, 1900 to 1910.

In 1860 the total number of cattle in the United States was 28,967,028. Of these, 12,019,156 were in the 11 Southern States. In the rest of the country there were 16,857,872.

War had its inevitable effect. Five years after its close, notwithstanding the energies of reconstruction North and South, there were only 28,074,582 head of cattle in the United States. There were in the 11 States only 9,255,956, a decrease of 2,763,200. The cattle and losses were distributed as appear in the following table:

Total cattle in United States for 1860 28,967,028
Total cattle for 1870 28,074,582

	1870	1860	Loss.
Alabama	500,296	813,604	313,518
Arkansas	379,023	570,530	191,507
Florida	466,806	453,451	13,445
Georgia	807,667	1,208,952	400,285
Louisiana	593,138	593,138	209,774
Mississippi	581,247	736,790	155,543
North Carolina	618,263	693,810	75,547
South Carolina	289,207	505,776	217,569
Tennessee	682,218	823,244	141,026
Texas	3,990,158	4,397,414	407,256
Virginia	573,152	1,188,002	614,850
Total	9,255,956	12,019,156	2,763,200

1910. All cattle (United States) 61,803,866
1900. All cattle (United States) 67,719,418

	1910	1900
Alabama	932,428	799,734
Arkansas	1,028,071	894,537
Florida	845,188	751,261
Georgia	1,089,316	899,491
Louisiana	804,795	670,235
Mississippi	1,012,632	873,356
North Carolina	700,861	624,518
South Carolina	389,882	342,808
Tennessee	996,529	912,184
Texas	6,884,586	9,428,196
Virginia	859,067	825,512
Total	15,581,355	17,021,970

Gain in all except Texas. Loss in Texas due to sale of range for agricultural purposes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. How much time does the gentleman wish?

Mr. SLOAN. I can finish in 20 minutes.

Mr. HAUGEN. I will yield to the gentleman 10 minutes.

Mr. SLOAN. It took more than 12 years after the war before the number of cattle before the war was equaled in the country at large. At the close of the war the number of cattle in the Northern States was less than at its beginning. Authorities throughout the country on this problem state that the accredited herd enterprise is coming into general favor. Dr. Kiernan, having charge of the tuberculosis section of the Bureau of Animal Industry, at the hearings stated:

Mr. MCLAUGHLIN. What do you mean by accrediting the herd?

Dr. KIERNAN. Herds that are found free. The way it developed that this plan was adopted, it requires that when herds of cattle have been subjected to two annual or three semiannual tuberculin tests and found free from the disease, that they would be placed upon either the State accredited herd list or the United States accredited herd list. That means that whenever an owner of any of those herds of cattle desired to ship an animal interstate it would be unnecessary for him to send out and get a veterinarian to come in and test an individual animal that he might desire to ship interstate. A certificate could then be issued for any animal in that herd to be shipped interstate, without a further tuberculin test, good for a period of one year.

Mr. MCLAUGHLIN. Did this relate only to pure-bred cattle that you speak of?

Dr. KIERNAN. Well, here is the definition of the pure-bred herd of cattle, to be classed under the accredited herd list, any herd containing one or more pure-bred animals. That plan was adopted and has been sent out to officials of the various States for their indorsement, and we have already received favorable replies from 12 or 15 States.

Mr. RUBEY. Do you mean then, when you say one or more pure-bred animals, that if a herd composed of 20 animals contains one or two pure-bred animals that that whole herd will receive a certificate?

Dr. KIERNAN. Yes, sir.

Mr. SLOAN. As to being clear of tuberculosis.

While the Live-Stock Sanitary Association of the United States, as well as the various national breeding associations, were in convention at Chicago early in December of 1917, the Breeders' Gazette, one of the greatest publications of its class in the world, published an editorial, a part of which is as follows:

A CAMPAIGN AGAINST TUBERCULOSIS.

A tied-up trade is undoubtedly bound to follow neglect on the part of the breeders to set seriously to work to clean their herds of tuberculosis. Some years ago the plan of State accredited herds was presented to them and a considerable number in some States, especially those which encourage a clean-up by means of compensation, are acquiring lists of disease-free herds. In some States the movement has been slow, as breeders fear the possible loss. At the meeting of the United States Live Stock Association in Chicago this week the Bureau of Animal Industry submitted a tentative plan for accredited herds and a committee of that association studied it. At a dinner given by the Chicago Live Stock Exchange at the Saddle and Sirloin Club on Monday night of this week a large number of sanitary officials and veterinarians met representatives of a half dozen cattle registry associations in conference on this subject. A committee of breeders was named to consider the proposed plan, together with the committee of sanitary authorities.

Three factors are essential to a successful campaign against tuberculosis: First, the problem must be admitted to be a cow question, not a baby question. It is fundamentally an economic question. Second, reasonable compensation must be granted for reacters which are slaughtered or segregated. Third, Federal and State aid and cooperation must be liberally extended. It is not a local or a State problem. It is interstate, it is Nation-wide.

Mr. LINTHICUM. Whose statement is that?

Mr. SLOAN. It is the statement of the Breeders' Gazette, an editorial.

Mr. LINTHICUM. He said that it must not be considered a baby question but an economic question?

Mr. SLOAN. He says it must be confined to that. I do not agree with the proposition.

Mr. LINTHICUM. Neither do I.

Mr. SLOAN. Because they are both important, but the economic feature is the one I am arguing. I do not detract in any way from the large question, to wit, the sanitary, of which I know the gentleman from Maryland is champion.

On December 4, 1917, I received a telegram, a copy of which is as follows:

UNION STOCK YARDS, ILL., *December 4, 1917.*

Hon. CHARLES H. SLOAN,
House of Representatives, Washington, D. C.:

At a joint conference of live-stock breeders, State veterinarians, and members of this exchange House bill No. 6188, making an appropriation of $1,000,000 for the control of tuberculosis in live stock, was unanimously approved and its passage recommended.

THE CHICAGO LIVE STOCK EXCHANGE,
By E. C. BROWN, *President.*

To indicate what the live-stock sanitary authorities, as well as the various live-stock associations, are doing in Nebraska, I submit the following telegram recently received:

LINCOLN, NEBR., *January 18, 1918.*

Hon. CHARLES H. SLOAN,
House of Representatives, Washington, D. C.:

Resolutions passed by the Nebraska Improved Live Stock Breeders' Association, Lincoln, Nebr., January 17, 1918:

"Whereas the disease, bovine tuberculosis, is causing a loss of approximately $20,000,000 annually in the United States and is continually becoming a greater menace to the live-stock industry; and

"Whereas if allowed to continue its ravages the production of meat and milk products will be seriously hindered, to the detriment of all classes and to the cause for which we are fighting: Now, therefore, be it

"*Resolved by the Nebraska Improved Live Stock Breeders' Association in convention assembled at Lincoln, Nebr., January 17, 1918,* That we recommend aggressive measures be taken by the Federal Government and various States to eradicate this disease, and that liberal appropriation be made for the purpose. We heartily indorse the provisions of the bill now pending in Congress, introduced by Congressman SLOAN, which provides for an appropriation of $1,000,000 annually for the eradication of tuberculosis, and we urge the Legislature of Nebraska at the next general session to appropriate a liberal fund with which to cooperate with the Federal Government on an equal basis in the payment of indemnities and expenses incidental to making of tuberculin tests in this State; and be it further

"*Resolved,* That a copy of these resolutions be forwarded to Secretary Houston of the United States Department of Agriculture, to the Nebraska Members of the United States Senate and House of Representatives, and to the governor of the State of Nebraska, with request that the substances of these resolutions be incorporated in his message to the next legislature."

CHAS. GRAFF, *President.*
H. J. GRAMLICH, *Secretary.*

The following resolution was passed by the Nebraska Dairymen's Association January 18, 1918:

Whereas the disease, bovine tuberculosis, is causing heavy annual losses in the dairy industry of the United States, and is seriously interfering with the proper development of our dairy herds and the production of milk products: Therefore be it

Resolved by the Nebraska State Dairymen's Association in convention assembled at Lincoln, Nebr., January 18, 1918, That we heartily indorse the Sloan bill now pending in Congress, which provides for an appropriation of $1,000,000 for the eradication of this disease by the Bureau of Animal Industry in cooperation with the various States.

D. H. FRANDSEN.
A. M. TEMPLIN.
H. C. YOUNG.

There were in the United States in 1900, 67,719,410 head of cattle. In 1910, according to the census, there were only 61,803,836. According to present estimate we have now about 63,500,000. All of these are subject to tuberculosis. Of course it is more generally prevalent in the North than in the South, where the climate is more equable and the cattle uniformly live in the open.

This problem should appeal especially to Members who live in the cattle-tick region as well as to those who live above that latitude. That section has been making important strides in rebuilding their live-stock industries. In every State there are many who note the ravages of the boll weevil and at the same time have noticed how the Orient is beginning to cultivate and produce American cotton. They see that the one great crop, cotton, will not maintain their present station nor aid them in that progress for which their climate, soil, and other natural resources equip them. The South can become a successful competitor of the North in the production of meat foods. If proper progress is to be made, the herds which are being built up must be kept clear of tuberculosis. It can only be kept out by a nation-wide cleansing of the herds, especially those from whose ranks must come the breeding factors. Figuring in ultimate results, the people of the Southland have as much at stake in this enterprise as we of the North.

The work proposed is one of man size and is for the hour. It is not a problem for to-morrow. Since the Spanish-American War the Spanish word "manana" has in too many important considerations been Americanized. Let not the Department of Agriculture or the American Congress adopt it. I would like to have you read the statement of Dr. Mohler. It is hopeful, militant, and confident that this problem, if attacked in the way it should be, tuberculosis can be eradicated.

Mr. TILSON. Mr. Chairman, will the gentleman yield for a question right there?

Mr. SLOAN. Certainly.

Mr. TILSON. In a word, what does the gentleman say shall be the plan of campaign? Shall it be intensive in one State, so as to remove it entirely from that State, and then move on to another State, or is it to be a general campaign everywhere all at once?

Mr. SLOAN. It can not all be done at once. It must be taken up by separate areas. I shall try to explain here. Wherever a State will cooperate with the Federal Government, then the State and the owners will proceed to clear up a selected area, just as they are proceeding to do now with hog cholera so effectively. As they clear up an area, other areas will be taken hold of, multiplied, and expanded, and finally the campaign will become State wide and afterwards Nation wide. Dr. Mohler has well stated the plan.

Mr. TILSON. Meanwhile not permitting other cattle from the outside to come in—other cattle that might be diseased?

Mr. SLOAN. Yes.

Mr. LINTHICUM. If the gentleman will permit, if we can not get more than $250,000, it must necessarily be taken up piecemeal?

Mr. SLOAN. Yes. Dr. Mohler believes that if the solution of this problem is properly gone about it will take $1,000,000 for 1919. I have talked with him at least twice upon this subject and once quite recently.

I have made his statement a part of my remarks. He believes that if this problem is gone about it will take $1,000,000 for 1919. His statement fits well with the demand that is being made for increased production of meat. Appeals are being made by our food controller that on certain days we not eat meat. I approve it. Our boys will need it in the trenches. Meat and white bread constitute the battle food of our Army, whom we believe when properly equipped and maintained, man for man, are the best fighters in the world. [Applause.] Let us stint to save. Let us also strain to produce.

Beef production at the present moment is a losing venture. I hope it may improve. The Department of Agriculture appeals to the patriotism of feeders to buy and feed long, that every beef and swine life may produce a maximum of meat.

I received through the mail a few days ago the following figures from an experienced and extensive cattle feeder who had had his ups and downs in that precarious business.

Mr. JUUL. Mr. Chairman, will the gentleman yield?

Mr. SLOAN. Certainly.

Mr. JUUL. Why do you say that meat or beef production is a losing venture?

Mr. SLOAN. Because it is at this particular time. I shall submit the figures here.

Mr. FESS. Mr. Chairman, will the gentleman permit a question?

Mr. SLOAN. Yes.

Mr. FESS. Is the falling off in the production of live stock due, in a great degree, to these elements that destroy, or are we not producing as much as heretofore?

Mr. SLOAN. Destruction by diseases is a large factor. We are, since 1910, slightly increasing our cattle, and the hog census

showed last April an increase of hogs. Beef production, however, is not right now, as the markets go, a money-making proposition. I can state that because I am fighting the proposition personally now, feeding high-priced corn to what is, comparatively speaking, low-priced beef. Of course there has been, on account of the war, a great demand, with rather fancy prices, for animals of much less than a maximum growth.

Mr. JUUL. I do not want to take up the gentleman's time, but I suppose the gentleman means it is not as paying a venture as farming in other lines might be. The gentleman does not mean to say that a man who is producing meat to-day is losing money in producing it?

Mr. SLOAN. The man who is doing what the Government asks—putting the maximum amount of beef on the bovine life—is losing money now.

Mr. FESS. Would the gentleman care to say what proportion of our energy is going into conserving what we have, rather than increasing the number? Or is the gentleman ready to make a statement in that regard?

Mr. SLOAN. I could not make a good answer to that very pertinent question within my time.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. SLOAN. Mr. Chairman, I would like to have 10 minutes.

Mr. JUUL. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for 10 minutes.

Mr. HAUGEN. Mr. Chairman, I yield to the gentleman 10 minutes more.

The CHAIRMAN. The gentleman from Nebraska is recognized for 10 minutes more.

Mr. SLOAN. I would like to say in response to the question propounded by the gentleman from Ohio [Mr. FESS] that we are devoting a great deal of energy to conserving meat. This measure is for that purpose. We are saving meat. That has an effect on the price of the matured beef animal. Immature animals are relatively higher than they used to be; the matured animals are cheaper. Yet that is just what the Government is appealing for, so that in the end the maximum number of pounds may be produced from the number of cattle we have. Feeders were purchased by the cattlemen at an extraordinarily high price. The figures you will find here given by an old feeder. They illustrate the case fairly well. The figures are presented by Hon. C. E. Adams, of Omaha. I read:

	Total cost.
20 feeders, average weight 1,000 pounds, at 9 cents per hundredweight	$1,800.00
75 bushels corn per head for 6 months' feed, 1,500 bushels, at $1.50 per bushel	2,250.00
25 tons of hay, at $15 per ton	375.00
Labor and care per day, $1.33⅓, for 180 days	240.00
Losses from accident or natural causes	90.00
Interest on the investment, 6 months at 7 per cent	162.00
Total cost	4,917.00
Maximum gain on 20 head, at 400 per head, 6 months, is 5,000 pounds, added to the original weight, 28,000; market value of prime beef, to-day's market, $12 per hundredweight	3,360.00
Gain on hogs following cattle, 6 months, 5,000 pounds, at $16 per hundredweight	800.00
Total receipts from sale	4,160.00
Loss to balance account	757.00
Total	4,917.00

It is somewhat different with pork and hogs. Our hog business has been going along all right. But if this Government had not done what it did do in regard to hog cholera we would have had 25 per cent less pork than we have at this time, and the price would be higher to those who have to consume it.

He makes some very appropriate remarks calling attention to the Government having provided in many cases for increase of wages, practically guaranteed transportation earnings, guaranteed good prices for fuel and wheat, that it would be proper to do something of the kind for the beef producer, whom he now figures is working at a loss. Here is an opportunity to aid him to reduce his hazard.

Men who go into hazardous business, where loss appears as frequent as gain, desire to eliminate every possible factor of hazard or loss. One of the large reasons why 8 and 10 years ago many farmers refused to produce swine was because the cholera would come along and destroy their herds. The Government and States took hold of this problem some five or six years ago, and now it is within the power of every swine owner to immune his hogs, or at least reduce their loss to an inconsiderable minimum. Talk about preparedness!

One of the best pieces of preparedness that this Government has accomplished was in attacking hog cholera, the result of which finds us undoubtedly with 25 per cent more pork in the United States than we would have had had the Government not taken hold of the problem.

If the Government would have the cattle owner breed to his capacity and keep his animals till maturity in order that the largest results may follow, every energy of the Government should be exercised to prevent his loss.

There is perhaps a still larger consideration affecting the economic side of this question than any I have detailed, and that is what America will have opportunity to do and which it can do for the world. A hurried reference to conditions following our own Civil War applies not only to the colossal war now being fought but to every war that has ever been waged between organized governments.

The keeper of herds from early times have been looked upon with more favor than the tillers of the soil. It was so between Abel and Cain. For this there are some religious reasons. There are reasons based upon turning the fruits of the soil into concentrated form for the sustenance of man. This form does not terminate growth when summer's burning sun gives way to winter's duller orb. There is the more important reason that while fruits of the soil must be carried wherever man would wander, the flocks and herds carry their own weights and the other burdens of man. But more particularly and to the point are the flocks and herds the source and support of soil fertility.

A searching glance of a map covering southeastern Europe, southwestern Asia, and northeastern Africa, coupled with a brief historical survey of that region centered around the cradle of the race, must lead one to consider why no vigorous civilization of the ancient days survive. Why are the peoples all subservient to other powers? Why the decrease of forestry? Why do the rivers carry less waters to the seas? Why is commerce decadent? Why the diminished plains and valleys of plenty? Why the multiplication in number and the extensive increases of desert areas? Why so much sand and so little loam? Many causes familiar to students of history there are but I shall emphasize but one. The history of that section is largely a recital of its wars. Canaan and Moab, Assyria and Babylon, Syria and Persia, Turkey and Egypt, each have sent over some of the others their battling and destructive hosts. The flocks and herds of the defeated have been despoiled while those of the victorious were not augmented. With the alternating tide of battle there was reduction and often destruction of sheep and cattle.

Without the herds and flocks the deserts charging with sand-laden winds invaded fertile valleys and subdued productive plains. In this day travelers passing through that section of the earth eagerly inquire how far to the next oasis or river. In that ancient day the wayfarer or the fugitive inquired what distance to the desert.

Over in Europe they are destroying millions of human beings in battle and elsewhere. But great as is the human waste I am convinced that, relatively speaking, there is a much greater reduction of food animals.

The lesson of the destroyed herds of the Orient is patent to all European countries. When peace arrives their representatives will be coming to this country to obtain factors for rebuilding their herds. They will view the animals as they appear and will study their pedigrees for desirable strains of blood. But while investigating these they will also consult with care the health of the animals considered for shipment to Europe. Then will appear large profits to the American producer and saving to the consumer, combined with advantage to a hungering world seeking to provide for itself that food for which the human system throughout all the ages has craved—namely, beef. [Applause.]

Mr. LEE of Georgia. Mr. Chairman, I yield 20 minutes to the gentleman from Texas [Mr. YOUNG].

The CHAIRMAN. The gentleman from Texas is recognized for 20 minutes.

Mr. YOUNG of Texas. Mr. Chairman and gentlemen, in dealing with this, the annual appropriation bill for the Department of Agriculture, we are dealing with items that touch agriculture in all of its phases, and every phase of agriculture has its peculiar troubles. One section of the country, by reason of climatic conditions, is confronted with its peculiar troubles. Another section of the country, by reason of its peculiar climatic conditions, has its particular troubles. In the forests in some sections of the country we have one trouble; in the prairies of another section we have another trouble, and so far as the Committee on Agriculture is concerned, a committee in which politics does not enter, we, representing the different sections of the country and knowing the troubles confronting agriculture in the different sections of the country from which we come, undertake as best we can, with the expert information given us by our department and with the knowledge peculiar to each of us, to deal fairly with every trouble, from

whatever section that trouble may come, and to legislate in order that the great whole may be taken care of.

Now, the distinguished gentleman [Mr. SLOAN] who has just discussed at some length one of the great troubles, tuberculosis, that confront the live-stock industry of this country will not find any quarrel with me in his effort to eradicate that trouble. It is a trouble not peculiar to live stock. It reaches into the human family and it has been combated all these ages as best it can be combated, and personally I am not averse to doing anything that can be done that would help to eliminate tuberculosis from cattle in any section of the country.

Gentlemen who discuss the great appropriations that they want for this one item can not raise any quarrel with me, coming as I do from a State that has 8,000,000 head of cattle to contribute to the food supply of the world. Our people are intensely interested in that industry. In the year just passed and in the year before that 144 counties of that great State did not have rainfall, and magnificent herds of cattle that men had devoted a lifetime to building up, great thoroughbred herds, had to be sacrificed, and 2,000,000 head of cattle have been swept away. That country is barren. It has had these troubles.

But while I am intensely interested in this great proposition, as a member of the Committee on Agriculture with a duty to perform, with other interests involved, and not one alone, where the whole subject of agriculture must be taken care of, personally interested as I am for my State with its millions of head of cattle, when there comes before the Committee on Agriculture expert information that that committee must rely upon in appropriating the people's money, I am bound to follow the advice and recommendation of those experts. And what do we do with reference to this item? We appropriate every dollar that these experts tell us they can legitimately expend in the next fiscal year, and we give them $50,000 more than they estimated for in the original estimates as they came to our committee. When the direct question was asked of those experts, "How much can you spend on this item in the next fiscal year?" and they told us that $250,000 was the outside amount that they could legitimately use, that committee with one voice gave them $250,000.

Mr. SLOAN. Does the gentleman say that Dr. Mohler did not think that they could use effectively a great deal more than $250,000?

Mr. YOUNG of Texas. I do not think Dr. Mohler's testimony can dispute the statement of the expert that we had before the subcommittee and before the committee, when the direct question was put to him, and he had to answer it. We asked him, "How much can you legitimately use and expend?" and he said $250,000, and we gave it to him.

Mr. SLOAN. That was Dr. Kiernan, was it not?

Mr. YOUNG of Texas. I think that was the gentleman's name.

Mr. SLOAN. And that was what he thought could be used on the basis of the work that had been laid out.

Mr. YOUNG of Texas. Oh, the gentleman is not going to raise any quarrel with me on the amount, when we get the machinery to spend this amount properly. But there rests upon us the duty of taking care of the Treasury at the same time that we take care of these great interests. We have got to have organization, we have got to have system, we have got to have the machinery, and as a Committee on Agriculture we are dependent on the department down here to give us the information as to the machinery they have, and as to what they can legitimately spend. And when they tell us that they can use only so much money, I am not going to vote to appropriate a great sum that will be wasted, however great the end which we desire to accomplish. Now, I have had a little experience in these matters. In the South we have the tubercular trouble. It is not a sectional trouble confined to one section of the country alone. It is all over, and we are all interested in the meat supply of the Nation. But take the Texas fever, that comes by reason of the cattle tick. We have had a great fight on that in Texas, which is an empire within itself. We have spent a lot of money locally, and we had the help of the Federal Government trying to eradicate the pest which brought about this disease. Here would be one bunch of men spending money trying to eradicate it within a certain area, but here was a neighbor over on another great pasture who had not seen the importance of this proposition, and he did not clean up his pasture, and the result was that he overran his neighbor, and we had much lost motion and lost energy, and we wasted a great deal of money. Yet we knew the concrete proposition that we were after, which was to destroy the pest that cost us many millions of dollars each year. But after spending this money gradually from year to year, both locally and by the national authorities, the time finally came around when the whole State was awakened to the proposition, and we did the sensible thing. Millions of dollars had been wasted, but when the proper time came, after a campaign of education had aroused everybody to the necessity of it, we did the sensible thing. Public sentiment being aroused, the legislature of that great State took up the matter of eliminating this pest, and by legislative enactment they said, "The Government has discovered for us a method by which the cattle tick can be eradicated, and we will no longer fool with this pest, but we will say by statutory enactment that Texas must be free of the cattle tick by 1921." So they made compulsory the dipping of the cattle, and by 1921 we will be free from that terrific trouble, and we will have won the fight and struggle that we have had for all these years. But we had to do it gradually. We spent this money, and we built up public sentiment. If the Government had given us millions from the Federal Treasury, and that had been supplemented by millions from our State and our localities, it is likely that it would not have been wisely spent at the time and most of it would have been wasted; but when we attack these great problems we must do it gradually. I believe in attacking them. You will not find me trying to throw anything in the way of the attack you are going to make on tuberculosis. But we have got to handle it as we do other great questions—appropriate the money as it can be legitimately used, make the fight consistently, and when you have organized your machinery and when you are getting it in motion, as they need more money, I am free to say to you, representing the great State of Texas with so many cattle as we have, my voice and my vote will be cast for every dollar that can be righteously expended on this one great subject. [Applause.]

Mr. ROBBINS. Mr. Chairman, will the gentleman permit an interruption?

Mr. YOUNG of Texas. Sure.

Mr. ROBBINS. Before the gentleman leaves that subject, how much does he say can be advantageously expended in this tuberculosis campaign? The gentleman is on the committee.

Mr. YOUNG of Texas. My judgment is the judgment based on the expert on whom we relied, who stated that he could use only $250,000 in the next fiscal year.

Mr. ROBBINS. Is that the amount fixed in the bill?

Mr. YOUNG of Texas. Yes. We gave him every dollar he asked for, and $50,000 more than was in the original estimate.

We have got other problems to deal with. Agriculture never was confronted with such serious conditions as it is to-day. I am sure that you gentlemen from the other States know your own local conditions. I know the conditions in my own great State.

It so happens that Texas is a great cotton and cattle State. It takes a great deal of labor in that State to produce cotton. We are short of labor. Our farmer boys, being patriotic when Old Glory called, went to the colors, leaving the farm, leaving the store. They have gone from us; they are not there to till the soil. That is true of other States in the Union. Not only are we confronted with the fact that the boys who have worked on the farm all these years have gone from us; other classes of labor, listening to the siren song of high wages in manufacturing centers of the country, have left agriculture by the thousands and the farm is stripped of that labor.

I do not know how it is in other States, but in Texas, a State 800 miles north and south and 800 miles east and west, we will be able to plow and be able to seed the crop, but where the labor is to come from to preserve the crop no man can undertake to say.

Mr. DENISON. Will the gentleman yield?

Mr. YOUNG of Texas. Yes.

Mr. DENISON. Did I understand the gentleman to say that the present war has taken the boys from the farms in Texas?

Mr. YOUNG of Texas. Yes.

Mr. DENISON. Does the gentleman mean the draft law?

Mr. YOUNG of Texas. Both draft and volunteer.

Mr. DENISON. The draft law gave to the President the authority to exempt labor on the farm.

Mr. YOUNG of Texas. Speaking for my State alone, I would like to see the color of the eyes of any President who could exempt a boy in Texas when Old Glory calls. [Applause.]

Mr. DENISON. I asked if the gentleman had reference to the draft law and he said he did.

Mr. McKENZIE. Will the gentleman yield?

Mr. YOUNG of Texas. I will.

Mr. McKENZIE. The fact is, is it not, that a large number of the boys refused to ask for exemption?

Mr. YOUNG of Texas. That is true all over the Nation; I do not speak of any particular section. I am speaking of the facts. I am not going to be drawn off into a discussion of the draft law. I voted for it and I would vote for it again, but

these are facts confronting the Nation, and not only the Nation but the world at large. I know, as every gentleman here must know, that in this war in Europe the trouble at this moment is the food supply, something to keep not only the soldiers supplied but the civil population as well. Our allies are looking to us to furnish that food supply.

Mr. SNELL. Will the gentleman yield?

Mr. YOUNG of Texas. Yes.

Mr. SNELL. Has the Committee on Agriculture anything in view to relieve the shortage of farm labor at the present time?

Mr. YOUNG of Texas. It has not been discussed by the committee as a committee, so far as I am advised. So far as I am personally concerned, using my wits as best I may, I do not know and I can not suggest where we are going to get the labor to save the crops of my State.

Mr. SNELL. I notice in a bulletin this morning that Mr. Post, Assistant Secretary of the Department of Labor, says that there is no necessity of importing common labor, that there is plenty in this country. I would like to know where that information comes from. In my district there is a shortage of labor on the farms, and farmers are complaining at the present time and want to know what Congress is going to do about it.

Mr. YOUNG of Texas. I wish I could give the gentleman the information. I am speaking of my section because I know the facts. You gentlemen who have not seen cotton grow do not realize the great labor necessary in the production of cotton. In the saving of cotton after the crop is made you have to pick four or five locks of cotton from one boll, and it all has to be done by hand. In that way one has to gather 1,500 pounds of seed cotton to make a bale of 500 pounds of lint. Last year our crop fell down from 4,500,000 bales to 3,000,000 bales by reason of 144 counties having been swept by drought. Last year had it not been for the failure of the west and southwest Texas, northeast Texas that made a cotton crop could not have preserved it even in the first year of the war. While I am on that item I want to say that this is one item that affects every man in this country as well as in Europe. We are on a starvation basis for cotton supply of the world. For three years, instead of making 16,000,000 bales of cotton in this country, we have made 11,000,000 bales, and 11,500,000 bales, and the present year 10,500,000 bales. There have been three short cotton years, with a war which is demanding this great product.

Now, we must make it to clothe our people. We must save it to clothe our boys in the camp, and this labor question is one which confronts us and we have to deal with it.

Mr. SNELL. Will the gentleman yield?

Mr. YOUNG of Texas. I will.

Mr. SNELL. Does the gentleman agree with the statement of Mr. Post in regard to the importation of labor?

Mr. YOUNG of Texas. I will say that I do not know anything about where those figures or statements came from. I am stating what is true in my section of the country.

Mr. SNELL. I read that from the Official Bulletin issued to-day.

Mr. YOUNG of Texas. The gentlemen from other States know what the conditions are in their sections of the country.

Mr. ROBBINS. Will the gentleman yield?

Mr. YOUNG of Texas. For a question.

Mr. ROBBINS. I notice in this morning's paper a suggestion that we import from Porto Rico 110,000 laborers for use on the farms of the United States. What does the gentleman think of that proposition?

Mr. YOUNG of Texas. I would not like to express an opinion on that proposition, because I have got to think about what is involved in it. I have heard suggestions made here and there of taking the boys out of this place and that place and putting them on the farms. I know as a man raised on the farm that if you go and get people who have never had any experience in farming and put them on the farm, you will not get the best kind of labor. Say what you may about it, in order to be a good farmer and render effective work, a man has got to have experience on the farm and know how to do that work.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Texas. Yes.

Mr. McKENZIE. As a matter of hope, does the gentleman not think that the good wages paid by the Texas farmers to the Mexican laborers this past season will be an inducement to bring those same men back this year to harvest this year's crop? Is there not some hope in that?

Mr. YOUNG of Texas. The question of good wages is an inducing cause which carries labor from one section of the country to another all of the time. It was the high price of labor in the factory sections of the country that induced these men first to leave the farm to get better wages. They are all human beings, and they are all selfish, just as we are. They want the best wages they can get. We will get them back if wages will get them back. What did we do this year? All my life I have had cotton picked at the rate of 50 to 75 cents a hundred pounds—seed cotton. This year the high wages drove us to pay all the way from $1 to $1.50 a hundred for that crop.

Mr. HUSTED. To what extent would the gentleman say farm labor in Texas had been depleted on account of the war?

Mr. YOUNG of Texas. It would be very difficult to arrange it on a percentage basis. I have not figured it out in that way. The only thing I know is of my own immediate community. There is scarcely a farm in the whole community, from a one-horse farm up, where one to two of the farmer's sons have not gone from the farm into the Army. I have not figured it out on a percentage basis, but you let that run through all the farms all over the United States and it will make a tremendous total. Who is going to say to the boy "No" when he says he is going to the colors? I can not tell a boy in my county not to leave the farm, and I am not going to do so. That is a matter that must address itself to him—what his duty is—but I do know that when he performs his duty as he sees it, and he leaves the farm and enters the service, there is a vacant spot on the farm that some one must be found to fill in order to cultivate and garner the crops in order that the armies at the front may be fed and our civil population may be cared for. It is a great problem that some one has got to work out. Some plan must be devised by which agriculture can be cared for. Of course, great prices for crops help in a way; but however great those prices may be, if you have not the labor to produce them, the crops can not be purchased and can not be conserved.

In this bill we have dealt in a practical way with the different problems that confront the different sections of the country. Where insects appear and the Government say they want to attack the problem, we have given such money as they have said they need, and it is proper to do so. Some gentlemen seem to criticize the appropriation for the eradication of the pink bollworm. It so happens that this insect has struck my State first. It came from Mexico, where many of our troubles come from.

The boll weevil came from there. I had overlooked the fact that along Trinity Bay and three or four counties in the Beaumont section have been ravaged by this insect. I did see that it was discovered up toward the central part of the State, where one field was thought to be infested. I hoped as a cotton grower that the Government specialists were mistaken as to the insects they have found, because I know the history of that pest in other countries. When it enters a cotton field it destroys the field and drives out the industry. That is not a Texas problem any more than it is a problem for the people in Massachusetts, where they manufacture the cotton that grows in that State. It is not a Texas problem any more than the foot-and-mouth disease was a problem of Illinois and for Central and Western States, because the meat problem was a problem for every State in the Union. It is not a Texas problem any more than the gipsy moth is a New England States problem, because that insect threatens the timber all over the country. It is a world-wide problem. Where are you going to get your clothing if the cotton industry is destroyed? This insect has made its appearance in my State. I hope that it may be wiped out. We have combated the boll weevil, and we have been able from year to year to make advancing gains on its destruction. It has been a great fight, too. When that insect first appeared there in my own district honorable men who had spent a lifetime buying their farms and rearing their children had their crops destroyed, and it was on the crop that they expected to survive, and those men made great sacrifices and sold their farms, believing that the insect could never be controlled. They practically gave their land away. But we have got control, and those same lands to-day are higher in value than they ever were in the history of the State. And I want to say to the gentlemen from the other cotton States of the South, as the boll weevil enters your territory advise your farmers to stay with their real estate and not to sacrifice it as so many Texas farmers did, as we have conquered the proposition and our land values are better than ever. Many of those people who sacrificed their lands are now tenants and they never have been able to buy a farm again. I hope and pray that the pink bollworm, which is said to be more destructive than the boll weevil has ever proven to be, may be gotten under control, that the Government in cooperation with the States will be able to handle it. Only last year it appeared, and the Legislature of Texas made an appropriation. It is small, it is true, because at that time we did not know the seriousness of the menace, but they did better than that appropriation. They provided that sections of the country where this insect had ap-

peared should be segregated and no cotton should be planted, in order to wipe out the insect, in order that it might not scatter from there to other parts of the State.

You remember this insect is over the southeastern part of the State. That is 400 miles from where I live, in the great cotton belt of Texas, and now by these quarantine regulations on the part of the State, with the aid the Federal Government will give them through their experts' advice and cooperation, it is hoped that at one fell swoop this insect may be destroyed and not live among us as the cotton-boll weevil has all these years. The endeavors of the Government will reach across the Mexican border. There is a certain limited section of cotton territory from where this insects comes, and it is hoped by the aid of the Mexican Government and its people, through cooperation which has been promised, this whole thing can be wiped out in a year's time. Now, the truth is, while some gentlemen have criticized a $500,000 appropriation, $100,000 of it will be actually expended on this educational work—demonstration, and such methods as they use in a question of this kind, quarantine, and so forth—and the other $400,000 is simply an emergency fund that will be used only in the event this insect shows up and it is necessary to use it in the infected section. It is not to be used otherwise, but to be turned back to the Treasury. So much for that item.

Now, on the other hand, as to our boys who go to the front from the farm and our factories and other avenues in life, I want to say, as far as my personal observation goes, I have seen very little evidence of slacking since the country's call, so far as my immediate section of the country is concerned, and so far as I know generally, there is very little evidence of it in any section. But they are gone. They are dependent on those of us left behind here, whether we are in Congress or out of Congress, to see to it that they are properly armed, that they are properly clothed, that they are properly fed, and that they have the proper medical supplies; and I, for one, want to do whatever I can do to see that those boys are gratified in their desires and their demands, because they are risking their lives for me and mine, and it is as little as I can do as an American citizen, as a Member of this body, to contribute my mite wherever I can and however I can in helping our boys at the front, that they may be properly cared for.

Mr. DENISON. Will the gentleman yield?

Mr. YOUNG of Texas. I will.

Mr. DENISON. The gentleman has spoken about slacking in connection with the boys in Texas in this war.

Mr. YOUNG of Texas. I did not limit it to Texas.

Mr. DENISON. I want to ask the gentleman from Texas, would he consider it slacking for a young man whose services were needed on the farm to claim exemption on that ground?

Mr. YOUNG of Texas. If a man would figure it out as he would a mathematical proposition, a boy might be of more service on a farm than he is at the front. I feel that. Here is Bill on one farm and Sam on the other, constant companions for a lifetime and great friends, true boys. Bill feels it his duty to respond to the colors. That is where the Government calls and he goes, but Sam may feel he is called to remain on the farm and at once there arises in the community a proposition, why did Bill go and Sam remain? Call it what you may, that is a condition that arises immediately, and when you find one fine fellow volunteering the boy on the next farm to him is going, too. It is then up to us, knowing that it is true from one end of the Nation to the other, it is up to us, how are you going to fill the vacant place to make Mother Earth produce the sustenance that these boys must have at the front? I do not know; I have been thinking a good deal in my office lately where I can be of practical service. I try in every letter that I write to make some suggestion that will help in the community where that letter is written and I have mailed out something in the nature of a circular letter to numbers of people, calling attention to a need here and there, and I think some good has been accomplished from it. I believe that every Member of this Congress representing the various districts of the Nation——

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEE of Georgia. I yield the gentleman five additional minutes.

Mr. YOUNG of Texas. If we could feed out from here where we know the demands made on the Government in fighting this war and can get that information into the various sections of the country and wake people up as to the immediate need we can all do some good in a personal way in response to the correspondence that comes to us from every section of our districts. We have got it to do. Whether our service is on this floor or outside of this floor we have that great burden on us and with the conflicting problems that arise it behooves every Member of this body to bestir himself to know just what he can do in a practical way to wake men to take some step or some action that will help to produce the food supply and conserve that food supply.

Great prices will not do it, as I said before. Great prices will not do it, and yet this price problem is a serious problem. Take gentlemen from the corn-growing States. That is their great industry. That is where they get their great resources from, and when they get good prices their people are usually prosperous if they can make a good crop; but prices now can not be compared with prices before the war, because—take one item in my State, where we used to get labor for 50 cents to pick cotton, and they got good wages picking three, four, and five hundred pounds a day, they now have to pay as high as $1.50. The farmers who have got to buy cultivators to grow your corn have to pay 50 to 100 per cent increase on many of those items. Clothing the same way. Your harness is the same way. Besides, you do not grow everything you use. We grow one great crop, you grow another great crop, and as a united country a commodity that helps to make our respective communities great helps to make a great rich Nation, from which our wants are supplied; but when the corn crop fails in the State of my friend from Iowa, why Texas feels that failure.

And when the cotton crop fails in the great State of Texas the State of Iowa, my friends, feels that failure. And so it is true of the crops through all the farming industries. And the diversified interests that we have render us great problems in this bill from year to year in order that we may see to it that all of these industries along the agricultural lines may be properly cared for, and more abundantly cared for just now, because the world is at war. The war will be lost or won in the ability of the United States to furnish the food supply. God grant and give us the wisdom and the power as an American people that we may answer the cry of our own people and our allies, so that when this war ends we may be conscious of the fact that we have met the demands. The war won, and liberty, justice, virtue, and democracy may live forever. [Applause.]

Mr. LEE of Georgia. Mr. Chairman, I yield 15 minutes to the gentleman from Missouri [Mr. SHACKLEFORD].

Mr. SHACKLEFORD. Mr. Chairman, just now there is much criticism of our management of the war. Most of these complaints are unjust and very unfortunate.

The President, his Cabinet, and Congress are honestly and earnestly laboring for the common good. Murmuring and grumbling tend to dishearten and discourage them. Moreover, it is calculated not only to injure us in the estimation of our allies abroad, but to create distrust and lack of confidence among the people at home.

Taken altogether the progress made and the efficiency shown by the United States since the declaration of war have been marvelous. The world has been astonished at our success.

Undoubtedly many mistakes have been made in the performance of our gigantic task. It could not be otherwise. Did gentlemen think when we entered the war that it was to be a holiday; that it would cost us nothing; that we should achieve a succession of brilliant performances and make no blunders; that we should score a series of glorious victories and suffer no reverses? These were matters to be considered when we were determining whether we would go to war. It is too late now. We are in war, a terrible war, and the time has come when we must fight, not moan.

A bill has been introduced in the Senate to create a war cabinet clothed with powers to map out and direct war policies and have charge of war supplies. A bill somewhat similar has been introduced in this House. The adoption of this measure would be to take the conduct of the war out of the hands of the President and turn it over to the proposed war cabinet. To do this would, in my judgment, be to invite disaster. We should leave the management of the war with the President. I think it is to be regretted that such a proposition has been brought before Congress. Nothing can come from it except to stir up dissensions and strife at a time when our greatest need is a united people.

This war cabinet scheme has the support of able and patriotic men in both Houses of Congress, but it has received its momentum chiefly from strong influences outside of Congress.

Powerful manufacturers have contributed largely to this propaganda. Secretary of the Navy Daniels and Secretary of War Baker have both been very careful of the taxpayers' interests in purchasing war supplies. This has aroused the antagonism of some who desired greater profits and feel that they might have fared better with a war cabinet.

Another group which has been very active in its advocacy of the proposed war cabinet is composed of politicians who are seeking political advantage. Not only do they criticize the

present policies of President Wilson and Congress, but they rake the realms of the past for dead issues out of which to make political capital. They are still carping about the failure of the President and Congress to plunge the country into the European war at its outbreak to avenge the wrongs of Belgium. Much criticism is still being made against President Wilson and Congress because we did not go into the war upon the sinking of the *Lusitania*. Newspaper columns teem with abuse of Congressmen who, whether mistaken or not, voted against the declaration of war. All of these questions have gone into the past and can have no bearing upon the vital issues of to-day. This carping criticism and abuse is indulged in in the name of loyalty, but is in fact the efforts of ambitious politicians to gain favor by prejudicing the public mind against those who now enjoy the confidence of the people.

A characteristic example of this class is Col. Roosevelt. For several months he has been engaged in bitter denunciation of the President's management of the war. He has not confined himself to a discussion of Mr. Wilson's present policies, but has gone into the issues of the past to find something upon which he could arouse opposition. He claims this all is done to help win the war, but we can not escape the conviction that he is moved by an irrepressible yearning to strengthen himself in popular favor. The following is from an editorial in the Kansas City Star, written by Col. Roosevelt:

Our economic unpreparedness is just as complete as our military unpreparedness and is one of the chief factors therein. We are now paying bitterly for the fact that two or three years ago it was deemed politically wise to shape our Government policies along the lines of "watchful waiting" and "he kept us out of war." If three years ago we had begun in good faith and earnestly to prepare, and if when the *Lusitania* was sunk we had acted precisely as we did act, with no more provocation, in February last this war would now be over.

Mr. Chairman, I believe the President's policy of "watchful waiting" was sound. The most grievous affliction of our allies has been food shortage. The one thing that has made the ultimate defeat of Germany certain was the great crop of this country in 1917. Had our farmer boys been called to training camps two or three years sooner an insufficient food supply might have compelled England, France, and Italy to have quit the fight.

It is true that our slogan in the last campaign was "He kept us out of war." To that battle cry a majority of the American people rallied and elected Mr. Wilson President against the vehement advice of Col. Roosevelt. Was our position in that campaign correct? I think it was.

But suppose that "he kept us out of war" and "watchful waiting" were unsound policies. Suppose Mr. Wilson and Congress were in error in their failure to enter the European war at its beginning. Suppose Mr. Wilson and Congress blundered in not going into the war immediately upon the sinking of the *Lusitania*. Suppose Congressmen were mistaken in voting against the declaration of war in April. Nobody will contend that the President and Congressmen were not controlled by their conscientious judgment. These questions have all been swallowed up in the voracious yesterday and have no connection with the living, burning problems of to-day. Then why would Col. Roosevelt and scheming politicians of smaller caliber dig up and discuss those dead issues of the past? There can be but one reason for it, and that is a desire to secure political advantage.

Some light may be shed upon the motive of Col. Roosevelt for resurrecting these dead issues and trying to inflame the public mind over them by the news items appearing in the papers for the last few days since he came to Washington. Here is one from the Enquirer:

WASHINGTON, *June 23*.

Col. Roosevelt brought up the heavy artillery for a tremendous drive for speeding up the war. He rallied the congressional critics of the administration's conduct of military affairs and gave new heart to the movement for the creation of a war cabinet. The breach between the President and Congress widened to the breaking point. On every hand it is admitted that a crisis is on hand that perhaps will determine the future military policy of the United States against the central powers.

Col. Roosevelt's arrival in Washington this morning gave the congressional critics of the administration a leader who intends to make the best of his opportunity.

I will read an item from the Post of the same date:

Col. Roosevelt's candidacy for the Republican nomination in 1920 was given an impetus at the meeting of the subcommittee of the Republican national committee's executive committee yesterday. Among the Republicans the lines are being drawn between the Progressives, headed by Col. Roosevelt, and the old guards who are generally regarded as unalterably opposed to the consideration of Col. Roosevelt as a candidate.

Nobody doubts the loyalty of Col. Roosevelt, but all Americans must sorely regret to find this great man playing the patriotism of the country as a trump card in a political game. How inspiring it would have been to have found this wonderful genius of organization here not to lead a fight against the President but to promote harmony with the President and a united effort to achieve victory for our country.

Mr. Chairman, our country faces an awful crisis. Before the war broke upon us there were many opinions amongst us as to the policy it were best for us to pursue. Some thought we should go into the war at the beginning to avenge the wrongs of Belgium. When the *Lusitania* went down the number who believed we should enter the war was greatly increased. When we met in extra session last April the President had reached the conclusion that the time had come to abandon the policy of "watchful waiting" and take aggressive action. Some of us believed we should still keep out of the conflict and demand redress of our wrongs when peace should be restored. Each was honest in his own view and would have been unmanly had he not contended for it, but when Congress declared war personal opinions were laid aside and all stood together for our common country. Those who advocated the war and those who opposed it—Democrat, Republican, and Socialist—all lined up together to bring victory to our arms.

Mr. Chairman, all of us—President, Cabinet officer, and Congressman—feel the weight of the appalling responsibilities resting upon us. We all desire to do that which is best for our country. In the performance of our solemn tasks we need the confidence and sympathy of the people and the guiding hand of God.

But, sir, notwithstanding the false notes sounded by the self-seeking few, it is encouraging to know that in this dark hour of war there is harmony and unity of purpose among our people. They hold themselves ready to sacrifice their all upon the altar of their country. They deny themselves fuel. They observe wheatless and meatless days. They stand with purse in hand to subscribe to Y. M. C. A. and Red Cross; to buy thrift stamps and liberty bonds. They submit to the most burdensome taxation to provide revenues for the support of our Army and Navy. Fathers and mothers restrain their sighs and their tears as they send their sons away to fill up the ranks of war. When our young men are called they solemnly, but promptly, go with unfaltering steps to carry their country's flag to victory.

Our souls are filled with gratitude that God has put it into the hearts of the people to so heroically and loyally consecrate themselves to their blessed country.

Mr. LEE of Georgia. Mr. Chairman, I yield 15 minutes to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. Mr. Chairman, I am particularly interested in the subject which is under discussion to-day, that of the eradication of tuberculosis from the cattle of this country. As the Members present know, some two years ago I introduced a resolution to investigate this subject, and, through the assistance of the federation of labor of my State, cooperating with the Federation of Labor throughout the country, we were able to bring this subject before the various labor organizations, the women's clubs, and other organizations of the country, as to the importance of the eradication of tuberculosis. I told them at that time that there were some 2,000,000 cattle in this country suffering from this dread disease; that there were some 93,000 deaths each year from tuberculosis, and that 6,000 of these deaths could be traced in children who had contracted the disease from tuberculous cattle through the drinking of the milk.

I treated the subject upon the line of sanitation and health more than upon economic lines, because while I believed and while I realized the great importance of the economic question as to the eradication of tuberculosis, and while I admire the magnificent argument made by the gentleman from Nebraska [Mr. SLOAN] along that line, I believe the great and paramount question involved in the eradication of tuberculosis among cattle is to stop the spread of bovine tuberculosis among the people, and especially among the children of this Nation.

We hear a great deal about the conservation of the food supply, conservation of the fuel supply, conservation of this, that, and the other, but I tell you, gentlemen, the great question for our country and for every other white country on the face of the globe in these days is the conservation of humanity and the continuation of the white race with its power and might on this earth, and yet we sit idly by and appropriate the meager sum of $250,000 for the eradication of tuberculosis among cattle, when we know we can trace the death of 6,000 children to that very cause. We appropriate some $600,000 for the eradication of the cattle tick. We appropriate other hundreds of thousands of dollars toward eradicating the boll weevil. We appropriate hundreds of thousands of dollars for the eradication of hog cholera. All these large sums, as the gentleman from Texas says, are not matters for the State of Texas, not for the State of Iowa, or for the State of Massachusetts, but they involve the welfare and the prosperity of all the country from Maine to Florida, and from the Atlantic to the Pacific. We can not touch

upon any of these questions in any one State or in any one section of the country that we do not affect these other sections of the land. And so, as the gentleman said in reference to the boll weevil in Texas, in reference to the hog cholera in the South, in reference to these various other things, they are subjects in which the whole Nation is interested. And likewise is the whole Nation interested in the question of the eradication of tuberculosis from cattle.

I talked to Dr. Mohler. He said, "Yes; $250,000 was all that they had asked for." "But," I said, "Doctor, what can you do with $250,000?" He replied, "Not much. We can proceed along the line on which we have been proceeding, but we can not make much headway." "Suppose you had the $1,000,000 which Mr. SLOAN has asked for in this bill?" He said, "If we had the $1,000,000 we could pursue the subject with greater energy; we could go into the various States and campaign. We could show the people the great necessity for getting rid of tuberculosis; and we could use it with great advantage by adding to our present system of operation. But with $250,000 we can merely proceed along the lines on which we are now proceeding, and which are extremely slow."

Do you know the lines along which they are now proceeding as recorded by Dr. Mohler? I quote from the hearing:

> Before commencing the eradication work in a given area the subject will be presented in its true light, and they would decide by election their will in the matter. Every qualified voter should have the privilege of casting the ballot to decide whether or not tuberculosis should be removed.

Now, just imagine proceeding along lines where you leave the people to vote whether tuberculosis shall be eradicated or not. Did you leave it to the people to vote whether or not the boll weevil should be eradicated? Did you leave it to the people to vote whether or not the hog cholera should be eradicated?

Have you left it to the people to vote whether or not the white plague shall be eradicated from the human race? And yet here you are proposing under this method the using of $250,000 to let the people of any given section say whether tuberculosis in cattle, which spreads disease among all the children of the country, shall be eradicated. And that is the system under the $250,000 appropriation.

As Dr. Mohler said, "If you give me the money to eradicate tuberculosis from cattle, I can get rid of it, and I can get rid of it without these vast sums of money that the people imagine will be necessary." I said, "Doctor, what do you propose to do about these fine herds of cattle, where men have built them up for years, where they are proud of them and are interested in them? Do you propose to kill the cattle?" He said, "No. We propose to separate the diseased cattle from the perfect cattle, and then we propose to take the calves from the diseased cattle and put them with well mothers or feed them on pasteurized milk, and in that way we can save the diseased cattle, we can breed from them, and we can build up the herds to just as large an extent as at the present time and gradually get rid of the diseased cattle without any great loss." So there is no necessity for any great loss. Why, gentlemen, right here, as the gentleman from Nebraska [Mr. SLOAN] has told you, tuberculosis in the District of Columbia has been reduced from 18 per cent to less than 1 per cent. In Maryland it has been reduced in vast herds from 12½ per cent to about 2 per cent, and throughout the whole section where they have worked and where they have had the money with which to work they have gradually eradicated or greatly diminished tuberculosis. I would like to see a million dollars appropriated for this work.

Mr. SLOAN. Mr Chairman, will the gentleman from Maryland yield?

Mr. LINTHICUM. Certainly.

Mr. SLOAN. Dr. Mohler is the head of the Bureau of Animal Industry, is he not?

Mr. LINTHICUM. He is; and he is a man who has given a great deal of study to this work.

Mr. SLOAN. He is the best authority in the world, as I understand, on that subject. If he were given sufficient funds to carry out his plans, as outlined in his letter or statement to me, he would require, as you understand, about a million dollars?

Mr. LINTHICUM. Yes. He told me that if he had a million dollars he could make rapid progress in the eradication of tuberculosis, but that with $250,000 the process would be extremely slow.

Mr. SLOAN. Then the bureau is ready to undertake that campaign if Congress assumes the responsibility and says, "Go ahead"?

Mr. LINTHICUM. Absolutely. But, as the gentleman knows, the heads of these departments are loath to ask for large sums of money. They have difficulty in getting them. It is not like a war proposition. If somebody came in here and said he wanted $5,000,000 as a war proposition you would appropriate it and leave it to him to expend to the best advantage; but if a man comes in here and tells you he wants the money to improve the food conditions and save the lives of children, you say to him, "Let us look into it and see how we can get along." I want to assure you that we ought to look after the interests of the women and children of this country, not only now but after the war is over.

Dr. Schroeder, an expert bacteriologist in the Department of Agriculture, stated before the Committee on Rules that 300 children die annually in New York City of bovine tuberculosis. On this basis the annual death rate throughout the United States from tuberculosis is 6,000.

I ask you, gentlemen, is $1,000,000 too much with which to save the lives of 6,000 children in this country? Look at your own child in your own home, and say to yourself what would $1,000,000 be to you if needed to save the life of that child. Yet you have 2,000,000 cattle in this country yielding diseased milk, from which children die of tuberculosis, and we stand here talking about giving $250,000 for the eradication of this disease.

Dr. Mohler formerly was assistant chief of the Bureau of Animal Industry; now he is chief. Here is what he says: He told the committee that he had personally examined the bodies of a number of children who had died of tuberculosis, and he had found that over 42 per cent of them had died of bovine tuberculosis. Now, we have 93,000 deaths from tuberculosis in this country every year, and about 6,000 of those are from bovine tuberculosis.

I do not want, Mr. Chairman, to take up too much of the time of the committee to-day, but I do want to bring it to your attention that in addition to the economic question that arises as to the saving of cattle and the saving of hogs, which the gentleman from Nebraska [Mr. SLOAN] has gone into so fully and brought to your attention, I want you to take under consideration just what it means to have this tuberculous milk going into the homes of the people of this country.

You know things have radically changed in the last 20 or 25 years. It used to be that the woman milked the cows in the morning and made the butter during the day, and then that butter was sold in the community or was fed to the members of the family. After awhile that condition ceased, and the little dairies and creameries sprang up in the neighborhood and the neighbors would carry the sweet milk to the creamery and there it would be turned into butter and the farmer would take the skimmed milk back home with him.

But that condition changed, and then it became possible, by refrigeration and otherwise, to ship this milk long distances and to turn it into butter and cheese and distribute it through all sections of the country. Nowadays, when tuberculosis in a herd of cattle exists in any one section of the country, you can not tell how far the ramifications of that disease may spread by transportation and refrigeration and by sale in the markets of the country. The milk that a farmer takes to the creamery is not, perhaps, drawn from any cattle affected by tuberculosis; but the skimmed milk he takes home may not be from his own cattle but from some other cattle, which may be affected with tuberculosis, and when he takes that milk home from the creamery and feeds it to the hogs it is possible for him through that milk to impart the disease to them. Over a million hogs slaughtered in Chicago were retained because they were affected with tuberculosis. Two thousand carloads of cattle packed together would constitute the amount of cattle that are rendered valueless on this account.

It is not only a question of economics but a question of sanitation, a question concerning the lives of the children and grown people of this country, and a question which certainly $250,000 will not go very far toward solving. That sum of money will not go very far toward eradicating the disease.

Mr. WASON. Mr. Chairman, will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. WASON. Did I understand the gentleman to say that every creature that is affected with tuberculosis and is giving milk will carry the germs of that tuberculosis?

Mr. LINTHICUM. I did not quite catch the gentleman's question.

Mr. WASON. My question was, Will every creature that is affected with tuberculosis and is giving milk transmit the tubercular germs?

Mr. LINTHICUM. I say this, that if you had a child which had a tuberculous mother and that child were nursed by that tuberculous mother, it is more than likely, unless the constitution of the child was very strong, that the child would contract tuberculosis from its mother. But if you took that child when

it was young and fed it on milk not affected by tuberculosis it would not contract tuberculosis.

Mr. WASON. I understood the gentleman's illustration was that if Mr. A's herd was tubercular and the milk from that herd were transported to the creamery, Mr. B might take the milk home and feed it to his hogs and thus infect the hogs?

Mr. LINTHICUM. Perhaps I talked too fast for the gentleman to understand me. What I said was this, that if Mr. A had tuberculosis in his cattle, he would probably take that milk to the creamery, and he would probably not wait until his own milk was turned into butter, but would take the milk that had been furnished by some other farmer to the creamery and take it home; that if he fed the tubercular milk to his hogs, they were apt to contract tuberculosis. Some cows may have tuberculosis in those parts which does not affect the milk, but usually it does.

Mr. WASON. That was what I understood the gentleman to say. But my inquiry now, which was my first inquiry, is this: Does every milch animal infected with tuberculosis transmit it?

Mr. LINTHICUM. Oh, I think not. I think tuberculosis is transmitted very largely because of a weak constitution. Some children are born of tuberculous mothers who nurse them and the children do not contract tuberculosis because their constitutions are strong enough to throw it off, while others have weak constitutions and contract it. Cows may, as I have said, have tuberculosis not affecting the milk.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LINTHICUM. I thank the committee for their attention. [Applause.]

Mr. HAUGEN. I yield to the gentleman from West Virginia [Mr. WOODYARD] two minutes.

Mr. WOODYARD. Mr. Chairman, I ask that the following telegram be read in my time.

The Clerk read as follows:

CHARLESTON, W. VA., *January 24, 1918.*

HON. HARRY C. WOODYARD, M. C.,
Washington, D. C.:

Coal-car situation in Kanawha district shows absolutely no improvement in past two weeks. Worst supply to-day ever experienced, with 131 idle mines and 11,000 idle mine workers, account of no cars. Only 4,800 tons of coal equipment supplied to-day; order for 69,000 tons. Can you secure information indicating immediate improvement? Please answer.

KANAWHA COAL SHIPPERS' ASSOCIATION,
MAX T. PRICE, *Secretary.*

Mr. WOODYARD. Mr. Chairman, this telegram indicates a deplorable, and I might say an intolerable, condition, so far as the transportation system of this country is concerned. The people of this country are making and have been making many sacrifices. They are doing it patriotically and cheerfully, but it seems to me that the time has come when Congress can not sit passively here and allow conditions like this to prevail without at least taking some step to assist the executive branch of this Government in relieving it, as well as many other similar situations in the country. I am sure that every Member on the floor of this House wants to do only that which will help us to successfully prosecute the war; but I want to say, as emphatically as I can, that the time has come when the people of this country are going to demand, and are demanding, that the legislative branch of the Government step in and take some measures to relieve these conditions. [Applause.]

Mr. HAUGEN. I yield 30 minutes to the gentleman from Illinois [Mr. DENISON].

Mr. DENISON. Mr. Chairman, I am in favor of this bill, but I do not intend to discuss it. I listened with some interest, as I always do, to the gentleman from Texas [Mr. YOUNG], but I do not entirely agree with him on the question of farm labor. I do not think that the young men whose services are necessary to cultivate the crops are in any sense of the word slackers when they claim exemption when drafted into the military service.

Mr. YOUNG of Texas. I beg the gentleman's pardon. I did not say anything from which the gentleman can draw that conclusion. I said I personally might know that the boy who remained at home was doing greater service than he could do in the trenches. Yet his neighbor's boy, who had gone to the trenches might feel otherwise, and as a result, the two boys having been together, would follow the same course.

Mr. DENISON. I may have misunderstood the effect of the gentleman's answer to the question I propounded to him when he was speaking. I think this question of labor on the farm is one that is going to become very serious, and I think it is the duty of men to claim exemption when drafted under the draft law if their services are necessary on the farm. This suggests the question that I want to present to the committee, rather than the agricultural bill under consideration, namely, the question of the administration of the draft law.

Mr. Chairman, the provost marshal general has filed his report to the Secretary of War on the first draft under the selective-service law, which presents some valuable information and some quite interesting conclusions. One of these conclusions is stated by Gen. Crowder in the following words:

ERECTING THE REGISTRATION SYSTEM.

From the moment American participation in the world war became apparently inevitable the enactment of the selective-service law was also inevitable. The trend of continental military organizations since the battle of Jena, and the inception of the junker idea of "the nation in arms" (not to mention the unprecedented military effectiveness of the German Empire in the present conflict), left no doubt that no intelligently directed nation could afford to enter the conflict with less than its entire strength systematized, organized, and controlled for war. Such systematization is impossible under any other than the selective plan for raising armies. The thinking element of the Nation was perfectly aware of the truth of this proposition, and Germany has given such a demonstration of its effectiveness that little argument was necessary to support it in May of this year, and none is necessary to-day. If farms, factories, railroads, and industries were not to be left crippled, if not ruined, by the indiscriminate volunteering of key and pivotal men, then, in the face of such an enemy as Germany, the total military effectiveness of the Nation would have been lessened, rather than strengthened, by the assembly of 1,000,000 volunteers.

With this conclusion I think the mature judgment of almost every loyal American will now agree, especially so in view of the events that have transpired and the military and industrial demands upon us that have become apparent since the enactment of the law on May 18 last.

When the draft law was under consideration in the House I was one of those who at first favored the old volunteer method of raising our Army. Many of my constituents, I thought, were opposed to the idea of compulsory military service. I represent a district where the volunteer spirit and belief in the volunteer system has always been deeply embedded in the minds of the people since the days when Gen. John A. Logan, then the Member of Congress from that district and afterwards the greatest of all volunteer soldiers, resigned his seat in this body and returning home organized his regiment of volunteers to fight for the preservation of the Union. My sentiments and my inclinations were at first favorable to the committee bill, which would have authorized the President to call for volunteers for a period of six months before the draft provisions should become effective.

But after more serious consideration of the question I became convinced that in a matter of such grave importance, where the adequacy and effectiveness of our fighting forces and possibly the very safety of the Nation was involved, I could not afford to follow my personal sentiments against the better judgment and experience of military men and others who were in a position to know better than I what military measures we should adopt.

With the President, the Commander in Chief of the Army and Navy, insistently urging Congress to eliminate the volunteer provision of the bill and proceed at once to raise an Army on the principle of selective compulsory service for all who were of military age; with the Secretary of War and the General Staff of the Army recommending it; with all the great metropolitan newspapers demanding it; with every Republican governor and our two ex-Presidents advising it, I did not feel that I as a Member of the minority party here should vote against the draft law with the volunteer provision eliminated simply because my personal sentiments were in favor of calling for volunteers. Moreover, my judgment told me that this world war into which we had entered was so different from all former wars in methods of warfare and in demands of man power and industrial resources, we could not afford to follow the old method of raising armies if another method more speedy and more effective could be found. And in that connection the disastrous experience of England, which delayed her preparation for effective participation in the war more than a year by depending on the volunteer plan of raising troops, was staring us in the face. We were urged not to make a similar mistake. I became convinced then, although I did not believe it then as firmly as I do now, that in order to win this war we would have to raise an Army of several million men in the shortest time possible, and that to do so without involving the Nation in industrial paralysis some sort of selective system of raising an Army, based on the principle of compulsory or universal obligation to service, would be necessary. I concluded that under the circumstances we could not wisely depend upon the volunteer system, and, since we could not, we had best begin right by at once putting into effect the draft law instead of waiting six months to do so, as was provided in the committee bill then under consideration.

For these reasons, Mr. Chairman, and for others which I stated here at that time, I voted for the selective-service law. Since

then great events have passed swiftly on the world stage and the realization that we are deeply in the war has more fully dawned on the people. If I do not misjudge the stupendous task and the magnitude of the sacrifice that yet awaits this country before we are again at peace with the world, the people everywhere will soon know, if they do not now realize it, that Congress acted wisely in passing promptly the selective compulsory-service law and that any other method of raising the vast armies that we will need would have been nothing less than disastrous. I believe the Provost Marshal General is right when he says in his report, "No intelligently directed nation could afford to enter this conflict with less than its entire strength systematized, organized, and controlled for war. And such systematization is impossible under any other than the selective plan for raising armies. The thinking element of the Nation is perfectly aware of the truth of this proposition."

After the draft law was passed and the machinery provided for immediately raising an adequate military force for training and service, I, with the other Republicans of the House, voted for the proposition to authorize the President to at once send a division of volunteers to France under Col. Roosevelt. This, I think, the President might well have done. It would have had a fine moral effect on the men and the issues in Europe and would have given an opportunity for many men in this country who had had military training to volunteer for immediate service in France.

But, Mr. Chairman, I found on returning to my district this fall that there was some opposition to the draft law among the people and some disposition to complain at the Members of Congress for voting for it. I am led to believe that this condition in my own district was not unlike the condition in many other parts of the country. I tried to ascertain the cause for some of the criticism I heard, and I think the information I obtained is worth calling to the attention of the committee.

In the first place, I think by far the greater part of the complaint and opposition to the draft law has been due not to the principles or provisions of the law itself but to the unhappy methods of the War Department in the administration and execution of the law.

There were a few—but a very few in my district, I am proud to say—who were opposed to the law and who complained at Congress for passing it, whose real opposition, as a matter of fact, was to the war. They were pro-Germans or pacifists who were opposed to our entering the war at all. They were unwilling, for reasons which are quite obvious, to publicly proclaim their opposition to the war. Public sentiment would not tolerate that; but they did mask their opposition to the war under a criticism of the draft law. And I wish to say now, Mr. Chairman, that these objections were not, with few exceptions, among the men of German nationality. I have a great many Germans in my district, particularly in two counties. They are among the most valuable, most industrious, and most successful farmers of my district. And I have never yet received a single letter from any of my German constituents objecting to our declaring war or criticizing me for voting either for war or for the draft law. So far as my own information goes they have, with very few exceptions, been loyal to the United States in this world struggle, and for such as have been loyal I have the highest respect and admiration.

Then I found some who disapproved the draft law because they sincerely favored the volunteer method of raising an army. In talking with some of these I found they were conscientious in their attitude, but they did not fully realize the magnitude of the problems before Congress and the country. They did not understand that Congress had to provide for obtaining quickly an army that might and probably would require several million men; that no one connected with the Government, the War Department, or with Congress believed we could raise the necessary men by calling for volunteers; they did not know that there were but two propositions considered by Congress for providing an army; that both of these provided for compulsory military service in identically the same language; one, however, putting the draft into immediate effect, and the other postponing the draft six months, during which time the President could try to raise the necessary troops by calling for volunteers; and that Congress approved the former plan upon the urgent recommendation of the President, the War Department, the General Staff of the Army, and all of the military men of the country. When they come to realize, as they surely will, that the entire strength of this Nation will be needed in this war, and that our entire strength can not possibly be systematized, organized, and controlled under the volunteer system alone I am sure they will in the end approve the action of Congress in passing the draft law.

Mr. Chairman, when the first quotas of men were assembled to entrain for the cantonments there was, of course, a feeling of distress among the friends and families of the drafted boys. This was only natural and has always been the case when men leave their homes in large bodies to fight for their country. But mingled with this feeling of distress there was also with many a feeling of resentment at the law which took the boys from their homes. This resentment not infrequently was manifested by criticism of Congress for enacting the draft law.

Mr. Chairman, the generally accepted idea of exalted patriotism is for a man to willingly offer his own life for his country. But I have sometimes thought that the fathers and mothers or the wives and children who are left at home are just as patriotic, when, with a smile on their faces and a blessing on their lips, they send their sons or husbands away to the front without complaint. It is one of the most bitter cups of life's journey, and I could not blame those who at first even felt resentful when their sons or husbands were taken away to fight the country's battles in this war. The fact is the events which brought the United States into this war transpired so rapidly the people could not for a time realize we were really at war. They knew, of course, there had been a declaration of war, but to them the war seemed far off. It was only when the law reached right down into almost every home in the land and took the sons and husbands and fathers that the people realized with an awful shock that we were really in the war. And there was at first a rebound in the public mind which found expression in resentment at the law.

I am proud to say, Mr. Chairman, that this resentment has been rapidly disappearing from among the people of my district. My people are loyal and patriotic. As they come to better understand the great peril in which our country finds itself—the great peril to our rights, our liberty, our democratic ideals, and our very existence as an independent Nation; as they come to better understand the stupendous military and industrial problems that confronted the country and had to be solved without delay—they will then realize, I believe, that Congress did the very wisest thing it could have done when it passed the selective-service law.

Mr. Chairman, I have found that a great deal of the adverse feeling of the people toward the draft law has been due to the administration of the law rather than to the law itself. And I desire to say that I believe there has been some justification for this criticism. In raising the first quota of troops the Provost Marshal General's office acted with a haste that was not only unnecessary but unwise; followed a policy that was not in harmony with the intention of the law; and issued rulings that were confusing to the local exemption boards and so contradictory as to be almost unintelligible. The people of the country should know that Congress has had nothing to do with the administration of the law. Responsibility for the manner of administering the law rests with the President and the War Department, and if any criticism is justified on account of the way the law has been administered it must fall upon the War Department and not upon Congress.

Section 3 of the draft law authorized the President to "exclude or discharge from service, or to draft for partial service only, those in a status with respect to persons dependent upon them for support which renders their exclusion or discharge advisable."

In this language Congress gave the President full authority to exclude or exempt from the draft all persons having wives, children, or other persons dependent upon them for support where such dependence rendered their exclusion advisable.

I was present while the draft law was under discussion in the House, and have reread the proceedings in both the House and the Senate. And I think I am safe in saying that it was the purpose and the desire of Congress that married men and those with children or others dependent upon them should be exempted, at least until such time as they were imperatively needed in the military service. Indeed, one of the strongest arguments made in favor of the draft law, as against the volunteer plan, was that under the selective plan men having wives or other dependents could be kept out of the service and the burden of supporting their dependents could be thereby saved to the Government. Congress authorized the President to exempt men with dependent families in the interest of the Government rather than of the individual. The Provost Marshal General says in his report:

> The principle was deduced that no exemption authorized in the selective-service law was intended for the direct benefit of an individual, but that every such exemption was for the sole benefit of the Government.

Without doubt this is the true spirit of the law, but the War Department failed to regard this principle, and the best inter-

ests of the Government in the different rulings and instructions given to local exemption boards respecting exemption on the ground of dependency. In the first place, the War Department made a serious mistake in making local exemption boards judges of the law as well as the fact in passing on claims for exemption on the ground of dependency. This, I think, was contrary to the spirit and intention of the law.

Congress authorized the President to determine the status with respect to persons dependent upon them for support which would render the exemption of individuals desirable. Under this authority the President, acting through the Provost Marshal General, should, by proper regulations, have declared clearly and unequivocally the classes of persons whose exclusion from the draft be considered advisable on account of dependency.

Instead of fixing by Executive order or by definite departmental regulation or ruling the class or classes of persons that should be exempted on account of dependency, local exemption boards were left to determine for themselves, in each individual case, the advisability of granting the exemption, and no adequate or clear definition of the statutory terms "dependent for support" was ever given to local boards by the War Department. I know of at least one governor who right in the beginning appealed to the Provost Marshal General to clearly define the rule of dependency that should govern local boards in passing on claims for exemption. But it was not done, at least not until most of the men had been inducted into the military service. The obvious result was that local exemption boards often made their own rules of guidance in passing on claims for exemption. Congress did not intend for local exemption boards to determine the advisability of exempting individual citizens from liability for service. Congress intended, and so provided in the law, that the President should determine that question, and, having determined the class of persons whose status with reference to dependency rendered their exclusion from the draft desirable, the Provost Marshal General, with the approval of the President, should have instructed all local boards to exempt all persons coming within that class. Then the local boards would have been under the duty only of determining the simple question of fact whether claimants come within that class.

This has been done now, after the law has been in operation eight months, and will be followed hereafter in calling men into the service. But it was not done when it should have been done—before over half a million were called into the military service, many of whom should, under the law, have been excluded from the draft. There are thousands of young men in the different military camps to-day who have dependent families at home and whose families the Government will have to support, because of the failure of the War Department to properly administer the law that Congress passed. And this has resulted not only in added burdens on the Government but in unwilling soldiers, and discontented people at home as well.

Now, what has been the result of following a different policy?

In the first place, different exemption boards followed different rules in granting exemptions; there was an entire lack of uniformity in granting or refusing claims for exemptions all over the country. In southern Illinois I know of exemption boards that exempted almost every man who had a wife or children; I know of others that practically exempted none. One board followed a rule of its own, so I heard, of exempting a man if he had a wife and two children, but not so if he had only a wife and one child; another board had a rule to exempt men having a wife and child, but not so if the claimant had a wife but no child.

Mr. COLLIER. Will the gentleman yield right there?

Mr. DENISON. I will.

Mr. COLLIER. I want to ask the gentleman for information if he has investigated and found that this nonuniformity among the different boards is general among the States, or if it is confined to one or two? I myself think there was a great deal of nonuniformity among the different boards.

Mr. DENISON. So far as I have heard, it extended generally everywhere.

Mr. COLLIER. There was no uniformity of action by the local boards, except in very few States.

Mr. DENISON. In very few States. Some boards would exempt men having wives and children whom they supported, while other boards refused exemption in such cases, where the husband or wife had relatives who were able and willing to support them. Some local boards would not exempt any man whose wife was physically able to get out and work for her own support.

In fact, the Provost Marshal General in his report says his office at one time made a ruling that if the parents of the registrant or of his wife were ready, able, and willing to undertake the support of the wife during the husband's absence, local boards would be justified in refusing to exempt in such cases.

This ruling soon proved to be a mistake. Of it the Provost Marshal General says:

> This ruling did not work well. The few boards that had been prone to hold married men for service in the absence of the most unequivocal circumstances of dependency took the rulings as authority to look into the material wealth of the parents of the husband or of the wife. Regardless of readiness and willingness, regardless of whether or not the wife had in the past been actually dependent on the labor of the husband for support, these boards held some married men for service wherever it appeared to them that, rather than let the wife suffer, the parents would undertake her support during the absence of the husband.

And then he says further in his report that all local boards were instructed to correct their errors in following this ruling by reopening all claims for exemption that had been denied under it, and that all such errors were happily corrected.

As a matter of fact, I know that there were a great number of such errors that were not corrected. Often local boards would not reopen cases, and commanding generals at the different cantonments would not release the men in many such cases after they had been inducted into the military service. And there are many men in these camps to-day who should have been exempted, and who would have been exempted but for these confusing rulings or lack of clear rulings by the Provost Marshal General, which in many cases misled local boards in the performance of their duties.

Mr. Chairman, one of the most fundamental virtues of any law is the absolute uniformity of its application and administration. A good law may be rendered obnoxious by a lack of uniformity in its application to persons similarly situated. And the people will, under the stimulus of patriotism, bear without complaint a law that is harsh and even burdensome if it falls upon all citizens alike. But where it is enforced in one way upon a citizen or number of citizens or the people of one community and in an entirely different way upon other citizens living in the same community or in adjoining communities, there is a just and legitimate ground for complaint.

Many people in my district have complained to me because some young men were denied exemption while other young men in other parts of their county or adjoining counties, who were similarly situated, were exempted.

In most cases the complaint was not that the registrant had to serve, but that men similarly situated had been excused from service.

I happen to know of one county in southern Illinois where there were two local exemption boards. One board had to raise a net quota of 188 men and the other a net quota of 283. The board with the net quota of 188 men called 256 registrants; the other board, to raise a net quota of 283, called 1,076 registrants. One board allowed but 53 claims for exemption, while the other board allowed 410 claims. One board exempted almost every married man who claimed exemption, while the other exempted very few. I assume that the conditions I have described prevailed in other parts of the country.

And the point I want to make clear is, that this condition was not due to any fault of the exemption boards themselves. In Illinois at least the most honorable, capable, patriotic, and valuable men in the different counties served on local exemption boards, and they served at a sacrifice of their own personal interests. These men, with the very highest self-sacrificing devotion to duty, performed their difficult duties the best they could as they understood them.

The blame must rest upon the War Department for failing in the beginning to assume the responsibility of classifying the men whose exclusion from the draft was advisable, instead of leaving that duty to the different local boards without sufficient instructions to enable them to administer the law uniformly over the country. And, Mr. Chairman, this action on the part of the War Department has resulted not only in a chaotic lack of uniformity in the administration of the law but placed a burden of responsibility upon the members of the local boards that I do not think was within the intention of the draft law; it subjected members of local exemption boards and even Congress itself to criticism, which, if justified at all, should fall upon the War Department.

The Provost Marshal General in his report admits that mistakes were made, and that rulings were made on the question of dependency that did not work, resulted in mischief, and had to be recalled. But he dismisses the matter by saying such mistakes were inevitable under the circumstances. I do not see why this should necessarily have been so.

Mr. Chairman, the selective-service law provides also for the appointment of district boards, with original jurisdiction, to dispose of claims for exemption on industrial grounds, and appellate jurisdiction in claims for exemption on other grounds. One of the principal purposes of providing a tribunal to review all

peals from the decisions of local boards granting or denying exemption claims was to more effectively insure uniformity in the administration of the draft law.

And yet I venture the assertion that as a general rule district boards treated their appellate work as a mere perfunctory matter. I venture the further assertion that the regulations and the ruling issued by the Provost Marshal General's office were such as to lead district boards to treat appeals from local boards in exemption claims as mere perfunctory or routine matters. For instance, on August 1, 1917, the Provost Marshal General issued a printed compiled ruling, from which I quote the following instruction to district boards:

It is not expected that district boards will reopen each dependency case in these automatic appeals, but it is intended that each case be scanned with a view to determining whether its result is in consonance with the expression of the principles of the regulations that is found in the rulings of this office and the decisions of local boards in similar cases throughout the country.

And on August 11, 1917, there was issued another pamphlet of compiled rulings by the same office containing this instruction:

It is true that all cases of discharge on the ground of dependency are appealed by the Government to the district board, but this clause is only inserted to secure uniformity in action. District boards are to examine these cases to discover departures from the law, regulations, and rulings; they will not and can not open every case on its merits. It is in the local boards alone, therefore, that the solution of the difficulty and the protection of deserving claimants lies.

I charge that these rulings of the Provost Marshal General gave authority to district boards to practically ignore claims for exemption on grounds of dependency appealed from local boards.

While I was in my district I heard what was a common report there, that the district board had never reversed a single decision of a local board in refusing an exemption claim; and that the board handled such appeals in a mere clerical or perfunctory manner, never looking into the merits of any claim, I do not know that this report was entirely accurate, but I do know it was the general belief among the people.

And when I read these instructions of the Provost Marshal General I was not at all surprised that district boards should have taken that view of their duties.

Mr. Chairman, I am not criticizing the members of district boards personally. They, too, had a difficult duty to perform, and they were men of the highest integrity and patriotism. But I do criticize the War Department for issuing such instructions to district boards as would cause them to ignore one of the very important duties imposed upon them by the act of Congress, and for which they were created. If the War Department had instructed district boards to actually reopen and consider all appeals that came to them from local boards in exemption claims, the unfortunate lack of uniformity in the decisions of different local boards in claims for exemption, particularly on the ground of dependency, would have been discovered and probably corrected.

Mr. Chairman, the draft law also authorized the President to exclude or discharge from the draft persons engaged in industries, including agriculture, found to be necessary to the maintenance of the Military Establishment.

One of the strongest arguments urged in support of the draft law by those favoring it, including President Wilson, was that in this war it would be absolutely necessary to leave undisturbed, as far as possible, those industries, including agriculture, that would be necessary to maintain the Military Establishment. To maintain the Military Establishment in this war it is necessary to feed and fuel our people, our allies, and our Army and Navy. It was urged that if we should undertake to raise armies by the old indiscriminate volunteer system, men in all industries under impulse of patriotism would enlist; key and pivotal men in important industries would go into the Army; and agriculture, so necessary to feed the Nation and its armies, as well as the mines and other industries necessary to the prosecution of the war, would be crippled. And it was urged that by the selective-draft system men necessary in these industries would be excluded from the draft in order to pursue their industrial duties which were just as essential as military duties. Yet, Mr. Chairman, this purpose of the law has been almost entirely ignored by the War Department in drafting into the military service the first 687,000 men. Why, the Provost Marshal General admits in his report that his office considered military necessity first and paid little attention to industrial necessities.

In this connection, I wish to quote the following strange admission in the report of the Provost Marshal General. On page 24 he says:

At the time of the formulation of these regulations the very grave industrial and agricultural problem before the Nation was recognized in this office; but, as shall be developed later in this report, the theory accepted here was that the responsibility for the determination of the question whether this Nation was to contribute militarily, industrially, or both, to the allied aims in this cosmic struggle had been decided before this office was created; that the decision was for military cooperation; that this decision imposed upon this office the necessity of producing the first draft of men synchronously with the military preparation to receive them; and, therefore, that the paramount military necessity was to be adjusted to the agricultural and industrial necessity with the least possible disarrangement of the latter, but with the absolute military necessity always in the foreground.

With this thought in mind the first regulations were promulgated. No apology is needed for them. It is believed that they produced a result with such accuracy in respect to the plan that no substantial criticism can be made of them. Formally it is frankly admitted that they were full of faults.

In other words, Mr. Chairman, the decision that this Nation should cooperate militarily in the world war rather than industrially was made in the inner councils of the War Department before the Provost Marshal General's office was created and before the draft law was passed by Congress. Is there any wonder then that, in administering the law, regulations and rulings were issued by the Provost Marshal General's office that did not carry out some of the provisions or the purposes of the law?

According to the report there were called out and examined 3,082,949 men to raise the first 687,000 men. From this number there were exempted only 20,315 men on industrial grounds in the 4,557 counties or districts of the country, or a little more than an average of 4 men from each county or district.

And 33,528 men were exempted on agricultural claims, or a little over 7 men from each county or district. There were only 851 coal miners exempted from military service in the entire United States. Yet this country, as well as our allies, need nothing worse to-day than they need coal.

Mr. BLACK. Can the gentleman give us any figures as to how many coal miners were taken into the service? He says something over 700 were exempted. Does he have any figures as to how many were taken into the military service?

Mr. DENISON. No; I have not. I know there are about 15,000 coal miners in my district, and if any one of them was exempted on industrial grounds I have not heard of it. Yet we need fuel pretty badly. And we are going to need it worse, and so are our allies, before this war is over. The coal miners are patriotic in my part of the country, and there may not have been very many who claimed exemption on industrial grounds, but if the war continues very long we will have to protect the supply of labor in coal mines whether the men claim exemption or not.

Mr. SHALLENBERGER. Will the gentleman allow me to interrupt him?

Mr. DENISON. Yes.

Mr. SHALLENBERGER. Is it the gentleman's opinion that the administration of this first draft interfered unnecessarily with agriculture, from the fact that not as many were exempted as should have been?

Mr. DENISON. I think so. I heard the remarks of the gentleman from Texas [Mr. YOUNG] a while ago, when I believe the gentleman from Nebraska was not present, and he said that was one of the great problems now before the country, that the men had been taken off the farms to go to war, producing a greater scarcity of farm labor.

Mr. SHALLENBERGER. Then, if it should be established that these men were called into the service before their camps were ready for them, before the War Department were able to clothe and house them properly, in addition to the lack of preparation in that respect, the fact that they were not allowed to give their services to agriculture when labor is so essential to agriculture during the fall, it interfered to that extent also, that they were called out at a time when they were essential to agriculture and when agriculture could have used them to the advantage of the country, as well as at a time when the War Department had not prepared to receive them in the training camps.

Mr. DENISON. Exactly. I can show, if I have time, that according to the Provost Marshal's report itself there was practically a race being run between his office and other branches of the War Department, and that he was trying to get the men into the service by the time the cantonments were ready; and he admits that this was unfortunate, because he got the men ready and sent them into the service before the War Department had prepared for them. This haste was unnecessary and was unfortunate, because it was at a time when the men should not have been taken from the farms unless that was absolutely necessary.

Mr. SHALLENBERGER. September, October, and November are the months when we plant the wheat and harvest the corn, are they not?

Mr. DENISON. Yes.

Mr. TILSON. Will the gentleman yield?

Mr. DENISON. I will.

Mr. TILSON. Speaking of the coal miners, will the gentleman say whether many of them applied or asked for exemption?

Mr. DENISON. Yes; a great many of them did. A great many claimed exemption on industrial grounds, and some of these men that were claiming it were what is termed by the Provost Marshal General "pivotal men," men who had charge of important work essential to the operation of the mines, and they could not get a single exemption. In fact, the first regulations issued by the Provost Marshal General's office seemed to look solely to the question of military preparation and omitted industrial preparation.

Mr. TILSON. Does the gentleman think that if there was some sort of an arrangement made by which a man exempted for real reasons—a munition worker or a farmer or a coal miner—could have some recognition of the fact that although he was willing to go and serve his country, nevertheless it was more important for the service that he stay at home—does the gentleman think that something of that kind would encourage men to stay at home or cause more men to apply for exemption?

Mr. DENISON. I do not think it would cause more men to apply for exemption.

Mr. TILSON. There are munition men working in my district who refused to apply for exemption, saying that it will be said that "I showed the white feather or a yellow streak," and they did not apply for exemption when they were absolutely essential to the manufacturers.

Mr. DENISON. One of the strongest arguments made here in favor of the selective-service law was that by passing it we could protect these industries. I think the time will come when the Government itself will have to protect the industries even if the men do not claim exemption.

Mr. TILSON. I think the gentleman is correct; and in doing so it will be helped by making some recognition of the fact that these men are not showing the white feather, are not showing a yellow streak, but doing that work which is best and most advantageous to winning the war.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. HAUGEN. I yield to the gentleman five minutes more.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. SHALLENBERGER. I see that the gentleman has gone exhaustively into the subject, and I would like to ask him if he was able to learn who in the Provost Marshal General's Office was responsible for these men being sent out under draft before the Quartermaster General or the Surgeon General was prepared to take care of them?

Mr. DENISON. I can not answer the question. The Provost Marshal General says that he did it because he was ordered by other departments in the War Department to do it.

Mr. SHALLENBERGER. He does not take the responsibility?

Mr. DENISON. No; he avoids the responsibility.

Mr. STEVENSON. Will the gentleman yield?

Mr. DENISON. I will.

Mr. STEVENSON. Does the gentleman know how many appeals from the district boards to the President on industrial ground have been sustained?

Mr. DENISON. I can not give the figures, but I think the gentleman can find them in the report of the Provost Marshal General.

Mr. STEVENSON. I have been unable to hear of one single instance.

Mr. DENISON. I have never heard of one in my section of the country.

In my own district, Mr. Chairman, I heard of a few cases where farmers were allowed a short time to gather crops before being taken to the military camps. But I did not learn of a single case where a farmer was exempted on agricultural grounds, or where a coal miner or railroad man was exempted on industrial grounds. I represent a district, Mr. Chairman, that is not only a great farming community, but is also one of the largest bituminous coal-mining districts in the United States. I know of cases where the most necessary employees of coal mines and railroad shops were drafted, and not one was exempted on industrial grounds. I know of many cases where boys were taken from farms when absolutely no one was left to gather crops or plant new ones, and not one was exempted on agricultural grounds.

I think, Mr. Chairman, that the country should know that one of the very important purposes of the selective-service law, namely, the protection of industries, including agriculture, from disturbance by reducing the supply of labor, has been almost entirely ignored by the War Department. And I think that the country ought to know that the blame or criticism for this must rest not on the Congress for enacting the law, but on the War Department for failing to administer the law in accordance with its plain purpose and provisions.

And let me call the attention of the committee to the following very illuminating statement in the Provost Marshal General's report:

> Admittedly, also, and for the reasons hereinbefore stated, these early regulations were not addressed to the complete solution of what must now be recognized as the high functions of this office—the striking of the ultimate balance between the industrial, including the agricultural, needs of the Nation and its military needs. With a full realization of its ultimate problem, the first regulations were, nevertheless, intended to serve solely as an expedient which should produce the military result required, with far greater expedition, as it afterwards proved, than was demanded, but in a way such as would never permit this office to fall behind the supply departments in the military preparation of the Nation, and at the same time would protect other national activities against indiscriminate drafts on labor supply. That they have been effective in their result and to this end can never be questioned.

Well, Mr. Chairman, I think they can very properly be questioned; and this admission by Gen. Crowder of the blunders of his office in the regulations under which the first half million or more men were drafted into the military service, and the announcement that a different policy will obtain in drafting men hereafter, may be reassuring to the young men of the country who will hereafter be called into the service. But it is poor consolation to the thousands of young men and to the families of those men who are already in the service, and properly would not have been if the War Department had more carefully carried out the plain purposes of the law.

In conclusion, Mr. Chairman, let me add that I observe that the Provost Marshal General in his report speaks with great emphasis and with apparent pride of the achievement of his office in preparing the regulations and organizing the complicated machinery for putting the selective-service law into execution and having the drafted men ready for delivery to the different military camps by the time originally fixed by the War Department.

We must give credit to whom credit is due. To select over half a million men from civil life and be ready to deliver them by the first or middle of last September was a most remarkable achievement. The war came to this country with a sudden and terrible crash. Men, munitions, supplies, and ordnance had to be furnished by the Government quickly and in great quantities. It fell to the Provost Marshal General to produce the men, to the Quartermaster General to produce the cantonments to receive them and the supplies to equip them, and to the Ordnance Bureau to produce the guns and munitions with which they are to fight.

It is a fact worth calling to the attention of the country, I think, that with all our great wealth and resources we have been able to produce men far faster than we could produce either the camps to receive them, the clothes to clothe them, or the guns and munitions with which to equip them.

And it must be said with humiliation, if not with shame, that the men were produced and sent to the military camps before the camps were completed to receive them, before clothing was provided to clothe them, before equipment was ready to protect them from the weather, and before guns were ready to supply them.

Yes, the Provost Marshal General produced the men with remarkable speed. He himself says the regulations and plans for executing the draft law were prepared in his office six weeks before the draft law was passed by Congress. Of course, they did not fit the law exactly as it was afterwards passed, but they were sufficient to produce the men. Gen. Crowder says, on page 13 of his report:

> The responsibility was upon the office of the Provost Marshal General to produce men as rapidly as they could be accommodated and absorbed into the Army, and the information then furnished by the War Department was to the effect that the Army would be prepared to receive a first call of over half a million men during the month of September, 1917.

Again, he says on August 8, the War Department directed him to furnish 30 per cent of the first draft on September 1, 30 per cent on September 15, 30 per cent on September 30, and 10 per cent as soon after September 30 as practicable.

He further says "unexpected delays in the erection of camps and the accumulation of supplies caused deferments of the original call, and that his office produced the military requirements with far greater expedition than was demanded."

Mr. Chairman, we can not blame the Provost Marshal General for drafting the men into the service before the War Department was ready and equipped to receive them. He was ordered by the War Department to do so. But the War Department, or the system under which it operates, must be blamed for this unfortunate blunder. Many of the drafted boys from Illinois were told to leave their own overcoats at home. They went into camps that were not ready to receive them, and, though the weather was cold, for weeks they did not have blankets or overcoats. And the unfortunate conditions in the different camps disclosed by Senator CHAMBERLAIN, the chairman of

the Military Affairs Committee in the Senate, this week suggest that it would have been better for the country if the War Department had not acted with quite so much speed in sending the drafted men into the military camps.

Mr. Chairman, I am glad that entirely new and different regulations have been prepared and put into effect by the Provost Marshal General, under which the young men of the Nation will hereafter be drafted and sent into the military service in accordance with true purpose and provisions of the law. We must protect the industries and the farms of the country that are necessary to the maintenance of our Military Establishment from too great depletion of labor. Especially must the supply of labor for the farms and coal mines and munition plants be conserved as far as possible. Mr. Chairman, I would not criticize any branch of the War Department if to do so would embarrass anyone in authority in the prosecution of the war. I will hereafter, as I have heretofore, support the President in everything the Government needs to conduct the war to a successful conclusion. I have called attention to these matters, because there has been some just complaint among the people over the administration of the selective-service law, and they are entitled to know on whom, if anyone, the blame should fall. [Applause.]

Mr. HAUGEN. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. CLARK].

Mr. CLARK of Pennsylvania. Mr. Chairman and members of the committee, I am not going to make any lengthy address. I do not desire to consume the time of this committee but very briefly. The subject matter about which I wish to make some remarks, while not perhaps germane to every provision of the bill before us for discussion, is nevertheless germane to the subject of the bill, namely, agriculture.

It so happened that I was appointed a member of the Pennsylvania public safety committee, and in connection with the discharge of my duties I became chairman of the food supply of the local committee in my State. In discharging those duties I came in contact with the producer, with the person who handles the output, and also with the consumer, not only in one portion of the State but, to a considerable extent, in the entire State. I have attended meetings that have been called by the committee of my State. I attended the meeting held under the auspices of the Pennsylvania committee in Philadelphia not long since; informative addresses were made by prominent State and national officers.

That to which I wish to call the attention of the House is the very grave condition that confronts this country at the time respecting the scarcity of farm labor. Early in the spring of this last year I was called to the western portion of the State and engaged in the perfecting of an organization which adopted plans and set men at work, and the results were very gratifying, and reports of that work were made to two departments of this Government—the Agricultural Department and the Department of Labor. These reports were considered by the officials of those departments as of considerable value. All I wish to do now is to ask unanimous consent to revise and extend my remarks in the RECORD along these lines.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HAUGEN. Mr. Chairman, I yield 20 minutes to the gentleman from Iowa [Mr. RAMSEYER].

Mr. RAMSEYER. Mr. Chairman, we are just beginning to learn that this war is not alone a contest between contending armies on the field of battle. The work of the people back of the line will have more to do with bringing triumph to our cause than the embattled hosts. The American farmer must grow more foodstuffs than the German farmer, the American miner must mine more fuel than the German miner, and the American factory must produce more than the German factory. Every man must take a hold and do his level best. Victory on the battle field will be impossible unless we first have victory on the farm, in the factory, and in the mine.

This war is more a contest of economic resources than it is of men under arms. To sustain our armies we must have the cooperation of every useful industry, trade, business, and profession of the country. These must be at the highest degree of productivity and efficiency. Close cooperation of all the activities of the Nation are necessary to win the war. As Kipling puts it:

> It ain't the guns nor armament
> Nor funds that they can pay,
> But the close cooperation
> That makes them win the day.
>
> It ain't the individuals
> Nor the army as a whole,
> But the everlasin' teamwork
> Of every bloomin' soul.

These lines of Kipling apply with even greater force to the people back of the line than they do to the men who constitute the Army.
